What Are My Eyes
Really Telling You?

Eyes are a fascinating part of the human body. It makes me think of common quotes and comments such as "eyes are a window to the soul," "in the blink of an eye" and "the first camera is one's eye." Working with eye-gaze technology and those who need it on a daily basis has really opened my eyes, pun intended. In observing others use of eye-gaze technology, I found that I was learning more about their eyes than I ever imagined, and it wasn't just about language and communication software, but I was truly seeing their interaction with the world around them through this technology. My-co-presenter Barb Kelii and I met while working with patients living with Amyotrophic Lateral Sclerosis (ALS). We are both now working with students in school districts. During my transition back to working in schools is when I really began to wonder, if eye-gaze technology can help me reach someone who had language and lost it, how much more so could it help me reach someone who never had the chance to express themselves, gain the language they need? This year I took time to reflect on eye gaze. I thought about how far it's come and how it can help those who are not readily picked to try eye-gaze technology.

Eye gaze research has come along away and you can tell that just by the size of the eye trackers in production today versus 10 and 20 years ago. In recent years, there has been more eye-gaze research than ever before. If you look at current research taking place in various universities and technology institutions around the world, you'll be amazed at what eye gaze can really tell you about different of areas of daily living. There are studies in social sciences, marketing, human and computer interaction, medical fields, pediatrics, sports, engineering, gaming and virtual reality (VR) and in so many more areas of life. A good website to get a snapshot view across many areas of eye gaze research is www.tobiipro.com. This website has one of the the most compiled list of current eye-gaze research that is concisely summarized for those who want to begin exploring eye-gaze research. For example, there were four areas of eye gaze research that fascinated me: student behavior, consumer research/marketing, sports and infant/child research.

STUDENT BEHAVIOR

The User eXperience and Interaction Research Center (Slovak University of Technology in Bratislava, Slovakia) is one facility using eye-gaze technology to analyze the study behavior of students in real a classroom environment. This facility has a classroom equipped with eye trackers allowing them to take data on student behavior and learning. These students are taking a course in eye gaze, but are able to provide researchers with valuable information while doing so. Clemson University, in Clemson, South Carolina, also has an eye-tracking classroom. Students from different disciplines of study are able to participate in eye tracking courses and design eye tracking experiments (see Q&A with Dr. Andrew Duchowski, professor at Clemson University).

IMPLICATIONS?

What if we could analyze students' behavior inside the classroom environment in the United States' primary, elementary and secondary

RACHELL JOHNSON MCD CCC-SLP Rachell has 13 years of experience in the field of speech-language pathology and has been working with assistive technology since 2011, specializing in eye gaze evaluations and treatment. She currently works for The Stepping Stones Group and is serving Florence One Schools in Florence, South Carolina as 1 of the District's 2 Assistive Technology Team Leaders. "Highlights of my career have been working for Live Life Therapy Solutions in conjunction with the Minnesota Technology For Home Grant, serving as Assistive Technology Program Manager for the DC Maryland and Virginia Chapter of the ALS Association, and of course Attending and Presenting at Closing the Gap 2012-2018!"

Dr. Andrew Duchhowski's lab which features a state-of-the-art in high speed eye tracking technology with a 2,000 Hz eye tracker from SR Research called the Eye Link.

schools in real time as they are learning? What information could we derive about students' reading, math, visual tracking skills and overall learning behavior? If we had that information what improvements could we make in education? My school district, Florence One Schools, is using a pilot program from Lexplore (https://www.lexplore.com/) to evaluate the reading skills of students. What if education had more programs like this at their disposal?

CONSUMER RESEARCH AND MARKETING

During our Closing The Gap presentation, Barb and I showed a video interview of a research study conducted at Clemson University in 2013 to determine which types of packaging design best gained consumer's attention.

IMPLICATIONS?

If researchers can determine more about a consumer's shopping behavior through eye tracking, what can I determine about a person's communicative behavior when they have no language?

SPORTS

During our presentation Barb and I showed a sports research video, of a novice surfer versus an experienced surfer. In the video both surfers are wearing an eye tracker, Tobii Pro glasses. When their gaze points are analyzed, the novice surfer gaze is down because he is worried about his balance. The experience surfer's gaze is towards the next wave.

IMPLICATIONS?

After viewing this video it made me think of my students who struggle with mobility and movement. If all of their energy is exhausted on keeping their balance once in motion, How can I expect them to accurately and effectively reach a target such as a switch in order to participate in an activity or communication? Why do we pass these ones up for the opportunity to try eye gaze? It's because they have some movement and we have all been "taught" that movement equals no eye gaze when it comes to funding. However, we know it is not enough volitional movement to be effective communicators when the very movement we are asking them to do affects their

balance and ability to stay upright and steady while trying to hit a target. When did therapy become target practice? Why not eye gaze?

INFANT AND CHILD RESEARCH

The Uppsala Child and Baby Lab in Uppsala Sweden conducts eye-gaze research with infants and toddlers. They measure eye movements in children because developmentally speaking, eye movements are one of the first behaviors that newborns can physically control.

IMPLICATIONS?

If eye gaze is one of the fundamental motor skills that children are born with, and researchers are using that information to learn more about their behaviors and how they perceive the world, then wouldn't the same result be gained for someone who might be older but have the cognitive ability of a toddler or infant? Why not try eye gaze?

After reading this research I began to question examining someone's gaze points. What can we learn about them that may affect or improve their speech therapy, occupational therapy or their education environment? When speaking with Barb about eye-gaze technology, she commented, "There are so many beneficial and non traditional ways we can use eye-gaze technology. Think of our young learners who show delays in reading or who aren't able to verbalize their understanding of topics. We can use this technology to assess verbal comprehension, visual tracking skills or visual recognition." This made me think of those who are symbol communicators, but not yet readers, but are they? We do not really know. Eye-gaze technology can even be an avenue for assessments in reading, on children who were unable to be assessed before.

Barb further comments, "Many of the electronic games our young students play have their eyes moving all over a screen. Down, up, right, left, diagonal. Then they come to school and their eyes need to be able to focus on a still object and track left to right. When a student demonstrates difficulty with this skill, it's up to us to figure out if it's a motoric skill they can learn or a disability that can impact their learning. Eye-gaze technology and software can help us do that."

We decided to launch an investigation of our own and to use eye-gaze technology with those who had never been exposed to eye tracking because they were not the "traditional candidate" for a communication device with eye gaze for access. We explored three areas: pre-communication skills, receptive language ability and visual tracking. We were able to record and review eye tracking tasks using Gaze Viewer, by Tobii Dynavox. This product allows the evaluator to record the screen and playback the video of what the client was looking at while it shows the gaze points and a heat map of exactly where they were looking. This means we could have the client do any task whether it was watching a video, playing an on-screen game with an eye tracker or completing a cognitive task. The recording is all happening behind the scene and goes unnoticed by the user. This method does not detract from the user's task or your evaluation of

the user. Rather, it enhances the evaluation upon review of the video feedback once the task is complete. So what did we learn?

Have you ever heard of the least dangerous assumption (https://youtu.be/1rlwA7C-vc8)? It was mentioned in a few sessions that I attended at CTG 2018, and that is exactly what we put into practice. Our least dangerous assumption is that despite different vision difficulties, limited cognition and non-volitional movements the user could engage with what was on the screen. This is exactly what happened. They not only engaged with the screen but we went from something as simple as blank screen engagement to a higher cognitive task such as shared reading and reading comprehension. Another least dangerous assumption was that when someone is unable to participate in following directions with a fine or gross motor task it may not solely be because of low vision or cognitive abilities. We we were able to show the users participating with their eyes on tasks they were previously unable to demonstrate physically. Allowing them to "grab" and "touch" with their eyes rather than motorically, showed us they cognitively understood and were following along with the task the entire time, just visually. It helped me think not only about their engagement and interaction, but also my own interactions with the eye tracking user as they interact with the screen. How so?

Video - The Least Dangerous Assumption
https://youtu.be/1rlwA7C-vc8

One great thing about using the video feedback is that you have the option of recording what you say to the user as well. Often with eye tracking on a communication device, the clinician is helping the eye gaze user by speaking to them constantly. When a person who is physically engaging with a communication device makes a mistake or misselects an option on the screen, you help them correct it immediately because you can visually see they are going towards the wrong word or message. However, the human eye is fast and when working with someone who is new to eye gaze or perhaps cognitively delayed, we truly have to be patient and give the user time to process the

BACK TO CONTENTS

Clemson University classroom with 20 Gaze-point eye trackers when it was originally configured.

question you have asked and/or change their response when they misselect. I found that when they went to the wrong selection I was hearing the playback of myself saying a verbal cue immediately when in fact on the video playback the user was already heading toward the right response before I could even finish the verbal cue. My cues were unnecessary. The feedback showed me just how cognitively on task the user truly was, something you cannot observe completely with just the user and the screen alone. Using the Gaze Viewer software, I get the feedback I need to be a better clinician when working with a communication device that has an eye tracker. With this type of feedback I am able to determine a person's tracking patterns and habits and how they engage the screen before, during and after a response in conversation or other on-screen tasks. This also tells me more about a person's dwell time and the adjustments I need to make as their clinician to the eye gaze settings.

How can you duplicate this in your own school or private therapy practice? Here are some helpful tips on trying eye gaze with a-typical eye gaze candidates:

• If you do not have access to a communication device with an eye tracker, talk to your local reps and see if you can borrow one, or participate in a product placement program. Another option could be to contact your state assistive technology program and borrow one.

• Become familiar with the software that is available for the device you have. If you're unsure, ask your rep. Don't be afraid to use and combine software that you have access to.

  • We used Gaze Viewer sold by Tobii Dynavox, Sensory Eye FX by Sensory Guru and Look to Learn, originally by SmartBox, which is now part of the Tobii Dynavox product family. If you don't have access to any software let your

local reps know and talk about your options to buy or borrow. This type of software has become more affordable than it used to be.

• Make sure the software you will use to evaluate eye tracking has video feedback and audio feedback. For example, the Look to Learn software has a picture feedback of a heat map, however the Gaze Viewer software has video feedback that plays the entire session (up to 30 minutes) so when we used the Look to Learn program we had to turn on Gaze Viewer to see and hear the entire session.

• Interested in having an eye tracker to try out some of your own assessments? For example, when engaging in a shared reading passage, I could examine whether or not a student was truly tracking each word and moving from left to right while reading. I could use a communication device with an eye tracker if I had access to one, however I can also use a computer. To do this, look into purchasing an eye tracker device compatible with your computer. These are not as expensive as they used to be, you can get an eye tracker for less than $700.

• If you are introducing eye tracking to someone who is cognitively delayed:

  • Use simple instructions and model with your finger or a light/laser pointer.

  • Start with blank screen engagement and cause and effect activities and progress to turn taking and errorless activities.

  • Show them the power of communication in real time. Set up a task where they can give a directive that has powerful meaning to them. For example, being able to call a parent's name and the parent responds immediately. Capitalize on that power by getting the parent to turn away, then walk away and then leave the room. Calling their name after each time with the device. Realizing that they can call them and get them to come back from another room may just be the moment of power you were looking for to bridge the gap between screen engagement and using the device for communication.

I hope you discover ways to use eye tracking technology in your daily practice.

Special thank you to Dr. Duchowski!

Q & A WITH DR. ANDREW DUCHOWSKI, CLEMSON UNIVERSITY

How long have you been doing eye tracking research?

20 years, I started in 1998 when I started Clemson's eye tracking lab: eyeCU.

What courses do you teach in eye tracking?

I teach Eye Tracking Methodology for graduate and undergraduate students. This semester I am teaching Gaze Sensing and Interaction. We have a classroom with 20 eye trackers from Gazepoint (https://www.gazept.com). We are one of four Universities in the world with an eye tracking classroom, one in Slovakia which you mentioned, Sweden, South Africa and ours in Clemson, SC.

What's next for you?

We have a premier state of the art eye tracking research conference (ETRA http://etra.acm.org/2019) in the US this year. It will be held this summer, June 25-28, 2019, in Denver, Colorado. Eye tracking companies bring their latest technology to exhibit and the most current eye gaze research is presented.

This summer I am teaching a week long Clemson Summer Scholars course for rising 10th-12th graders. The course is entitled: Human-Computer Interaction Through Eye Tracking. Students will be get to conduct hands-on eye tracking experiments. Enrollment starts December 1, 2018. https://www.clemson.edu/summer/summer-scholars/eye-tracking.htm

What are some current trends with eye tracking?

In recent years there have been open source solutions to high tech eye tracking. Where an eye tracker 20 years ago cost thousands of dollars, now with open source solutions for eye trackers, head mounted glasses, and Virtual Reality Headsets (VR) these are much more affordable, some even $600. However the most recent trend that I've noticed is the disappearance of some open source companies because they are being bought out by larger companies such as Apple, Google and Facebook. In terms of research, eye tracking has expanded in the areas such as cognitive load and vigilance, a term used for mental workload or tasks. An example of research for cognitive load would be measuring the pupil diameter of surgeons as they perform. An example of vigilance would be driving.

My journey with eye tracking has only been seven years compared to your 20, and in my mind I see the future of eye-tracking research resulting in placing eye trackers in classrooms across America whether it be for standardized testing or to use in daily education tasks. I see eye trackers there. Where do you think the future of eye tracking is headed?

I attended a seminar in Dagstuhl, Germany, it's kind of a think tank for academic research and the term we used there is ubiquitous gaze sensing (https://www.dagstuhl.de/de/programm/kalender/semhp/?semnr=18252). It's the "internet of seeing things". The idea that a time will come when eye-tracking technology will be everywhere in every computer, appliance and toaster. Think about about a TV/DVR that automatically pauses when you look away from it. So even with your toaster, it's the idea that a person's gaze can provide to the operating system a sort of context and then the operating system can respond to it. That is where eye tracking is headed.

Teaching Auditory Scanning with Music:
An Effective Strategy

When a student receives a new communication system, they have a steep hill to climb when it comes to learning where all the language is stored within a device. When that child also requires alternative access through auditory scanning, that hill may never seem to end. With a robust vocabulary system, the amount of vocabulary to learn can seem overwhelming and the organization of the language system can feel arbitrary for both the user and the communication partner. For the team that supports them, it can often feel difficult to find an approach that works. A single idea does not always work for each category, page set or system.

Auditory scanning has often been described as "rhythmic" in nature. Our multidisciplinary team took the idea of using music to capitalize on those rhythms. Music is a fun and enjoyable experience for all. For many of our students, music is highly motivating. Research supports the idea that music-based, multi-modal activities enhance learning and the ability to maximize language learning and retention. Classrooms across the country use music and lyrics to teach the alphabet, days of the week, months of the year and so on. By using the rhythms and patterns of music, beats, sounds and lyrics as a teaching strategy for AAC use, our students have an opportunity to engage in fun and rewarding activities to help memorize device layout and build language.

This strategy is used with multiple students on different communication systems. While the strategy can be used with single switch users, our team prefers using two-switch step scanning when possible. As we discuss the approach and the procedures for implementation, keep in mind this is a general framework and does not need to follow a set progression. We typically start the same way with our students, but there is no set order. We use a variety of songs and sound activities concurrently and interchangeably within teaching sessions based on individual needs and goals.

THE CHALLENGES

The students we serve have complex communication needs. In addition to language impairments, most have some visual, motor and physical impairments. Access can be challenging for these students as on-screen targeting is usually difficult. Our students access their devices most successfully using alternative access methods, such as auditory scanning with switches. These students all need access to a robust vocabulary system and not a system with limited choices. Too often, smaller vocabulary sets are chosen for these students for a variety of reasons. This limits the student's ability to generate novel utterances for a variety of communicative functions. Even the device options can be limiting. Some of the dedicated devices with a robust vocabulary on the market were not developed with auditory scanners

DANA ARCE is a Speech-Language Pathologist with ten years of experience working in the educational setting. She is also a RESNA certified Assistive Technology Professional. Dana currently works for a school district serving students ages 3-22 in both the classroom and the home settings. She serves as part of a multidisciplinary team who supports students with complex communication needs that require alternative access for communication systems. She can be reached at danaarce.slp@gmail.com.

BACK TO CONTENTS
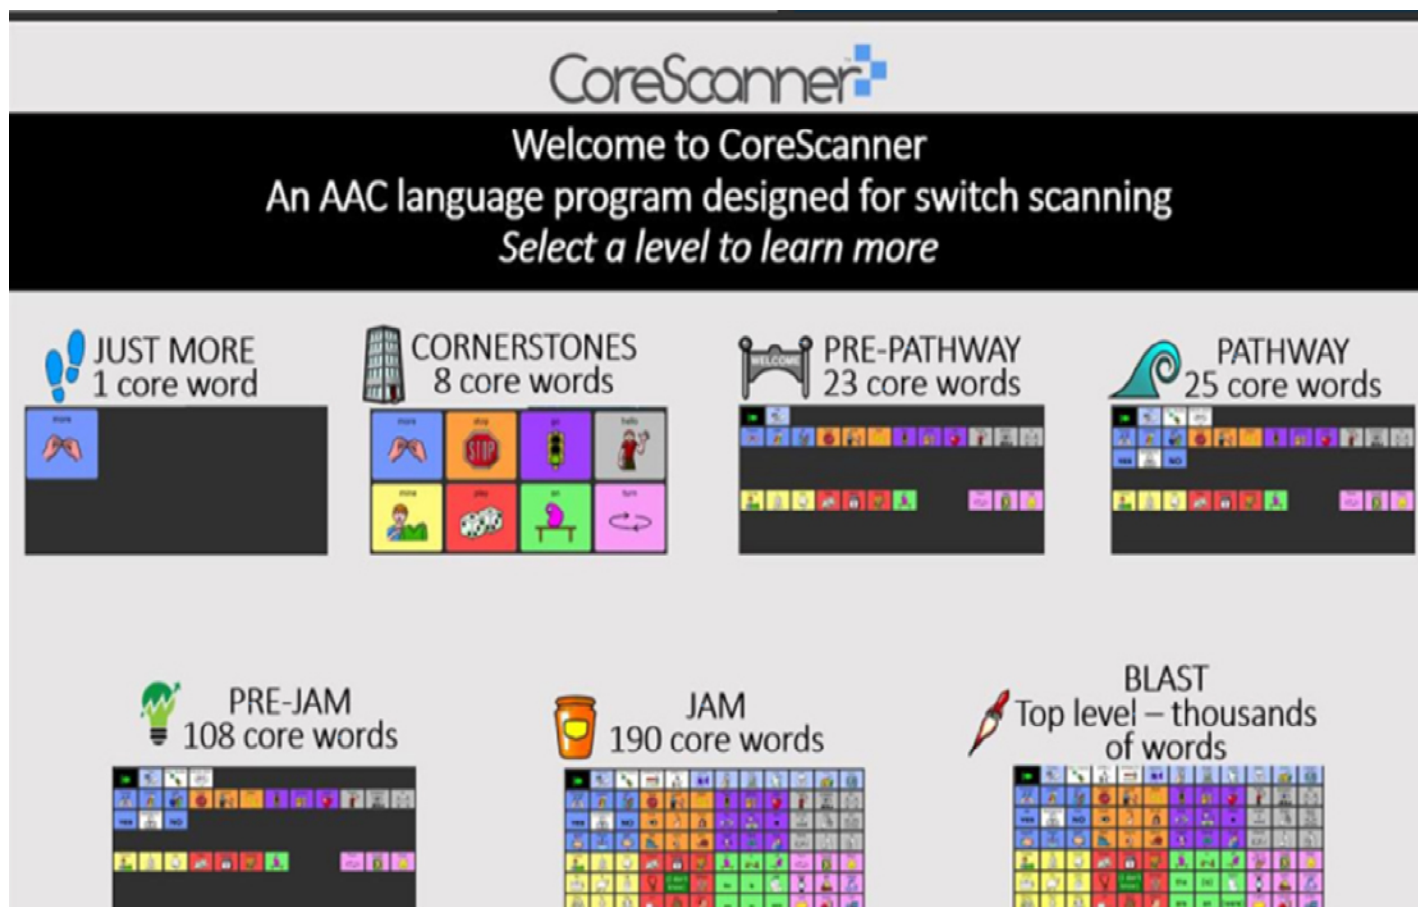

Image 1: CoreScanner by PRC.

in mind. While most have a scanning option, the systems were not organized or designed for switch users. The device layout can seem arbitrary; linear scanning can take too long, and row/column or block scanning can be organized randomly. Our users that cannot see the icons within a group must memorize which words are within each row or block to most effectively navigate through the device to communicate. If the language is not organized in a meaningful way, it can be difficult for users to remember where vocabulary is stored making communication more time-consuming.

THE IDEA

As part of a multidisciplinary team, the idea started as a way to figure out how to best support a new AAC user. We started with a student named Corinne, a 10-year-old female with a complex medical history. She'd just received a new communication device and had never used auditory scanning with head switches for access. Her device was an Accent 1200 with CoreScanner (see Image 1) by Prentke Romich Company (www.prentrom.com). We chose CoreScanner as the vocabulary because, at the time, it had just been released and was designed with scanners in mind. The speech-language

pathologist, assistive technology professional, and music therapists all worked together to come up with a plan for teaching scanning, facilitating language development and helping our student learn the location of the vocabulary within the device. The team determined that since music was highly motivating for this student, and it was a common teaching strategy that

Image 2: BIGmacks with recorded drum and cymbal sounds

it would help address some of the challenges the student was facing with the new device.

With the support of the entire educational team, we selected consistent terminology for her equipment. The scan switch was called "the mover," and the select switch was called "the chooser." We then assigned each switch with a unique sound. Once we had the sounds, we brainstormed ways we could teach the patterns for words using those sounds, and finally how we could use the sounds and patterns to create songs and activities to show where words lived and to give meaning to the language within the device.

With CoreScanner, the words are separated into eight colored blocks each consisting of nine icons. Our team called them blocks and identified them both by cornerstone word and color. For example, the more block and the blue block both refer to the first cornerstone word in CoreScanner. Multiple songs were created for each of the blocks. Our team created three types of songs, creatively named: "Name That Tune," "Instructional" and "MadLib" songs.

STARTING WITH SOUNDS

Our starting point was to assign sounds to switches. To assign sounds to the two switches, we used two recordable, single message switches (e.g., BIGmack by AbleNet) and the Garage Band App. Our team used a drum sound for one switch and a cymbal sound for the other (see Image 2). Any sound combination will do; however, it's essential that the sounds be distinctly different. We then plugged the head switches into the single message switches for Corinne to explore. Alternatively, with the right Bluetooth equipment, this can also be done by creating a recipe for an Apple device and having the head switches play directly in the app. For all of our students, once the switches have been assigned the sound, the students spend time playing with the switches and sounds without demands. It gives them a chance to explore and create music with the sounds. This is one of our students' favorite activities. After they have had free time for exploration with the sounds, they get an opportunity to repeat a given sound. For example, the communication partner might play a drum beat and ask the student to play the drum beat with their switch. As the student becomes more proficient with repeating single sounds, the communication partner will

Image 3: CoreScanner Legacy layout with customization for Corinne

Image 4: More Block in CoreScanner

ask the student to repeat more complex patterns, such as drum, drum, cymbal, drum, drum, cymbal.

PAIRING SOUND PATTERNS WITH WORDS

Depending on the communication system the student is using, we choose eight to 10 core words that have some meaning as a place for the student to start. In our example with Corinne, one of her favorite words was "more." With her device layout (see Image 3), the pattern to get to more was: scan, scan, select, scan, scan, select, scan, select. So our team put together a "Name that Tune" song which played the sound pattern: drum, drum, cymbal, drum, drum, cymbal, drum, cymbal and identified it as how to get to more. So this song type had the target vocabulary word and the sound pattern to get to that word using the two switches. Corinne learned that repeating the pattern with the switches helped her get to more on her device faster. Once the motor pattern was established, we would move on from that word and introduce a new core word in its place using another "Name That Tune" song.

TEACHING NAVIGATION WITH SONGS

CoreScanner has eight cornerstone words. The "Instructional" songs focused on the cornerstone words. In order to get to the more block, Corinne needed to hit her mover twice and the chooser once. The song then has two drum sounds and one cymbal sound to indicate that the user is now in the more block. The song lyrics then list each of the words within the block and drum sounds to represent using the switches to scan through the block: drum, drum, more, drum, color, drum, no, drum, good, drum, numbers, drum, look, drum, yes, drum, help, drum, bad (See Image 4).

TEACHING VOCABULARY

The "MadLib" songs were created to teach the vocabulary words within the block with context in a fun and silly way. These songs were named after the color of the block. Some of the lyrics for the blue block include: "Every day I want more music, it brings color to my life. I say no one can deny it; it's a good day to hear a melody. The numbers and the pictures that the sounds create just look and see the beauty that it makes". Our music therapist did a fantastic job creating these songs and recorded them for the team to use.

Samples of these songs can be found at the following link: https://www.dropbox.com/sh/se279vpdfsamvqn/AABfqQVd7xUDH9xWS4Lr2dlfa?dl=0

EXPANDING THE TEACHING

Team members used different songs during instructional time and when modeling words as part of an activity. For example with Corinne, we may have used a "Name That Tune" song for repeating the pattern to get to the number icon in the blue block (scan, scan, select, scan, scan, scan, scan, scan, scan, select, or drum, drum, cymbal, drum, drum, drum, drum, drum, drum, cymbal) prior to a math lesson. During literacy activities, we would pick one or two core words to focus on and use the songs that included those vocabulary words. We would use the "Name That Tune" songs to teach how to get to the word or use the "Instructional" songs to teach about the block that contained the target word. These teaching strategies were used by all team members to support academic activities as well as during direct instruction.
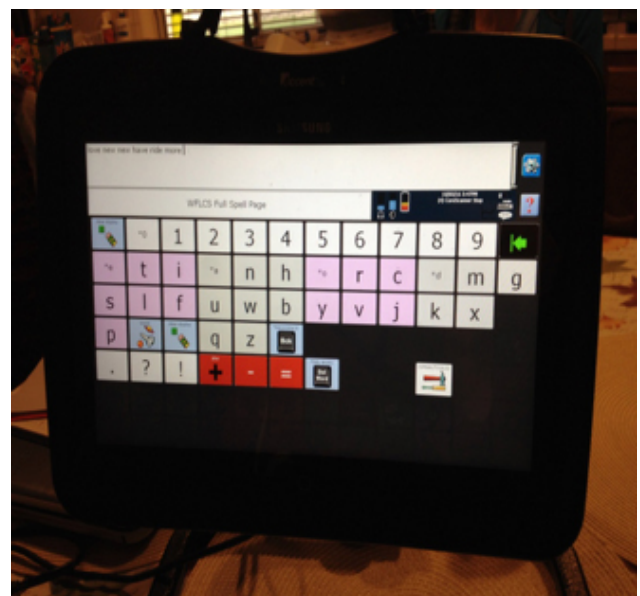

Image 5: Customized alphabet in CoreScanner

BACK TO CONTENTS

ADDITIONAL STRATEGIES

In addition to consistent vocabulary, customization of the system was vital. It may seem that the sound patterns we used are not an exact match for CoreScanner now. We found it important to change the scan patterns, so back was always the first choice. This was done so that in the event a block was selected in error; it would save time for the user should they need to go back, rather than having to scan through nine icons before being able to exit the block.

Additionally, the alphabet was reorganized so more frequently used letters required fewer switch hits to access (see Image 5). New alphabet songs were created to teach the new order of the letters. Songs were also made for each of the letter blocks using the same drum and cymbal sound patterns as well as lyrics to learn the name and sound of the letters during literacy instruction.

A low-tech board to replicate the system was used to supplement teaching vocabulary within the blocks (see Image 6). Eight large 12" x 12" cardboard pieces were used to make a low-tech board. One side of the 12' x 12" removable piece was the cornerstone word, and the other side contained 4" x 4" removable icons. These low tech pieces were used during teaching activities for language learning such as pronouns; he, she, it or concepts; big,

little, fast. We also used the larger icons when listening to "Name That Tune" songs.

OTHER DEVICES

This strategy has been used with multiple students with a variety of systems. CoreScanner by PRC was selected specifically for Corinne to access through auditory scanning when we started this project. CoreScanner is a robust language system and with customization is an excellent choice for auditory scanners. We have had great success with this strategy using CoreScanner with Corinne as well as other students. Sometimes we get students that already have a device in place. When this happens, we do our best to use the device that user has and try to make it work so that they can have access to a robust language system while still considering the access needs. This often means that vocabulary, pages and folders need to be made from scratch and scanning patterns need to be programmed. It can be a significant time commitment upfront to make a system work effectively to meet the needs of auditory scanners. Additionally, consideration must be given to the additional equipment needed to connect switches to iPads and computers as well as the setting up switch control or in-app scanning settings. Each system has pros and cons for switch users.

Image 6: Large size low-tech core board with removable icons

We have used Proloquo2go by AssistiveWare on an iPad, as well as Communicator 5 software by Tobii Dynavox. With Proloquo2go, we have made nine folders on the main page that then each open to a nine-button page. This gives access to 81 core words. We then create songs to teach the vocabulary on the main page with folders as well as to teach the words within each folder. Learning the song's lyrics has been especially helpful for the communication partners because the words in the folder cannot be seen from the main page. The communication partners have found modeling words on the device easier when they can remember which folder the target word is in. Concerning the scanning settings on an iPad, we have found it more user-friendly to use switch control settings within the iPad rather than the in-app scanning with Proloquo2go. With Communicator 5 software, we can use it on a Microsoft tablet with switches connected through Bluetooth or a computer with switches connected using a switch interface. Both hardware options work well, and the software allows for more options with customization of the scanning settings.

IN SUMMARY

Our students who are new AAC users accessing a device through auditory scanning have a steep hill to climb when it comes to building language and memorizing device layout. Our team has worked on a unique approach to support our students' learning in a fun and engaging way. We hope that by sharing the strategy we have used successfully with some of our students, that other providers will be able to replicate this strategy to support students with similar needs. Our use of this strategy has evolved and varied for each student and system. We have also been fortunate to have fantastic music therapists help support this idea. While the value of music therapy on this team has been significant, the underlying premise and framework can translate across any team trying to teach auditory scanning.

OUR AMAZING TEAM

This project has been so meaningful and has helped several students learn to navigate their AAC devices. It has been a rewarding journey. In addition to the incredible students and staff who have taken this journey with us, this project would not have been possible without our first student Corinne and her family, and some amazingly dedicated team members: Michele Bishop, Becky Parker, and Tara McConnell. I am so grateful to have had the opportunity to collaborate on this project from the beginning and look forward to continuing the journey with them. ■

Closing The Gap

37th ANNUAL CONFERENCE
OCTOBER 2-4, 2019

Preconference Workshops:
Monday and Tuesday, September 30 -October 1, 2019

PRIOR LAKE, MINNESOTA

Preview of Exhibits:
Tuesday, October 1st, 2019

Assistive Technology in Special Education, Rehabilitation and Everyday Living

SAVE THE DATE
Plan To Attend!

Early registration, parent, student, group and other discounted rates available

The Closing The Gap Conference is truly more than a conference,

it is a network of invaluable resources – teachers, therapists, clinicians, parents, end users and manufacturers – all emphatically working together to change lives with assistive technology. The 37th Annual Closing The Gap Conference promises nothing less than excellence!

ADMINISTRATORS PARTICIPATE FREE

When any school district or hospital staff member registers for a preconference workshop or the three-day conference, one administrator (Special Education Director, Principal or Hospital Administrator) from that organization can attend the conference, Wednesday through Friday, and the exhibition preview, Tuesday evening, for FREE! One free registration per district/hospital.

$25 RETURN DISCOUNT

A $25 "RETURN" DISCOUNT is available to ANY past conference registrant and must be used by JUNE 30, 2019.
This discount can be used for any preconference workshops OR conference registration and is IN ADDITION to any and all other applicable discounts.
If registering online, you will be required to enter code RETURN at checkout.

Conference - Wednesday, Thursday, Friday, October 2-4, 2019
Includes Preview of Exhibits – Tuesday Evening, October, 1 AND Continental Breakfast Wednesday and Thursday, October, 2 & 3

Registration Received	On or Before June, 30	July 1 - September, 19	September 20, - Onsite	
Standard Rate	$490	$565	$590	
Group Discount - 5+ or more **Group Discount - 8+ or more** **Group Discount - 20+ or more**	Groups 5+ Deduct $30 Groups 8+ Deduct $50 Groups 20+ Deduct $70			
All group registrations must be received at the same time				
Parent Rate *(A letter describing your child's disability must accompany registration)*			$310	
Full-time Student Rate *(Proof of full-time student status must accompany registration)*			$310	
Presenter Rate	$390	$465	$515	
Exhibitor Rate	$390	$465	$515	

Single-Day and Exhibit Hall Only Registration

	Price
Thursday Only - October, 3	$300
Friday Only - October, 4	$130
Exhibit Hall Only - Tuesday evening through Friday, October, 1-4	FREE

Preconference Workshops - Monday and Tuesday, September 30 - October 1, 2019
Includes Preview of Exhibits – Tuesday Evening, October 1

	Price
Monday, September, 30 *(Some preconference workshops carry an additional fee for materials)*	$295
Tuesday, October, 1 *(Some preconference workshops carry an additional fee for materials)*	$295
BUNDLED PRICING! Monday and Tuesday Bundle ($80 savings)	$510

Closing The Gap

37th ANNUAL CONFERENCE

OCTOBER 2-4, 2019

Preconference Workshops:
Monday and Tuesday, September 30 -October 1, 2019

PRIOR LAKE, MINNESOTA

Preview of Exhibits:
Tuesday, October 1st, 2019

Assistive Technology in Special Education, Rehabilitation and Everyday Living

CALL FOR PARTICIPATION

THERE'S SOMETHING SPECIAL ABOUT CLOSING THE GAP

Recognized for being more than just a conference, it is a network of invaluable resources –teachers, therapists, clinicians, parents, end users and manufacturers – all emphatically working together to change lives with assistive technology.

Attendees will have the opportunity to participate in unique presentations and engaging learning experiences. They will see first-hand, the latest AT technologies, and will return home with a deeper understanding of how AT is creating new opportunities for teaching and learning.

CURRENT TRENDS AND TOPICS

Topics will cover a broad spectrum of technology as it is being applied to all disabilities and age groups in education, rehabilitation, vocation and independent living. People with disabilities, special educators, rehabilitation professionals, administrators, service/care providers, personnel managers, government officials and hardware/software developers will share their experiences and insights at what has become known as the best educational AT conference in North America.

SHARE YOUR EXPERTISE

Groups or individuals who wish to participate in Closing The Gap's 2019 Conference should submit their proposals for one-hour and multiple-hour presentations as soon as possible. Directions and information are found within. Please fill out the proposal form completely; incomplete proposals will not be considered.

REGISTRATION

Presenters may register for the three-day conference at discounted rates. Please visit the registration page for pricing details.

Presenters do not have to register for the conference to present; however, only those presenters who have registered may attend conference sessions/exhibits other than their own.

All-day preconference workshops are scheduled for September 30 - October, 1 and cost $295 for one day or $510 for two days.

PROPOSALS

Closing The Gap will consider proposals for one-hour or multiple-hour sessions that describe and/or demonstrate successful applications of assistive technology for persons with disabilities.

Proposals are invited that report results of current applications; research; development of hardware, software or adaptive devices; model programs or procedures used by and for persons with disabilities.

Proposals for sessions that demonstrate the use of software programs, mobile apps, adaptive devices or the innovative use of assistive technology are highly encouraged – especially specific how-tos, tips and tricks and product comparisons.

Proposals should focus on practical applications, implementation strategies and best practices, rather than theoretical discourse.

Proposal content should be supported by evidence and should include quantitative performance data.

Proposals for open forums in which participants discuss, comment openly and share ideas and opinions relevant to a primary subject or focus are also encouraged.

PROCEDURE

Abstract: A 300- to 500-word abstract must accompany the proposal form.

Summary: A separate, 100-word summary must also be submitted for inclusion in the Conference Directory.

Proposal Form: The proposal form must be completely filled out and returned with the abstract and summary or submitted online

NOTIFICATIONS

Confirmation of presentation proposal acceptance/declination, and confirmation of specific date and time of accepted presentation will be sent by July 15, 2018.

In offering to present a paper, it is expressly understood that the presentation may be scheduled at any time on any of the conference days at the discretion of the conference organizers.

SUBMISSION DEADLINE

2:00 pm Central Daylight Time, Thursday, April 25, 2019

REGISTRATION AVAILABLE MARCH 15, 2019!

SUBMIT ONLINE!

Check It Out: Renew Your Literacy Instruction with Adapted Books

Everyone has the right to access print in order to learn, share experiences and improve overall quality of life. When we read, we gain a sense of independence, allowing us to actively participate in daily routines and activities within our communities. Literature is deeply woven into our society, and positive reading and learning experiences occur when readily available tools and supports are used to create meaningful and engaging learning opportunities. However, educators are often faced with time constraints and limited resources while trying to address the diverse needs present in today's classroom. How do we ensure that we are providing proper access to print in a way that meets the unique learning styles and needs of all learners?

WHAT IS AN ADAPTED BOOK?

The idea of adapting books is not a new concept. For years, people with visual impairments have had access to books in braille or large print formats. Books on tape have frequently been used with individuals who require auditory supports while reading. But what about our students with more complex needs? What sort of adaptations might we offer them beyond adjusting the text?

An adapted book is one that is made accessible to a reader by reducing or eliminating obstacles that may inhibit their ability to access a book in a traditional print format. Adapted books include modifications that address a variety of print disabilities and barriers, including, but not limited to:

HANNAH J. MOFFITT, M.ED. Hannah has a Master's Degree in Special Education K-12 from James Madison University and has 12 years of experience in the education field. She previously taught special education for five years in Loudoun County Public Schools in Virginia. She has worked in both team-taught and self-contained settings across a variety of grade levels. Hannah also spent five years on the Assistive Technology Team in Loudoun, providing consultative and evaluation services, professional development, and training and support for students and families. She is currently in her second year as an Assistive Technology Specialist for Weld County School District 6.

Hannah is passionate about AAC, core vocabulary, and the link between language/communication and literacy skills. Additionally, she works hard to promote the theory and practice behind Universal Design for Learning within her school district in order to make learning engaging and accessible for all. While Hannah spends a great deal of time exploring high-tech tools, she also enjoys opportunities to be creative with low-tech/no-tech supports as well. She is currently in her second year as an Assistive Technology Specialist for Weld County School District 6 in Greeley, Colorado.

JAMIE D. OLSON, OTR/L Originally from South Dakota, Jamie attended the University of Sioux Falls as an undergraduate for exercise science and psychology. She relocated to the suburbs of Milwaukee, Wisconsin where she attended Concordia University Wisconsin and earned her Master's Degree in Occupational Therapy. She moved to Colorado seven years ago to practice as a school-based occupational therapist.

Jamie is passionate about working with students with disabilities and maximizing their independence, and assistive technology provides a natural solution. Certified in Assistive Technology, she has been an AT Specialist and Occupational Therapist in Weld County School District 6 for six years.

- Physical disabilities
- Visual impairments
- Cognitive disabilities
- Communication and language needs
- English Language Learners.

Adapted books may come in a variety of formats, including paper-based or electronic versions.

Adapting a book typically means adjusting someone else's work. Photocopying or altering a printed material may initially feel strange or almost unethical. However, the Chafee Amendment (Sec. 121 of the Copyright Act) provides that "it is not an infringement of copyright for an authorized entity to reproduce or to distribute copies or phonorecords of a previously published, nondramatic literary work if such copies or phonorecords are reproduced or distributed in specialized formats exclusively for use by blind or other persons with disabilities." In order to remain in compliance with copyright law, you must own a copy of the book in order to make adaptations.

UNIVERSAL DESIGN FOR LEARNING

All students come to school with their own unique set of experiences, strengths, needs and preferences or interests. In the special education world, modifying and adapting materials to meet this diverse set of learning styles and needs typically becomes second nature. More often than not, what we do for our students with significant learning needs is considered best practice for all students. Special education is becoming less specialized in the sense that only a small number of students are able to access certain instructional strategies and supports. Instead, identifying and analyzing potential barriers present in our curriculum, along with considering individual learner strengths and needs, allows educators to be proactive by planning ahead for potential accommodations and modifications that any student in general education or special education may require in order to fully participate in the classroom environment.

Universal Design for Learning (UDL), which was first introduced in the 1990s by Anne Meyer and David Rose, is "a framework to improve and optimize teaching and learning for all people based on scientific insights into how humans learn," (CAST, 2018). This framework influences the development of learning goals, instructional methods and materials and assessments that can be adjusted to equalize learning opportunities for all students. UDL aims to make rigorous curriculum acces-

sible and understandable by all students.

UDL is organized into three main principles and their respective brain networks: engagement, representation and action and expression.

Multiple means of engagement includes the affective networks, or the "why" of learning. When learners are unable to attend to information and are not engaged in the content, this information is inaccessible. To foster learners who are purposeful and motivated, educators must tap into students' individual interests, while offering appropriate challenges and increasing motivation and attention. Additionally, strategies such as self-assessment and reflection that support self-regulation skills increase a student's ability to sustain continued effort and persistence with task completion.

Multiple means of representation includes the recognition networks, or the "what" of learning. To create learners who are resourceful and knowledgeable, educators should provide students with options for acquiring information through different modalities. A "one size fits all" model of instruction creates inequalities across learners. Therefore, providing a variety of representations not only increases accessibility, but also enhances comprehension of material. Options might include presenting information through a variety of media (e.g. video, photographs/diagrams, text, demonstrations, etc.) that targets specific learning styles and needs.

Multiple means of action and expression includes the strategic networks, or the "how" of learning. It's important to ensure that educational materials are physically accessible for all students so that all learners can fully interact with the curriculum. Educators may provide options for the ways in which students demonstrate what they know in order to encourage learners who are strategic and goal-oriented. For example, students could be given opportunities for increased autonomy to express their understanding of the curriculum content in a way that targets their personal learning preferences, such as composing a song, filming a movie, writing an essay or building a structure.

ACCESSIBLE EDUCATIONAL MATERIALS

Working in conjunction with the principles of UDL, it's imperative that educators are providing students with accessible educational materials (AEM). In the past, the Individuals with Disabilities Education Act (IDEA) has specifically focused on accessible instructional materials (AIM) that were in print format. It outlined the provision of the four specialized formats (braille, large print, audio and digital text) for students with print disabilities in K-12 education, as well as the implementation of the National Instructional Materials Accessibility Standard (NIMAS). AEM takes the NIMAS/AIM definition a step further, outlining these as "print- and technology-based educational materials, including printed and electronic textbooks

Image 1: Page fluffers created with clothespins.

and related core materials that are designed or enhanced in a way that makes them usable across the widest range of learner variability, regardless of format (e.g. print, digital, graphic, audio, video)" (National Center on Accessible Educational Materials, 2016). This definition is not limited to only K-12 education, and has been expanded to include post-secondary education and workforce deployment.

When educators have a better understanding of the tools and materials available to support the growing variety of learning styles and needs, differentiation occurs more freely. AEM opens the idea of accessibility beyond the printed textbook to provide options for adapting educational materials, both printed and digital, as well as educational technologies, so that they are usable by people with and without disabilities. Providing all students with a variety of universally designed options that include AEM encourages the likelihood of classroom participation, independence, and progress in the curriculum.

ADAPTED BOOKS = ACCESS FOR ALL

The development of adapted books incorporates the use of a variety of tools and supports that targets a diverse set of learning needs. It's important for books to be easily accessible by all in order to promote student engagement and participation. Adaptations for increased accessibility include:
- Increasing the ease of physical access and manipulation
- Providing visual supports for language and cognition
- Modifying page layouts to decrease visual stimuli
- Adjusting or simplifying the language to accommodate for cognitive and communication/language needs
- Addressing different learning styles and preferences.

Books in a traditional paper-based format alone can create significant barriers for students with physical disabilities. Adaptations such as page fluffers (Image 1) and slant boards or easels can be temporarily or permanently fixed to traditional
Image 2: Font and image adaptations for Feast for 10 by Cathryn Falwell.

books, making them easier for readers to manipulate independently. Books in a digital format can be made to read aloud automatically using text-to-speech software. A reader can advance through the pages of a digital book with a switch and switch interface on the computer.

For our students who have visual processing or acuity needs, modifications to the visual appearance of the book may be necessary. Adjusting the font size, color/contrast and spacing may help a reader visually track text more easily. Reducing or eliminating the background of more complex images may help some individuals visually attend to a book and process the images presented to them (Image 2). Tactile supports, such as the addition of textured details on pictures, provides the necessary sensory input for an individual who is blind to interact with and comprehend the information presented.

Many students with disabilities struggle to comprehend grade level text and vocabulary. Providing text-to-speech supports within digital formats allows students to participate in reading activities more independently. Additionally, for students who require both auditory and visual supports, many text-to-speech technologies provide these accommodations simultaneously with dual highlighting features. Simplifying the language of the text either in length or vocabulary usage helps to reduce the cognitive load placed on struggling students or English Language Learners, making novel concepts easier to understand. For students who may struggle with understanding abstract representations or concepts, changing the visuals to real photographs or actual objects may increase motivation and engagement with the text.

For students who have complex communication needs or for students who are English Language Learners, adding visual supports provides additional meaning to unfamiliar vocabulary or concepts. For augmentative and alternative communication (AAC) users, these visuals can be tied directly to their language systems, supporting both receptive and expressive language goals (Image 3). With each of our book adaptations, we include

a standard, low-tech communication board that includes core vocabulary that can be used with any book or reading activity. Providing access to these high frequency words across a variety of contexts supports development of sight word vocabulary and word meaning. Additionally, students with complex communication needs have a way to interact with the text without requiring access to unique or specialized vocabulary that is specific to the activity.

MOVING FORWARD: ADAPTED LITERACY KITS

In working with teachers and therapists across our district, we frequently found ourselves repeatedly making the same recommendations for adapting materials. While everyone appeared receptive to our suggestions, we found that no matter what grade level or population they were working with, teachers were facing the same issues of not enough time or resources to implement the tools and strategies we suggested. To better support our staff and students, and to take the idea of adapted books even further, we began creating adapted literacy kits. Given the problems we were encountering, we had several goals in mind, specifically:

- Provide a rigorous curriculum supported by accessible education materials for all students
- Provide a variety of tools and strategies to promote mastery of individual IEP goals
- Increase classroom engagement and participation, particularly for our students with disabilities in the general education setting
- Build capacity and create a collaborative environment between professionals.

An adapted literacy kit is simply a unit in a bag! In our kits, you will typically find several books (original copies and adapted versions), communication supports that include access to core vocabulary, story props and a variety of learning activities (e.g. file folder games, fine motor tasks, writing prompts, etc.) (Image 4). The books we select are often popular children's ti-
Image 3: AAC icon sequences added to Jump, Frog, Jump! by Robert Kalan. Visuals created using the PASS software from Prentke-Romich Company.

tles. We tend to shy away from text that is too long or too complicated, and we like to include books that have repeated lines or phrases throughout the story. Repeated lines of text work well with single hit communication devices so that all students can "read" the book aloud. We frequently refer back to the common core standards when creating our kits so that all students have access to grade level material that is accommodated in a way that meets their learning styles and needs.

The learning materials for our literacy kits are often low cost or free. Just like our teachers, we also struggle with limited re-

Image 4: Example of an adapted literacy kit.

sources when trying to meet everyone's needs. We have become "junk collectors" in the sense that we are pros at reusing common household materials and recyclables. Additionally, we are frequent Dollar Store shoppers! We also spend many hours scouring various education blogs, websites and Pinterest to find freebies offered by other educators and parents. Everything we gather is assembled to create supplemental activities and supports for our literacy kits. By incorporating extension activities with the books, the adapted literacy kits encourage development of core academics, language and literacy skills, social skills and fine or gross motor skills.

Adapted literacy kits can be used by general education teachers, special education teachers, parents and therapists and accessed by children with emerging literacy or language skills, typically developing children, and children with disabilities. The adapted books can be used by themselves, or with assistive technology ranging from low-tech/no-tech tools to specialized software and hardware, high-tech AAC, braille and more. Our adapted books and literacy kits are used to help bridge the gap between student performance and grade level expectations.

CHECK IT OUT AT THE LENDING LIBRARY

In order to share our adapted literacy kits with our staff and students more efficiently, we created a district-wide lending library where teachers and therapists can borrow the instructional materials. This provided a needed solution for the issues of limited time and resources while ensuring that all students

BACK TO CONTENTS

have access to meaningful and engaging learning experiences. Staff completes a Google Form with their name, location and the items they would like to check out. Inventory is updated as items are loaned and returned so that users can see what is available in real-time. Items are on loan for a two-week period and are delivered by our assistive technology team or through our interoffice mail system. At the end of the two weeks, we collect the items and swap them out for something new if requested.

During our first year of operation, we expanded our lending library to include life skills curricula, adapted toys and professional titles. Now that we have a strong foundation of children's literature (19 titles and counting!), we are looking to add more books for our secondary population, specifically chapter books and non-fiction works. We are also exploring shoebox work tasks and other activities that might target pre-vocational and daily living skills. Additionally, we would like to supplement our existing kits with more digital materials and activities, further increasing the accessibility factor for our students with more complex needs. While our lending library serves to ensure that students have access to appropriate learning materials, our ultimate hope is that our adapted literacy kits generate new ideas and encourage teachers and therapists to collaborate, problem solve and think outside the box.

PART 1: Better Assistive Technology Decision Making Through Research

A little over a year ago I overheard a conversation between two of my colleagues who are very knowledgeable about assistive technology (AT). One asked the other if she knew of any research about AT. The reply was, "There really isn't any research about AT." I was shocked by that conversation, because there is quite a bit of research regarding AT. It's led me to research and embark on a mission to help all of us be more aware of the readily available research about AT and how it can inform us as we make decisions about AT for our students with disabilities.

This is especially important because federal regulations actually require that our Individualize Education Program (IEPs), including special education, related services, and supplementary aids and services, be based on peer-reviewed research to the extent practicable (34 C.F.R. §300.320(a)(4)). Since AT is required to be made available, if needed, as part of special education, related services, or supplementary aides and services (34 C.F.R. §300.105), it's not much of a reach to realize that we need to know about AT research.

There is an abundance of research available, and we won't be able to cover all of it, but included here are some of the key findings that every AT Specialist and IEP team member should know. This first article in a two-part series will focus on AT for students with intellectual and low incidence disabilities.

AUGMENTATIVE AND ALTERNATIVE COMMUNICATION WELL RESEARCHED

One of the most well researched areas of AT is augmentative and alternative communication (AAC). Calculator & Black, (2009) reviewed 102 published articles and identified effective practices for teaching AAC to students, including:

- Using naturalistic teaching,
- Using a system of least prompts,
- Training peers and teachers to use the devices,

- Teaching multiple modes of AAC,
- Teaching a single symbol for a variety of purposes, and
- Introducing the use of communication devices early in a child's life.

Their literature review also suggests strong evidence for the use of AAC for students with significant intellectual disabilities. The absolute misconception that children must have some type of "pre-requisite skills" before AAC is used is still occasionally heard. However, numerous researchers have disproved the belief that persons with significant levels of intellectual disabilities need to reach a certain performance level or that they could not benefit enough from communication devices to justify the cost (Light, Roberts, Dimarco, & Greiner, 1998; McNaughton, Light, & Arnold, 2002; Romski & Sevcik, 1997; Romski & Sevcik, 2000).

USE OF AAC DOES NOT KEEP A CHILD FROM LEARNING TO TALK

Unfortunately, we still hear of service providers and family members who want to postpone the introduction of AAC because they fear that it will delay the development of the child's spoken language. Research tells us clearly that the use of AAC, including voice output devices, absolutely does not prevent the development of speech. Some of the best evidence for this comes from a thorough meta-analysis of the literature by Millar, Light, and Schlosser (2006). They reviewed hundreds of studies, eliminating those that were not well designed. They narrowed their focus down to 23 studies of high quality that involved 67 individuals from ages two to 60. These subjects included individuals identified as having developmental disabilities, intellectual disabilities, mental retardation or autism. They looked at speech production before, during and after the introduction of AAC. They found unequivocally that AAC use did not slow or prevent the development of spoken language. In fact, speech production increased in 89%

DR. PENNY REED is an independent consultant who provides consultation and training on a variety of topics related to assistive technology with a special focus on helping school districts improve their delivery of assistive technology services. She is the author of numerous publications about assistive technology services. She can be reached at 1happypenny@gmail.com.

of the subjects. There was no evidence of decreases in speech in any subjects. For 11% of the subjects across all studies there was no change, but for 89% of those individuals provided with AAC, their speech production increased. While this meta-analysis was done 12 years ago, it is definitive. We don't need more research to answer this question any more than we need more research to determine if seatbelts are effective in preventing deaths in car accidents. We know the answer. Don't expect, or feel a need for, new research to address this issue.

What we are beginning to see in research now is that it delves further into why AAC works and how it can be most effectively used. Romski, et.al. (2010) studied 68 toddlers with developmental disabilities. Prior to the start of the study, they had fewer than 10 spoken words each. They randomly assigned them to three groups who were provided AAC for input (receptive language), AAC for output (expressive language) or spoken language intervention only. For the first group, the adult used symbols for the child's receptive communication, pointing to them when speaking. For the second group, the adult used hand over hand to help the child use a speech-generating device for expressive communication. The toddler's vocabulary use was checked after 18 and 24 sessions. In both augmented interventions the children made modest, but significant gains. Children receiving spoken intervention only and no AAC did not make any gains. The toddlers who received AAC for output were much more likely to produce spoken words. The toddlers who received AAC for receptive communication also made gains in their use of spoken words. This research tells us that AAC Intervention with young children with developmental delays actually facilitates the development of speech better than spoken language intervention alone. Look for more research along these lines as researchers begin to identify specific aspects of AAC use that are important.

THE GREATEST CHALLENGE IN TEACHING CHILDREN TO USE AAC

Several studies show that the greatest challenge to successful AAC intervention is in training communication partners. Research by Binger et al., (2010); Kent-Walsh et al., (2010) Cumley & Beukelman, (1992); Light, Collier, & Parnes, (1985) shows that communication partners tend to:

- Dominate communication interactions;
- Ask predominantly yes or no questions;
- Take the majority of conversational turns;
- Provide few opportunities for the child to initiate or respond;
- Interrupt the child's communicative attempts; and
- Focus too much on the technology tool.

The ImPAACT Program (Kent-Walsh & Binger, 2013) is one intervention program that has been documented to yield positive results for clients using AAC. https://www.researchgate.net/publication/260124160_Fundamentals_of_the_ImPAACT_Program

USE OF POWER MOBILITY

Another area where some team members may have questions about the use of AT is power mobility. While there is no clear answer to exactly when to begin power mobility, multiple studies have demonstrated that children less than two years of age can learn to use power mobility (Butler, Okamoto, & McKay, 1984; Jones, McEwen, & Hansen, 2003; Kangas, 1997; Zazula & Foulds, 1983). Research has not been able to identify a tool that is effective in determining readiness for power mobility. For young children who are not learning to walk at the same age as peers, power mobility provides many opportunities to engage in more independent exploration of their environment, as compared with focusing exclusively on remediation of mobility difficulties, which can delay independent exploration. When not exhausted from efforts to move about their environment, children can see, hear and touch elements around them. This is important because exploration is important for spatial searching, spatial problem solving, social and exploratory behaviors, and visual tracking (Gustafson, 1984; Yan, Thomas, & Downing, 1998).

No research has substantiated a commonly held fear that children will regress in motor skills due to use of power mobility (Bottos, Bolcati, Sciuto, Ruggeri, & Feliciangeli, 2000; Jones, McEwen, & Hansen, 2003). Parents, who sometimes worry about loss of motor abilities if power mobility is used, have reported: increased child independence and personal control, increased child engagement in meaningful life experiences and positive effect on others' attitudes toward the child when power mobility is provided (Berry, McLaurin, & Sparling, 1996; Wiart, Darrah, Cook, Hollis, & May, 2003). While there was often trepidation prior to beginning to use power mobility, Home and Ham (2003) found the majority of parents who responded to a questionnaire felt that power mobility increased confidence, motivation and happiness, and reduced frustration.

AT FOR SELF-MANAGEMENT FOR STUDENTS WITH INTELLECTUAL DISABILITIES

Although there is less research in other areas of AT use for students with intellectual disabilities, there is evidence that AT can be effective for self-management and self-prompting. Cullen, Alber-Morgan, and Shelia (2015) reviewed 36 studies about using technology mediated self-prompting for daily living skills and found this body of research has demonstrated the positive effects of technology mediated self-prompting for adolescents and adults with disabilities across a range of daily living skills, in a wide variety of settings, and using a variety of types of technology. The most targeted activities for this research were buying, preparing and consuming food. Some focused on managing personal finances, managing a household and buying and caring for clothing.

Other researchers have looked at a variety of uses of AT for self-management (Davies, Stock, and Wehmeyer, 2002a; Lancioni, O'Reilly, Seedhouse, Furniss, & Cunha, 2000; Lancioni, et.al., 1998;

Lancioni, et. al., 1999). They found that picture cues presented digitally are more effective than pictures presented manually on cards and that personal computer systems with auditory prompts and text are more effective than traditional written schedules. Mechling (2007) found digital devices to be effective to self-initiate, self-instruct, self-maintain and self-monitor one's behavior and task performance. AT has been found to be very effective as a self-management tool.

AT FOR READING FOR STUDENTS WITH LOW INCIDENCE DISABILITIES

There is often a presumption that students with significant disabilities including intellectual disabilities will not learn to read. When present, this presumption can lead to the denial of reading instruction, which results in students not learning to read (Keefe & Copeland, 2011; Ruppar, Gaffney, & Dymond, 2015). Much of the research on reading for students with severe disabilities in the past has been focused on sight word memorization or drills in decontextualized sub-skills. That research will not be reviewed here. Rather, we'll look at the research about the broader reading and writing experiences that lead to the development of literacy skills (Erickson, Hanser, Hatch, & Sanders, 2009; Erickson, Hatch, & Clendon, 2010). For example, when children write, they attempt to read what they have written. If an adult asks the child what he or she wrote, the child will explain it. Speaking and listening occur as part of the overall literacy experience. Effective literacy instruction has been shown to develop the traditional reading/literacy skills for children with significant disabilities, including intellectual disabilities. An excellent free resource about effective literacy instruction is Erickson, K., Hanser, G., Hatch, P. & Sanders, E. (2009). *Research-Based Practices for Creating Access to the General Curriculum in Reading and Literacy for Students with Significant Intellectual Disabilities*, https://www.kcdsg.org/files/content/Cheryl%20Jorgensen_Literacy%20and%20Severe%20Dis.pdf.

ACCESS TO INFORMATION VS. ACCESS TO LEARNING

Rose and Meyer (2002) were the first to make a distinction between access to information and access to learning. The distinction is important because providing quick access to information may decrease the opportunity for a child to learn new skills and thus have more access to learning. The use of picture supported text is an example of this. Hatch (2009) found that it may actually increase confusion, limit literacy learning in the long run, and interfere with learning opportunities. Several studies have concluded that placing pictures with text slows the rate of word learning (Pufpaff, Blischak, & Lloyd, 2000; Rose & Furr, 1984; Saunder & Solman, 1984). While picture supported text may provide access to content information, it may actually impede the more long term learning of reading and other literacy skills. That is not to say that there is no place for the use of picture supported text, but rather to know that its use will not automatically lead to the development of decoding skills. Picture supported reading and writing can be very useful and may be chosen as the best means for a student to access information and communicate in writing, but it's not a scaffold to the development of traditional literacy skill. One reason for this may be the actual figure (printed word vs. picture symbol) on which the eyes and the child's efforts are focused. There are many components to literacy and they involve focusing on the building blocks of reading and writing. One small study provides a glimpse of the importance of invented spelling and later reading skill. Ouellette and Senechal (2017) found that alphabetic knowledge and phonological awareness are developed through practice. If a student does not practice using letters to represent sounds when writing or work to decode printed letters to make meaning, those skills will not develop.

AT USE BY ADULTS WITH SIGNIFICANT INTELLECTUAL DISABILITIES (ID)

It appears that AT can be effective in the workplace. Morash-Macneil, Johnson, & Ryan (2017) found AT was successful for increasing work performance of individuals with ID in respect to productivity, navigation, time management and task completion. Cullen, Alber-Morgen, & Sheila (2015) found that prompting with AT is more effective than low tech methods and Sauer, Parks, & Heyn (2010) found that AT results in increases in accuracy, independence and generalization. Similarly, Sauer et al. (2010) indicated that following the implementation of AT, there was an increase in accuracy, independence and generalization of skills in the workplace. Technology in these studies included hand held computers, iPads, iPods, smart phones and vibrating watches.

In other research, Bryant, Seok, Ok, & Bryant (2012) surveyed care givers and found that the majority of clients were not using AT devices to support their needs in identified areas of living (home living, community living, life-long learning, employment, health & safety, social, protection & advocacy). In four of the seven areas, at least 60% of clients were not using AT devices as part of their support system. This research is several years old and hopefully, this picture will change as use of AT becomes more pervasive.

PART TWO: RESEARCH ON AT USE BY STUDENTS WITH HIGH INCIDENCE DISABILITIES

This has been a brief overview of some of the valuable research about AT. Part 2 of this two-part series will look at research about AT use by students with high incidence disabilities, where the focus is primarily on reading and writing. Resources to continue to keep informed about AT research will also be included. In the meantime, consider visiting www.natenetwork.org/resources where ongoing information about AT Research is frequently updated.

BACK TO CONTENTS

Language, Actions, and Learning Math

When I was a new teacher, language and actions weren't what I thought about first when providing math for my students with disabilities. Typically, I thought about which game or activity I would pull from my cupboard. As I look back, language and actions were precisely what I needed to think about. Language and active learning play major roles in solid math instruction. Language supports thought; active learning builds understanding. Learning math requires talking, thinking and doing. Solving a problem requires talking, thinking and doing.

I was under the wrong impression that math was all about memorization. I thought if my students memorized numbers, shortcuts and tricks, they would somehow find math useful in the real world and know how to apply it, especially if it involved a calculator. I thought if my students heard me say it, it was the same as my students saying it, doing it and understanding it. Little did I know that memorizing and shortcuts are not the substance of math; they're just nice to know once the math concepts are learned.

My students needed to actively learn and understand math concepts well enough to solve problems. Only then would math be useful to them. Only then could they use a shortcut like plugging numbers into a calculator or using memorized facts to solve a problem. The experience of using hands-on, multi-sensory materials to learn math concepts, language and actions is well-worth the effort, as it allows teachers the opportunity to find students' math potential and guide them as far as they can go.

Misperceptions about math, math instruction and access to math prevail to this day. There are many myths that have misguided our instruction for decades.

These myths include:

- Students need to learn a limited set of isolated math skills, defined as 'functional' skills, without learning pre-requisite skills.
- Students with disabilities require highly specialized 'methods' to learn, created only for students with disabilities, which focus on memorized responses not based on math.
- Differences in students with disabilities justify differences in math instruction.
- Math can be taught with only games or worksheets.
- Teachers need to teach the same skills to students with disabilities until mastered.
- Math is not connected.
- Problems can be solved in the real world with just a calculator by simply plugging in the numbers.
- Being good at math is a gift that only some people have.
- Math needs to be done quickly.
- Mistakes in math are only useful for determining weaknesses in skill and understanding.

These practices have brought on negative results, including splinter skills, little or no progress in math goals on Individual Education Plans (IEPs), a lack of confidence, low expectations and an inability to solve problems encountered in the real world. With

---
KAREN ROSS-BROWN has a BS degree in special education and MLS degree with an emphasis in assistive technology. She taught in special education for over 23 years in Minnesota and Wisconsin, specializing in teaching students with multiple, significant disabilities. Karen joined the curriculum team at AbleNet, Inc. in 2008. She was the primary author of Equals Mathematics curriculum and co-author of Equals Math curriculum revision (2017) with Jennifer Emanuele and James LaRocco. Karen has trained teachers in AbleNet curricula across the United States. She has presented at National Council of Teachers of Mathematics (NCTM) National and Regional Conferences, National Council for Exceptional Children (CEC) National Conferences, Closing the Gap (CTG) Conference, and Assistive Technology Association (ATIA) Conference.

few or no prerequisite skills taught, students learn a lot less math than their potential suggests they can learn.

The collective knowledge gained in the last decade regarding how we learn, how our brains work and what children with disabilities can do has had a very positive impact. Take-aways from that knowledge have influenced teachers in general and special education in how to think about math instruction and students with disabilities. Here are a few examples:

1. Math is connected within and between content areas in a comprehensive view.
2. When we make connections, we learn.
3. Multi-sensory, hands-on math instruction increases active learning and builds understanding.
4. Having language supports and influences thought.
5. Students with disabilities can and do learn math.

1. MATH IS CONNECTED.

When you carefully look at the National Council of Teachers of Mathematics (NCTM) Content Areas in mathematics (numbers and operations, geometry, measurement, algebra, and data and probability) it quickly becomes apparent that math content areas are connected. This is important because learning the system of numbers acts as a support for math learners and their understanding of mathematics across math content.

On a basic level, for example,

- I can make sense of a dial scale and a ruler (measurement) or a graph (data) more easily if I understand number order and comparisons (numbers and operations)
- When I solve a missing addend equation (numbers and operations), I can't help but think about an unknown represented by a letter in an equation (algebra).
- I can multiply amounts (numbers and operations) in an input-output table and find a number pattern (algebra)
- When I measure perimeter or area, I am applying skills I learned in measurement and geometry.
- I determine which shape is a hexagon and which is an octagon (geometry) when I know how to count the number of sides (numbers and operations)

It is important to note these connections within a curriculum are maximized when all math content areas are complete, with skills placed in a sensible order and pre-requisites included.

2. WHEN WE MAKE CONNECTIONS, WE LEARN.

Making connections matter in new learning and memory as it allows students to use math flexibly in their real-world experiences. Students connect what they know with what they are learning, their past experiences with new experiences, their math knowledge with real-world examples and known vocabulary with a new application of a learned vocabulary word. When lesson objectives are ordered specifically to support subsequent skills, the idea of making connections is utilized to support students by providing necessary pre-requisite skills and connecting them to new knowledge.

This is the very reason a well-constructed curriculum is useful and effective. We learn math over time, not in a vacuum specific to single skills requiring mastery. When a comprehensive curriculum is present, students build and learn math knowledge across lessons within and between content areas with specific, connected lesson objectives.

3. MULTI-SENSORY, HANDS-ON ACTIVE LEARNING IS ESSENTIAL.

Multi-sensory instruction is very useful for many reasons. Students are more engaged when they use a variety of tools, manipulatives, and points of view. Learning is experienced in multiple ways by increasing the modes of learning, positively affecting memory and recall.

Hands-on instruction in math allows students to visualize a problem and move objects around to make sense of it and try ways to solve it. Representations provided, such as concrete, semi-concrete, and abstract materials, are recommended for all students regardless of ability or age. In the learning sequence from concrete to abstract, students are shown, and then use, a concrete view with manipulatives, a semi-concrete view with drawings, picture symbols, photos, or cards and an abstract view with numerals and symbols. It is a commonly accepted practice in general education mathematics to utilize these representations to deepen understanding and assist in problem solving. These opportunities move students from passive learning to active learning experiences, which help anchor students in their understanding of math concepts.

4. HAVING LANGUAGE SUPPORTS AND INFLUENCES THOUGHT.

Language plays a large role in how and what we think. It is a significant part of learning when students begin to form thoughts about what is being learned. Emphasizing acquisition and the means of language access is a clear priority for students with disabilities, for both receptive and expressive language. Learning and understanding vocabulary is a staple of education as it has been proven to increase achievement.

To take advantage of this connection to learning, students need to have access to express their ideas, thoughts and answers about what is happening in math class. Many students also require a substantial reduction in the amount of language used

to explain a problem, vocabulary meaning, or a math concept because they need more time to process information. This places more importance, then, on modeling actions and strategies using objects, tools, pictures or drawings to demonstrate solving a problem or depict the meaning of a math concept or vocabulary word. It also requires the opportunity for students to process the information and to have it repeated over time.

5. STUDENTS WITH DISABILITIES CAN AND DO LEARN MATH.

It is very hopeful and helpful to know that research indicates humans are born with math knowledge. Often, I have heard teachers talk about their students' abilities in terms of a specific developmental age. I never quite understood what that meant for my own students. When developmental ages are used to indicate potential, it can appear as a limitation of expectations, as opposed to a starting point for growth. We must be cautious when our views or practices reduce our expectations of what students can do, as research has shown raising expectations increases the probability of success. Lower expectations reduce opportunities for learning. However, when I increase my expectations, I eagerly put more in place for my students to learn.

In this age of testing and data collection, teachers need to remember to truly teach within multiple, meaningful learning opportunities. Quality math instruction is a strong indicator of success. Students should be supported and taught with models and guidance as they learn how to think about math concepts and solve problems. This includes learners who need a high amount of support. It is our responsibility as educators to give students the support to actively learn and show what they can do and understand.

AbleNet has brought strong evidence that students with disabilities at all levels of cognition can and do learn math with best practice instructional methodologies. This is shown in a four-year study and a one-year study measuring success for students using the original version and the newly revised Equals Math curriculum. Equals Math curriculum provides instruction specifically for students with disabilities in structured lessons with a complete and comprehensive set of lesson objectives placed in a specific order to maximize pre-requisite skills and connections within and between math content areas.

While the structure and quality of math instruction is very important in supporting students with disabilities, the difference between students with disabilities learning math and typically developing students learning math is access. Given that quality math instruction is present, access to it remains the golden ticket: the gateway to learning math for students with disabilities.

Access includes a large variety of practices and use of tools, materials and assistive technology for supporting students as they talk and perform actions related to their learning. Math instruction can be viewed within layers of access from place-ment in a foundational skills curriculum with embedded differentiation within lessons, and in the use of materials with built-in support to adaptations that support individual student needs, e.g. language and actions with the materials. It is equally important to keep in mind that access includes teaching with models and guiding students as they learn math concepts gradually over time, building their understanding. This is much preferred over the expectation that students master every math skill before moving on to the next.

Language support for students with disabilities begins with using their own communication system (e.g. speech generating, single message, or dedicated device; PECS or other language board for augmentative and alternative communication) as recommended by a speech and language professional. Students need access to those devices always, including in math class. Beginning communicators often have a communication system with limited message locations so they require a way to comment on what is happening in front of them in real time, in this instance during math class.

A math lesson should include enough materials (math tools, counters, workmats, cards and interactive materials) to be used for answering a question, making a choice and communicating what is happening in the moment. Creating a display with two-three choices on the table or in a pocket chart provides expanded, temporary communication access that relates to what is right in front of the students. Students choose an answer or a comment from this display by touching, pointing, eye gazing or rely on the teacher to point to each and indicate their choice by saying, "That's the one I want," with their own communication system or Step-by-Step communicator.

It's important that students who require language support have opportunities to learn what the provided choices mean. For example, we know that language begins with naming. Why not begin with naming the tools and materials students use in math class? How about naming the actions students are expected to complete with those tools?

Models, choices and naming with a communication system or display allows students to become familiar with tools and objects and how to use them. Familiarity with these things is as helpful as a familiar routine. When a student is taught what the choices are for tools, counters, vocabulary, and actions, they make better, informed choices. Once the lesson structure, tools and actions are known, students can feel more confident with new math concepts and problem solving and begin to focus on these skills.

Naming actions is more meaningful if students perform actions themselves. Often, that requires an adaptation, so students can be as independent as possible in performing the action. Again, models are important but active learning needs to follow. Hand-under-hand assistance should be a temporary support until a more independent adaptation is identified. The Equals Math Action Dictionary, a guide with abundant ideas to

support students' access for both language and motor access, can help get you started. In your own school or district, be sure to seek out your speech and language professional, occupational therapist, and/or assistive technology professional, as they are invaluable resources that can provide options and a direction that best fit the needs of your students.

A few examples from the Equals Math Action Dictionary (below) support individual students who require adaptations for language use and actions performed in a math lesson. The adaptation ideas in the Action Dictionary can be used as is or tweaked for an individual's unique needs. Sometimes teachers use the ideas as a starting point that leads to a new one. Most materials needed to create these adaptations are present in the Equals Math curriculum kit but can be found elsewhere.

Equals Math Action Dictionary Sample

How can a student answer a question when she cannot remember or does not talk in a typical way?

Provide a display of two or three answer choices for a student to select. In the pictured example, stacks of 2, 3 and 4 connecting cubes represent the amount choices. For beginning learners, show more obvious differences. For example, if the solution is 4 cubes, place 1 cube and 10 cubes as distractors.
How does a student count with objects when he can't keep track of them?

Fasten counters onto MathLine tabs with Velcro. Students can slide the tabs with counters and manage to keep them organized to add, subtract, multiply or divide. All Equals counters fit on the tabs.
How can a student count when she does not talk with a verbal voice?

A Step-by-Step communicator has 120 seconds or recording time. There is no limit to the number of messages so it is possible to record the number list from 1 to 100 or any number between. With each activation, the first and subsequent numbers are heard, one at a time under the student's control.

How does a student connect the points on a graph when he is unable to hold a pencil or write with it?

The student places or presses Wikki Stix lengths to connect points present on the grid to create a line graph.

BACK TO CONTENTS
How does a student with low vision count with a 10-frame?

A 10-frame box with room for connecting cubes is an easy solution. The Equals Math curriculum kit includes 12 boxes so students can not only count cubes 1-10 but also group cubes by tens and ones and use in a place value chart.

How can a student estimate when she cannot picture an amount in her mind?

Providing choices is an easy adaptation when a student is inexperienced with amount or is unable to picture an amount. In this photo, the student is estimating the amount in the bowl (10). The choices are far apart: 20, 2, and 9. Choices of any amount can be used, some more challenging than other, depending on the needs of the student. Numerical representations could also be used.

How does a student flip a shape when he is unable to pick it up?

Utilizing a 3-ring binder, page protectors, and Velcro tabs, the student can turn the page left-to-right or right-to-left to flip the shape. This action and the resulting alternative view of the shape helps a student understand congruency, e.g. the shape is the same despite its orientation in space.

How can a student make a shape when he is unable to draw it?

Using two-dimensional shapes and workmats from the Equals kit, students can use the shape outlines to place shapes to create a design or another shape. Fastening Wikki sticks to the top borders of the shapes helps students control their movements as they slide the shape into place.
How can a student make a pattern when she is blind?

Use Wikki Stix to create and fasten X's and O's so the student can feel a distinct difference when creating an AB pattern.

The adaptation examples show only a small portion of possibilities for students with disabilities to access math. Once established for your students, access becomes a natural part of the day, often across other subject areas.

Teaching math for students with disabilities is much more complex and intricate than many teachers have realized. Math instruction based on research and an abundance of access options have opened doors and raised expectations. We now know what quality math instruction looks like and how to bring it to students. The results are astoundingly exciting and successful. At this moment, teachers are in the best position for providing quality math instruction for their students with disabilities than ever before. The tools are here. It's time to move forward and grasp them. ■

Maker Technology for Beginners MAKEing AT

The maker movement has taken the world by storm. Adweek (2014) defines the maker movement as an "umbrella term for independent inventors, designers and tinkerers... A convergence of computer hackers and traditional artisans, the niche is established enough to have its own magazine as well as hands-on Maker Fairs that are catnip for do-it-yourself (DIYers) who used to toil in solitude. Makers tap into an American admiration for self-reliance and combine that with open-source learning, contemporary design and powerful personal technology like 3-D printers."

AT specialists are makers by nature – creative and resourceful problem solvers who are excited by a challenge and willing to try anything and everything to support the needs of those with disabilities. We can work wonders with Velcro and duct tape, will take hours to construct and rework projects and are not afraid of failure. Actually, the field of AT was born many years ago in the garages of tinkerers who saw the power of newly mainstreamed computer technology for creating tools and supports for people with varied abilities; often for family members or close friends. In reality, we were makers before being makers was a thing! However, during that time, the technology was expensive, training was limited and the knowledge network was small.

Fast forward 30 plus years. Walk into any middle school or high school and you will find kids learning to make and tinker, build and create, as part of their STEAM education. It is not uncommon for public schools to have 3D printers, robotics labs and technology workrooms for all students. There are even shared commercial maker spaces and innovation labs in many communities that enable amateur and professional tinkerers to design prototypes and products using expensive equipment, software and tools to which they would not otherwise have access.

The maker demographic is wide but has become increasingly popular with millennials. These current students and young adults, who are accustomed to such things as hack-a-thons and shark tank competitions, will soon become career professionals who use their love of making and their knowledge of technology to develop innovative solutions that can help a range of people, including those with disabilities.

The affordability of such technology, paired with the wealth of tutorials, videos and services available online, has also fueled the amazing community of makers of all levels and backgrounds. For those without an engineering or technical background, using a 3D printer or laser cutter can seem like a daunting task. However,

MARCI KINAS JEROME is an associate professor at George Mason University specializing in the areas of severe disabilities and assistive technology. She serves as the academic coordinator of the low incidence special education programs and the online AT masters and certificate programs.

CINDY GEORGE is the director of Virginia's statewide AIM project. She is a member of the faculty at George Mason University and teaches in the online assistive technology masters and certificate programs. She has worked extensively in the field as an assistive technologist for many years.

it's important that AT providers become more comfortable using these maker tools since they can open new viable avenues for creating customizable, affordable and durable AT solutions for individuals with disabilities.

MICROCONTROLLERS

Microcontrollers, or "hobby enthusiast" technology, has been around since the early days of Radio Shack. The Shack was the local stop for finding materials to complete those projects from the mid-70s through the 90s. But as with the closing of Radio Shack, times have certainly changed. Technology has become cheaper and more readily available thanks to the likes of Amazon. It is also now in the forefront of STEAM education as it pushes towards 21st century learning.

Microcontroller technology consists of a range of tools that work together to produce actions. The main component includes the microcomputer board; a small circuit board with a microprocessor, memory and input/output circuitry. There are several types of boards that range in price and capacity, but most common are the Arduino, Adafruit and Raspberry Pi line of boards. The board acts as the brain for a project, but it needs to get its instructions to know how to run. There are several software programs and languages you can use to write the script for your board's actions, some of which might appear very sophisticated to those just getting started. Luckily, beginners can use built-in code templates found in programs such as Arduino IDE to create projects with limited code knowledge. Next is the range of "attachments" for the board in the form of buttons, sensors or motors. Buttons (also known as switches) act as an input, when pressed an action will occur. Microcontroller buttons may by push-action style or lever and can turn on a light, control a sound or initiate an action as programmed on the board. Sensors include infrared, proximity, time, temperature, light, motion and identification. Microcontroller technology is often sold in kits for users to experiment with the various sensors and buttons. Kits

help those who are just starting out and do not have the specific knowledge to gather the individual tools that are needed to complete a project. Spark Fun's inventor kits available at sparkfun.com are an excellent starting point because they not only provide the physical components, but also provide step-by-step visual directions as well as starter code for all projects.

So how does microcontroller technology go from a hobby to AT? It depends upon the perspective you take. It is the same mindset for those of us who look at a dollar store pink hair curler and see a built-up paintbrush holder. As a hobbyist, you can use a button switch to turn on an LED light to learn about programming and circuitry. However, as an AT specialist, you can build a custom solution for someone with a disability to have an accessible light signal. We already know that AT specialists are great problem-solvers (that is the nature of our jobs), but now we are giving access to real tools that are often only found in expensive AT hardware devices. And while there will always be a place for those well-developed, quality-tested AT hardware devices, there is a place in our AT toolbox for more simple, cheaper, individualized and possibly even temporary solutions to assess and support individual needs.

A great way for maker newbies to get familiar with microcontroller technology without having to know any code is with a Makey Makey kit. Makey Makey is an invention kit developed from research by two students at MIT Media Lab's Lifelong Kindergarten. The $49 commercially-available kit includes a "switch interface" board and several sets of alligator clips (serrated metal clips attached with wire used to make temporary electrical connections). The board is pre-programmed to include keyboard commands (letters, numbers, space, enter) as well as basic mouse commands. The board connects to the computer via USB. Users simply plug one end of an alligator clip onto the board at the spot that corresponds to the keyboard/mouse command

Makey Makey Pictures - https://makeymakey.com

they want to use and clip the other end to something that acts as the "switch".

While the Makey Makey seems silly and fun (and it is!), it is an excellent resource for AT professionals working to provide physical access to and/or engage folks in using the computer. Makey Makey could be used for assessment purposes, play sessions and social/group activities using readily-available, common objects that students enjoy while also supporting their natural motor patterns. Your imagination is the limit for what you could invent to control the computer. Makey Makey is designed to be "plug, clip and play," but the board can also be hacked for advanced programming and even work with mobile devices.

3D PRINTING

3D printing is the process of making three-dimensional solid objects from a digital file using an additive print method. A 3D printer prints the object by laying down successive layers of material until a solid object is created. 3D-printed objects are

Makey Makey Video - https://vimeo.com/279920496

most often made from plastic, but can be built from various resins or metals. 3D printers vary in cost from a few hundred dollars to several thousand dollars depending on the size and types of materials to be printed. 3D printing also requires a drawing or blueprint from which to print. This specialized software certainly has a learning curve, but beginners can create simple designs with some initial training. Luckily, there are sites such as Thingverse where makers can share their already-created designs. With access to a 3D printer, it is simple to print already-designed keyguards, adapted grips and tools, mounts and even Brailed items. Those with advanced skills can print some really cool AT tools such as custom 3D-printed prosthetics that you often hear about on the news or social media.

LASER CUTTING AND ENGRAVING

Laser cutting is another popular technology being added to maker spaces. Laser cutting uses a laser to precisely cut by melting, burning or vaporizing on a wide variety of solid materials such as wood, cardboard, acrylic and cork. Like 3D printers, laser cutters vary in price based on the size of the cutting space and materials that it can cut. Laser cutters utilize vector drawings to create cut files. Vector drawings use mathematical equations to create points, curves and lines along an object path, allowing a graphic to be scaled to any size without changing the graphic quality. Makers can user a paid program such as Adobe Illustrator or a free tool such as Inkscape to create vector drawings. Creating these drawings is more complex than using standard photo editing tools, but the learning curve is certainly easier than learning to render objects in 3D for 3D printing. Laser cutters are an excellent way to construct low cost fixtures such as keyguards, slant boards, positioning equipment, device holders, tactile maps and images, writing guides and more. Products can be used as a permanent tool or created to be used temporarily for assessing or training for a task. Many laser cutters can also etch designs on materials such as wood, glass and metal in addition to

Luminous Lowtops - https://makezine.com/projects/make-37/luminous-lowtops/
LED Light Up Shoes - https://www.youtube.com/watch?time_continue=34&v=86Gctesc500

cutting. Laser engraving could be used to create tactile objects by utilizing relief design to raise certain elements.

SEWING/WEARABLE TECHNOLOGY

While sewing has always been a staple of home economics, interest in sewing has seen a resurgence with the increased availability of wearable micro-technology also known as e-textiles. Wearable technology utilizes a small, sewable microcontroller board often powered by a battery pack. Although standard wires can be used as thread, conductive thread is becoming mainstream; creating circuits within products such as "smart" winter gloves that allow you to use your smart phone while wearing the

Laer Cut Keyguards - https://www.closingthegap.com/keyguards-for-keyboards/

gloves. While e-textiles are still an emerging area, there is great potential to support people with disabilities. Conductive thread gloves can be programmed to play music, operate the computer and such with the slightest of movements. A fun way to get started with wearable microcontrollers is to create LED clothing with individual sewable LED lights or electroluminescent wire. Microcontrollers and batteries are hidden in garments as LED threads are sewn into the fabric. LED lighted clothing can provide visibility and extra safety for individuals who are blind.

"OLD SCHOOL" TECHNOLOGY

While there have been great advancements in developing new maker tools, we should not forget the maker tools that started the movement and have been a staple of the technology education curriculum for more than thirty years. Soldering is a critical skill for any maker. Soldering is the process of joining two electrical elements together using a meltable, conductive metal filler. Soldering is used to strengthen and secure electrical elements such as a wire to an arduino board, a specialized micro-computer board. An easy and cost-effective beginner soldering project is to create a battery interrupter. A battery interrupter consists of a copper coin on one end and a standard switch jack on the other end, connected together using speaker wire that is soldered to each element. A battery interrupter is placed in the battery compartment of a toy, light, fan or other battery-operated item with an on/off switch. With the battery interrupter in place, a switch user can use their preferred switch to turn on or off the battery-powered device.

Skills from the days of wood shop, metal shop, and auto repair also serve makers well. Many AT tools continue to be fashioned from standard home improvement store supplies. The days of walking the isles of Home Depot to find materials to create that perfect something still happen. Using PVC pipe to create custom

Adaptable Switch : Egonomic Button - https://www.thingiverse.com/thing:3093824
Adaptable Switch Video - https://www.youtube.com/watch?v=G_vfFqMYHT8

height technology stands, communication device mounts and hand-held pointers are still valuable. Creating slant boards using corrugated plastic from used yard signs, custom building supportive furniture from wood or pallets, or constructing single-switches for AT assessments all remain important skills of AT makers.

MAKE IT HAPPEN

Some people learn best by jumping in and experimenting while others like a more structured approach. There are numerous tutorials and videos online that provide fundamental skills and knowledge in many maker domains. There are also classes and workshops available through local universities, adult education providers and professional maker spaces. There are several communities of practice from online social media groups to in-person local and national Maker Faires to share ideas and to seek support and troubleshooting help. Whatever your learning style or preference, remember that maker technology can be a fun and viable way to develop affordable, custom AT supports for people with disabilities. ∎

UPCOMING LIVE WEBINARS

PROFFESIONAL DEVELOPMENT

CEUs are provided by the AAC Institute and are available for live webinars at no additional fee (does not include sponsored webinars unless noted). A 60-minute webinar = 0.1 CEUs. A 90-minute webinar = 0.2 CEUs

Tips and Activities for Implementing Core and AAC with Older Students

By Kelly Key
Thursday, February 21, 2019
3:30 pm – 5:00 pm (CST)

Do you work with students with complex communication needs that are in middle school, high school or at the transition level?   Would you like to learn about some fun and clever ways to provide your students with core vocabulary (both visually and verbally)? If so, this is the webinar for you! This enthusiastic presenter will share a variety of activities, resources, and creative ways to increase communication with your older students.

Information will include; quick age appropriate activities like going on a virtual roller coaster and playing games that are "cored out." She will share how to embed core words and visuals throughout your student's day to increase communication and independence and tips for getting your staff on board.
Is Your Student Data Safe?

By Kelly Fonner and Mike Marotta
Thursday, March 7, 2019
3:30 pm – 5:00 pm (CST)

Do you check the Privacy Policy of every tool that you recommend for a student's use? Some are confusing and even misleading. As we are informed about data vulnerability through FaceBook, are the tools you are using at school, FERPA & COPPA compliant and secure?

If you are using free apps, you're not the consumer–you're the product. So beware, just because it's a tool in the world of disability, doesn't mean that your student data isn't being used or sold. As educators we are obligated to check the policy on every tool. Join us in this webinar to learn and share what you are doing to insure that free isn't getting you called into the principal's office….

Timeline for Transition: A Roadmap for Students Transitioning to Post-Secondary Education with Technology

By Rachael Kruzel
Tuesday, March 26, 2019
3:30 pm – 5:00 pm (CDT)

Colleges and Universities have increased the use of assistive technology as a means of providing accommodations to students. For students transitioning, it's more important than ever to come to college with an understanding of assistive technology, including what they have used and what has been effective.

Having a timeline with yearly items to accomplish can help to guide a successful transition. Participants will be lead through the Timeline4Transition and the QIAT-PS, as well as a timeline for the successful transition to higher education. Participants will leave with tools and a timeline to implement with students they are currently working with.

Top Ten Transition Tech Tools: Common Assistive Technology Tools used in Post-Secondary Educations

By Rachel Kruzel
Tuesday, April 16, 2019

Differences between K-12 and postsecondary education for students is abundant. The assistive technology that is available and is used is one of these differences. But how different are the tools used in postsecondary education versus K-12? What are the most common tools used once students get to college?

Attendees of this webinar will learn about ten (or more) of the most common assistive technology tools being used in the postsecondary education setting. Tool functionality and practical use examples will be addressed along with demos of the tools for better understanding for those working with students in high school or transitioning

Giving Independence. One Fingernail at a Time.

AN EFFORTLESS MANICURE IN UNDER A MINUTE.

The ClipDifferent Pro is a revolutionary, first-of-its kind, automatic fingernail clipper that safely trims fingernails with the simple touch of a button.

WHO'S IT FOR?

Put simply, the ClipDifferent Pro nail clipper is for a variety of people with a multitude of abilities, who by nature or choice, would like an easier way to clip their fingernails.

Perhaps you have Arthritis, MS or Parkinson's and fine motor dexterity is an everyday challenge. Or you might be one of our many great disabled veterans, someone with a congenital disability, or one of the untold amount of able-bodied people who really dislike the messy process of cutting

their fingernails. Or maybe you're a family member or caregiver who knows what a little more independence might mean to your loved ones.

WHAT IS IT?

The ClipDifferent Pro is a patent-pending, carefully engineered fingernail clipper that transforms this repetitive "task" into an easy experience. The safe fingernail slot prevents skin from coming into contact with the trimming mechanism (even those with full vision loss can use it safely). In addition, it catches the nail clippings in a drawer, eliminating the mess of this routine task. It's also compact (3" x 5") and contains a

rechargeable battery that can last months between charges.

Zappos Adaptive – Inclusion – Function – Community

ZAPPOS' STORY

A few years ago, a Zappos employee took a call from a customer whose grandson received the wrong shoes. Sadly, the employee was unable to find a replacement for what she needed. Their customer was frustrated — and rightfully so. She shared that her grandson, Gabriel, has autism and is unable to use shoes with laces due to the challenges of tying them. As Gabriel ages, it becomes increasingly difficult to find footwear for his needs.

That call made a lasting impression on our employee, and he vowed to do something about it. Following several months of immersive research, education, and talking with families and people with disabilities, he helped create a team dedicated to sourcing products that are functional, fashionable, and meet all types of needs. Zappos Adaptive aims to connect people with products that make life easier.

ZAPPOS ADAPTIVE MISSION

Zappos Adaptive is a shopping experience that brings together brands who offer products that are innovative, functional and fashionable. They are on a mission to provide options for people searching for clothing, shoes and accessories that help make getting dressed easier!

Tram – Lift. Ambulate. Transfer.

LIFT. AMBULATE. TRANSFER.

The Rifton TRAM is a transfer and mobility device capable of lifting, transferring and providing supported ambulation for patients of varying abilities and body types. Easily adoptable by multiple caregivers, the TRAM's intelligent engineering significantly reduces back strain and stress for a safer work environment. The Rifton TRAM is a multi-functional device that seamlessly:

- Performs seated transfers
- Raises a patient to standing
- Provides supported ambulation
- Allows for the dignity of private toileting.

Smartbox Introducing Look to Read
Look to Read enables children with disabilities to experience and enjoy books independently. Suitable for eye gaze, switch and touch access.

A FUN AND MOTIVATING WAY TO EXPLORE STORIES

Everyone can enjoy Look to Read as part of their literacy journey – whether you are just starting out or already have some literacy skills. Each book is fully accessible, with exciting content and learning activities to support you at every stage.

WHO IS LOOK TO READ FOR?

Look to Read is suitable for AAC learners at any stage in their literacy journey, including those who are:

- Understanding cause and effect and developing access skills
- Exploring books independently for the first time
- Recognising sounds and letters, and developing early literacy

KEY FEATURES

- 16 original animated stories
- 4 stages of progression
- 95 letter sounds and 100 high frequency words
- 64 learning activities
- Symbolised chat grids for every story
- Workbook for tracking and recording progress
- High contrast mode for users with visual impairment

HOW IT WORKS

Step one – Choose from one of the 16 stories about the magical adventures of a young boy called Pip and his family.

Step two – See the words of the story displayed on the screen. Look, touch, press your switch or move your mouse over the words to hear them read aloud.

Step three – When you have read the whole sentence, fun animations will bring the story to life.

16 ANIMATED STORIES

The stories in Look to Read are grouped into four different reading stages – each stage gradually introduces new sounds and vocabulary to build on what you've already learned. As you progress through the stages they introduce more complex sounds, and longer stories with more words on the page.

Ultra Light 1 HD Finger Switch

FINGER SWITCH

The Ultra Light 1 HD Finger Switch is a very small (smaller than your thumb) switch that requires very little pressure and gives great tactile and audible feedback. It is easily mountable

within reach of a finger, and its small size and low price let you mount several switches within easy reach of one or more fingers. Comes with 6 interchangeable color panels.

The Ultra Light 1 HD Finger Switch fits like a ring, is adjustable, with light activation force and tactile feedback, It is perfect for someone with limited range of motion and best of all it is affordable!

ULTRA LIGHT 1 HD FEATURES

1. A light activation force without losing tactile feedback

2. A reusable sticky base that is easily cleaned and doesn't leave a film

3. Six colorful, cleanable, and durable switch tops – just peal and place

4. A low profile makes it ideal for people with limited finger movement

5. An ergonomic design allows for comfortable activation while in your hand, mounted on a table or on a positioning arm

6. A rugged design that can withstand the heaviest hitter for a lifetime of activations

7. Two screw mounting for ultra secure placement

8. 1/8 inch (3.5mm) Right angle mono plug standard for use with PC access, AAC, ECU, adapted Toys, etc.

9. 6 foot very flexible cable for those challenging switch placements

10. Affordable!

Tellus I5 by Jabbla – We All Have A Voice

JABBLA

Communicating…making yourself heard…interacting…

For some people, communication is always going to be a challenge. Jabbla develops technology that assists people with communication challenges.

Jabbla products are known for their industry leading innovative technology, dependability, and quality craftsmanship. Each one has multiple access methods and adaptable software, so they can be customized to each individual user. It is the individual user that is most important to Jabbla.

After all, their motto is: we all have a voice.

TELLUS I5

RELIABLE DESIGN

The Tellus i5 is their newest member of the Tellus family. A perfect match between reliable functionality and attractive design. The Tellus i5 has integrated eye tracking, resulting in an all-in-one solution for users who rely on their eyes to communicate, to work with a computer or to control the environment. Intel i5 processor and Windows 10 based, ready to run various software programs, but especially built to take the best out of Mind Express.

DESIGNED FOR LANGUAGE DEVELOPMENT

Top notch Mind Express applications such as Amego or Score turn this fully dedicated piece of technology into a highly functional AAC device. NoveltiesThe integrated eye gaze results into a streamlined and sustainable device. Its sleek design is above all a great match for daily use.In addition you can wake the device up from sleep using the eye gaze. Due to this efficient use of battery, your autonomy increases.

Standz: Abduction Stander by Jenx – Always Supportive

STANDZ – ABDUCTION STANDING SYSTEM

Inspired by the clinical benefits of abducted standing we have worked closely with therapists from all over the world to ensure the perfect combination of clinical positioning with simplicity of use. They are delighted to bring you Standz – their most versatile standing frame yet!

Standz offers Prone or Supine standing and easily accommodates either abducted or neutral leg positioning for children between the ages of 1-9. Leg length discrepancy is easily accommodated by the individual control for knee and foot positioning and all adjustments are tool free to enable quick and effective clinical postural adjustments. An extensive reange of accessories ensures that Standz can accommodate children with a wide range of postural requirements.

FEATURES:

• Tool Free Adjustments

No more hunting for the right sized allen key, cleverly designed wing knobs offer a comfortable grip to enable effective clamping with minimal effort – meaning growth adjustments have never been easier.

• Angle Gauges

Built in angle gauges for frame angle and individual leg abduction – easy to read gauges enable precise positioning and allow for the correct position to be repeatedly achieved.

• Individual Leg Adjustment

Adjustment for both knee and footplate height – Ideal for accommodating leg length discrepancy. This tool free adjustment can be made in seconds and securely clamps into place using our clever clamping marquee design.

• Individual Leg Abduction

Standz offers the ability to independently adjust either leg from 0 – 30 degrees of abduction depending on the child's

BACK TO CONTENTS

clinical needs. Simply adjusted through a wing knob clamp, this action is quick and simple to adjust for each standing session.

- Antimicrobial Covers

As standing aids the digestive system and gravity can take it's course, our covers have been designed to wipe clean, they also contain an antimicrobial agent to aid infection control.

- Tray Holder

A clever accessory offers convenient storage when the tray is not in use.

- Safety Lock

Built in safety lock for frame angle adjustment – Ideal for those busy environments where there is potential for accidental activation of an unlocked mechanism.

AbleLink Windows Software – Their Solutions Changes Lives

For over two decades, AbleLink has provided access to the Windows operating system through a creative interface that allows individuals with cognitive barriers to access everyday technologies. The all-new Smart Living Suite 3.0 features software that includes simple button navigation, safe web browsing, email, and much more – all in a picture-and-audio based environment.

SMART LIVING SUITE 3.0

The Smart Living Suite 3.0 is the best way to open up Windows computers for everyone, regardless of cognitive ability! All five of the AbleLink Windows software programs are included in the Suite:

- Smart Living Desktop – The only "home screen" you need, unlocking access to virtually anything on the web or on the local computer
- Visual Impact – AbleLink video modeling program, allowing for creation of any kind of step-by-step instruction
- Smart Living Email – Spam-free email, relying on picture-based contacts and audio email exchanges for ease of use
- Web Trek – Safe and ad-free web browsing, scalable as the user grows with the software
- Visual Media Player – Single-touch access to movies, online videos, music, playlists, and more

12 volt NI-MH High Capacity Battery and Charger
Adaptive Switch Laboratories, Inc.
Price: $295
Device: switch interface
Disability: physical
The ASL 515 is a 12 volt power source with charger that is used with 12 volt DC sensors without a power wheelchair. This high capacity battery will last up to two days before charging.

12/24 Volt AC Power Source Wall Plug
Adaptive Switch Laboratories, Inc.
Price: $60
Device: switch interface
Disability: physical
The ASL 505 is for accessories or 12 or 24 volt sensors to plug into the wall for use with computers and ACC devices.

2 ECU Interface Cable with 2 Mono Plugs
Adaptive Switch Laboratories, Inc.
Price: $180 - $210
Device: environmental control
Disability: physical
ASL 802-2, 802-3 and 802-4 converts directional commands from the ECU port into separate mono plugs. It has two, three, or four output jacks from the left and right signal on the driver control that can be used for tilt, recline, computer/communication access or any device that requires a mono.

2-Switch
Compusult Limited
Price: $129 - $159
Device: keyboard emulator, mouse emulator, switch interface
Disability: cognitive, learning, physical
Operating System: Windows, Mac, iOS, Android
The 2-Switch is a USB-based device that can be preprogrammed with two keyboard inputs, two mouse actions or one keyboard input and one mouse action. The 2-Switch DIP is a user-configurable version of this product.

4 Choice Sequential Scanner for the Visually Impaired
Enabling Devices
Price: $399.95
Device: dedicated communicator, speech output
Disability: cognitive, physical, speech
Our communicator provides illumination of your icons. It is also extremely flexible, four scan modes, choice of the number of fields to use and two mounting systems.

4-Level Communication Builder
Enabling Devices
Price: $356.95
Device: dedicated communicator, speech output
Disability: cognitive, physical, speech
Communication Builder now with four levels. Comes with four easy to change frames (one, two, four, eight and 16 window options). Retains all your recordings on all four levels when switching between frames. Total record time is 300 seconds.

6dot Braille Label Maker
LoganTech
Price: $749
Device: alternative keyboard, braille input, braille output
Disability: vision
The 6dot Braille Label Maker has everything you need to create high quality Braille labels in any language. Powerful but simple, the 6dot's ergonomic design makes it easy for children and adults of all ages to label practically anything at home, school, the office or on the go.

6dot BrailleCoach
LoganTech
Price: $995
Device: dedicated communicator, speech output
Disability: cognitive, learning, physical, speech, vision
Operating System: Windows, Mac
The Logan BrailleCoach Braille training device accelerates attainment of Braille literacy by allowing convenient, self teaching of Braille. Prerecorded and easy to customize Braille embossed tags trigger BrailleCoach audio output for independent, interactive learning.

7-Level Communication Builder
Enabling Devices
Price: $369.95
Device: dedicated communicator, speech output, speech trainer
Disability: cognitive, learning, physical, speech
The 7-Level Communication Builder is a self-contained communication device. It allows the user to record and play back from one, two, four, eight or 16 different messages per level. There are seven levels for recordings. Total record time is 300 seconds.

7-Message Take and Talk Go! Board
Enabling Devices
Price: $227.95
Device: dedicated communicator, speech output, speech trainer
Disability: cognitive, learning, physical, speech
Record seven messages up to 35 seconds each. You then play the message back by removing or placing one of the 3 x 3-inch icons on one of the light sensitive compartments. Wall mounting hardware included.

8-Pin Extension Cable
Adaptive Switch Laboratories, Inc.
Price: $78
Device: environmental control
Disability: physical
The ASL 811 8-Pin Extension Cable has 8-pin round connectors on each end and is to be used as an extension for an ASL drive control package.

Accent 1000
Prentke Romich Company (PRC)
Price: $7295
Device: keyguard, switch, dedicated communicator, environmental control, speech output, speech trainer
Disability: cognitive, learning, physical, speech
Operating System: Windows, Mac
Accent 1000 offers advanced functionality and user-friendly features, making communicating fast and easy. With its portability and bright 10-inch display, Accent 1000 is easy to access and provides an extensive vocabulary. It"s also available as a powerful host for our NuEye Tracking System. The Accent 1000 is configured as a dedicated device to meet the functional specifications of the Medicare/Medicaid funding requirements.

Accent 1400
Prentke Romich Company (PRC)
Price: $7595
Device: keyboard emulator, switch, speech output, speech trainer
Disability: cognitive, learning, physical, speech
Operating System: Windows, Mac
Accent 1400 is a dedicated speech-generating device (SGD) that offers user-friendly features to make communicating fast and easy for individuals with speech impairments. The large 14" screen is the perfect choice for individuals with complex access needs or those who want larger icons. The Accent 1400 also offers multiple access options and accommodates the NuEye Tracking System and the NuPoint Head-tracking System. The Accent 1400 is configured as a dedicated device to meet the functional specifications of the Medicare/Medicaid funding requirements.

Accent 800
Prentke Romich Company (PRC)
Price: $6595
Device: keyguard, switch, dedicated communicator, speech output, speech trainer
Disability: cognitive, learning, physical, speech
Operating System: Windows, Mac
Accent 800 is a dedicated SGD, locked from running Windows applications meeting Medicare and Medicaid funding guidelines. The Accent 800 offers advanced functionality and user-friendly features, making communicating fast and easy. It's the smallest and most portable PRC device that offers Unity , the proven language system from PRC.

Acrobat HD - mini ultra 13.3
Enhanced Vision
Price: $2525 - $2525
Device: large print
Disability: vision
This flexible 3-in-1 video magnifier with a built-in 13.3 battery operated monitor is ideal for near, distance and self-viewing. Rotate the camera for reading, writing, grooming and magnifying images at distances. Acrobat is perfect for work, school or home and its small compact size make it easy to transport.

Acrobat HD - mini ultra 13.3 w/ Rolling Case
Enhanced Vision
Price: $2595 - $2595
Device: large print
Disability: vision
This flexible 3-in-1 video magnifier with built-in 13.3 battery operated monitor is ideal for near, distance and self-viewing. Rotate the camera for reading, writing, grooming and magnifying images at distances. Acrobat is perfect for work, school or home. A small compact size & case make it easy to transport.

Acrobat HD ultra Arm w/13.3 Monitor
Enhanced Vision
Price: $2345 - $2345
Device: large print
Disability: vision
A flexible long or optional short arm offered with a 13.3 battery operated monitor, this 3-in-1 video magnifier is ideal for near, distance and self-viewing. Rotate the camera for reading, writing, grooming and magnifying images at distances. Acrobat offers a complete system for those at work, school or home.

Acrobat HD ultra LCD 20
Enhanced Vision
Price: $2295 - $2295
Device: large print
Disability: vision
This flexible 3-in-1 video magnifier is ideal for near, distance and self-viewing. By rotating the camera, you can read, write, groom and magnify images at any distance. The Acrobat offers a complete system for those at work, school or home. Offering a 20 high resolution HD LCD.

Acrobat HD ultra LCD 20 w/ Rolling Case
Enhanced Vision
Price: $2380 - $2380
Device: large print
Disability: vision
This flexible 3-in-1 video magnifier is ideal for near, distance and self-viewing. By rotating the camera, you can read,

write, groom and magnify images at any distance. The Acrobat offers a complete system for those at work, school or home. Offering a 20 high resolution HD LCD & Case.

Acrobat HD ultra LCD 22
Enhanced Vision
Price: $2495 - $2495
Device: large print
Disability: vision
This flexible 3-in-1 video magnifier is ideal for near, distance and self-viewing. By rotating the camera, you can read, write, groom and magnify images at any distance. The Acrobat offers a complete system for those at work, school or home. Offering a 22 high resolution HD LCD.

Acrobat HD ultra LCD 22 w/ Rolling Case
Enhanced Vision
Price: $2580 - $2580
Device: large print
Disability: vision
This flexible 3-in-1 video magnifier is ideal for near, distance and self-viewing. By rotating the camera, you can read, write, groom and magnify images at any distance. The Acrobat offers a complete system for those at work, school or home. Offering a 22 high resolution HD LCD & Case.

Acrobat HD ultra LCD 24 w/ Rolling Case
Enhanced Vision
Price: $2800 - $2800
Device: large print
Disability: vision
This flexible 3-in-1 video magnifier is ideal for near, distance and self-viewing. By rotating the camera, you can read, write, groom and magnify images at any distance. The Acrobat offers a complete system for those at work, school or home. Offering a 24 high resolution HD LCD & Case.

Acrobat HD ultra LCD 24"
Enhanced Vision
Price: $2695 - $2695
Device: large print
Disability: vision
This flexible 3-in-1 video magnifier is ideal for near, distance and self-viewing. By rotating the camera, you can read, write, groom and magnify images at any distance. The Acrobat offers a complete system for those at work, school or home. Offering a 24 high resolution HD LCD & Case.

Acrobat HD ultra LCD 27"
Enhanced Vision
Price: $2995 - $2995
Device: large print
Disability: vision

This flexible 3-in-1 video magnifier is ideal for near, distance and self-viewing. By rotating the camera, you can read, write, groom and magnify images at any distance. The Acrobat offers a complete system for those at work, school or home. Offering a 27 high resolution HD LCD.

Acrobat HD ultra Long or Short Arm
Enhanced Vision
Price: $1995 - $1995
Device: large print
Disability: vision
Offered with a flexible long or optional short arm, this 3-in-1 video magnifier is ideal for near, distance and self-viewing. By rotating the camera, you can read, write, groom and magnify images at any distance. The Acrobat offers a complete system for those at work, school or home.

Adapt-It Pack
Adaptivation, Inc.
Price: $64 - $64
Device: switch, environmental control
Disability: cognitive, learning, physical
Our simple-to-use Adapt-It Pack has everything needed to make a battery-operated toy switch accessible. The Adapt-It Pack includes: Mini Pal Pad, Battery Interruper, battery-operated toy (two AA batteries included) and easy-to-follow photo instructions

Price: $5 - $6.5
Device: environmental control
Disability: physical, vision
AT Fishing lure 3 pack is the easiest threading jig on the planet. It is great for people with vision or physical disabilities.

AT Ultra Light 1 HD Switch
Assistive Technology Engineering and Consultation Inc. (Atec)
Price: $19.95
Device: switch
Disability: physical
The Ultra Light 1 HD Switch is an all purpose accessible Switch with light activation force and tactile and audible feedback, reusable sticky base, six colorful, cleanable and durable switch tops. It is perfect for someone with limited range of motion to allow control of any device from Xbox adaptive controller, computers and AAC to toys and ECUs.

AT Ultra Light 1 STD Switch
Assistive Technology Engineering and Consultation Inc. (Atec)
Price: $21
Device: switch
Disability: physical
The Ultra Light 1 STD Switch is an all purpose accessible Switch with Normal activation force and tactile feedback, reusable sticky base, six colorful, cleanable and durable switch tops. Its low profile makes it ideal for people with limited finger movement and it is affordable.

AT Ultra Light Cheek Switch
Assistive Technology Engineering and Consultation Inc. (Atec)
Price: $49.95
Device: switch
Disability: physical
The AT Ultra Light Cheek Switch is a wearable switch activated with cheek, chin, or head movement. it has light activation force with tactile and audible feedback, It is perfect for someone with limited range of motion to allow control of any device from Xbox adaptive controller, computers and AAC to toys and ECUs.

AT Ultra Light Chin Switch
Assistive Technology Engineering and Consultation Inc. (Atec)
Price: $49.95
Device: switch
Disability: physical
This is a wearable switch that mounts around the neck to provide chin switch control. It has light activation force, tactile and audible feedback, It is perfect for someone with limited range of motion to allow control of any device from Xbox adaptive controller, computers and AAC to toys and ECUs.

AT Ultra Light Hand Switch
Assistive Technology Engineering and Consultation Inc. (Atec)
Price: $49.95
Device: switch
Disability: physical
This is a wearable switch that mounts around the hand to provide finger switch control. It has light activation force, tactile and audible feedback, It is perfect for someone with limited range of motion to allow control of any device from Xbox adaptive controller, computers and AAC to toys and ECUs.

AT Ultra Light Hand Switch Array
Assistive Technology Engineering and Consultation Inc. (Atec)
Price: $89.95 - $195.95
Device: switch
Disability: physical
The AT Ultra Light Hand Switch Array connected to an Xbox adaptive controller or Computer Switch Interface (CSI) is the perfect computer and game interface. If you have reduced movement this is a great solution.

AT Ultra Light HD Finger Switch
Assistive Technology Engineering and Consultation Inc. (Atec)
Price: $49.95
Device: switch
Disability: physical
This is a wearable switch that fits like a ring around your finger to provide switch control. It has light activation force, tactile and audible feedback, It is perfect for someone with limited range of motion to allow control of any device from Xbox adaptive controller, computers and AAC to toys and ECUs.

AT Ultra Light Wrist Switch
Assistive Technology Engineering and Consultation Inc. (Atec)
Price: $69.95
Device: switch
Disability: physical
The AT Ultra Light Wrist Switch is a wearable switch requiring very little movement to activate, and has light activation force with tactile and audible feedback, It is

perfect for someone with limited range of motion to allow control of any device from Xbox adaptive controller, computers and AAC to toys and ECUs.

Attainment Talker 24
Attainment Company, Inc.
Price: $39
Device: speech output
Disability: cognitive, learning, speech
Great sound quality and volume on this 24 message voice output device. Each message area is 3/4 inch. Device size 12 3/8 x 2 1/4 x 1/2-inch. Two AAA batteries included.

Attainment Talker 6
Attainment Company, Inc.
Price: $39
Device: speech output
Disability: cognitive, learning, speech
Great sound quality and volume on this six message voice output device. Each message area is 1 1/2 x 1 5/8-inch. Device size 12 3/8 x 2 1/4 x 1/2 inch. Two AAA batteries included.

Attendant Alert
Adaptive Switch Laboratories, Inc.
Price: $570
Device: environmental control
Disability: physical
The ASL 522 can be activated by a single switch which makes a high pitch beep until the switch is no longer activated. It can either be powered by a 9 volt battery or a power wheelchair. Switch not included.

Attendant Control Device
Adaptive Switch Laboratories, Inc.
Price: $642
Device: environmental control
Disability: physical
The ASL 510 is a four directional digital attendant override with D9 pin for ASL digital attendant port with reset/mode change capability. When in drive mode the reset switch when activated will perform as a passive stop switch. This device will work in conjunction with the digital drive control.

Balloon Switch
Technical Solutions Australia
Price: $300
Device: switch, switch interface, environmental control
Disability: physical
Operating System: Windows, Mac, Android
An extremely sensitive squeeze switch, the Balloon Switch uses electronic circuitry to analyze tiny squeezing actions and produce a controlled switch signal. Intended for people with extremely weak movement. Additional details at .

BAT Keyboard
Infogrip, Inc.
Price: $199
Device: alternative keyboard
Disability: physical, vision

Operating System: Windows, Mac
A one-handed, compact keyboard that replicates all the functions of a full size keyboard with greater efficiency and convenience. Easy to learn and use. Letters, numbers and commands are simple key combinations/chords that you can master in no time.

Battery Device Adapter
AbleNet, Inc.
Price: $15
Device:
Disability: cognitive, physical
Operating System: Windows, Mac
Convert any battery operated toy or appliance into a switch activated device. Just place the copper disc between the battery contact and a battery in the device, connect a switch and your students are ready for action. How to guide included.

Battery Interrupter
Adaptivation, Inc.
Price: $14
Device: switch, environmental control
Disability: cognitive, learning, physical
The Battery Interrupter is used to modify battery-operated devices and toys for switch input. It has a standard 3.5 mm jack and comes in two sizes (for AA & AAA and C & D batteries).

Battery Interrupter
Adaptive Tech Solutions
Price: $11.96 - $13
Device: switch interface
Disability: physical
Insert our battery interrupter between AA / AAA, or C/D batteries to make most items switch enabled. Our disks have been coated to prevent corrosion so the adapters can be used for years.

Beam
Origin Instruments Corp.
Price: $149
Device: switch, switch interface
Disability: physical
Operating System: Windows, Mac, iOS, Android, Chrome
Beam is a wireless switch transmitter that can be paired with a HeadMouse or Swifty. When used with the HeadMouse, Beam allows adaptive switch users to make mouse clicks wirelessly. Swifty is a USB switch interface with wireless receiver. Up to three switches can be plugged into Beam.

Bee-Bot
Terrapin Software
Price: $89.95 - $89.95

Disability: learning, physical
Bee-Bot is a colorful, sturdy little robot that follows commands entered via built-in command buttons and is a fun way for young children to learn coding. Press arrow keys for forward, back, left and right to create a program and then press GO to

send Bee-Bot on its way. Lights and sounds confirm each command. Bee-Bot can execute up to 40 commands at a time.

BG Remote Attendant Control
Adaptive Switch Laboratories, Inc.
Price: $1078 - $1468
Device: switch interface
Disability: physical
The ASL 520BG allows a parent/aide to have control over one or more directions of a power wheelchair by a wireless control. It can be used as a training tool or as a full attendant control device and is compatible with all wheelchair electronics that allow for digital control.

BIG Blue-tooth Keyboard
RJ Cooper and Associates
Price: $199 - $199
Device: alternative keyboard, keyguard
Disability: cognitive, learning, physical, vision
Operating System: Windows, Mac, iOS, Android
Large/big/oversize key and print keyboard, colored-rows or yellow keys, for iPad. Bluetooth/wireless, can be used with iPad, Android, or any computer w/Bluetooth. Comes with stand to angle keyboard at 70 degrees for one-handed hunt-and-peckers. Keyboard available for tremors or accidental keypress prevention.

Big Buddy Button
AbleNet, Inc.
Price: $65
Device: switch
Disability: cognitive, learning, physical
Made for persons with moderate-severe upper extremity and motor disabilities. Features a 4-inch target area and can be activated with just 5.3 ounces of force. Auditory and tactile feedback. Activate by pressing anywhere on the large, colorful surface. Available in red, yellow, green, and blue.

Big Red Switch
AbleNet, Inc.
Price: $65
Device: switch
Disability: cognitive, learning, physical, vision
The Big Red switch offers a 5-inch activation surface with tactile and auditory feedback, but with a twist. Our iconic switch tops can be removed and replaced with the color of your choice: Red, Blue, Yellow or Green. It's all up to your own style, tastes or specific vision needs.

BIG Step-by-Step
AbleNet, Inc.
Price: $165 - $165
Device: switch, dedicated communicator, speech output
Disability: cognitive, learning, physical, speech
Record any series of messages directly into the BIG Step-by-Step and press its activa-

tion surface for the first message. Press again and BIG Step-by-Step automatically steps to the next message. With two minutes of recording time, you can record as many messages as you need, divided any way you like.

Big Talk Triple Play
Enabling Devices
Price: $184.95
Device: dedicated communicator, speech output, speech trainer
Disability: cognitive, learning, physical, speech
Versatile communicator with single, sequential and random message capabilities. Push the round plate and your prerecorded words can be played back in single, sequential or random order. Device has four levels. Record up to 75 seconds per level for a total of 300 seconds.

BigKeys Keyboards
AbleNet, Inc.
Price: $149 - $149
Device: alternative keyboard, environmental control
Disability: cognitive, physical, vision
Operating System: Windows, Mac
BigKeys keyboards for computer access provide users large, high-visibility keys that are easy to see. In addition, for users who lack fine motor movements, the larger keys provide a larger strike area that is easier to access compared to standard keyboards.

BIGmack Communicator
AbleNet, Inc.
Price: $135
Device: switch, dedicated communicator, speech output
Disability: cognitive, learning, physical, speech
Record any message directly into this single message tool and press its large activation surface for crystal clear, single message playback. BIGmack communicator has a large, 5-inch activation surface. Students connect with teachers, classmates and the world around them.

BIGtrack
AbleNet, Inc.
Price: $85 - $85
Device: mouse emulator, switch, environmental control
Disability: cognitive, physical
Operating System: Windows, Mac
BIGtrack's 3-inch trackball, makes it the largest trackball mouse available, requiring less fine motor control than standard trackballs and is ruggedly built. BIGtrack has left and right mouse click button behind the trackball avoiding unwanted mouse clicks. BIGtrack allows for 2nd mouse connection; they can be connected allowing simultaneous participation.

Bite Switch - G-Switch Series
GlassOuse Assistive Device
Price: $49

Device: switch
Disability: cognitive, learning, physical
Operating System: Windows, Mac, iOS, Android, Chrome, Other
Bite Switch comes with a 3.5mm jack and it can be paired perfectly with GlassOuse v1.2 or any kind of adapted device offering 3.5mm jack input as a switch control. Covered with a non-carcinogenic material, silicone cover protects the switch module and it is easy to change and clean.

BJOY Button
Westminster Technologies
Price: $400 - $445
Device: mouse emulator
Disability: physical
Operating System: Windows, Mac
The BJOY Button offers one of the easiest ways to access your computer. This device has been specially designed to offer access to mouse functions through the use of eight buttons. The BJOY Button uses 4 big buttons to control the cursor's movements and 4 big buttons to enable options and actions of mouse clicks. The action for each button can be completely customized through the BJ Software. Computer/laptop NOT included. Compatibile with computers, tablets and smartphones which are cursor-controlled. Set up of the device must be done on a Windows PC.

BJOY Ring Kit
Westminster Technologies
Price: $614 - $849
Device: mouse emulator
Disability: physical
Operating System: Windows, Mac
The BJOY Ring Kit offers the ability to use the joystick of your wheelchair as a mouse control for your computer. This kit includes the BJOY Ring, two switches for left and right click ability, and the appropriate adapter to connect the switch to the BJOY Ring. Wired and wireless versions of this product are available. Computer/laptop NOT included. Compatibile with computers, tablets and smartphones which are cursor-controlled. Set up of the device must be done on a Windows PC.

BJOY Stick
Westminster Technologies
Price: $260 - $465
Device: mouse emulator
Disability: physical
Operating System: Windows, Mac
Make moving your mouse easier with your choice of BJOY Stick. Choose from two different designs for ease of use based on upper body strength and range of motion. BJOY Software allows these devices to be tailored to the user's needs and capabilities. Use the BJOY Software in order to modify the mouse operations like pointer speed, orientation, button functions, etc. All settings are saved in the BJOY Device so you take them with you wherever you

go. Computer/laptop NOT included. Compatibile with computers, tablets and smartphones which are cursor-controlled. Set up of the device must be done on a Windows PC. Joystick control choices are Progressive or Microswitch. Progressive movement allows the joystick or mouse to be moved in all directions. Microswitch movement only allows movement in 4 or 8 directions. This works like a compass - North, South, East, West for 4 movement points and for 8 movement points Northeast, Northwest, Southeast, and Southwest are added.

Blaze ET DAISY Multi-Player with OCR
HIMS inc.
Price: $795
Device: optical character recognition, speech output
Disability: cognitive, vision
Blaze EZ is a digital book player with WiFi and OCR camera for the visually impaired. It features stand-alone, single-button OCR capture and read aloud capabilities. Simple navigation gives quick access to music, radio, books and printed materials. Now supports output to HIMS Braille displays.

Blaze EZ DAISY Multi-Player with OCR
HIMS inc.
Price: $595
Device: optical character recognition, speech output
Disability: cognitive, vision
Blaze EZ is a digital book player with WiFi and OCR camera for the visually impaired. It features stand-alone, single-button OCR capture and read aloud capabilities and is about the size of a deck of cards. Simple navigation gives quick access to music, radio, books and printed materials.

Blue-Bot
Terrapin Software
Price: $119.95
Device: dedicated communicator
Disability: cognitive, physical, speech
Operating System: Windows, Mac, Android
Blue-Bot is a Bee-Bot robot with a Bluetooth connection. Use the command keys to send Blue-Bot forward and back or turn left and right or command it from an Android or iOS tablet with the free downloadable apps.

Blue-Bot Tactile Reader
Terrapin Software
Price: $129.95 - $129.95
Device: alternative keyboard
Disability: vision
The Blue-Bot TacTile Reader is a unique, hands-on programming device to control Blue-Bot. Press the connect button to pair Blue-Bot with the TacTile Reader. Then place individual tiles, each representing a Blue-Bot command, sequentially on

the TacTile Reader. Press the GO button and watch Blue-Bot move step-by-step through the program while the TacTile Reader lights up each command as Blue-Bot performs it. Want to change the program? Just switch the order of the tiles and press GO again. The TacTile Reader combines the excitement of Blue-Bot with a concrete, hands-on immersion in coding.

Blue2
AbleNet, Inc.
Price: $185 - $185
Device: mouse emulator, switch, environmental control
Disability: cognitive, physical, speech
Operating System: Windows, Mac, iOS, Android, Chrome
The Blue2 switch provides a sleek, modern design with new features that make it compatible with all switch accessible apps. Also new to Blue2 is the ability to toggle the on-screen keyboard on and off for iOS devices and a built-in rechargeable battery.

BlueLites
ATE
Price: $5200 - $6000
Device: alternative keyboard, mouse emulator, switch, environmental control, speech output
Disability: physical, speech
Operating System: Windows
BlueLites turns any PC with bluetooth into a communication device. It provides loudspeakers and has built-in infrared and RF transmitter. You can use your own familiar software on any (tablet) PC of your choice.

Bluetooth Small Switch
RJ Cooper and Associates
Price: $99 - $99
Device: switch, switch interface
Disability: physical
Operating System: Windows, Mac, iOS, Android, Chrome
A 3" round, green, Bluetooth switch for iPad, Android, Mac, or Windows. Capable of controlling switch-friendly apps, Switch Control compatible apps, the Music app, Camera, and other standard apps.

Bluetooth Super-Switch
RJ Cooper and Associates
Price: $184 - $184
Device: switch, switch interface
Disability: physical
Operating System: Windows, Mac, iOS, Android, Chrome
Large (5"), round switch with built-in interface. Works with all switch-friendly apps, and Switch Control compatible ones.

Box One 4 All
Tech4Freedom
Price: $400 - $500
Device:
Disability: vision
Operating System: iOS, Android
Small device fitted with sensors obtaining and analysing surroundings information

and transmitting it to the user through his/her own smartphone.

Braille EDGE 40
HIMS inc.
Price: $2495
Device: alternative keyboard, braille input, braille output
Disability: vision
Operating System: Windows, Mac, Android
This 40-cell refreshable Braille display is easy to pair by USB or bluetooth to your PC, Mac, iOS or Android device and has basic notetaker capabilities. Built-in applications include notepad, scheduler, alarm, clock, calculator, stopwatch and timer. The battery lasts up to 20 hours on a single charge.

Braille Sense Polaris
HIMS inc.
Price: $5795
Device: braille input, braille output, printer
Disability: hearing, speech, vision
Operating System: iOS, Android
BrailleSense Polaris offers a new standard in blind-friendly applications with the latest in cutting edge technology. We've kept the traditional computer interface that has contributed to the popularity of other BrailleSense models. BrailleSense Polaris supports Google Apps, making it easy to utilize Google services like Drive, Docs, Sheets, and Slides as millions of other students do everyday.

Braille Sense U2
HIMS inc.
Price: $4595
Device: braille input, braille output, speech output
Disability: hearing, vision
Operating System: Windows, Mac, Android
This 32-cell Braille notetaker has exclusive features including Excel viewer, Twitter, Quick Browser, YouTube and advanced word processor. Terminal clipboard allows for composing text on Braille Sense then sending completed block together to iPhone, iPad, Android or computer. LCD display allows parents and teachers to assist or deaf-blind to communicate.

Braille Sense U2 MINI
HIMS inc.
Price: $2995
Device: braille input, braille output, speech output
Disability: vision
Operating System: Windows, Mac, Android
This 18-cell Braille Notetaker has advanced features for students and professionals. Exclusive applications include Excel Viewer, Twitter, Quick Browser, YouTube, advanced word processor and Terminal Clipboard for composing text on Braille Sense and sending completed block of text all at once to iPhone, iPad, android device or computer.

Braille Sense U2 QWERTY
HIMS inc.
Price: $4595
Device: alternative keyboard, braille output, speech output
Disability: vision
Operating System: Windows, Mac, Android
This 32-cell Braille Notetaker has a QWERTY keyboard and advanced features for students and professionals. Exclusive applications include Excel Viewer, Twitter, Quick Browser, YouTube, advanced word processor and Terminal Clipboard for composing text on Braille Sense then sending completed block all at once to iPhone, iPad, android device or computer.

BrailleNote Touch
HumanWare
Price: $3995 - $5495
Device: braille input, braille output
Disability: vision
Operating System: Android
HumanWare's newest braille notetaker. It combines the benefits of KeySoft and braille literacy of a traditional note taker with the efficiency and power of a modern tablet. Available with a 32 cell braille display or an 18 cell braille display

BraillePlace
Enabling Technologies Company
Price: $49995
Device: braille output, speech output
Disability: vision
Operating System: Windows
BraillePlace is a high capacity interpoint commercial embosser that produces Braille at 300 cps.

Braillo 300 S2
American Thermoform Corporation
Price: $23000
Device: braille output, printer, speech output
Disability: vision
Operating System: Windows, Mac
Braillo 300 Braille embosser is a reliable and dependable embosser for true Braille production. At 300 CPS using continuous Braille paper, it offers exceptional Braille quality and consistency. Its combination of speed, durability, reliability are the reasons why it is used by most of the largest Braille production facilities.

Braillo 450 S2
American Thermoform Corporation
Price: $35000
Device: braille output, printer
Disability: vision
Operating System: Windows, Mac
The Braillo 450 S2 is an ideal embosser for those that need increased Braille output over the 300 S2, but not the speed and scalability of the 600 S2. It shares the same chassis as the 300 S2, but internal components are upgraded to ensure superior dot quality and consistency at these higher

embossing speeds. Using continuous/fanfold Braille paper and embossing at 450 CPS (1,350 pages per hour), it will be a trusted, high speed asset to your business

Braillo 600 S2
American Thermoform Corporation
Price: $45000
Device: braille output, large print, printer, speech output
Disability: vision
Operating System: Windows, Mac
The Braillo 600 S2 Braille embosser is the faster, more robust counterpart to the Braillo 450 S2. Embossing at 600 CPS (1,800 pages per hour), it is the fastest continuous/fanfold embosser available, and it offers remarkable dot quality and dependability. Its combination of speed, reliability and quietness are the reasons why its predecessor, the Braillo 600, is used across the world by most of the largest Braille production facilities. Unique to the 600 S2 is that it is built upon a chassis that can be upgraded to a Braillo 600 SR as your Braille production needs expand.

Braillo 600 SR
American Thermoform Corporation
Price: $79500
Device: braille output, large print, printer, speech output
Disability: vision
Operating System: Windows, Mac
The Braillo 600 SR braille embosser meant for large volume Braille production. This Braille embosser is unique, as it uses paper rolls instead of continuous tractor feed paper. Using paper rolls helps to save money on paper expenses and also eliminates the need for a burster and its operator.

Braillo 650 SF
American Thermoform Corporation
Price: $128000
Device: braille output, printer, speech output
Disability: vision
Operating System: Windows, Mac
The Braillo 650 SF is the worlds only fully automated Braille book production system. Send a file and pick up a finished, folded, covered and stapled book. The Braillo 650 SF makes on-demand Braille publishing possible.

Braillo 650 SW
American Thermoform Corporation
Price: $88000
Device: braille output, printer, speech output
Disability: vision
Operating System: Windows, Mac
Braille 650 SW Braille Embosser is an advanced Braille embosser that employs a paper cutter for two or four page-per-sheet format, and a stacking unit engineered to handle large format production. This machine is ideal for creating both magazines and textbooks.

BrainPort Vision Pro
Wicab, Inc.
Price: $10000
Device: dedicated communicator
Disability: vision
The BrainPort Vision Pro is an oral electronic vision aid that provides electrotactile stimulation to aid profoundly blind patients in orientation, mobility, and object recognition as an adjunctive device to other assistive methods such as the white cane or a guide dog. The device is a non-surgical solutions for profoundly blind individuals.

Bright Box
Adaptivation, Inc.
Price: $129 - $129
Device: switch
Disability: cognitive, learning, physical, vision
The Bright Box has a visual display that is activated when the user presses the top of the surface. The Bright Box can be used as a visual cue to aid in locating the device for persons with low vision or for any nighttime user.

Bright Box Tactile
Adaptivation, Inc.
Price: $149 - $149
Device: switch
Disability: cognitive, learning, physical, vision
The Bright Box Tactile has visual and tactile feedback. The visual feedback and tactile feedback can be employed independently of each other. The Bright Box Tactile can be used to activate any battery-operated device with a standard 1/8-inch jack.

Buddy Button
AbleNet, Inc.
Price: $65
Device: switch
Disability: cognitive, learning, physical
The Buddy Button provides tactile and auditory feedback, is 2.5-inches in diameter and requires a force of 7 ounces in the center and 5.3 ounces at periphery. Unsurpassed durability that now comes in seven great colors and designs.

Button Switch
Adaptive Switch Laboratories, Inc.
Price: $180
Device: switch
Disability: physical
The ASL 305 is a momentary switch that has an activation button the size of a dime and requires medium force for activation.

Calculator with keyguard
Turning Point Therapy and Technology, Inc.
Price: $75
Device: keyguard
Disability: physical
Casio large display/large button basic function calculator with keyguard.

CANDY 4 HD II Handheld Video Magnifier
HIMS inc.
Price: $595
Device: large print
Disability: vision
CANDY 4 HD is a handheld video magnifier that magnifies near or near distance up 1x - 20x. The flip-away handle lets you use it as a stand or handheld magnifier. Capture and save Up to 5 images. Easily customize 4 selectable color modes from a number of preset combinations.

CANDY 5 HD II Handheld Video Magnifier
HIMS inc.
Price: $695
Device: large print
Disability: vision
CANDY 5 HD is a handheld video magnifier that magnifies near or near-distance 1x-22x. The three-position handle can be used left or right-handed as a stand or handheld magnifier. Mirror view mode is great for grooming. Image capture lets you save up to 5 images. User-customize 4 selectable color modes.

Chat Fusion 10
Saltillo Corporation
Price: $4895 - $6395
Device: keyguard, switch, switch interface, speech output
Disability: speech
Operating System: Android
Chat Fusion is driven by our powerful Chat software, but there is so much more. Fusion offers multiple access methods including Chat Point (optional headpointing), a front and rear camera, and extended battery life. Single or dual switch and advanced scanning features are incorporated into the device.

Cheap Talk 8 - 6 Level Communicator w/Overlay Option
Enabling Devices
Price: $327.95
Device: dedicated communicator, speech output, speech trainer
Disability: cognitive, learning, physical, speech
Our 6-Level Communicator is ideal for teaching language skills. Record 48 six-second messages on six levels. Messages can be recorded and rerecorded as often as you wish. Available in three colors.

Chester Mouse
AbleNet, Inc.
Price: $22
Device: mouse emulator
Disability: cognitive, learning, physical
Operating System: Windows, Mac, Android
Young children can be confused about whether to use the right or left button on a mouse and using drag-and-drop and click-and-move can be frustrating. Welcome Chester Mouse, a tiny single-button mouse with no scroll wheel, that's easy to control and made of rugged plastic for strength and durability.

Choice 4 Communicator
Enabling Devices
Price: $310.95
Device: dedicated communicator, speech output
Disability: cognitive, hearing, learning, physical, speech, vision
A transitional communicator. Start with one field, then add two, three and then four fields. Sequentially illuminate objects, photographs or icons with its super bright lights. Direct select or single switch scanning with auditory cueing. Twelve levels with a total of 300 seconds record time.

Clip Talker
Attainment Company, Inc.
Price: $12
Device: speech output
Disability: cognitive, learning, speech
Recordable single message voice output device. Eight seconds record time. Measures 1.5 x 2 x.5 inch. Includes clip-on holder and batteries.

Closed Caption Display Units
Compusult Limited
Price: $2350 - $8995
Device: large print
Disability: hearing
Operating System: Windows
Compusult's Caption Display units provide large format LED output of closed captions from analog video sources, captioning/transcription software and Compusult's Caption Display software. The Caption Displays provide four lines of 32 characters, with character heights ranging from 0.7- to 4-inches.

Communication Builder
Enabling Devices
Price: $269.95
Device: dedicated communicator, speech output, speech trainer
Disability: cognitive, learning, physical, speech
The Communication Builder is equipped with five easy to change frames, which allows you to refine communication choices as the person develops new skills. Record your messages with the simplest push of a button. Light, durable and easy to carry with a built-in handle. Total record time is 300 seconds.

Compact Switch
RJ Cooper and Associates
Price: $49
Device: switch
Disability: cognitive, physical, speech
Round 1-inch compact switch that makes a nice click sound when activated.

Connect 12
HumanWare
Price: $2695 - $2995
Device: alternative keyboard, optical character recognition, large print, speech output
Disability: vision
Operating System: Android
The New Prodigi Connect 12 is more than a powerful digital magnifier with desktop and distance viewing. This ideal solution for students of all ages opens the window to an intelligent Android world, allowing free and open access to more than a million apps.

Cordless Switch Interface
RJ Cooper and Associates
Price: $99
Device: switch interface
Disability: physical
Operating System: Windows, Mac
Provides two switch inputs for plugging switches into a computer. Once plugged in, the switch(es) become standard mouse clicks. With installation of the accompanying SwitchHopper software you can configure each button to be any mouse-button event or keystroke that you would like.

Crick USB Switch Box
Crick Software, Inc.
Price: $159
Device: switch interface
Disability: physical
Operating System: Windows, Mac
Plugs into your computer and connects your switches. It will work instantly with Clicker and DocsPlus, with no setup required. For other switch accessible software, we have included USB Keys software, a small application that converts switch presses from the USB switch box into key presses or mouse clicks.

Cushion Grip Switch
Enabling Devices
Price: $46.95
Device: switch
Disability: cognitive, hearing, learning, physical, speech, vision
A fantastic sensitive switch that fits most hands. Just slip it over your hand and you can use a palmer grasp or roll it on a tray or tabletop to activate any device or toy.

DaVinci HD/OCR
Enhanced Vision
Price: $2995 - $2995
Device: optical character recognition, large print, speech output
Disability: vision
DaVinci is a high performance desktop video magnifier, featuring Full HD, selective text-to-speech OCR and a 3-in-1 camera. Experience the joy of reading again with high definition color and contrast, crystal clear images, and vibrant colors. DaVinci will read any printed text aloud with the push of a button.

DaVinci Pro HD/OCR
Enhanced Vision
Price: $3795 - $3795
Device: optical character recognition, large print, speech output
Disability: vision
DaVinci Pro is a high performance desktop video magnifier, featuring a 3-in-1 camera, Full HD & selective text-to-speech OCR. Experience the joy of reading with high definition color and contrast, crystal clear images, and vibrant colors. DaVinci Pro will read any printed text aloud with the push of a button

DigiCite
Compusult Limited
Price: $2395 - $9995
Device: braille output, large print, speech output
Disability: vision
Operating System: Windows
DigiCite speaks electronic messages displayed on a single piece of fixed, in-place, business equipment. DigiCite acquires images of the message display and converts these into speech output and/or large print, high contrast display output. Blind and visually impaired persons can then independently work with the adapted business equipment.

Dipsy
Adaptivation, Inc.
Price: $49 - $49
Device: switch
Disability: cognitive, learning, physical
This tilt-sensitive switch can be attached to the head, arm, finger or any appropriate object and can be used for posture training. The Dipsy is activated by a 30-degree tilt which makes it less prone to false activation. Includes a headband and two finger mounts.

Drink-Partner Insulated Tumbler
Mealtime Partners, Inc.
Price: $69.95 - $69.95
Device:
Disability: cognitive, physical
The Drink-Partner Drinking System can accommodate an Insulated Tumbler in the cup holder, as an alternate drink container to the bottle that is provided with the Drink-Partner Drinking System. The Insulated Tumbler is an assistive drinking aid that provides hands free drinking for individuals with disabilities. The Drink-Partner Insulated Tumbler will fit in any of the Mealtime Partners Front Mounted Drinking Systems Cup Holders as well as the Drink-Partner Cup Holder. The Insulated Tumbler holds 16-ounces of hot or cold liquid. It keeps liquids hot or cold for several hours. The tumbler has a screw-

on stainless steel lid that has flex tubing integrated into it. The flex tube contains the drinking tube from which the user drinks. Once positioned, the flex tube will hold the drinking tube in position, until it is adjusted.

Dual Button Mechanical Switch with Stereo Plug
Adaptive Switch Laboratories, Inc.
Price: $360
Device: switch interface
Disability: physical
The ASL 524 with Stereo Plug will allow you to use both mechanical switches with one switch port. For instance right and left mouse click or recline and tilt.

Dual Switch Input Adaptor
Adaptive Switch Laboratories, Inc.
Price: $20
Device: switch interface
Disability: physical
The ASL 817 allows two mono port switches to have the same mono output or can allow for two output switch functions from one single switch port.

Dual Switch Latch and Timer
AbleNet, Inc.
Price: $135
Device: switch, environmental control
Disability: cognitive, physical
Operating System: Windows, Mac
Two SLATS in one. This unit allows two students to activate their own devices simultaneously. The Dual Switch Latch and Timer features the same modes of control as our single SLAT, allowing you to choose the amount of time an activity requires to ensure student success. Two toy/appliance cables included.

Dynavox 3100 Interface Cable
Adaptive Switch Laboratories, Inc.
Price: $190
Device: environmental control
Disability: physical
The ASL 802-D Dynavox 3100 Interface Cable converts the four directional commands from the ECU port into separate mono plugs. This interface cable is especially designed for the Dynavox 3100 system only.

E-bot ADV iPad Compatible Portable Video Magnifier with OCR
HIMS inc.
Price: $2995
Device: optical character recognition, large print, speech output
Disability: cognitive, learning, vision
Operating System: Windows, Mac, Android
E-bot ADV is a portable video magnifier that magnifies near or far wirelessly onto the screen of an iPad, PC laptop, Macbook or monitor. Use OCR to capture/read text aloud. E-bot folds for easy transport. A

built-in light sensor automatically adjusts image brightness. Adjust image by touch-screen or remote.

E-bot iPad Compatible Portable Video Magnifier
HIMS inc.
Price: $2495
Device: large print
Disability: vision
Operating System: Windows, Mac, Android
E-bot is a portable video magnifier that magnifies near or far wirelessly onto the screen of an iPad, PC laptop, Macbook or monitor. E-bot folds for easy transport between locations. A built-in light sensor automatically adjusts for a perfectly lit image. Adjust screen image by touchscreen or keyboard commands.

E-bot PRO iPad Compatible Portable Video Magnifier with Electronic Camera and OCR
HIMS inc.
Price: $3495
Device: optical character recognition, large print, speech output
Disability: cognitive, learning, physical, vision
Operating System: Windows, Mac, Android
E-bot PRO is an iPad compatible reading, writing and distance video magnifier with electronic camera movement, full-page OCR and SD-card slot. It's completely wireless and folds to the size of a shirt box for easy transport. Choose from 8 user-selectable color modes. Control camera by touchscreen, joystick remote or keyboard.

eeZee Mouse CURSOR
LaZee Tek
Price: $599
Device: mouse emulator
Disability: physical
Operating System: Windows, Mac, Android, Chrome, Other
Alternative computer access designed to work with the person's abilities; empowering them to access a computer and beyond. A tiny body sensor provides smooth accurate cursor control, worn anywhere from head to toe. This cost effective cursor control is compatible with all hardware and software; including all clicking software.

eeZee Mouse PRO
LaZee Tek
Price: $899
Device: mouse emulator
Disability: physical
Operating System: Windows, Mac, Android, Chrome, Other
Alternative computer access designed to work with the person's abilities; empowering them to access a computer and beyond. A tiny body sensor provides smooth accurate cursor control, worn anywhere

from head to toe. Clicking performed via microphone using sound detection. Compatible with all hardware and software. No software required.

eeZee Mouse SWITCH
LaZee Tek
Price: $749
Device: mouse emulator
Disability: physical
Operating System: Windows, Mac, Android, Chrome, Other
Alternative computer access designed to work with the person's abilities; empowering them to access a computer and beyond. A tiny body sensor provides smooth accurate cursor control, worn anywhere from head to toe. Utilizes most any type of external switches for clicking. Compatible with all hardware and software.

Egg Switch
Adaptive Switch Laboratories, Inc.
Price: $156
Device: switch
Disability: physical
The ASL 300 is a mechanical switch and features a seal that prevents foreign substances from entering the switch and interfering with operation. The base features screw insets for secure mounting. It comes in five different colors: black, red, blue, yellow and green.

eSight
eSight
Price: $15000
Device: alternative keyboard
Disability: vision
eSight is the only patented, assistive-device of its kind anywhere in the world. eSight is wearable, handsfree, portable - and most importantly, eSight is a non-surgical device. eSight is currently registered with the United States FDA and Health Canada.

ET Roller rolling floor stand
CJT Mounting
Price: $1125 - $1347
Device: speech output
Disability: physical, speech
No tools required! The only rolling floor stand with a 20 inch base that can hold an I15 at 5ft plus. The ET Roller's adjustable arm extends from 17 to 24 inches and can position your device from 6 inches off the ground up to 5ft plus. A TBO can be easily attach to provide a dual arm rolling stand.

Everest
HumanWare
Price: $4395 - $4395
Device: alternative keyboard, braille output
Disability: vision

84

LITTLE Step-by-Step Choice with Levels
AbleNet, Inc.
Price: $195 - $195
Device: switch, dedicated communicator, speech output
Disability: cognitive, learning, physical, speech
LITTLE Step-by-Step Choice with Levels provides an exciting option for easy-tech, quick-ready communication. Allowing you to skip a message without it playing in its entirety. Press the activation surface repeatedly, and skip multiple messages to get to your desired message. When you find it, release the activation surface to play the message.

LITTLE Step-by-Step Communicator
AbleNet, Inc.
Price: $165
Device: switch, dedicated communicator, speech output
Disability: cognitive, learning, physical, speech
With two minutes of recording time, you can record as many messages as you need. Users are empowered with the ability to communicate/participate more naturally. Each touch of the 2.5-inch activation surface plays/advances messages in sequence, or use the message repeat feature to replay one message in the series.

Little Step-by-Step GamePlay
AbleNet, Inc.
Price: $195 - $195
Device: switch, dedicated communicator, speech output
Disability: cognitive, learning, speech
Incorporating the Step-by-Step GamePlay into game-based instructional lessons enables students to learn basic skills such as eye-hand coordination, as well as more complex skills such as problem solving. Learning through games is not only highly motivating, but encourages collaboration, offering another way to interact and communicate with each other.

LITTLE Step-by-Step with Levels
AbleNet, Inc.
Price: $195
Device: switch, dedicated communicator, speech output
Disability: cognitive, learning, physical, speech
Record a series of messages to this speech generating device, then activate the 2.5-in/6.35-cm switch top to play each message back one at a time. Includes 4-minutes of record time, three recording levels, and supports the use of an external switch for alternative methods of access level.

LITTLEmack Communicator
AbleNet, Inc.
Price: $135
Device: switch, dedicated communicator, speech output
Disability: cognitive, learning, physical, speech
Introduce voice output devices to beginning communicators, while teaching cause-and-effect. Simply record any message directly into LITTLEmack for one touch, single message playback. Connect a toy or any other battery operated appliance for instant positive reinforcement.

Logan ProxTalker
LoganTech
Price: $2995
Device: speech output
Disability: cognitive, learning, speech
Operating System: Windows, Mac
The Logan ProxTalker is an augmentative communication device that offers the first moveable picture communication with a voice output. Encoded picture sound tags produce voice output when placed on any of the five device buttons and pressed. Tags can be customized with any image and sound.

Lucy
ATE
Price: $5200
Device: keyboard emulator, mouse emulator, switch, speech output
Disability: physical
Operating System: Windows
Lucy is a handsfree keyboard and mouse emulator. A fair to good head control with an amplitude of nearly an inch is enough to operate Lucy. It is very fast and due to its special layout highly comfortable. It is also suitable for ALS patients as a communication device.

MAGic Large Print Keyboard
Freedom Scientific, Inc.
Price: $79
Device: alternative keyboard, printer
Disability: vision
Operating System: Windows
Bold, high-contrast keys with oversized characters provide fast, accurate typing with less of the eye fatigue experienced when straining to locate keys on standard keyboards. The easy to-read keyboard and 22 dedicated MAGic keys make learning and using MAGic Screen Magnification Software easier than ever.

Max - Color or Black-and-White

Operating System: Windows, Mac, Android
VisionBoard 2 offers advantages to people who find it painful or difficult to use traditional keyboards by improving readability and reducing eyestrain with 1-in/2.54-cm keys and large, bold black-on-white letters/numbers. Low vision users can increase/improve capabilities with greater comfort and control. Features two USB 2.0 side ports and function keys.

VisionBoard Wireless
AbleNet, Inc.
Price: $60
Device: alternative keyboard, large print
Disability: learning, physical, vision
Operating System: Windows, Mac, Android
VisionBoard Wireless is a wireless keyboard that provides 1-in/2.5-cm available with either white lettering on black keys or black lettering on white keys. Compatible with Windows 98SE and newer, and MAC OS 10.1.5 and newer.ds.

VisuALS
VisuALS Technology Solutions
Price: $2700 - $2700
Device: voice recognition, dedicated communicator, speech output
Disability: physical, speech
Operating System: Windows
<p style="text-align: left;">VisuALS is an affordable assistive communication (eye tracking) device that allows people to communicate and stay connected with their world by using only their eyes. The VisuALS System is comprised of a tablet computer, eye tracking bar (purchased separately), bluetooth speaker, a case, a mount unit and proprietary software. All of these elements are pre-integrated by VisuALS before shipping to you to simplify initial setup. Features of the system include text-to-speech, web browser, notepad, home automation controls, commonly used phrases, and more.

VoiceCue
Attainment Company, Inc.
Price: $39
Device: speech output
Disability: cognitive, learning, vision
Auditory cueing - record up to five messages and set them to designated times. Settings can be every day of the week, five days of the week or just once a week. Lightweight and discrete. Includes clip-on holder and two AAA batteries. 2.5 x 4 inches.

VoicePal Levels
Adaptivation, Inc.
Price: $399 - $449
Device: speech output

Disability: cognitive, learning, physical, speech
The VoicePal Levels is a customizable communication device. Messages can be accessed through switches, direct selection, visual scanning, auditory scanning, and objects scanning via the external LED's. Sequential messaging and random messaging are also available features. The VoicePal Levels has four levels and 17 1/2 minutes of record time.

VR Trek
HumanWare
Price: $699 - $699
Device: alternative keyboard, speech output
Disability: vision
Operating System: Windows, iOS
The Victor Reader Trek combines the world renowned simple book reading and media playback experience of the VictorReader Stream with the navigation guidance technology found in the Trekker Breeze.

Wave Switch
Technical Solutions Australia
Price: $240 - $240
Device: switch
Disability: learning, physical, vision
An infrared light beam is reflected back to a sensor which triggers the switch any time you move your hand or any body part within about 5cm of the sensor.

Wearable Talker
Enabling Devices
Price: $136.95
Device: dedicated communicator, speech output, speech trainer
Disability: cognitive, learning, physical, speech
Wearable Talker is so versatile you can wear it on any part of your body, your wrist, forearm, or leg or place it on a wheelchair arm. Features: 20 seconds of recording time, 10 seconds per message, 2 messages.

Windows Compatible Keyboard and Keyguard Combination
Turning Point Therapy and Technology, Inc.
Price: $150 - $200
Device: keyguard, large print
Disability: physical, vision
Operating System: Windows
Keyboard and keyguard combination unit compatible with Windows. Also, available in large print.

Wireless IR Mouse Emulator
Adaptive Switch Laboratories, Inc.
Price: $1560 - $1680
Device: mouse emulator
Disability: physical
Operating System: Windows, Mac
ASL 550 and/or 551 a desktop wireless, infrared transmitter/receiver mouse emulator with three switch configuration. Full mouse emulation is achieved with

only three switches. The five switch version allows the wheelchair joystick to become a joystick operated mouse. Computer access from the wheelchair is achieved through a wireless infrared connection.

Wireless Switch Interface
QuizWorks Company
Price: $230 - $230
Device: switch interface
Disability: physical
Operating System: Windows, Mac
Wireless switch input to a computer from 100 feet. Patented RF system does not require line-of-sight to the computer. Uses standard operating system keyboard and mouse USB-drivers. Plug in one to five switches and choose from 40 keystrokes or mouse clicks to run any single/multiple switch software programs.

Wireless Switch Transmitter and Receiver
Adaptive Switch Laboratories, Inc.
Price: $800
Device: switch, switch interface
Disability: physical
The ASL 503 allows you to transmit up to five switches to a remote location. This is achieved with a 12 volt transmitter/receiver that has five mono ports as inputs on the transmitter and five mono outputs on the receiver. Switches not included.

Wobble Switch
Adaptive Switch Laboratories, Inc.
Price: $180
Device: switch
Disability: physical
The ASL 304A is a single function switch that has a light action spring and can be activated by contact from any direction.

Woodpecker
Jabbla
Price: $105
Device: switch interface
Disability: learning, physical, speech
Operating System: Windows
Switch/joystick interface. One to five switches. Mouse control, action/reaction, input for Mind Express and KeyVit.

X-Keys XK-3 Foot Pedal (Front Hinge)
P.I. Engineering
Price: $129.95
Device: keyboard emulator, mouse emulator
Disability: physical
Operating System: Windows, Mac, Android
Front hinged pedal allows the user to rest a foot on the main pedal without activating it. Activation requires just slight additional pressure from the toe or ankle. Perfect for mouse clicking or modifier keys with the main pedal. Includes programming software for Windows and Mac and app for Android.

X-Keys XK-3 Foot Pedal (Rear Hinge)
P.I. Engineering
Price: $129.95
Device: keyboard emulator, mouse emulator
Disability: physical
Operating System: Windows, Mac, Android
USB foot pedal allows the user to comfortably rest a foot on the main pedal and keep it active for long periods. Perfect for microphone activation or media playback. Includes programming software for Windows and Mac and an app for Android.

X-keys USB Keypad
P.I. Engineering
Price: $139.95
Device: alternative keyboard, keyboard emulator, mouse emulator
Disability: physical
Operating System: Windows, Mac, Android
Customize-able 24 key keypad for macros, text strings, mouse commands, and shortcuts to launch programs, open files, and more. Emulates keyboard, mouse, and game controller (joystick). Includes programming software for Windows and Mac and app for Android. Clearly labeled keys available in four sizes. Multiple mounting options available.

X-Keys XK-12 USB Switch Interface
P.I. Engineering
Price: $99.95
Device: keyboard emulator, mouse emulator, switch interface
Disability: physical
Operating System: Windows, Mac, Android
Connect up to 12 switches. Interface and program each switch with a function. Any keyboard shortcut your software uses can have a designated switch (copy, paste, save, open, close). Switches are easily set up to launch applications, open files, or type short lines of text like names, addresses, and numbers.

X-Keys XK-16 Stick
P.I. Engineering
Price: $99.95
Device: keyboard emulator, mouse emulator, switch
Disability: physical
Operating System: Windows, Mac, Android
Sixteen programmable keys to trigger macros, shortcuts, application, select tools and open files or directories. The low profile, slim footprint fits nicely on a podium or under a monitor. Includes software for Windows or Mac and app for Android. Also available in 8 and 4 key versions.

Zingui 2
Jabbla
Price: $3995 - $7295

Device: switch, dedicated communicator, environmental control, speech output
Disability: speech
Operating System: Windows
Zingui 2, is a display AAC device featuring an 8-inch touchscreen and weighs only 850 gr (1 lbs 14 oz). Zingui 2 comes in two versions: the basic version with digitized speech and the Plus version with digitized speech and text-to-speech.

ZoomText Large-Print Keyboard
Ai Squared
Price: $99
Device: alternative keyboard
Disability: physical, vision
Operating System: Windows
The ZoomText Large-Print Keyboard provides large, high-contrast lettering that is easy to see. Eighteen programmable feature keys allow you to access your favorite ZoomText, Internet and multimedia commands with the touch of a button. Used with ZoomText Magnifier or Zoom-Text Magnifier/Reader, your low-vision computer workstation is complete.

Zumo Learning System
Zyrobotics
Price: $89.99 - $159.99
Device: switch
Disability: cognitive, learning, physical
Operating System: iOS, Android
The Zumo Learning System provides an accessible learning environment for children of all abilities. It combines switch-accessible apps and a Wireless Plush Switch, named Zumo, to create an engaging and educational experience for children. Apps focus on cause-and-effect and/or early math skills and are fully customizable based on the special needs of each child.

101 Animations
RJ Cooper and Associates
Price: $0
Special Skill: cognitive redevelopment, early childhood, adapted keyboard/switch access
Disability: cognitive, physical
Skill Level: infant/toddler, preschool, elementary
Operating System: Windows, Mac
Each activation of the switch causes one of 101 large, loud animations to be played. All Windows and Mac OS's supported.

2 + 2
RJ Cooper and Associates
Price: $59
Special Skill: early childhood
Academic Skill: math
Disability: learning, physical, vision
Skill Level: elementary, secondary
Operating System: Windows, Mac
This is a talking math facts program. You can edit the facts list and use addition, subtraction, multiplication and division with numbers up to 999, even decimals. An easy-to-follow scan system is built in for single switch operation, if desired. 2+2 has drill mode, test mode and help function.

AAC Evaluation Genie
Tip Top Apps
Price: $12.99
Special Skill: communication, scanning, single switch, multi switch, speech output, diagnostic
Disability: cognitive, learning, physical, speech
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Operating System: iOS
AAC Evaluation Genie is an informal diagnostic tool that is intended to assist speech-language pathologists and others with identifying skill areas that relate specifically to the language representation methods commonly found on augmentative communication systems. Includes both English and Spanish language options for testing.

ABA Worksheets
ABA Materials Pty Ltd
Price: $46
Special Skill: cognitive redevelopment, communication, early childhood, language development, large print
Academic Skill: language arts, pre-reading, reading, spelling
Disability: learning, speech
Skill Level: infant/toddler, preschool, elementary
Operating System: Windows
Designed originally for children with autism on an ABA program, this CD holds over 60 Powerpoint files with a total of over 2000 printable worksheets. Topics include: Attributes, Emotions, Sequences, Observation, Reading, Writing, Prepositions, Genders.

Abilipad
AppyTherapy
Price: $19.99
Special Skill: basic living skills, cognitive redevelopment, communication, early childhood, eye-hand coordination, language development, vocational, adapted keyboard/switch access, large print, scanning, single switch, multi switch, speech output, telecommunications, authoring system
Academic Skill: language arts, pre-reading, reading, social studies, spelling, typing tutor, word processing
Disability: cognitive, learning, physical, speech, vision
Skill Level: preschool, elementary, secondary, adult
Operating System: iOS
Abilipad is a customizable keyboard and adaptive notepad, with word prediction and text-to-speech. You can design keyboards with audio, letters, words, sentences and images. Link keyboards for unlimited applications: word and picture banks, sentence building, spelling, storytelling, language games and communication boards. Languages: English, Spanish, French and German.

AbleNet Equals Math Program
AbleNet, Inc.
Price: $2395
Special Skill: basic living skills, early childhood, , IEP/IPP
Academic Skill: database, math, problem solving, reading
Disability: cognitive, learning, physical
Skill Level: preschool, elementary, secondary
Operating System: Windows, Mac, Android
Equals Math Program is a Pre K-12 curriculum that provides mathematics instruction for educators who work with students in special education or in alternative education programs. It encompasses pre-readiness math skills, fundamental math skills and higher order math skills. Lessons provide three levels of instruction: mild, moderate and severe.

Access Algebra
Attainment Company, Inc.
Price: $129 - $399
Special Skill:
Academic Skill: math
Disability:
Skill Level: secondary
A research-based math curriculum for high school students who have moderate-to-severe developmental disabilities, including those with an intellectual disability or autism. The curriculum gives students access to content their high school peers are learning, but with the adaptations and support they may need to succeed. The curriculum accommodates students who have unique needs, including those who are nonverbal and those whose math skills are at an emergent numeracy level.

Access Language Arts iPad app
Attainment Company, Inc.
Price: $39.99
Special Skill: cognitive redevelopment, communication, language development, adapted keyboard/switch access, large print, scanning, single switch, multi switch, speech output
Academic Skill: language arts, pre-reading, reading
Disability: cognitive, learning, physical
Skill Level: elementary, secondary, adult
Adapted stories:Neighbors, Sadako and a Thousand Paper Cranes, The Diary of Anne Frank, and We Beat the Streets. Five-step sequence: Preview, vocabulary instruction, read the adapted story, comprehension questions, sequencing activity. Research has shown to be highly effective in teaching language arts skills aligned to standards.

Access Language Arts software
Attainment Company, Inc.
Price: $99
Special Skill: cognitive redevelopment, communication, language development, adapted keyboard/switch access, large print, scanning, single switch, multi switch, speech output
Academic Skill: language arts, pre-reading, reading
Disability: cognitive, learning, physical
Skill Level: elementary, secondary, adult
Operating System: Windows, Mac
Adapted stories:Neighbors, Sadako and a Thousand Paper Cranes, The Diary of Anne Frank, and We Beat the Streets. Five-step sequence: Preview, vocabulary instruction, read the adapted story, comprehension questions, sequencing activity. Research has shown to be highly effective in teaching language arts skills aligned to standards.

Access Language Arts: WRITE Software
Attainment Company, Inc.
Price: $99 - $990
Special Skill: language development
Academic Skill: language arts
Disability: learning, physical
Skill Level: secondary
A researched and standards-based approach for secondary students practicing reading and writing skills. Prompts students to write grade-aligned opinion paragraphs for nonfiction and fiction and improves reading comprehension and vocabulary development. Can be used as a complement to Teaching to Standards: English Language Arts or a stand-alone curriculum.

Accessible Literacy Learning (ALL) Reading Program Software
Tobii Dynavox
Price: $79.99
Special Skill: communication, early childhood, language development, scanning, single switch, multi switch
Academic Skill: language arts, pre-reading, reading, spelling
Disability: cognitive, learning, physical, speech
Skill Level: elementary, secondary
Operating System: Windows
The ALL Reading Program Software is designed specifically to teach basic reading skills to students who are non-verbal and is accessible through touch/eyegaze/scanning. It enables students to bypass oral responses at all stages of instruction, allowing even the most challenged students to learn to read. Free trial available.

Activity Trainer - US Version
Accelerations Educational Software
Price: $99 - $499
Special Skill: basic living skills, communication, early childhood, eye-hand coordination, language development, vocational
Academic Skill: health, language arts, math, pre-reading, problem solving, reading
Disability: cognitive, learning
Skill Level: preschool, elementary
Operating System: Windows
The Activity Trainer (AT) is the first software designed to make video modeling (VM) practical. VM increases acquisition rates of skills. The AT has a library of over 300 activities and you can create your own. The AT adds to VM task analysis, sequences, organization by student, data collection, and video to image and image to text transitions. These features make the Activity Trainer a powerful addition to your toolbox to improve outcomes of your students.

Adjective Remix
Smarty Ears Apps
Price: $9.99 - $9.99
Special Skill: communication, language development
Disability: speech
Skill Level: infant/toddler, preschool, elementary
Adjective Remix is a single or multiplayer app that targets practicing vocabulary knowledge of qualifying words (aka adjectives). In order to more effectively teach this concept we have segmented the adjectives into 8 major categories. Appearance, Colors, Feelings, Quality, Shape, Size, Time and Touch.

Disability: cognitive, learning, speech
Skill Level: preschool, elementary
Operating System: iOS
And, Or, But requires the player to find the object on the screen that has a specified color, size, number, or spatial relationship. There are four levels of difficulty and seven tasks.

Animal iGames
Tip Top Apps
Price: $0.99
Special Skill: early childhood, eye-hand coordination, language development
Academic Skill: pre-reading
Disability: cognitive, learning
Skill Level: infant/toddler, preschool
Operating System: iOS
Animal iGames is an early learning play based app designed to foster independent play while teaching vocabulary, sequencing, auditory processing and critical thinking skills. Three engaging activities are included that children love to play over and over!

Animal Jigsaw - Assemble 4 pieces of a picture
STEP BY STEP
Price: $0 - $2.99
Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, adapted keyboard/switch access, single switch, multi switch, diagnostic
Academic Skill: problem solving
Disability: cognitive, learning, physical
Skill Level: infant/toddler
Children learn piece together a well known picture of an animal. App helps develop spatial cognition skills, visual perception skills, and fine motor skills.

Animal Maze - Find a route through the maze
STEP BY STEP
Price: $0 - $2.99
Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, adapted keyboard/switch access, single switch, multi switch, diagnostic
Academic Skill: problem solving
Disability: cognitive, learning, physical
Skill Level: preschool

Children learn to navigate through a maze. App helps develop spatial orientation skills, and planning skills.

Animales Fantsticos!
LocuTour Multimedia
Price: $1.99
Special Skill: cognitive redevelopment, early childhood, language development
Disability: cognitive, learning, speech
Skill Level: preschool, elementary
Operating System: iOS
Animales Fantsticos! has six stimuli for each of 120 animal pictures: word, parentese, descriptive phrase, descriptive statement, functional statement and the initial sound of the target word. This simple language program encourages turn-taking, imitating, describing, questioning, answering and playing with sounds and words.

Animated Step-by-Steps
Animated Step-by-Steps
Price: $5 - $6
Special Skill: communication, early childhood, language development, single switch, speech output
Academic Skill: language arts, math, music, pre-reading, reading, science
Disability: cognitive, hearing, learning, physical, speech, vision
Skill Level: infant/toddler, preschool, elementary
Operating System: Windows, Mac, iOS, Android
Animated Step-by-Steps are animated PowerPoints designed to address literacy, language, AAC and a host of academic goals. Each page includes a series of animations. Read the text up to the star click and see an animation of what you just read. There are three versions of each resource. This is the Regular Version (non symbol-supported). This resource can be displayed on the 'big screen' (interactive whiteboard, large screen TV using Apple TV) or the 'small screen' (computer monitor, iPad/Android tablet using the free Microsoft PowerPoint app). Please visit the Animated Step-by-Steps blog for further information on the creative use of these educational resources.

Animated Toys II
Judy Lynn Software, Inc.
Price: $49
Special Skill: early childhood, single switch
Disability: cognitive, physical
Skill Level: infant/toddler
Operating System: Windows
Animated Toys II is comprised of 26 segments, each containing a toy animated on the computer screen. The toys are activated by a switch, mouse click, or the keyboard enter key. The toys incorporate cause and effect skills, increasing attention span, visual tracking, and focusing on objects.

Animation-ish
FableVision Learning
Price: $59.95 - $2499.95
Special Skill: communication, language development
Academic Skill: graphic arts, language arts, math, problem solving, reading, science, social studies
Disability: learning
Skill Level: preschool, elementary, secondary
Operating System: Windows, Mac
Animation-ish is an easy-to-use animation software program that inspires creativity and enables children to show what they know. Sparks creative thinking and imagination. Provides engaging activities that integrate creativity across the curriculum. Helps teachers enliven lessons and improve understanding through visual representation. Boosts technology literacy skills.

Aphasia: Start Speaking Again iPhone/iPad App
Parrot Software
Price: $19.99
Special Skill: communication, voice recognition
Disability: speech
Skill Level: secondary, adult
Operating System: iOS
Users move images on the left side to colored boxes on the right side using verbal instructions. Examples are: 'Move bread on the purple box' or 'bread purple box'. Program listens for the name and the box color.

APP2Speak
Cabson Consulting - APP2speak
Price: $89.99 - $89.99
Special Skill: communication, speech output
Disability: speech
Skill Level: secondary, adult
Operating System: iOS, Android
APP2Speak is an easy-to-use speech output software application. Simply touch a pre-loaded photo to talk, or easily customize the app by adding your own photos or by taking a photo within the app itself. The app uses a pre-recorded (or any voice that you personally record) to speak your message to family and friends. The software provides easy-to-read instructions and includes a built-in Help system, and it requires no special training to create the optional voice and photo customizations. Custom pages are endless, and you can share your custom pages with other devices that also have the app installed. Set your preference to start APP2Speak on either a pre-set page, a text-to-speech page, or a custom page. It is designed and created for the thousands of individuals who experience speech impairment as a result of a stroke, brain injury, Parkinson Disease, ALS, autism, and other conditions effecting speech and communication.

APP2Speak is available for APPLE iPads and Android Tablets

Apraxia Therapy
Tactus Therapy Solutions
Price: $24.99 - $24.99
Special Skill: communication
Academic Skill: language arts
Disability: speech
Skill Level: elementary, secondary, adult
Operating System: iOS, Android
Use video modeling to practice speaking when apraxia makes it hard. Tap along, repeat, and hear yourself as you speak in unison.

Arthur's Birthday - interactive storybook
Wanderful Inc.
Price: $3.33 - $4.99
Special Skill: communication, early childhood, language development
Academic Skill: language arts, pre-reading, reading

AT-node for Access
Koester Performance Research
Price: $0
Special Skill: adapted keyboard/switch access, scanning, single switch, multi switch, voice recognition
Disability: physical
Skill Level: preschool, elementary,

secondary, adult
Operating System: Windows, Mac, iOS, Android, Chrome, Other
AT-node for Access is a public, searchable collection of research on the use of computer access interfaces by people with disabilities. AT-node serves as an evidence-based tool for AT service providers and end users to facilitate informed selection of text entry interfaces. The data can be explored from multiple standpoints to create benchmarks for text entry based on the type of interface, individual diagnosis, and body site being considered for interface activation. The information can inform interface selection, goal setting, and optimizing training for selected interfaces. Researchers and students can use AT-node to identify relevant publications and data on computer access, saving significant time and effort. It provides an efficient way of learning what has already been done and what gaps remain in the field.

ATEval2GO
Smarty Ears Apps
Price: $39.99 - $39.99
Special Skill: diagnostic, IEP/IPP
Disability: cognitive, hearing, learning, physical, speech, vision

STEP BY STEP
Price: $0 - $2.99
Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, language development, adapted keyboard/switch access, single switch, multi switch, diagnostic
Academic Skill: problem solving
Disability: cognitive, learning, physical
Skill Level: preschool
Children learn to differentiate among items according to logical characteristics. App helps develop visual differentiation skills, visual perception skills, and cognitive skills.

Dino-DOT
Academic Software, Inc.
Price: $20
Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, adapted keyboard/switch access, scanning, single switch
Academic Skill: pre-reading, problem solving
Disability: cognitive, learning, physical
Skill Level: infant/toddler, preschool, elementary
Operating System: Windows
Connect the dots and colorful animated dinosaurs appear before your eyes. Number concepts, counting, sequencing skills and special perception are involved in play. Games can be selected using patterns of three, six, nine or 12 dots. Mode of play, difficulty level, auditory feedback and scan speed can be controlled manually.

Dino-FIND
Academic Software, Inc.
Price: $20
Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, adapted keyboard/switch access, scanning, single switch
Academic Skill: pre-reading, problem solving
Disability: cognitive, learning, physical
Skill Level: infant/toddler, preschool, elementary
Operating System: Windows
Dino-Find is a game of concentration stimulating memory and pattern recognition and providing scanning practice. Dinosaurs are selected randomly. One to six matching pairs can be displayed. Switch users make selections using row/column or linear scanning. Mode of play, difficulty level, auditory feedback and scan rate can be controlled manually.

Dino-GAMES
Academic Software, Inc.
Price: $60
Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, adapted keyboard/switch access, scanning, single switch
Academic Skill: pre-reading, problem solving
Disability: cognitive, physical
Skill Level: infant/toddler, preschool, elementary
Operating System: Windows
All 4 early-childhood educational games: DinoDOT (spatial-perception, counting & sequencing skills); DinoFIND and DinoLIKE (memory and pattern-recognition); and DinoMAZE (cause & effect and directionality learning). Adjust difficulty level and other settings for each game independently. DinoGAMES work with keyboard, mouse, or external single-switch and provide early scanning practice opportunities.

Dino-LIKE
Academic Software, Inc.
Price: $20
Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, adapted keyboard/switch access, scanning, single switch
Academic Skill: pre-reading, problem solving
Disability: cognitive, learning, physical
Skill Level: infant/toddler, preschool, elementary
Operating System: Windows
Single switch users select dinosaurs identical to a target dinosaur. The discrimination level can be set manually, choosing a match and two distracters, a match and one distracter, or the match alone. Color, shape and orientation of dinosaurs are used to enhance pattern matching skills. Can be controlled manually.

Dino-MAZE
Academic Software, Inc.
Price: $20
Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, adapted keyboard/switch access, scanning, single switch
Academic Skill: pre-reading, problem solving
Disability: cognitive, learning, physical
Skill Level: infant/toddler, preschool, elementary
Operating System: Windows
Colorful, motivating exercises where dinosaur characters move through mazes to reach goals with reinforcement through music and animation. Single switch users choose between cause and effect activities or games involving decisions about which directions the animated characters should go to get from start to finish. Can be controlled manually.

Discrete Trial Trainer - US Version
Accelerations Educational Software
Price: $99 - $499
Special Skill: basic living skills, communication, early childhood, eye-hand coordination, language development, vocational, single switch, multi switch
Academic Skill: health, language arts, math, pre-reading, problem solving
Disability: cognitive, learning
Skill Level: preschool, elementary

Operating System: Windows, Mac, iOS, Android, Chrome
This is an imaginative, interactive and slightly spooky reading experience with fully animated content loved by children and parents alike. Every page of this story comes to life. Read and play along with Harry and his friends as they retrieve their baseball lost in the haunted house across the field.

Hoonuit's Data Analytics Solution
Hoonuit
Price: $800
Special Skill:
Academic Skill: database
Disability:
Skill Level: elementary, secondary, adult
Operating System: Windows, Mac, iOS, Android, Chrome, Other
With the Every Student Succeeds Act (ESSA) implementation upon us, clear and accessible reporting is evolving. The additional transparency is important, but the new reporting requirements are putting added strain on already scarce time and resources. Hoonuit supports your accountability reporting efforts without sacrificing the access to data you need to make decisions.

House of Learning
Smarty Ears Apps
Price: $6.99 - $6.99
Special Skill: basic living skills, cognitive redevelopment, communication, early childhood, language development
Academic Skill: language arts, problem solving
Disability: learning, speech
Skill Level: preschool, elementary
The House of Learning is an iPad app developed by a certified Speech-Language Pathologist. It serves both as a tool for learning and playing. Children play with scenes and characters to work on prepositions, following directions and vocabulary.

I Can Match Capitals
OT-Care
Price: $6 - $6
Special Skill: communication, eye-hand coordination, language development, adapted keyboard/switch access, large print, single switch
Academic Skill: language arts, pre-reading, reading
Disability: cognitive, hearing, learning, physical, speech, vision
Skill Level: infant/toddler, preschool, elementary
Operating System: Windows, Mac
One capital letter is shown, with a choice of two small letters. The correct answer is randomly placed to the left or right of the screen. When the student touches the correct letter, they are rewarded with sight and sound. The whole screen is used, providing a large target area.

I Can Spell
OT-Care
Price: $6 - $6
Special Skill: early childhood, eye-hand coordination, language development, adapted keyboard/switch access, large print, single switch
Academic Skill: language arts, pre-reading, spelling
Disability: cognitive, hearing, learning, physical, speech, vision
Skill Level: infant/toddler, preschool, elementary
Operating System: Windows, Mac
Use a touch screen to teach spelling to children with coordination difficulties. The student clicks on their name to begin spelling, each letter is shown in turn, taking up half the screen. When the student touches the letter they are rewarded with sight and sound.

I Hate Peas
Marblesoft-Simtech
Price: $50
Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, language development, adapted keyboard/switch access, scanning, single switch, multi switch
Academic Skill: health, language arts, music, pre-reading, reading
Disability: cognitive, learning, physical
Skill Level: preschool, elementary
Operating System: Windows
I Hate Peas features another terrific sing-a-long story and a couple of new switch modes for training and play. Three cute kids will eat anything you put on their plate - except peas.

ICanEmail
RJ Cooper and Associates
Price: $0
Special Skill: communication, telecommunications
Disability: cognitive, learning, physical, speech, vision
Skill Level: elementary, secondary, adult
Operating System: Windows, Mac, iOS
A talking email app/website that also has voicemail capabilities. The user is presented with one aspect of email at a time, in a very obvious format. Non/early readers can speak their message and partner hears their voice from any mail program. Most email functions are in the program.

iCommunicate
Grembe Apps
Price: $49.99
Special Skill: communication, language development
Academic Skill: pre-reading, reading

Skill Level: preschool, elementary, secondary, adult
Operating System: Windows
Test Me, Score Me will help you know what students have learned. Put in your content, especially photos related to the student. Create multiple choice and yes/no (true/false) questions with pictures, movies, recorded speech and text. Collect data, too.

The Berenstain Bears Get in a Fight
Wanderful Inc.
Price: $3.33 - $4.99
Special Skill: basic living skills, communication, early childhood, language development
Academic Skill: language arts, pre-reading, reading, social studies
Disability: learning, speech
Skill Level: infant/toddler, preschool, elementary, secondary
Operating System: Windows, Mac, Android, Chrome
Read and play along with Brother and Sister Bear as a little morning grumpiness turns into an all-day fight - arguing and fighting. Do they even remember why they are fighting? Can anything make them stop? For children of all ages, this story teaches lessons on avoiding arguments and disagreements.

The Berenstain Bears In The Dark - interactive storybook
Wanderful Inc.
Price: $3.33 - $4.99
Special Skill: basic living skills, communication, early childhood, language development
Academic Skill: language arts, pre-reading, reading
Disability: learning, speech
Skill Level: infant/toddler, preschool, elementary, secondary
Operating System: Windows, Mac, iOS, Android, Chrome
This is an imaginative interactive reading experience with fully animated content featuring the popular Berenstain Bears. This story springs to life on every page. Read and play along as a spooky story keeps the entire Bear family up all night long but learn not to be afraid in the dark.

The Bully Book
Do2Learn
Price: $0
Special Skill: basic living skills, cognitive redevelopment, communication, early childhood
Disability:
Skill Level: preschool, elementary
Operating System: Windows, Mac, iOS, Android, Chrome
Users are prompted to select one of three characters, Ally, Pearl or Jeremy. Each char-

acter narrates an account of a bullying incident in which Pearl, who is autistic, is upset by Ally's cruelty, and Jeremy comforts her. Watercolor illustrations accompany each narrative, also providing alternate perspectives on the event. The story lines are each delivered as printable pages. Free at do2learn.com.

The Click to Read Bundle
Marblesoft-Simtech
Price: $169
Special Skill: basic living skills, cognitive redevelopment, communication, early childhood, language development, adapted keyboard/switch access, scanning, single switch, multi switch
Academic Skill: health, pre-reading, reading, social studies
Disability: cognitive, learning, physical
Skill Level: preschool, elementary
Operating System: Windows, Mac
Marblesoft and AIMEE Solutions combined to produce a new series of early literacy programs for children with special needs. We took the AIMEE Solutions fun reading activities and added Marblesoft's flair for creating easy-to-use accessible programs. The Click To Read Bundle contains all twenty stories from that series.

The Graphic Speller
Marblesoft-Simtech
Price: $39
Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, adapted keyboard/switch access, scanning, single switch, multi switch
Academic Skill: math, problem solving
Disability: cognitive, learning, physical
Skill Level: elementary
Operating System: Windows, Mac
The Graphic Speller teaches graphing skills by having the students spell out words. A set of letters is placed on a number line or graph. The student plots the given coordinates to find each letter in turn, spelling out a word. Supports mouse, keyboard, touch screen or switch input.

The Magnifier
Innovation Management Group, Inc.
Price: $49.95 - $3500
Special Skill: basic living skills, cognitive redevelopment, early childhood, vocational, large print
Academic Skill: reading
Disability: vision
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Operating System: Windows
Full screen, incrementally scalable magnifier. 1x to 40x in 1/10th increments; displays text and graphics; full screen and window modes; cursor tracker; mouse and arrow key support; pop-up and hot-key menu's. USB version available. District & University unlimited use license for $3500. Supports Windows 2000 thru Windows 10 (32/64 bit)

The Tortoise and the Hare - interactive storybook
Wanderful Inc.
Price: $3.33 - $4.99
Special Skill: basic living skills, communication, early childhood, language development
Academic Skill: language arts, music, pre-reading, reading, spelling
Disability: learning, speech
Skill Level: infant/toddler, preschool, elementary, secondary
Operating System: Windows, Mac, iOS, Android, Chrome
This is an imaginative and interactive reading experience with fully animated content loved by children and parents alike . A special favorite of Autistic children. Every page of this classic Aesop s fable comes to life. Read and play along as the Tortoise proves that slow and steady wins the race.

The TV Teacher Handwriting Programs
The TV Teacher, LLC
Price: $25 - $175
Special Skill: communication, early childhood, eye-hand coordination, language development
Academic Skill: language arts, math, pre-reading
Disability: cognitive, hearing, learning
Skill Level: preschool, elementary
Operating System: Windows, Mac, iOS, Android, Chrome, Other
The TV Teacher's award-winning handwriting program uses visual demonstrations of writing letters, numbers, and shapes using rhythmic chants and repetition. Using DVDs, flash drives, or online, this multi-sensory approach makes breakthroughs for children with special needs. Additional skits and vocabulary words have kids running to write with Miss Marnie!

The vOICe for Android: Seeing with Sound
Peter Meijer
Price: $0
Special Skill: basic living skills, scanning
Academic Skill: graphic arts, science
Disability: vision
Skill Level: elementary, secondary, adult
Operating System: Android
The vOICe for Android translates live camera views into sounds, thereby targeting sensory substitution applications and synthetic vision for the blind. Includes real-time talking OCR, talking color identifier, talking compass and GPS based talking locator.

The vOICe Learning Edition: Seeing with Your Ears
Peter Meijer
Price: $0
Special Skill: basic living skills, optical character recognition, scanning
Academic Skill: graphic arts, math, science
Disability: vision

Skill Level: elementary, secondary, adult
Operating System: Windows
The vOICe Learning Edition software translates images from a PC camera (webcam) into sounds that you hear via your stereo headphones, thus targeting synthetic vision for the totally blind. This product is free.

The Writing Machine
Tip Top Apps
Price: $0.99
Special Skill: cognitive redevelopment, communication, early childhood, eye-hand coordination, language development, scanning, single switch, multi switch
Academic Skill: pre-reading
Disability: cognitive, learning, physical, speech
Skill Level: preschool, elementary
Operating System: iOS
The Writing Machine presents early language and literacy concepts that introduce how one picture and one word go together. From this foundation, your child/student will begin to understand additional pre-literacy concepts including how to read text from left to right and to tell words from letters. Direct select and scanning access options are available.

TheraSimplicity
TheraSimplicity Inc.
Price: $49 - $49
Special Skill: basic living skills, cognitive redevelopment, communication, early childhood, language development, vocational, , instructional management
Academic Skill: language arts, math, pre-reading, problem solving, reading, spelling
Disability: cognitive, learning, speech
Skill Level: preschool, elementary, secondary, adult
Operating System: Windows, Mac, Android
TheraSimplicity: online, anytime, anywhere access, create and customize your materials. A virtual portfolio of high-quality, user-friendly therapy and educational materials that you can customize and use anytime, anywhere. All you need is an Internet connection.

ThoughtQ
Quillsoft Ltd.
Price: $14.99 - $14.99
Special Skill: basic living skills, communication, language development
Academic Skill: problem solving, reading, word processing
Disability: cognitive, learning
Skill Level: elementary, secondary, adult
Operating System: Chrome
A unique product that helps a student think outside of their own language box. Starting with an initial topic word or phrase, it uses its own world-wide knowledge to suggest a list of words/phrases that others have used when writing about that area. These suggestions are then linked to an embedded Google Custom Search to find relevant and interesting

web pages with less effort while helping the student gain greater knowledge. All students can benefit.

Tobii Dynavox Snap + Core First
Tobii Dynavox
Price: $49.99
Special Skill: communication, language development, speech output
Disability: cognitive, speech
Skill Level: elementary, secondary, adult
Operating System: Windows, iOS
Snap + Core First is a symbol-based communication app designed to be the most intuitive solution on the market. Centered on a proven Core Word approach to communication that focuses on growth, literacy and engagement, it allows users to start communicating quickly and stay engaged as they grow and evolve on their communication journey. iOS and Windows 10 versions available.

Tobii Dynavox Snap Scene(TM)
Tobii Dynavox
Price: $49.99
Special Skill: communication
Academic Skill: language arts, pre-reading, reading
Disability: speech
Skill Level: infant/toddler, preschool, elementary, secondary
Operating System: Windows
Snap Scene is an instant scene-based communication and language learning app for your child. Snap Scene will set your child on the right path to communication. By starting early you can jump start your child s language development. It can make the difference between language learning success and lifelong language difficulties.

Tom's Times Tables Pro
Computerade Products
Price: $0 - $1.99
Special Skill: basic living skills, adapted keyboard/switch access, scanning, single switch, multi switch, speech output
Academic Skill: math
Disability: learning
Skill Level: elementary
Operating System: iOS
Select 1 through 12 times table or advance automatically. Tap correct answer in sequential or random order from one of 16 answers displayed around screen. Percent correct and elapsed time show after completing a table. The Pro version provides teacher options, results data, voicing (English) and switch controlled scanning. The free Basic version does not include the teacher options.

Touch Balloons
Inclusive TLC
Price: $74 - $214

Train Talk
LocuTour Multimedia
Price: $4.99
Special Skill: basic living skills, communication, language development
Disability: cognitive, speech
Skill Level: preschool, elementary
Operating System: iOS
Train Talk is for children who love to talk about trains. This app helps direct that conversation to learn to ask and answer WH questions. There are 128 pictures with question prompts and sample answers to encourage turn taking, spontaneous speech, conversational skills and auditory comprehension.

Train Time
LocuTour Multimedia
Price: $9
Special Skill: cognitive redevelopment, communication, early childhood, language

development, adapted keyboard/switch access, scanning, single switch
Academic Skill: pre-reading, problem solving, spelling
Disability: cognitive, hearing, learning, speech
Skill Level: preschool, elementary, secondary, adult
Operating System: Windows, Mac
Consists of language, attention and memory games designed specifically for children with autism. The language games teach vocabulary, syllable segmentation, sound blending, reading and spelling. The attention games teach matching, same-to-same and figure-ground discrimination. Adults with stroke/ traumatic brain injury can use the CD to recover language and memory skills.

Turn Taking
Judy Lynn Software, Inc.
Price: $49
Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, single switch, multi switch
Academic Skill: problem solving
Disability: cognitive, learning, physical
Skill Level: infant/toddler, preschool, elementary
Operating System: Windows
The program is designed to teach the concept of waiting your turn. When a student's prompt appears, the student presses their switch, keyboard key, or touch window to reveal a section of a picture. Once the entire picture is displayed, a video clip reward related to the picture is played.

Turn-Talking
RJ Cooper and Associates
Price: $1.99 - $59
Special Skill: communication, language development
Academic Skill: pre-reading
Disability: cognitive, physical, speech
Skill Level: preschool, elementary, secondary
Operating System: Windows, Mac
This software takes the user on a guided tour of taking turns in a conversation. A supervisor writes a script and has a person, close in age to the user, record the user's phrases. Turn-Talking then conducts that conversation.

Type-A-Word
OT-Care
Price: $1.99 - $2.99
Special Skill: language development, large print
Academic Skill: pre-reading, reading, spelling, typing tutor
Disability: cognitive, learning, physical, vision
Skill Level: infant/toddler, preschool, elementary
Operating System: iOS, Android, Chrome
Begin the process of teaching the letters on the keyboard in order to spell words. You create the word to be typed. Each letter of the word is then presented in

turn. When the correct key is pressed a fun picture is shown and sound for that letter is played

TypingFun
OT-Care
Price: $0 - $5.99
Special Skill: communication, language development
Academic Skill: language arts, reading, spelling, typing tutor
Disability: cognitive, learning, speech
Skill Level: preschool, elementary
Operating System: iOS
This is the second part of the full "Miss Sues Keyboard Fun" but available on the IPad. It uses pictures and sound to reinforce letters on the keyboard for spelling words. Word list can be changed, data collection included

TypingTraining.com
Custom Solutions
Price: $21
Special Skill: eye-hand coordination, vocational, adapted keyboard/switch access, single switch, multi switch, voice recognition
Academic Skill: typing tutor
Disability: cognitive, learning, physical
Skill Level: elementary, secondary, adult
Operating System: Windows, Mac, iOS, Android, Chrome
TypingTraining.com is a typing website for assistive technology users. One and two handed training is provided. Included are comprehensive assessments, checklists, reporting and outcomes measurement tools to evaluate student performance with different input systems. Resource information includes areas of ergonomics, keyboarding, speech recognition and assistive technology.

Merit Software
Price: $79

Special Skill: cognitive redevelopment, language development
Academic Skill: language arts
Disability: cognitive, learning
Skill Level: elementary, secondary, adult
Operating System: Windows, Mac
Helps students recognize words in different contexts and understand the derivation of many English words. Students advance as they demonstrate readiness. A convenient record management system tracks scores and allows teachers to view detailed reports. Designed for students in grades 4 through 10 and can be used by older students.

Vocal Legacy Voice
VocaliD
Price: $1499 - $1499
Special Skill: communication, language development, speech output, telecommunications, voice recognition
Disability: speech
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Operating System: Windows, Mac, Android
VocaliD's Legacy voice allows a person at risk of loosing their voice to bank and preserve their voice for free in our Human Voicebank. Later, should they wish to, they can invest to have our engineering team build them their unique personal digital voice for use with our text-to-speech app, MyVocaliD and other compatible TTS apps and AAC devices. Voicebanking to preserve once Legacy requires the person to be able to read about 3500 sentences into our virtual recording studio - don't worry, we'll guide you through the process. While Voicebanking, they, they are also helping the speechless by making their vocal Legacy available to be blended with their vocalizations.

VocaliD BeSpoke Voice
VocaliD
Price: $1499 - $1499
Special Skill: communication, language development, speech output, telecommunications, voice recognition
Disability: physical
Operating System: Windows, iOS, Android
The VocaliD humanizes the voice inside any device that speaks. A BeSpoke voice is for speechless individuals who are able to produce 2-3 seconds of sound. From that sound, we are able to extract their vocal DNA which can then be blended with the voice from a surrogate in our human Voicebank. Our proprietary voice blending technology blends the two together to craft a single unique digital voice, uniquely recognizable, that can then be used with our text-to-speech app, MyVocaliD or other TTS apps and AAC devices.

WayFinder 3
AbleLink Smart Living Technologies

Operating System: Windows, Mac
Blends six interactive books with the power of music to build literacy skills and engage students of any age in a wide range of musical content. Features professional narration, concept review, music samples, and strong narrative photographs. Students explore melody, rhythm, musical styles, instruments and the history of music.

What's Different?
Do2Learn
Price: $0
Special Skill: cognitive redevelopment, language development
Academic Skill: language arts
Disability: cognitive, learning

Skill Level: preschool, elementary
Operating System: Windows, Mac
What's Different? explains categories of objects, such as animals or clothing. Four objects are displayed and the player clicks on the object that is not part of that category. Special learning features include randomly generated choices to avoid patterning and only positive rewards. This product is free.

Wheel of Sounds
Judy Lynn Software, Inc.
Price: $39
Special Skill: eye-hand coordination, scanning, multi switch, speech output
Academic Skill: pre-reading
Disability: cognitive, physical, speech, vision
Skill Level: infant/toddler, preschool
Operating System: Windows
Wheel of Sounds is a switch-activated game that plays an object's sound when the object is selected by the spinner. The spinner is activated by either step scanning, timed scanning, a single switch press, a mouse or touch screen.

Wheels on the Bus
Marblesoft-SoftTouch
Price: $115
Special Skill: early childhood, language development, adapted keyboard/switch access, braille, scanning, single switch, multi switch, speech output
Academic Skill: language arts, music, pre-reading
Disability: cognitive, learning, physical, speech
Skill Level: infant/toddler, preschool, elementary
Operating System: Windows
Students love the song Wheels on the Bus with 3-D animations. Students can sing along with nine song verses, read a story, learn what else goes and play with nine prepositions. This is another Steps to Learning program with changeable format and data collection.

Wheels!
RJ Cooper and Associates
Price: $59
Special Skill: eye-hand coordination
Academic Skill: problem solving
Disability: physical
Skill Level: elementary, secondary, adult
Operating System: Windows
Wheels! is a fully immersive 3D action game, designed specifically for SAM-Joystick and other alternative input devices (trackball, keyboard, mouse, IntelliKeys). It is very forgiving, has incremental levels, pie throwing clowns and robots. Great sound effects and music and important feedback for power wheelchair training.

Who, What, When, Where, Why
LocuTour Multimedia
Price: $4.99

Special Skill: basic living skills, cognitive redevelopment, communication, early childhood, language development
Disability: cognitive, speech
Skill Level: preschool, elementary

Explore traditional WH questions along with 17 additional question categories. The twenty-three categories of questions are: Who, Whose, What, When, Where, Why, How, How Many, Which, Do/Does, Did, Have/Has/Had, Was/Were, Is, Are, May I, Can, Will, Would, Should, Could, If and Negation. It requires moderate level inference skill.

WhQuestions
Smarty Ears Apps
Price: $6.99 - $6.99
Special Skill: communication, early childhood, language development
Academic Skill: language arts, problem solving
Disability: cognitive, speech
Skill Level: preschool, elementary
Whquestions is an iPad, iPhone and iPod touch application designed to help children with language delays and disorders practice answering questions in the following formats Who - What - Where - How - Why.

Wild, Woolly, Wonderful Critters
LocuTour Multimedia
Price: $1.99
Special Skill: communication, early childhood, language development
Disability: cognitive, speech
Skill Level: preschool, elementary
Operating System: iOS
Wild, Woolly, Wonderful Critters has six stimuli for each of 120 animal pictures. Practice the word, parentese, descriptive phrase, descriptive statement, functional statement and the initial sound of the target word. Explore language while learning about critters.

WinSCAN CS
Academic Software, Inc.
Price: $150
Special Skill: adapted keyboard/switch access, scanning, single switch
Academic Skill: word processing
Disability: physical
Skill Level: elementary, secondary, adult
Operating System: Windows
A new, enhanced version of WinSCAN, an advanced, multi-function, single-switch interface for PC users at home, school, or work. WinSCAN CS provides independent control access to educational, productivity, multimedia, and recreational software for Windows 8 or 10. Navigate the desktop; run applications, games and CDs. Surf the Internet with WinSCAN!

Woot Math
Woot Math
Price: $5.77
Special Skill: basic living skills, , diagnostic,

IEP/IPP, instructional management
Academic Skill: math
Disability: learning
Skill Level: elementary, secondary, adult
Operating System: Windows, Mac, iOS, Android, Chrome, Other
Woot Math helps teachers bring mathematics to life through research-backed tools for adaptive learning and formative assessment.

Word Practice
LocuTour Multimedia
Price: $4.99
Special Skill: early childhood, language development
Disability: learning, speech
Skill Level: preschool, elementary
Operating System: iOS
A beginning level app for early language learners. Colorful drawings or photos are presented in three categories: Common Verbs, Contrast Words like over/under and Animals. Listen and learn the vocabulary word, or imitate the speech model. The app provides a model for step-by-step transition to full sentences.

WordComplete (Innovation Management Group, Inc.)
Innovation Management Group, Inc.
Price: $99.95 - $3500
Special Skill: language development, vocational, adapted keyboard/switch access
Academic Skill: word processing
Disability: learning, physical
Skill Level: elementary, secondary, adult
Operating System: Windows
WordComplete adaptively predicts the word you are entering and gives you choices from it's dictionary. Dictionary comes with a basic list, then adds new words as you type them. You can import or create multiple dictionaries to suit your needs. Sorts alphabetical and often used. Windows 2000 thru Windows 10

WordComplete (RJ Cooper and Associates)
RJ Cooper and Associates
Price: $59
Special Skill: communication
Academic Skill: word processing
Disability: learning, physical, speech
Skill Level: elementary, secondary, adult
Operating System: Windows
Utility that provides candidates for completing words within any software. Choices can be spoken for preview and are presented inline with the insertion point. Customizable word list. Great for slow typists, emerging literacy, LD and Down Syndrome.

WordQ
Quillsoft Ltd.
Price: $139.3 - $199
Special Skill: basic living skills, communication, language development, speech output, voice recognition
Academic Skill: language arts, pre-reading, reading, spelling, word processing
Disability: cognitive, hearing, learning, physical, speech, vision
Skill Level: elementary, secondary, adult
Operating System: Windows, Mac
A writing skill improvement and compensation tool that works on top of any Windows or MacOS application where students write. WordQ helps students create better quality written work with greater independence and ease with less stress. Intelligent word prediction suggests words appropriate for elementary and secondary school levels. Students write faster and produce more, and get help with spelling and grammar with as little as one or two keystrokes.

WordQ for Chrome
Quillsoft Ltd.
Price: $14.99 - $14.99
Special Skill: basic living skills, communication, language development, speech output, voice recognition
Academic Skill: reading, word processing
Disability: cognitive, hearing, learning, speech
Skill Level: elementary, secondary, adult
Operating System: Chrome
An easy-to-use text editor for Chromebooks with writing skill improvement and compensation tools. All students benefit, including English Language Learners (ESL), Second Language Learners (ELL), and struggling writers.

WordQ Pro
Quillsoft Ltd.
Price: $139.3 - $199
Special Skill: basic living skills, communication, language development, speech output
Academic Skill: reading
Disability: cognitive, hearing, learning, physical, speech, vision
Skill Level: elementary, secondary, adult
Operating System: Windows, Mac
A writing skill improvement and compensation tool that works on top of any Windows or MacOS application where you write. All students and workers benefit, including English Language Learners (ELL), Second Language Learners (ELL), and struggling writers.

WordQ+SpeakQ
Quillsoft Ltd.
Price: $200 - $279
Special Skill: basic living skills, cognitive redevelopment, communication, language development, vocational, speech output, voice recognition
Academic Skill: reading
Disability: cognitive, hearing, learning, speech
Skill Level: elementary, secondary, adult
Operating System: Windows
SpeakQ combines with WordQ and adds simple speech recognition. Students devote more attention to what they want to write, rather than worrying about spelling.

Words and Their Stories
FableVision Learning
Price: $30 - $3300
Special Skill: communication, language development
Academic Skill: language arts, problem solving, reading, spelling
Disability: learning
Skill Level: elementary, secondary, adult
Operating System: Windows, Mac
This online vocabulary resource applies the WATS (Words And Their Stories) system, a vocabulary acquisition process based on inductive reasoning, process to general vocabulary study, standardized test preparation and literature specific vocabulary that is then combined with activities designed to improve reading comprehension skills. Additional licenses available.

WriQ
Texthelp
Price: $0
Special Skill: cognitive redevelopment, communication, language development, speech output, voice recognition, instructional management
Academic Skill: language arts, reading, spelling, word processing
Disability: speech, vision
Skill Level: elementary, secondary, adult
Operating System: Chrome
WriQ is a new Add-on from Texthelp that helps teachers score and keep track of students' spelling, punctuation and grammar errors so you can focus on the things computers can't score. WriQ auto-scores your students' docs and tracks the following measures over time: -Time spent writing -Text Maturity -Spelling error rate -Grammar error rate -Punctuation error rate -Percentage error free -Correct Word Sequences score The teacher dashboard gives you a clear graphical view of your students' writing activity, and let's you track their progress over time. And It's Free WriQ is completely free for now, but over time additional premium features will be added. For a limited time, as a thank-you to everyone who scores 100 student writing passages to help us out, we'll give you free access...for life!

Wrise
AssistiveWare
Price: $59.99
Special Skill: language development, speech output, authoring system
Academic Skill: reading, word processing
Disability: learning, vision
Skill Level: elementary, secondary, adult
Operating System: Mac
Wrise is a Mac word processor that makes reading and writing accessible for everyone. Designed to support reading comprehension and text composition, it can also be beneficial for individuals with dyslexia. With Text to Speech, word highlighting, zoom and EasyReading mode texts become more comprehensible and easier on the eyes.

Write on Handwriting: Cursive
Write-On Handwriting
Price: $1.99 - $2.99
Special Skill: communication, early childhood
Academic Skill: language arts
Disability: learning
Skill Level: preschool, elementary
Operating System: iOS
Conquering Cursive App for iPad is a developmentally sound app supported by research and years of educational experience. The Write-On Handwriting app fully engages students through multi-sensory instruction of letter and number patterns. The design is age-neutral and provides both instruction and practice modes suitable for all learners.

Writing Therapy
Tactus Therapy Solutions
Price: $19.99
Special Skill: cognitive redevelopment, communication, language development
Academic Skill: health, language arts, spelling
Disability: cognitive, learning, speech
Skill Level: preschool, elementary, secondary, adult
Operating System: iOS, Android
Allows independent practice of copying, written naming, writing-to-dictation and fill-in-the-blank at three levels of difficulty with built-in cues. Move letters around to (re)learn basic writing skills for single words. Download Language Therapy Lite for free trial. English (US and UK accents), Spanish, German, & French.

WYNN Reader
Freedom Scientific, Inc.
Price: $99
Special Skill: communication, language development, vocational, large print, optical character recognition, speech output, IEP/IPP, instructional management
Academic Skill: language arts, reading, spelling, word processing
Disability: cognitive, learning
Skill Level: elementary, secondary, adult
Operating System: Windows
Auditory and visual presentation of material transforms printed and electronic text into understandable information for struggling students. Includes text-to-speech, built-in Web browser, dictionaries, highlighters, spelling and homophone checker. Highlight live on the Web and extract into a separate document. WYNN Reader includes all features except OCR and scanning.

WYNN Wizard
Freedom Scientific, Inc.
Price: $595
Special Skill: language development, vocational, large print, optical character recognition, speech output, IEP/IPP, instructional management

Academic Skill: language arts, reading, spelling, word processing
Disability: cognitive, learning
Skill Level: elementary, secondary, adult
Operating System: Windows
Auditory and visual presentation of material transforms printed and electronic text into understandable information for struggling students. Includes text-to-speech, built-in Web browser, dictionaries, highlighters, spelling and homophone checker. Highlight live on the Web and extract into a separate document. WYNN Wizard includes all features, including OCR and scanning.

Yes-No for iPad
Smarty Ears Apps
Price: $1.99 - $1.99
Special Skill: communication
Disability: speech
Skill Level: preschool, elementary, secondary, adult
This is a simple yes/no communication iPad/iPhone app. It provides voice output for yes/no and it includes both male and female voices.

ZoomText 11 Magnifier
Ai Squared
Price: $395 - $495
Special Skill: communication, vocational, large print
Academic Skill: word processing
Disability: vision
Skill Level: preschool, elementary, secondary, adult
Operating System: Windows
ZoomText Magnifier enlarges and enhances everything on your computer screen, making all of your applications easy to see and use. Exclusive 'xFont' technology displays crystal clear text at all magnification levels. ZoomText Camera feature magnifies print materials. Enhanced Web Finder provide faster searching, navigation and reading on Web pages.

ZoomText 11 Magnifier/ Reader
Ai Squared
Price: $600 - $700
Special Skill: communication, large print, speech output
Academic Skill: word processing
Disability: vision
Skill Level: preschool, elementary, secondary, adult
Operating System: Windows
Combining the features of ZoomText Magnifier with a powerful set of reading tools, ZoomText Magnifier/Reader lets you see and hear what you are doing in all of your applications. Have your documents, Web pages and email read to you right through your computer speakers, even while your doing other tasks.

ZoomText Express
Ai Squared
Price: $49.99 - $69.99

Special Skill: large print
Academic Skill: word processing
Disability: vision
Skill Level: preschool, elementary, secondary, adult
Operating System: Windows
ZoomText Express magnifies (up to 2x) and enhances everything on your computer screen, eliminating eyestrain and fatigue that comes from squinting at the screen. ZoomText Express eliminates screen glare and makes everything easier to find and follow. Now you can use your computer with greater comfort and ease.

ZoomText ImageReader
Ai Squared
Price: $749 - $949
Special Skill: vocational, large print, speech output
Disability: vision
Skill Level: preschool, elementary, secondary, adult
Operating System: Windows
ZoomText ImageReader is a software and camera solution that makes printed text accessible to people who are visually-impaired, including books, magazines, business documents and more. Put the printed item underneath the camera, snap a picture, and a few seconds later the text appears in large fonts and is read aloud.

ZoomText Mac
Ai Squared
Price: $399 - $499
Special Skill: vocational, large print, speech output
Disability: vision
Skill Level: preschool, elementary, secondary, adult
Operating System: Mac
ZoomText Mac is a powerful computer access solution designed for the visually impaired. Through a combination of magnification, enhancements to colors, pointers and cursors, and a WebReader tool, ZoomText Mac provides you with complete access to applications, documents, email and the Internet.

ZoomText USB
Ai Squared
Price: $495 - $795
Special Skill: large print, speech output
Academic Skill: word processing
Disability: vision
Skill Level: preschool, elementary, secondary, adult
Operating System: Windows
With ZoomText USB, you can install and run ZoomText whenever and wherever you need to (with administrative privileges), without having to purchase additional licensing. Once ZoomText has been installed on a system, ZoomText will automatically start up each time you plug in the USB drive.

10 Foot TriFold Portable Wheelchair Ramp

Express Ramps
Price: $519.95 - $519.95
Product Type: seating/positioning/mobility
Skill Level: elementary, secondary, adult
Disability: physical

The Advantage Tri-Fold Ramp from EZ-Access offers the length required for wheelchairs and scooters to access mini and full-size vans, go up a number of steps, or raised landings. Advantage Tri-Fold Ramps split into 2 pieces, have anti-slip coatings, and feature bottom transition plates that make loading a breeze.

2-Point Padded Hip Belts

Bodypoint Inc.
Price: $58 - $126
Product Type: seating/positioning/mobility
Skill Level: preschool, elementary, secondary, adult
Disability: physical

Highest quality materials and advanced design details make Bodypoint belts the top choice of therapists and wheelchair users around the world. Our padded hip belt with two points of attachment is built for maximum functionality, durability, and all-day user comfort. Three pull styles and five buckle styles accommodate individual needs.

4 Switch Proximity Tray Array

Adaptive Switch Laboratories, Inc.
Price: $4480 - $5316
Product Type: seating/positioning/mobility
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: physical

The ASL 106 offers four proximity sensors that allow the driver to operate a power wheelchair. These sensors can be positioned inside a tray or at any available switch site. It was designed for those who have problems maintaining a switch that requires pressure or contact.

4-Point Padded Hip Belts

Bodypoint Inc.
Price: $79 - $163
Product Type: seating/positioning/mobility
Skill Level: preschool, elementary, secondary, adult
Disability: physical

Four points of attachment on this belt ensure the pelvis stays in an aligned, stable position, secure against the wheelchair seat and back supports. Primary straps position the belt while secondary straps anchor it into position. Bodypoint's high quality materials and design details ensure maximum functionality, durability, and all-day comfort.

5 Foot TriFold Portable Wheelchair Ramp

Express Ramps
Price: $219.95 - $219.95
Product Type: seating/positioning/mobility
Skill Level: elementary, secondary, adult
Disability: physical

The Advantage Tri-Fold Ramp from EZ-Access offers the length required for wheelchairs and scooters to access mini and full-size vans, go up a number of steps, or raised landings. Advantage Tri-Fold Ramps split into 2 pieces, have anti-slip coatings, and feature bottom transition plates that make loading a breeze.

5 Little Ducks with BSL Signs Kindle

Co-Sign Communications (inc DeafBooks.co.uk)
Price: $3.14 - $3.14
Product Type: adapted play/manipulative, instructional material, learning aid, sensory stimulation
Skill Level: infant/toddler, preschool, elementary
Disability: cognitive, hearing, speech

Available from amazon.com Thirty-five pages in fixed page landscape format to keep the relevant text with the signs. Part of a series to promote essential early learning skills. Well-loved counting Nursery Rhyme to enjoy with your child. Double-tap the sign graphics for pop-up text to describing the movements.

5 Little Men in a Flying Saucer with BSL Signs Kindle

Co-Sign Communications (inc DeafBooks.co.uk)
Price: $3.24 - $3.24
Product Type: adapted play/manipulative, instructional material, learning aid, sensory stimulation
Skill Level: infant/toddler, preschool, elementary
Disability: cognitive, hearing, learning, speech

Available from amazon.com Thirty-five pages in fixed page landscape format to keep the relevant text with the signs. Part of a series to promote essential early learning skills. Well-loved counting Nursery Rhyme with signs to enjoy with your child. Double-tap the sign graphics for pop-up text describing the movements.

6 Foot TriFold Portable Wheelchair Ramp

Express Ramps
Price: $249.95 - $249.95
Product Type: seating/positioning/mobility
Skill Level: elementary, secondary, adult
Disability: physical

The Advantage Tri-Fold Ramp from EZ-Access offers the length required for wheelchairs and scooters to access mini and full-size vans, go up a number of steps, or raised landings. Advantage Tri-Fold Ramps split into 2 pieces, have anti-slip coatings, and feature bottom transition plates that make loading a breeze.

6610 CHEST SUPPORT

Danmar Products, Inc.
Price: $150
Product Type: seating/positioning/mobility, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, physical

A core of moldable material surrounded in soft foam provides a comfortable chest support that can form to follow body contours. There are strap attachments on the Yokes for wheelchairs, travel chairs and strollers, and the lap belt has pivot mounts for optimal adjustability.

6611 CLEAR CHEST SUPPORT

Danmar Products, Inc.
Price: $130
Product Type: seating/positioning/mobility, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, physical

Flexible yet durable, this easy-to-use design has no bulky hardware and is hardly noticeable! It offers positioning for individuals who benefit from having their upper body stabilized and hips held at a proper angle. It can be used with most standard, high back or custom wheelchairs and strollers.

6615 SPLIT CLEAR CHEST SUPPORT

Danmar Products, Inc.
Price: $130
Product Type: seating/positioning/mobility, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, physical

This flexible yet durable anterior support provides a firm fit, and is designed to be easy on and off. It can be adjusted for seasonal clothing changes and growth. Made of heavy duty 1/8" thick clear PVC vinyl, it will last much longer than harnesses made of fabric.

6620 MODULAR CHEST SUPPORT

Danmar Products, Inc.
Price: $195
Product Type: seating/positioning/mobility, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, physical

We have surrounded a core of moldable material with soft foam to create a chest support that is comfortable and can be formed to follow body contours. The yoke arms and lap belt pivot, allowing for tailored adjustments for ultimate comfort.

6626 TRUNK SUPPORT SYSTEM

Danmar Products, Inc.
Price: $150
Product Type: seating/positioning/mobility
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, physical

Designed for use in a wheelchair or custom seating system, this system provides firm support by using an inner core of molded nylon, with a vinyl-coated soft form cover for comfort and ease of cleaning, and can be permanently mounted to the back of a chair.

6760 UTENSIL HANDLES

Danmar Products, Inc.
Price: $23
Product Type: adapted play/manipulative, learning aid, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical

Versatile and comfortable, these handles will hold eating utensils, personal hygiene items, activity brushes and crayons. Specially contoured sections fit into the hand and have a slide-buckle strap that can be easily adjusted for fit. Available in Blue, Orange or Red and sizes Small or Large.

6762 THERAPY HANDLES

Danmar Products, Inc.
Price: $26
Product Type: adapted play/manipulative, learning aid, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical

Versatile and comfortable, these handles will hold eating utensils, personal hygiene items, activity brushes and crayons. They come with a 1" foam extension to position the thumb and help with grip. Utensils can be placed in the end of the handle or in the thumb extension.

6763 HANDY HELPERS

Danmar Products, Inc.
Price: $9.95
Product Type: adapted play/manipulative, learning aid, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical

This simple, snap-on device allows a person to self-feed. It's easy to use, soft and comfortable, and comes with a spoon as shown. The vinyl-coated foam is easy to clean with warm soapy water.

6764 KNOB HOLDER

Danmar Products, Inc.
Price: $13
Product Type: adapted play/manipulative, instructional material, learning aid, sensory stimulation
Skill Level: infant/toddler, preschool,

elementary, secondary, adult
Disability: cognitive, learning, physical
This attachment fits into the end of the Utensil or Therapy Handle, and is used to positioning a writing instrument. Using this holder makes a pen or pencil's angle adjustable, which makes writing easier. and, no matter what position the hand is in, the user can see what is being drawn or written.

6766 TOY HOLDER
Danmar Products, Inc.
Price: $17
Product Type: adapted play/manipulative, learning aid, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical
This simple, snap on device allows an individual to interact with a small toy placed in his/her hands. Velcro bands are used to hold a toy in place, while webbing attaches around the palm or wrist. It can be adjusted to fit any size. Sold as a pair.

6767-A COMBO UTENSIL HANDLE & KNOB HOLDER
Danmar Products, Inc.
Price: $39
Product Type: adapted play/manipulative, learning aid, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical
This all-in-one tool combines the Utensil Handle (#6760) and the Knob Holder (#6764)with Anchor Strap.

6767-B COMBO THERAPY HANDLE AND KNOB HOLDER
Danmar Products, Inc.
Price: $42
Product Type: adapted play/manipulative, learning aid, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical
This all-in-one tool combines the Therapy Handle(#6762) and the Knob Holder (#6764) and Anchor Strap.

6770 MIBOWL HOLDER
Danmar Products, Inc.
Price: $45
Product Type: instructional material, learning aid, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical
This new design makes self-feeding easier than ever! Suction cups hold our foam bowl holder in place, preventing movement around the table. Use with our Handy Helpers (6763) for even more eating independence. The bowl is included and our vinyl-coated foam is easily cleaned with warm soapy water.

6771 MIPLATE HOLDER
Danmar Products, Inc.

Price: $45
Product Type: adapted play/manipulative, learning aid, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical
This new design uses suction cups to hold the plate in place, preventing movement around the table, making self-feeding easier than ever! Use with our Handy Helpers (6763) for even more eating independence. Our vinyl-coated foam is easily cleaned with warm soapy water.

6775 MITABLE TOPPER
Danmar Products, Inc.
Price: $55
Product Type: adapted play/manipulative, seating/positioning/mobility, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical
This soft foam table topper makes hard surfaces safer than ever, protecting heads and hands from making contact while also protecting table surfaces during art activities. The foam is vinyl-coated and easy to clean with warm soapy water.

6780 MITABLE TOPPER KIT
Danmar Products, Inc.
Price: $99
Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical
Comes complete with Table Topper Pad, Bowl or Plate Holder, and Handy Helper with spoon. The suction cups on the Bowl or Plate Holder sticks right to the Table Topper Pad and will not move. All components are vinyl-coated and easy to clean with warm soapy water.

6785 MIMITTS
Danmar Products, Inc.
Price: $105
Product Type: adapted play/manipulative, seating/positioning/mobility, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, physical
Our all-foam mitts are specially designed to help absorb and deflect the impact when an individual strikes out. They can be applied and secured quickly with Velcro straps, protecting both the wearer from injuring themselves as well as possibly injuring person(s) nearby; clean with warm soapy water.

6809 HENSINGER WITH HIGH BACK
Danmar Products, Inc.
Price: $130
Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical, speech, vision
Revolutionary in the world of cervical collars, this soft but supportive foam collar braces the head by supporting the occiput and jawline, and is 1" taller in the back. Helping to maintain mid-line head positioning results in improved breathing, swallowing and simplified feeding and aids with social interaction and awareness.

6810 HENSINGER HEAD SUPPORT
Danmar Products, Inc.
Price: $125
Product Type: seating/positioning/mobility, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical, speech, vision
Revolutionary in the world of cervical collars, the soft yet supportive foam is designed to brace the head by the jawline. It can be used with a chest support or mounted to a permanent seating system.

6815 HENSINGER HEAD SUPPORT WITH MOUNT BAR
Danmar Products, Inc.
Price: $152
Product Type: seating/positioning/mobility, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical, speech, vision
Social interactions and learning skills may be achieved more easily if the head is comfortably positioned while using feeder seats. The preformed bar has a Hensinger Head Support (6810 or 6809) attached. Specify size of feeder seat and Hensinger when ordering.

6826 ANTERIOR HEAD SUPPORT
Danmar Products, Inc.
Price: $126
Product Type: learning aid, seating/positioning/mobility, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical, speech, vision
Help to combat chin drop with this head support which provides firm yet gentle lifting of the chin, and lateral support of the head. There is a padded roll around the rear strap for a comfortable finish.

6828 SIDE-OPENING HEAD SUPPORT
Danmar Products, Inc.
Price: $145
Product Type: seating/positioning/mobility, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, physical, speech, vision
Secure, soft and very supportive, this head support opens on the side for easy on/off. It provides firm yet gently lifting of the chin, as well as lateral and occipital support of the head. The vinyl coating is easily cleaned with warm soapy water.

6833 SWIRL COLLAR
Danmar Products, Inc.
Price: $69
Product Type: learning aid, seating/positioning/mobility, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical, speech, vision
This swirl of soft foam wraps around the neck and has an adjustable Velcro closure in the rear, which makes fitting a breeze and encourages easy movement from side-to-side. Used for minor to moderate support, the Swirl can be used with any seating system and by individuals who are ambulatory.

6855 SOFT DEFLECTOR
Danmar Products, Inc.
Price: $100
Product Type: seating/positioning/mobility
Skill Level: elementary, secondary, adult
Disability: learning, physical, vision
This small, lightweight and discreet toileting aid can attach to any toilet seat; snap on the front or clamp to the rim. The vinyl-coated foam is easy to clean with warm soapy water, and fits onto our Toilet Seat Cover with Reducer Ring (#6850).

6856 PERSONAL DEFLECTOR
Danmar Products, Inc.
Price: $108
Product Type: seating/positioning/mobility
Skill Level: elementary, secondary, adult
Disability: physical
For standard deflectors that are too bulky and make toileting difficult, our personal deflector with a flexible preformed waistband, holds our soft deflector in place. Can be adjusted up and down, as well as side-to-side, and is easily cleaned with warm soapy water.

6858 PRIVACY APRON
Danmar Products, Inc.
Price: $120
Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility
Skill Level: preschool, elementary, secondary, adult
Disability: cognitive, learning, physical
Made to fit both open front and round styles of standard toilet seats (and our #6850 Toilet Seat Cover with Reducer Ring), this toileting aid can be mounted using a bracket or clamped onto the rim. Our germ resistant, vinyl-coated foam is easy to clean with warm soapy water.

6860 CHANGING STATION KIT
Danmar Products, Inc.
Price: $164.95
Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation
Skill Level: elementary, secondary, adult
Disability: cognitive, hearing, learning, physical

Our germ resistant, vinyl-covered foam is soft and easy to clean using warm soapy water. Soft and cushiony, the pad and forehead/chin rest add comfort while the J-Clips hold everything in place. Contains Changing Pad, Chin/Forehead Rest and J-Clips.

7 Foot TriFold Portable Wheelchair Ramp
Express Ramps
Price: $299.95 - $299.95
Product Type: seating/positioning/mobility
Skill Level: elementary, secondary, adult
Disability: physical

The Advantage Tri-Fold Ramp from EZ-Access offers the length required for wheelchairs and scooters to access mini and full-size vans, go up a number of steps, or raised landings. Advantage Tri-Fold Ramps split into 2 pieces, have anti-slip coatings, and feature bottom transition plates that make loading a breeze.

8 Foot TriFold Portable Wheelchair Ramp
Express Ramps
Price: $379.95 - $379.95
Product Type: seating/positioning/mobility
Skill Level: elementary, secondary, adult
Disability: physical

The Advantage Tri-Fold Ramp from EZ-Access offers the length required for wheelchairs and scooters to access mini and full-size vans, go up a number of steps, or raised landings. Advantage Tri-Fold Ramps split into 2 pieces, have anti-slip coatings, and feature bottom transition plates that make loading a breeze.

8720 DELTA SWIM SYSTEM
Danmar Products, Inc.
Price: $120
Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation
Skill Level: elementary, secondary, adult
Disability: cognitive, hearing, learning, physical

This component system is designed to aid in progressive swimming development, perfect for ambulatory individuals with postural balance and arm control. As swimming skills improve, pads can be removed to help achieve independence.

8721 PAD PLUS
Danmar Products, Inc.
Price: $45
Product Type: adapted play/manipulative,

learning aid, seating/positioning/mobility, sensory stimulation
Skill Level: elementary, secondary, adult
Disability: cognitive, hearing, learning, physical

Offered to modify the Delta Swim System (#8720) and the Tri-Swim (#8728), the Pad Plus may be attached to the front section to add buoyancy and raise the body position in the water.

8723 SECTIONAL RAFT
Danmar Products, Inc.
Price: $240
Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical

For individuals who are insecure in the water or non-ambulatory, the Sectional Raft supports and cradles the body, while allowing water to flow around the body, enabling interaction with the environment and helping to reduce anxiety.

8724 SWIM RINGS
Danmar Products, Inc.
Price: $87
Product Type: adapted play/manipulative, instructional material, learning aid, seating/positioning/mobility, sensory stimulation
Skill Level: elementary, secondary, adult
Disability: cognitive, hearing, learning, physical

Create your own personal flotation device with these versatile rings! Sets may be snapped together for neck, chest, torso, or body support, and the individual rings can be added or removed to adjust for comfort, and to increase or decrease flotation.

8725 HEAD FLOAT
Danmar Products, Inc.
Price: $105
Product Type: adapted play/manipulative, instructional material, learning aid, seating/positioning/mobility, sensory stimulation
Skill Level: preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical

Independence for everyone- there is no need to support the head manually, and hands are free! Superb cushioning allows the head to rest without pressure on the spinal column, which encourages neutral positioning.

8727 DOLPHIN FLOAT SYSTEM
Danmar Products, Inc.
Price: $172
Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation
Skill Level: elementary, secondary, adult
Disability: cognitive, hearing, learning, physical

Designed for physically involved individuals who have head/neck control, but may need to compensate for uneven weight. Using the side pads helps minimize a user's tendency toward lateral rotation, and the front chest pad provides additional lift and is removeable.

8729 STABILIZER BAR
Danmar Products, Inc.
Price: $120
Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation
Skill Level: elementary, secondary, adult
Disability: cognitive, hearing, learning, physical

Helps maintain balance and equilibrium during walking/gaiting pool exercises. It is also great for resting on or extending out in front for kicking drills, as well as workouts for individuals with mild arthritis. The amount of flotation can be adjusted by adding or removing rings.

8730 COMFORT MAT
Danmar Products, Inc.
Price: $160
Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation
Skill Level: preschool, elementary, secondary, adult
Disability: cognitive, learning, physical

Designed for use in the many situations where foam padding would be welcome. Place at the pool's edge to ease entry/exit. In the locker room, they insulate against the cold tile floors, and provide changing comfort. They make a great flotation raft too.

8735 HEAD FLOAT & STABILIZER BAR
Danmar Products, Inc.
Price: $200
Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation
Skill Level: preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical

This combination helps keep the face out of the water, and works well not only for swimmers with Athoid CP but also for those who roll sideways and backwards. Now they can stretch and turn their heads when interacting with others without tipping or rolling.

9708 SOFT COMFY CAP
Danmar Products, Inc.
Price: $96
Product Type: adapted play/manipulative, instructional material, learning aid, seating/positioning/mobility, sensory stimulation, telecommunications
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, speech, vision

Our lightest, coolest helmet yet! This stylish, head-hugging design made of compression-molded foam offers a uniquely comfortable fit, weighing only 3 ounces. It provides maximum ventilation and retains limited body heat, and is easy to clean with warm, soapy water.

9709 Hard Top Comfy Cap
Danmar Products, Inc.
Price: $131
Product Type: adapted play/manipulative, instructional material, learning aid, seating/positioning/mobility, sensory stimulation, telecommunications
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, speech, vision

Our lightest, coolest Hard Shell Helmet yet! This 11.5 ounce helmet is made of a compression-molded inner foam liner attached to a hard plastic exterior. The stylish design is extremely well-ventilated and retains limited body heat. It's easy to clean, using warm soapy water.

9817 HALO HELMET
Danmar Products, Inc.
Price: $174
Product Type: seating/positioning/mobility
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, speech, vision

Ideal for individuals who do not need full head coverage. A band of 5-8" soft, vinyl-coated foam surrounds the head at the forehead level, and extends down to cover the temporal and occipital areas. It's easy to clean with warm soapy water. Average weight is 10 ounces.

9820 SOFT SHELL HELMET
Danmar Products, Inc.
Price: $123
Product Type: seating/positioning/mobility
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, speech, vision

This lightweight helmet is constructed out of 1/2" thick shock-absorbing foam and is fully ventilated without compromising head coverage. It's vinyl-coated with our Fabricoat which does not allow for bacteria growth, and is easy to clean with warm soapy water. Average weight is 8 ounces.

9821 HARD SHELL HELMET
Danmar Products, Inc.
Price: $160
Product Type: seating/positioning/mobility
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, speech, vision

This headgear is both comfortable and effective in reducing the risk of injury. A

strong polyethylene shell covers a shock-absorbing foam liner which is vinyl-coated and easy to clean with warm soapy water. It allows for ventilation without compromising head coverage. Average weight is 17 ounces.

9822 HARD SHELL HELMET WITH FACE GUARD
Danmar Products, Inc.
Price: $260
Product Type: seating/positioning/mobility
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, speech, vision
This protective helmet features a shock-absorbent foam liner which is riveted to a strong polyethylene outer shell. A clear polycarbonate face guard is attached to the outer hard shell. There is an eye opening for an unobstructed view and a mouth opening for maximum ventilation. Weight averages 25 ounces.

9823 CHIN GUARD
Danmar Products, Inc.
Price: $50
Product Type: seating/positioning/mobility
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, speech, vision
This 1/2" thick foam guard fits comfortably over the chin area and can be worn with every helmet except for the 9822 Hard Shell Helmet with Face Guard. It is soft yet shock-absorbent and easily cleaned with warm soapy water. Weight averages 1.5 ounces.

9824 HARD SHELL HELMET WITH FACE BAR
Danmar Products, Inc.
Price: $208
Product Type: seating/positioning/mobility
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, speech, vision
A clear 2" wide polycarbonate bar is securely attached to our 9821 Hard Shell Helmet so that it can't move, to reduce the risk of injury to the facial area. The shock absorbent foam liner is vinyl-coated and the entire helmet is easy to clean with warm soapy water. Weight averages 21 ounces.

9825 DELUXE HARD SHELL HELMET
Danmar Products, Inc.
Price: $171
Product Type: seating/positioning/mobility
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning,

physical, speech, vision
This sporty version of our 9821 Hard Shell Helmet adds a decorative visor and rubber chin cup, adding style and flair. Our shock-absorbent foam is riveted to a strong, polyethylene outer hard shell, allowing ventilation without compromising head coverage. Easily cleaned with warm soapy water. Weight averages 18 ounces.

9829 FULL COVERAGE HELMET
Danmar Products, Inc.
Price: $152
Product Type: seating/positioning/mobility
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, speech, vision
This lightweight helmet is constructed out of 5-8" vinyl-coated foam and covers more of the temporal and cheek areas, as well as the area around the ears and nape of the neck. It's easy to clean with warm soapy water. Average weight is 10 ounces.

9830 CLEAR HELMET
Danmar Products, Inc.
Price: $220
Product Type: adapted play/manipulative, instructional material, learning aid, seating/positioning/mobility, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, speech, vision
This clear polycarbonate helmet is well-ventilated and edged with soft foam. We include 8 moveable pads that can be used to adjust the sizing and elevate specific areas of the helmet away from wound sites. It is easily cleaned with warm soapy water.

9836 NEWBORN CAP
Danmar Products, Inc.
Price: $83
Product Type: seating/positioning/mobility
Skill Level: infant/toddler
Disability: cognitive, hearing, learning, physical, speech, vision
This ultra-lightweight helmet is made from soft, 3/8" shock-absorbent foam and is fully ventilated. It's coated in vinyl so it's easy to clean with warm soapy water. A soft chinstrap holds the cap in place, and the ribbon on the front allows for moderate growth.

9910 SOFT COMFY CAP WITH DESIGN
Danmar Products, Inc.
Price: $142
Product Type: adapted play/manipulative, instructional material, learning aid, seating/positioning/mobility, sensory stimulation, telecommunications
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, speech, vision

Our lightest, coolest helmet yet! This stylish head-hugging design of compression-molded foam offers a uniquely comfortable fit, and weighs just 3 ounces. It provides maximum ventilation and retains limited body heat, and is easy to clean with warm soapy water. Choose from Butterfly or Camouflage design.

Aeromesh Calf Panel
Bodypoint Inc.
Price: $92 - $104
Product Type: seating/positioning/mobility
Skill Level: elementary, secondary, adult
Disability: physical

Bodypoint Calf Panels keep feet safely and comfortably on wheelchair foot plates. Wide strap distributes pressure across a broad calf region, especially useful for those in tilt or reclined position. Smooth, porous Aeromesh fabric provides air circulation and comfort while a stiffener layer maintains panel shape, eliminating folding and buckling.

Aeromesh Calf Strap
Bodypoint Inc.
Price: $71 - $83
Product Type: seating/positioning/mobility
Skill Level: elementary, secondary, adult
Disability: physical

Bodypoint Calf Straps keep feet safely and comfortably on wheelchair foot plates. A two-layer design blends comfort and function, and keeps feet from falling without bruising skin. Smooth, porous Aeromesh fabric against the legs provides air circulation and comfort while a stiffener layer maintains its shape, eliminating folding and buckling.

Aeromesh Rapid-Dry Bath Belts
Bodypoint Inc.
Price: $86 - $104
Product Type: seating/positioning/mobility
Skill Level: elementary, secondary, adult
Disability: physical

For users with poor trunk control or in tilt position, Bodypoint's Aeromesh belts provide a complete positioning solution for use while bathing. Belts can be worn across the chest, abdomen, knees or legs. Unique fabric allows water, soap, dirt and air to pass through freely while protecting skin and promoting hygiene.

Aeromesh Shower Chair Calf Support
Bodypoint Inc.
Price: $68 - $68
Product Type: seating/positioning/mobility
Skill Level: elementary, secondary, adult
Disability: physical

A calf strap designed specifically for shower chairs! Silky, porous Aeromesh material is soft on skin while allowing soapy water, dirt and air to pass through. Attaches to all major models using sewn-in clips; no hardware required. The 4 height supports legs but does not interfere with chair operation.

Aira
Aira

Price: $89 - $199
Product Type: seating/positioning/mobility
Skill Level: adult
Disability: vision

Aira develops assistive technology that connects the blind with certified agents via smart glasses and a dashboard that allows agents to see what the blind person sees real time. Agents help users accomplish a range of tasks from navigating streets, recognizing faces, and traveling the world. Prices are per month.

Bouncy Bands for Chairs
Bouncy Bands LLC
Price: $13.95
Product Type: learning aid, seating/positioning/mobility, sensory stimulation
Skill Level: elementary, secondary, adult

Disability: learning

Bouncy Bands for Chairs quickly install on chairs for students to rest and bounce their feet while they work quietly at their desk. Kids love being able to release their extra energy, anxiety, and boredom without distracting others. Teachers notice how students stay calmer, happier, and on task longer. Each set comes with 2 support pipes that keep the band in place when being used so it won't slide down to the floor. These support pipes stay in place so the chair can still be moved, lifted, and stacked without falling off. Please note that the support pipes are 4" tall and have a 1.5" inside diameter. Also, these support pipes are available in blue or black. The heavy-duty band is available in 2 sizes. Bouncy Bands for Elementary School Chairs have a 13.5" band that will stretch to fit chairs that are 13-17" wide. Bouncy Bands for Middle and High School Chairs have an even thicker 17" band that will stretch to fit chairs that are 17-22" wide. Note that all Bouncy Bands are made in the USA and latex free.

Bouncy Bands for Desks
Bouncy Bands LLC
Price: $14.95
Product Type: learning aid, seating/positioning/mobility, sensory stimulation
Skill Level: elementary, secondary, adult
Disability: learning

Bouncy Bands for Desks quickly install on desks so students can bounce their feet and stretch their legs while they work quietly. Students love being able to release their extra energy and anxiety in class without distracting others. Teachers notice how students stay calmer, happier and on task longer. Each set comes with 2 support pipes that keep the band in place when being used so it won't slide down to the floor. Please note that the support pipes are 8" tall and have a 1.5" inside diameter. Also, these support pipes are available in blue or black. The heavy-duty band is available in 2 sizes. Bouncy Bands for Standard Desks have a 20" band that will stretch to fit most desks that are 20-26" wide. Bouncy Bands for Wide Desks have a 31" band that will stretch to fit desks that are 31-38" wide. Note that all Bouncy Bands are made in the USA and latex free.

Braillabels
American Thermoform Corporation
Price: $39.99 - $349.99
Product Type: adapted play/manipulative, instructional material, learning aid, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult

It contains ten award winning storybooks commonly read in elementary classrooms, a kit to adapt them for easy student access, and story related manipulatives to encourage student participation.

Butler
Camanio Care Inc
Price: $503 - $503
Product Type: seating/positioning/mobility
Skill Level: preschool, elementary, secondary, adult
Disability: physical
Butler is a flexible table that is both pivot-able as well as height-adjustable and therefore creates a very good basis for most purposes: eat, write, read, armrest, work, crafts and more. Butler is a CE-marked medical device designed to support people with disabilities. The product is developed based from actual needs. With an ergonomically designed disc, the table can be brought very close to the body which has many advantages. For instance, Butler can ease and assist people with difficulties sitting correctly, such as elderly, people with arthritis, neurological diagnoses and back- and neck injuries. With Butler it is easier to reach things on the table for instance, a glass of water. Also, if several people are seated together at the same table and require different height settings, Butler can easily be screwed directly on to the table.

C-Pen Reader by Reader-Pen
Cadan Assistive Technologies
Price: $250 - $250
Product Type: instructional material, learning aid
Skill Level: elementary, secondary, adult
Disability: cognitive, learning, physical, speech, vision
The C-Pen Reader pen scanner is major technological breakthrough for anyone learning English and is a life-saver for those who suffer from reading difficulties such as dyslexia. The C-Pen Reader is a totally portable, pocket-sized device that reads text out aloud with an English human-like digital voice.

Caregiver Alert
Adaptive Tech Solutions
Price: $42.53
Product Type: adapted play/manipulative, telecommunications
Skill Level: elementary, secondary, adult
Disability: hearing, physical, speech
Our wireless attendant call button system allows people with limited or no finger use to activate the button using a switch. This chime is loud, travels through walls up to 75 feet. Can be used with an external switch for those with limited finger use.

CB100 - Compound Bow Mount
Be Adaptive Equipment, Inc.
Price: $609 - $609
Product Type: adapted play/manipulative
Skill Level: elementary, secondary, adult
Disability: physical
Model CB100 is designed for individuals with limited hand and arm movement and strength. This piece of equipment works on most all models of compound bows and can be used with right hand or left hand bows. It allows the limited mobility user to pivot the bow left and right and up and down while the mount holds the entire weight of the bow. The CB100 mount requires the use of a Draw-Loc or similar product (which is not included) to hold the bow at full draw for the user.

Chest Belt
Bodypoint Inc.
Price: $68 - $98
Product Type: seating/positioning/mobility
Skill Level: elementary, secondary, adult
Disability: physical
A comfortable, low-profile postural support option for users with limited hand function or those who prefer chest support without a buckle. New flexible molded end-tab is easy to grab, and upgraded hook-and-loop material holds securely but is smooth to the touch. Optional slip-on pads sold separately.

CJT Suction Cup Table Stand
CJT Mounting
Price: $225 - $450
Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical, speech
The heavy duty suction base keeps your device in place for hours. The CJT suction cup table stand is perfect tablets and small devices.

Classroom Audio Technology
Lightspeed Technologies, Inc.
Price: $895 - $3500
Product Type: learning aid, sensory stimulation, telecommunications
Skill Level: preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, speech
In today's dynamic classroom, it's no longer enough to have the best speech intelligibility possible. Lightspeed's access systems provide clear communication during whole group instruction plus two way audio to each small group. This allows teachers to monitor small groups, redirect off-task behavior, and encourage collaboration. Our classroom audio distribution systems help every student and assist those who need it most.

Deafness + Music
CymaSpace
Price: $0
Product Type: sensory stimulation
Skill Level: adult
Disability: hearing
Myles de Bastion is a musician who also happens to be Deaf. His search for ways to bridge his passion for music with his Deaf identity led him to develop technology that enables sound to be experienced as light and vibration.

DeCoste Writing Protocol
Don Johnston, Inc.
Price: $25 - $529
Product Type: instructional material
Skill Level: elementary, secondary, adult
Disability: cognitive, learning
In this age of accountability and assessment, your district needs a process to evaluate writing issues for students with disabilities. Unfortunately, many districts don't have a systematic way to do this. The DeCoste Writing Protocol is a formative assessment tool that helps educators identify factors affecting an individual student's ability to produce writing. The Writing Protocol compares a child's individual performance across handwriting and keyboarding tasks. It examines spelling performance and writing skills so educators make more informed decisions about instructional strategies and the appropriate use of technology to meet classroom demands. The DeCoste Writing Protocol evolved from Dr DeCoste's original book, Assistive Technology Assessment: Developing a Written Productivity Profile, first published in 2004. Much has changed over the last decade fueled by advances in technology and insights from new research.

Developing Reading Fluency Intro Pkg
Attainment Company, Inc.
Price: $259
Product Type: instructional material
Skill Level: elementary, secondary, adult
Disability: learning

The stylus pointer is available in four options that differ in length and bend-ability.

Headpod
Westminster Technologies
Price: $495 - $535
Product Type: seating/positioning/mobility
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: physical
The Headpod is a new dimension in the treatment of people who have inadequate head control. Until now, head control has been achieved through mechanical restraints on the sides of the head or neck of the user. The concept of vertical, dynamic support of the head is completely new. With it, the head is kept upright while at the same time it gives the user effortless mobility This may improve their effectiveness in other activities.

Headpod Dynamic Head Support
PACIFIC REHAB
Price: $495
Product Type: adapted play/manipulative, seating/posiioning/mobility
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, physical
A dynamic head support device which can be applied to almost anything with a headrest while the child is upright,.. wheelchair, walker, stroller, stander,bike or activity chair. The child is able to move

in full rotation, as well as chin tuck and extension, but not head drop. As the child acquires strength, the upper band is relaxed and they are able to move within their plane of strength. It is a completely different philosophy from head restraints and collars, which tends to atrophy musculature further due to lack of movement. The Headpod can only be used when the child is upright, to begin within their point of balance. A functional aide during power wheelchair use, Aug Comm and feeding. Any time that fatigue prevents function. It is not to be used for van or bus transport.

Health Care Communication Board (200 boards)
Greenhouse Publications
Price: $49
Product Type: instructional material, learning aid, telecommunications
Skill Level: elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, speech

Hoonuit's Professional Development and Data Analytics
Hoonuit
Price: $200

Product Type: instructional material, learning aid, sensory stimulation, telecommunications
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, speech, vision
Hoonuit provides continuous and in-depth resources to support ongoing learning to meet the PD requirements redefined by ESSA, but also to ensure teachers are prepared and empowered to reach every student effectively. With the Every Student Succeeds Act (ESSA) implementation upon us, clear and accessible reporting is evolving. The additional transparency is important, but the new reporting requirements are putting added strain on already scarce time and resources. Hoonuit supports your accountability reporting efforts without sacrificing the access to data you need to make decisions.

Hoonuit's Professional Development Solution
Hoonuit
Price: $800
Product Type: instructional material, learning aid, sensory stimulation, telecommunications
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, speech, vision
The one-time workshop or professional development days are a thing of the past. For districts to ensure the learning opportunities they provide their teachers and staff are positively impacting student success, administrators are diving deeper to challenge the quality and delivery of PD. Hoonuit provides continuous and in-depth resources to support ongoing learning to meet the PD requirements redefined by ESSA, but also to ensure teachers are prepared and empowered to reach every student effectively.

Hybrid Dual Arm Mount'n Mover with Pow!r Shoulder
BlueSky Designs
Price: $4800 - $4800
Product Type: seating/positioning/mobility
Skill Level: preschool, elementary, secondary, adult

InnverVoice AI
iTherapy, LLC
Price:
Product Type: learning aid
Skill Level: preschool, elementary, secondary
Disability: cognitive, learning, speech
InnerVoice can work like a typical communication device: letting your thoughts and feelings be heard and understood by others. Unlike traditional speech-generating apps, though, InnerVoice combines artificial intelligence technology with facial expressions, emotions, tone-of-voice, written words, and videos — providing a complete multi-sensory learning experience. Visual Language is an exciting new feature that uses Microsoft's Azure artificial intelligence technology to teach language and literacy skills in a unique way. The camera displays what you're looking at. Take a picture and watch InnerVoice's AI system label your picture with text and describe it with speech — allowing users to see the relationships shared among the environment, speech, language, and text. Visual language makes creating and editing buttons easier than ever: just take a picture and InnerVoice's AI system labels the button and adds a description.

Interactive Communication Card Sets
Greenhouse Publications
Price: $29.95
Product Type: instructional material, learning aid
Skill Level: infant/toddler, preschool, elementary
Disability: cognitive, hearing, learning, speech

LiteShower Portable Handicap Showers
Nova Health Products
Price: $649 - $749
Product Type: seating/positioning/mobility
Skill Level: adult

Disability: physical
Patented and made in the USA, LiteShower portable handicap showers are wheelchair accessible, foldable shower stalls that can be used anywhere in your home. Lite-Shower costs about 1/10 of an ADA roll-in shower and/or walk-in tub.

Little Step-by-Step GamePlay
AbleNet, Inc.
Price: $195 - $195
Product Type: adapted play/manipulative, learning aid
Skill Level: preschool, elementary, secondary, adult
Disability: cognitive, learning, physical, speech
Incorporating Step-by-Step GamePlay into game-based instructional lessons enables students to learn basic skills such as eye-hand coordination and complex skills like problem solving. Strategic thinking is developed as students are challenged, motivated and engaged. This promotes learning by doing, making students active learners in acquiring new skills.

LM100 - Limited Mobility
Be Adaptive Equipment, Inc.
Price: $609 - $609
Product Type: adapted play/manipulative
Skill Level: elementary, secondary, adult
Disability: physical
Be Adaptive Equipment Model LM100 is a limited mobility unit. Designed for use by people with limited use or paraplegics that cannot hold a gun up. Is designed for individuals with limited hand and arm movement and strength. The unique design of the equipment makes the weapon seem almost weightless to the person using it and allows them to have a full range of motion, up, down, and side to side. The simplicity of the LM100 allows it to hold all pistols, crossbows, rifles, and shotguns. The LM100 does not include a power trigger mechanism. If you lack hand movement and need assistance with this, you can purchase our TM100 (power trigger mechanism) and use it with this piece of equipment. To install the LM100 on your chair, it is as simple as placing the mounting plate with receiver tube under your cushion before being transferred into the chair. Once you are in the chair, simply sit the equipment in the receiver tube located between your legs. The design of the mounting plate allows the equipment to be used with almost any brand of wheelchair.

Look at Math
Attainment Company, Inc.
Price: $34 - $289
Product Type: instructional material
Skill Level: secondary
Disability: learning, physical
A standards-based, heavily-illustrated curriculum supporting secondary students

with math concepts. Includes situational and number line illustrations to help with visualization of concepts. Organized into three units: Numbers, Measurements, and Fractions and provides 11 chapters with consistent format. Also, progresses in difficulty as students complete lessons.

Adaptive Switch Laboratories, Inc.
Price: $3852 - $6612
Product Type: seating/positioning/mobility
Skill Level: secondary, adult
Disability: physical
The ASL 101 has a display module that illuminates 5 LED's for forward, right, left, reverse and select. The scan rate is adjustable and is best used for someone that only has one switch site available and other means for driving have been ruled out as an option.

Sip and Puff Head Array
Adaptive Switch Laboratories, Inc.
Price: $4730 - $5802
Product Type: seating/positioning/mobility
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: physical
The ASL 109 combines simple sip and puff controls with head movements. This system is designed for those with lateral head movement and weak breath control volume. The driver control is typically used with individuals with high level spinal cord injury.

Skoog 2.0
Skoogmusic
Price: $199.95
Product Type: adapted play/manipulative
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical, vision
Skoogmusic makes musical instruments we can all play. And we really do mean everyone! Play, jam and create music right out the box. We call it 'musicplay.'

Skwitch
Skoogmusic
Price: $49.95

OTHER AT

Product Type: adapted play/manipulative, learning aid, sensory stimulation
Skill Level: preschool, secondary, adult
Disability:
Skwitch is the brand new musical instrument from Skoogmusic. But we think it's so much more. Think of it as Skoog's compact, nimble little brother. Or sister. And it clips straight on to your iPhone, so within minutes you have a piece of accessible tech that you can use to create music, learn coding and more. It's a bit like magic, but better.

Slip-on Pads
Bodypoint Inc.
Price: $41.5 - $49.5
Product Type: seating/positioning/mobility
Skill Level: preschool, elementary, secondary, adult
Disability: physical
Slip-On Pads slide over webbing to add padded comfort to basic non-padded chest or hip belts, providing greater pressure distribution. Non-wrinkling, flexible fabric resists dirt and grime, and rounded edge binding avoids skin irritation. Three sizes to fit 1", 1.5" and 2" webbing.

SmartKnitKIDS Seamless Sensory Garments
Knit-Rite, Inc.
Price: $7.95 - $19.99
Product Type: sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: physical
Bumps, seams, ouchies, burglers, or nuggies. By whatever name they're called, seams and lumps and bumps can be a nuisance. SmartKnitKIDS Seamless Products have taken the woes out of clothes and help to keep the morning routine in check. In 2003, SmartKnitKIDS, a brand of Knit-Rite, Inc., started receiving requests from parents for a completely seamless sock. It seemed that all the seamless socks available had a flat or handlinked seam across the toes. To a sensitive child, this was still a bother; there was still a toe seam. With over 90 years of medical textile expertise, Knit-Rite used parent feedback to create a patented 100% seamless sock with added comfort features for sensitive feet. Children are not the only ones with sensitive feet and toes. Often sensitive kiddos turn into sensitive adults. SmartKnitKIDS expanded their line to include seamless socks for adults, appropriately named SmartKnit Big KIDS Socks. In 2010, SmartKnitKIDS launched patent pending Seamless Undies. The first of its kind, their seamless undies are seam free, elastic free, and gently hug little bottoms! The evolution continued with the launch of the Seamless Compresso-T & Bralette in 2011. The Compresso-T is a form-fitting undershirt

that protects skin from annoying clothing seams and provides a soothing 'hug'.

Smarty Symbols
Smarty Ears Apps
Price: $2000 - $20000
Product Type: instructional material, telecommunications
Skill Level: preschool, elementary, secondary, adult
Disability: cognitive, learning, physical, speech
Smarty Symbols is a symbol library developed to serve as a standard picture library for developing educational activities, apps, and software. Smarty Symbols contains over 11 thousand pictured icons originally created by Smarty Ears and it is ready to be licensed by developers and AAC companies.

Snow 7 HD
Zoomax
Price: $1000 - $1000
Product Type: learning aid
Skill Level: adult
Disability: vision
Snow 7 HD an easy to use 7-inch handheld video magnifier that offers real-time, crisp images on an ergonomically settled widescreen. With its small book size and only 16.93 ounces, Snow 7 HD can be taken anywhere to read closely and see at a distance.

Somatosensory Musical Bead Chain/Switch
Enabling Devices
Price: $179.95
Product Type: adapted play/manipulative, learning aid, sensory stimulation
Skill Level: preschool, elementary, secondary
Disability: cognitive, learning, physical, vision
Used for developing the concept of cause and effect. Movement of the beads will turn on a built-in music box. When the beads are manipulated, the music stays on. It can also be used as a capability switch without music when connected to any toy or device.

Square Panda Phonics Playset
Square Panda Inc.
Price: $119 - $119
Product Type: adapted play/manipulative, instructional material, learning aid, sensory stimulation
Skill Level: infant/toddler, preschool, elementary
Disability: cognitive, hearing, learning, physical, vision
Square Panda is an award-winning complete phonics learning system with multi-sensory instruction. Learners in early literacy environments engage in tactile, auditory, and visual learning through physical smart letters that interact with a library of 10 free learning games, creating

a highly-engaging, multisensory early literacy instructional experience.

Stages
Attainment Company, Inc.
Price: $69 - $199
Product Type: instructional material
Skill Level: preschool, elementary, secondary
Disability: learning, physical
A seven-stage framework for cognitive and language development. Covers learner considerations, relevant issues, communication strategies, tips for evaluating software, and a skills checklist before moving on to the next stage. Includes references to research and published articles and provides recommendations for software, apps, and manipulatives materials.

Stayflex Chest Support
Bodypoint Inc.
Price: $150 - $172
Product Type: seating/positioning/mobility
Skill Level: preschool, elementary, secondary, adult
Disability: physical
Provides wheelchair users firm trunk control without sacrificing comfortable shoulder movement. Patented, dual-zone construction eliminates upwards shift at the neckline when leaning forward, minimizing strangulation risk. Carefully selected materials optimally balance stretch and resistance, and quick-release swivel buckles allow easy removal. Available in two widths and with or without zipper.

Steady Stylus
ShapeDad
Price: $28 - $48
Product Type: adapted play/manipulative
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: physical
T-shaped stylus for tablet and smartphone for assistive grip aids. It is available in two versions: regular and mini.

Storytime Revised Book and Electronic files
Creative Communicating
Price: $50
Product Type: adapted play/manipulative, instructional material, learning aid, sensory stimulation
Skill Level: preschool, elementary
Disability: cognitive, hearing, learning, physical, speech
Save hours of time coloring and collecting pictures by using this ready-to-print software. An instructive step-by-step approach is introduced for building immediate success with early literacy skills and communication.

Straight Joystick Handle
Bodypoint Inc.
Price: $77 - $77
Product Type: seating/positioning/

mobility
Skill Level: preschool, elementary, secondary, adult
Disability: physical
Bodypoint's Straight Joystick Handle for power wheelchairs makes it easy to grasp the joystick using only the last joint of the user's fingers. This design is especially useful for users with very limited hand function. Can also be cut to length for a precise fit.

Sub-ASIS Compatible Belts
Bodypoint Inc.
Price: $84 - $169
Product Type: seating/positioning/mobility
Skill Level: preschool, elementary, secondary, adult
Disability: physical
Customize pressure relief while enhancing stability, fit and comfort with a sub-ASIS Compatible Hip Belt. Unique gel-filled sub-ASIS pads (sold separately) attach inside belt to fill anatomical gaps and prevent belts from digging or riding up, improving control of obliquity and rotation while minimizing bladder pressure. Two-point and four-point styles.

Suitcase Wheelchair Ramps
Express Ramps
Price: $99.95 - $389.9
Product Type: seating/positioning/mobility
Skill Level: elementary, secondary, adult
Disability: physical
These portable aluminum ramps are designed to be safe and easy to use on a variety of surfaces and support up to 800 pounds. Please see our Web site for all the ramps we carry.

Support Station
Rifton Equipment
Price: $2690 - $3558
Product Type: seating/positioning/mobility
Skill Level: elementary, secondary, adult
Disability: physical
Primarily for use in schools, day-hab and rehab settings, the Support Station provides necessary support for hygiene care while standing. Saves caregivers backs and provides dignity for client.

Swell Touch Paper
American Thermoform Corporation
Price: $132.99 - $228.99
Product Type: instructional material, learning aid, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: vision
Swell Touch Paper is utilized for Tactile Graphics machines manufactured by Zychem, PIAF, and Reprotronics. This paper swells along specified black lines and diagrams when being used with these heat processors.

Switch Fiber Optic Arrays
Adaptive Switch Laboratories, Inc.
Price: $4150 - $5470
Product Type: seating/positioning/mobility
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: physical
The ASL 107, 108 are two or four fiber optic switches that allow the driver to operate a power wheelchair. These sensors can be positioned inside a tray or at any available switch site. Typical users are individuals with extremely limited movement such as MD, MS, ALS and SMA.

Switch Poser
RJ Cooper and Associates
Price: $49
Product Type: adapted play/manipulative
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: physical
Inexpensive vacuum type device that holds switches at angles.

Switch-Adapted Call Chime
RJ Cooper and Associates
Price: $59
Product Type: adapted play/manipulative
Skill Level: preschool, elementary, secondary, adult
Disability: physical
Includes two transmitters, each with a different tone, communicates without wires up to 100 feet with the chime.

Switch-Adapted Game Controllers
RJ Cooper and Associates
Price: $69 - $149
Product Type: adapted play/manipulative
Skill Level: elementary, secondary, adult
Disability: physical
Standard controllers for all game consoles, available with a variety of adaptations, such as: SWITCH JACKS for major game functions, joystick extensions, movement of trigger buttons, etc.

Table Top Suction Mount for iPads
AbleNet, Inc.
Price: $75 - $75
Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility
Skill Level: preschool, elementary, secondary, adult
Disability: cognitive, learning, physical, speech, vision
Table Top Suction Mount provides a quick, easy way to mount almost any AbleNet switch or small dedicated speech generating device (SGD) to a smooth surface like a table or desktop. Two easy lock and release suction cups secure it while the pivoting arm allows positioning of the switch device.

TabletTable
Attainment Company, Inc.
Price: $179
Product Type: instructional material
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: learning, physical
An accessory for helping students to reach and view the screen of an iPad. Includes a built-in handle and a convenient storage space for chargers or other supplies. Provides an ergonomic, 22-degree angle design and offers solid construction and nonskid bottom for security and stability.

TactileTalk Toolkit
Attainment Company, Inc.
Price: $499
Product Type: adapted play/manipulative, learning aid, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: vision
Focuses on both communication and literacy skills by combining tactile symbols with voice output. Tangible symbols represent objects, activities, places, people and concepts. Several objects are organized on transparent sheets with borders and other symbols made with special tactile paint. These sheets function as overlays for an iPad screen.

Taking on Tough Words
Attainment Company, Inc.
Price: $34
Product Type: instructional material
Skill Level: elementary, secondary
Disability: learning, physical
A researched curriculum consisting of 90, 15-minute lessons for reading and spelling multisyllabic words. Integrates phonics rules and word recognition skills while providing increasingly difficult, sequenced and scripted lessons. Ideal for older elementary through high school students.

Talking My Way Object Communication Cards
Turning Point Therapy and Technology, Inc.
Price: $299 - $299
Product Type: adapted play/manipulative, instructional material, learning aid
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, speech
Communication for students whose understanding is enhanced through objects. The set consists of 30 different objects mounted on laminated cards with matching Mayer-Johnson Picture Communication Symbols. This method encourages transitions from objects to symbols, and/or text as well as meets many other communication needs. Available in Spanish.

Tangible Object Cards
Adaptivation, Inc.
Price: $26 - $847
Product Type: adapted play/manipulative, instructional material, learning aid, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical, speech, vision
This communication system is for anyone whose understanding is enhanced using objects. It is comprised of a core set of 20 cards and six supplemental sets of five cards each for a total of 50. Each card has an attached object and a detachable picture cue. Cards are 5x7-inches.

TBO Quick Release Mount
CJT Mounting
Price: $625 - $875
Product Type: seating/positioning/mobility
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: physical, speech
NO Tools or one tool option. The TBO quick release mount can easily clamp to walkers, wheelchairs, track systems, tables, standers, hospital beds and the CJT ET Roller in just seconds. 5 points of articulation. Single arm adjust from 10 inches to 14 inches. Maximum extension for double arm is 28 inches.

The Original Visual Time Timer 3 is an ideal 60 minute timer for individuals or small groups and has a protective cover that flips over to serve as a desktop stand.

Time Timer Original 8"
Time Timer LLC
Price: $34.95 - $34.95
Product Type: adapted play/manipulative, learning aid
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, vision

The Original Visual Time Timer 8 is an ideal 60 minute timer for small to medium groups, can stand alone or hang on the wall and is perfect for meetings, presentations, classrooms and student testing.

Time Timer PLUS 120 Minute
Time Timer LLC
Price: $38.95 - $38.95
Product Type: adapted play/manipulative, learning aid
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, vision

Sometimes, an hour is not enough time. The Time Timer PLUS 120 Minute packs all the features that have made our visual timers the first choice of teachers, students, parents and professionals into a new 120-minute timer. The Time Timer PLUS 120 Minute offers a greater visual impact for longer duration needs. Time management is not a one-size fits all undertaking. The right tools can make all the difference for your students, your work teams and your family to make the most of every moment.

Time Timer PLUS 20 Minute
Time Timer LLC
Price: $38.95 - $38.95
Product Type: adapted play/manipulative, learning aid
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, vision

The Time Timer PLUS 20 Minute packs all the features that have made our visual timers the first choice of teachers, students, parents and professionals into a new 20-minute timer. The Time Timer PLUS 20 Minute offers a greater visual impact for shorter duration needs such as completing blocks of homework, silent reading, instrument or sports practice, as well as perfectly managing the 15- to 20-minute work cycles in elementary education. The Time Timer PLUS 20 Minute is the new secret weapon for workplace meetings with 15- and 20-minute agenda items to keep each item on track and works perfectly when starting an organizing project at home.

Time Timer PLUS 5 Minute
Time Timer LLC
Price: $38.95 - $38.95
Product Type: adapted play/manipulative, learning aid
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, vision

The Time Timer PLUS 5 Minute packs all the features that have made our visual timers the first choice of teachers, students, parents and professionals into a new 5-minute timer. The Time Timer PLUS 5 Minute offers a greater visual impact for shorter duration activities such as brushing teeth, holding a speed round meeting, breathing exercises and managing a brainstorming session. The Time Timer PLUS 5 Minute is the best tool for keeping short routines at home, school or the office on track.

Time Timer PLUS 60 Minute
Time Timer LLC
Price: $38.95 - $38.95
Product Type: adapted play/manipulative, learning aid
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, vision

Fast becoming our most popular timer, the Time Timer PLUS 60 Minute packs all the features that have made our timers the first choice of teachers, students, parents and professionals into a new design that's as sturdy as it is useful. Ideal for active kids or a day full of meetings, the Time Timer PLUS 60 Minute features a rugged case and durable clear lens to protect its patented red disk. And the new on-the-go handle makes it easy to take the timer anywhere you go!

Time Timer TWIST
Time Timer LLC
Price: $19.95 - $19.95
Product Type: adapted play/manipulative, learning aid
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, vision

The 90-minute TWIST is an easy-to-use time management tool great for kids and adults. To use, simply turn the outer ring until you get to your desired time,

then push the play button. A digital display shows at a glance how much time remains. A magnetic back makes the TWIST a snap to display. Easily attach it to most metallic surfaces from refrigerators and file cabinets to the whiteboard in your classroom. The 90-minute Time Timer TWIST is a quiet and versatile timer that helps make all kinds of everyday tasks easier and more productive.

Titan ADA Wheelchair Ramps
Express Ramps
Price: $200 - $10000
Product Type: seating/positioning/mobility

TM100 - Trigger Mechanism
Be Adaptive Equipment, Inc.
Price: $334 - $334
Product Type: adapted play/manipulative
Skill Level: preschool, elementary, secondary, adult
Disability:
Be Adaptive Equipment Model TM100 is a vacuum actuated trigger system that attaches to your trigger guard. Is simple to install on any weapon with a standard trigger guard. The unique design of the mechanism allows it to fire most weapons if placed anywhere inside of the trigger guard. The simplicity of the set up allows the trigger mechanism to be moved from one weapon to another easily and quickly. The TM100 fires the weapon by a very slight suction on the blue tube in the picture which is attached to the control box. The control box is attached to the stock of the weapon with a Velcro cinch strap. The mechanism operates on 12 volt DC power and comes with a pigtail that can be attached to one of the batteries in your power chair or attached to an auxiliary battery.

Toe Straps
Bodypoint Inc.
Price: $25 - $25
Product Type: seating/positioning/mobility
Skill Level: preschool, elementary, secondary, adult
Disability: physical
Add our durable, hook-and-loop toe straps to slotted wheelchair footplates to limit aggressive foot rotation and dorsiflexion. Length is fully adjustable and can be trimmed shorter as needed. For enhanced

foot positioning needs, consider our Ankle Huggers Support Straps instead. Use them alone or in conjunction with toe straps.

Topcat Access
Lightspeed Technologies, Inc.
Price: $1562 - $4270
Product Type: learning aid, sensory stimulation, telecommunications
Skill Level: preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, speech
Teachers love Topcat because it delivers both multimedia audio and their instruction to every corner of the room without shouting at the top of their lungs. The IT team likes the easy, wireless ceiling installation and lack of interference with all the other technology in the building.

Trimline Shoulder Harness
Bodypoint Inc.
Price: $104 - $116
Product Type: seating/positioning/mobility
Skill Level: elementary, secondary, adult
Disability: physical
The Trimline Shoulder Harness is a classic Bodypoint wheelchair postural support with two separate, adjustable padded straps that comfortably accommodate asymmetry. When worn in the 'backpack style' each shoulder can be independently controlled while keeping the chest clear for maximum freedom of movement.

Twirling Bead Chain
Enabling Devices
Price: $218.95
Product Type: adapted play/manipulative, learning aid, sensory stimulation
Skill Level: preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, speech, vision
Feel the cool beads! Activate the built-in red gumball switch and the carousel begins to turn causing the colorful cool beads to gently touch your hand as they spin by. In addition, upbeat music plays and red and blue lights sparkle. Great sensory experience that also teaches cause and effect.

U-shaped Joystick Handle
Bodypoint Inc.
Price: $77 - $77
Product Type: seating/positioning/mobility
Skill Level: preschool, elementary, secondary, adult
Disability: physical
Bodypoint's U-Shaped Joystick Handle is form-fitting and ergonomic due to its curved shape and waterfall edge. This design provides maximum wheelchair driving control while remaining comfortable for users with CP, spinal cord injuries, and more. Available in two widths to accommodate the user's hand size.

Unique Learning System
N2Y, LLC
Price: $502.95
Product Type: instructional material, learning aid
Skill Level: preschool, elementary, secondary, adult
Disability: cognitive, learning, speech
Unique Learning System is an award-winning, online, standards-based set of interactive tools specifically designed for students with special needs to access the general curriculum. It provides preschool through transition students with rigorous materials specifically designed to meet their instructional needs. Users interact with differentiated, thematic units of study each month.

Universal Elastic Strap
Bodypoint Inc.
Price: $82 - $96
Product Type: seating/positioning/mobility
Skill Level: preschool, elementary, secondary, adult
Disability: physical
A stable solution for temporary, anytime positioning. Wraps around your chest, abdomen, lap or legs at home, in clinic, for sports, or whenever short-term postural support is needed. Soft to the touch with strong, durable hook-and-loop closure and easy-grasp thumb hole. Three sizes available. Cut to length without fraying.

Universal Mounting System - Friction Knob
AbleNet, Inc.
Price: $250 - $290
Product Type: seating/positioning/mobility
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, physical
The easy turn friction knob locks all joints securely into place. Extends to 20.5 inches. Clamps onto anything flat or round, including wheelchairs. Withstands up to 5 pounds of force. Price includes the mounting plate of your choice.

Using Assitive Technology to Meet Math Standards
Attainment Company, Inc.
Price: $29
Product Type: instructional material
Skill Level: preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, speech, vision
This guide for IEP teams provides an extensive list of goals based on math standards with potential AT solutions. Standards range from number sense to calculus (K-12). Also describes software, hardware, and manipulative tools with sample IEP goals. Authors Sherry Purcell Ph.D and Debbie Grant M.A. 290 pages.

Vibrating Light with Music
Enabling Devices
Price: $122.95
Product Type: adapted play/manipulative, learning aid, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, vision
The Vibrating Light with Music encourages even the most challenged child to reach out. The textured plate lights up and vibrates when pressed. It can be placed on a lap board or mounted on a wall. Hardware for wall mounting included.

Visual Communication Bracelet
Keira's Kreations, LLC

BACK TO CONTENTS

Price: $16.99 - $21.99
Product Type: instructional material, learning aid
Skill Level: preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, speech
Portable, wearable communication aid that delivers visual support. Perfect addition to any special needs toolkit!

Visual Schedule for the Classroom
Greenhouse Publications
Price: $29.95
Product Type: instructional material, learning aid
Skill Level: infant/toddler, preschool, elementary, secondary
Disability: cognitive, hearing, learning, speech
The Visual Schedule is a valuable tool for teachers to illustrate the days activities or unexpected changes in the schedule, assist in transition or request activities. The Visual Schedule can also be used at home by students to show their parents activities that were done at school that day.

WakerShaker
RJ Cooper and Associates
Price: $19
Product Type: sensory stimulation
Skill Level: infant/toddler, preschool
Disability: cognitive, physical
Waker Shaker is a simple, switch modified vibration device used for cause/effect training.

Weighted Animals
Quilted Illusions Weighted Quilts and Vests
Price: $65 - $95
Product Type: adapted play/manipulative, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical, vision
The weighted animals provide deep-pressure therapy for people with disabilities where anxiety is an issue. Quilted Illusions now carries weighted teddy bears, a shoulder monkey, and a lap tortoise.

Weighted Quilt
Quilted Illusions Weighted Quilts and Vests
Price: $225
Product Type: adapted play/manipulative, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical, vision
Weighted quilts are used for deep pressure therapy. They help to calm and give a sense of security to anyone who suffers from anxiety. People with Autism, ADHD and Alzheimer's are among those who can benefit from deep-pressure therapy. I use poly-pellets to weight my products. They are machine washable.

Weighted Vests
Quilted Illusions Weighted Quilts and Vests
Price: $140 - $180
Product Type: sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical, vision
The weighted vest provides deep-pressure therapy to people with disabilities where anxiety heightens the symptoms.
