

Closing The Gap

Solutions

February / March, 2020
Volume 38 - Number 6

ANNUAL RESOURCE DIRECTORY

2020
Edition

A guide to the latest assistive technology products for children and adults with disabilities. It is the culmination of an extensive search for the latest software, hardware and other assistive technology products that are on the market today, as well as their producers.

EDITOR'S NOTE: There is no charge for inclusion in the Resource Directory. Listings are based on editorial questionnaires, phone interviews and materials provided by producers. Listings are not advertisements nor is their inclusion in the Directory an endorsement or guarantee by Closing The Gap. Descriptions are edited materials submitted by producers. They are not product reviews. Information provided is as current as possible at publication time.

Classroom-based Communication Instruction: The Project Core Implementation Model

ACKNOWLEDGEMENTS

Special thanks to the Project Core research team including: Karen Erickson (PI), Claire Greer, Penny Hatch, Skip Ryan, Kathryn Dorney & Sofia Benson-Goldberg.

This article was produced, in part, under U.S. Department of Education, Office of Special Education Programs Grants No. H327S140017 and No. H327S190005. The views expressed herein do not necessarily represent the positions or policies of the Department of Education. No official endorsement by the U.S. Department of Education of any product, commodity, service or enterprise mentioned in this publication is intended or should be inferred.

As an assistive technology community, we believe in the basic right for all to communicate. We understand the inherent power this right affords. Yet many students who are considered to have significant cognitive disabilities do not have access to personal augmentative and alternative communication (AAC) solutions or evidence-based communication instruction to help them learn to communicate in flexible ways across partners, purposes, and environments.

The term significant cognitive disabilities is used by the United States Department of Education (2005) to describe students who have a disability or multiple disabilities that significantly impact intellectual functioning and adaptive behavior. These students require extensive, repeated, individualized instruction, substantially adapted and modified materials and

individualized methods of accessing information in alternate ways to acquire, maintain, generalize, demonstrate and transfer skills across settings (Dynamic Learning Maps Consortium, 2016). Students who fall within this group are eligible for special education services under a variety of categories such as autism, multiple disabilities, intellectual disability and deaf-blindness.

Many students with significant cognitive disabilities are at early levels of communication ability, with between 18 (Towles-Reeves et al., 2012) to 35 percent (Browder, Flowers, & Wakeman, 2008) not yet using speech, sign language or symbols to express themselves. For students who are reported to use symbols, their use is often quite limited. Results of one survey found that 70% of the 7,699 students with significant cognitive disabilities used only single symbols for a limited range of communication purposes during their school day (Erickson & Geist, 2016). Students with limited speech and significant disabilities need consistent access to AAC systems that go beyond single symbols, and they require targeted instruction aimed at their continued communication growth. This has been the focus of an effort called Project Core.

Project Core is a Stepping-Up Technology Implementation project funded by the United States Department of Education, Office of Special Education Programs (#H327S140017). Project Core aims to provide teachers, teaching assistants and related classroom staff with the training, tools and resources needed to teach symbolic communication. The approach includes

LORI GEIST, PhD, CCC-SLP, is an assistant professor at the Center for Literacy and Disability Studies in the Department of Allied Health Sciences at the University of North Carolina (UNC) at Chapel Hill. Prior to joining the research faculty at UNC, Lori worked in direct service, consultation and product development, with her efforts concentrated on intervention approaches that target communication, language and literacy outcomes for individuals with complex communication needs. Her research interests center on leveraging technology in the delivery of effective intervention. She is the project director for Project Core and co-PI for Building Bridges from Emergent to Conventional Literacy, two federally-funded research initiatives.

ensuring access to personal AAC systems with a prioritized set of core vocabulary and embedding communication instruction into the daily activities and academic routines of the school day. Previous work has supported the important role teachers and other classroom staff can play in the delivery of evidence-based AAC instruction in the classroom (see Clendon & Anderson, 2016; Kent-Walsh, Murza, Malani, & Binger, 2015).

TEACHING PRACTICES

The evidence-based teaching practices central to the Project Core implementation model include: (a) access to personal AAC systems for all; (b) identification and attribution of meaning to early communication acts; (c) use of aided language input strategies; (d) use of a prioritized core vocabulary and (e) application of naturalistic teaching principles and techniques. Each of these practices are discussed briefly here and an annotated collection of articles summarizing research on these practices is available at: project-core.com/annotated-bibliography/.

Access to personal AAC systems for all. AAC is an evidence-based practice supported by meta-analyses (Ganz et al., 2012; Schlosser & Lee, 2000) and systematic reviews (Douglas, Light, & McNaughton., 2012; Ganz et al., 2012; Holyfield, Drager, Kremkow, & Light, 2017; Ronski, Sevcik, Barton-Hulsey, & Whitmore, 2015). In fact, the body of evidence suggests that all students who cannot use speech to meet their communication needs can benefit from AAC intervention regardless of the severity of their intellectual or cognitive disability (Snell et al., 2010). For example, a meta-analysis of 50 single-case experimental studies, more than half of which focused on students with significant cognitive disabilities, supports the effectiveness of AAC intervention, generalization and maintenance (Schlosser & Lee, 2000). A second meta-analysis of 24 single-case studies of students with autism spectrum disorders who could not use speech to meet their communication needs revealed large effect sizes for the use of AAC to support expressive communication, social skills, academics and the reduction of challenging behaviors (Ganz et al., 2012). Across the interventions included in these studies, students were taught to use various forms of graphic symbols to meet a variety of communication needs using different approaches to intervention.

Identification and attribution of meaning to early communication acts. Before children use speech, signs or symbols to communicate, they rely on non-symbolic forms of communication like body movements (e.g., turning away), facial expressions (e.g., smile), gestures (e.g., pointing) and vocalizations (e.g., laughter) (Rowland, 2011). Caregivers who are responsive to early non-symbolic forms of communication support later language acquisition (Yoder, McCathren, Warren, & Watson, 2001). Similarly, beginning communicators of all ages benefit from responsive partners who honor the intent of these early behaviors and demonstrate symbolic forms of communi-

cation. This honoring of non-symbolic forms of communication helps students build an initial understanding that they can influence others. Demonstrating the use of symbolic alternatives to non-symbolic behaviors helps students learn that symbols carry meaning and can be used to communicate. These are important first steps to learning to use AAC (Beukleman & Mirenda, 2013). Teachers and classroom staff can watch for these early forms of communication, interpret and honor them and demonstrate more conventional, symbolic forms that offer another way to express the same idea.

One tool that can be helpful in learning to recognize and build on these early forms of non-symbolic communication is called the Communication Matrix (Rowand, 2011). The Communication Matrix is a teacher and parent-friendly assessment that is organized by behaviors at seven levels of communication ability across four basic reasons to communicate, including: (a) refusing things that are not wanted; (b) obtaining things that are wanted; (c) engaging in social interactions and (d) providing or seeking information. For each of these reasons to communicate, all of the behaviors a student uses are observed and reported. Behaviors become increasingly intentional and symbolic across levels, with the earliest levels requiring interpretation of behaviors that are not yet used with communicative intent and the highest level reflecting a student's ability to put two or more symbols together to construct messages. The Communication Matrix is a valid and reliable measure that is available free of charge from: communicationmatrix.org.

Use of aided language input strategies. Aided language input is a teaching strategy that can be used across the school day. There is a strong and growing evidence base supporting the benefits of providing aided language input during natural communication interactions (e.g., Brady, Thiemann-Bourque, Fleming & Mathews, 2013; O'Neill, Light & Pope, 2018; Ronski & Sevcik, 1996; Sennott, Light & McNaughton, 2016). Spoken models alone do not help students learn to use symbols on an AAC system to communicate. Instead, students need others to demonstrate the use of symbols and AAC (Shire & Jones, 2015). In its simplest form, aided language input involves pointing to symbols on an AAC system while speaking to students, using succinct language and holding the point long enough for students to see it and have a chance to make a meaningful connection between the symbol and the context in which the spoken word is used. It is not necessary to point to a symbol for every spoken word. Nor is it necessary to limit the words spoken to only the symbols that are available. Adults can say anything they want, but should try to include one or two words that provide an opportunity to demonstrate use of the available symbols. When students see adults using symbols to communicate, they get to see the power of the words they have available to them.

Use of a prioritized core vocabulary. Selecting the vocabulary to display via symbols on a student's AAC system is challenging. Students who use speech to communicate choose their own words from those in their expressive vocabulary. By contrast, students who are learning to use AAC must choose from the limited set of words others have selected for them. For some beginning communicators, cognitive, sensory and physical challenges place constraints on the number of symbols that can be included on an AAC system, the pace at which additional symbols can be added and the ways they can be represented and accessed (Beukelman & Mirenda, 2013; Erickson & Geist, 2016).

Historically, decisions about which symbols to use have focused on preferred items or activities (Beukelman, McGinnis, & Morrow, 1991; Schlosser & Sigafos, 2002; Snell, Chen, & Hoover, 2006) in order to promote requesting (Frost & Bondy, 2002) and functional communication (Adamson, Rowski, Deffebach, & Sevcik 1992). This process often results in concrete symbols that potentially increase student interest and joint attention and allow communication partners to reinforce successful communication through contingent reinforcement (Tomasello, 2003). The context-specific nature of these concrete symbols limit opportunities for teaching and learning and restrict the purposes for communication primarily to the pragmatic function of requesting (Dodd & Gorey, 2013). Furthermore, these symbols are of little use in the context of academic instruction.

Core vocabulary provides an alternative approach to selecting symbols to include on AAC systems for beginning communicators (Deckers, Van Zaalen, Van Balkom & Verhoeven, 2017; Van Tilborg & Deckers, 2016). Core vocabulary refers to a relatively small set of highly useful words, such as more, go, you and like. Core words are among the first words typically developing children learn to say (e.g., Banajee, DiCarlo, & Stricklin, 2003), they overlap with the first words they are explicitly taught to read (e.g., Dolch, 1955) and are predominant in children's early writing (Clendon & Erickson, 2008). One of the primary advantages of core vocabulary for beginning communicators who use AAC is that the words can be taught across a variety of contexts throughout the day.

Core vocabulary is conceptual. As a result, the symbols representing core vocabulary words are abstract and may be more difficult to learn than concrete symbols. However, in comparison to concrete vocabulary, there are dramatically more opportunities to teach and learn core vocabulary across a typical school day because the words can be used across contexts, purposes and partners (Adamson et al., 1992; Deckers et al., 2017). Additionally, core vocabulary can support the kind of initiating, responding and interacting that is required to successfully access grade-level standards. This usefulness is realized when adults take advantage of the flexibility of core vocabulary and teach its use across the entire school day.

Application of naturalistic teaching principles and techniques. Project Core is aimed at promoting spontaneity in communication and generalization across contexts and partners (Cowan & Allen, 2007; Pindiprolu, 2012; Prizant & Wetherby, 1998). The implementation resources are intended to support teachers and classroom staff in: (a) leveraging typical daily activities and common academic routines; (b) building on students' interests and preferences; (c) following student-initiated interactions and (d) developing intrinsic motivation through the natural consequences of interaction (Pindiprolu, 2012).

TARGET AUDIENCE

In Project Core, teachers, teaching assistants, related service providers and other personnel who interact with students in the classroom deliver the instruction and take a primary role in helping students learn to use AAC. No prior training or experience with AAC is required to get started. However, effective implementation is based on: (a) a belief that all students can learn to communicate in increasingly complex ways and (b) a commitment to engage in ongoing professional development (PD) that includes self-reflection and peer and coach support. Through the series of PD modules, teachers learn to identify all of the ways their students communicate, build on these early forms and make meaningful connections as they teach students to use symbols on personal AAC systems. Speech-language pathologists (SLPs) and related AAC specialists provide additional focused support and guidance, as schedules and case-loads permit. It is important to note that many students with significant cognitive disabilities have limited access to SLPs with expertise in addressing their specific communication needs (American Speech-Language Hearing Association [ASHA], 2012), and when they do, their time is often limited to small group, 20 to 30 minute sessions, two times each week (Brandel & Loeb, 2011). The Project Core implementation model aims to empower teachers to deliver foundational communication supports and instruction for all in need, and thus contribute positively to the time specialists like SLPs have available to focus on individualized solutions and intervention plans for students.

UNIVERSAL CORE VOCABULARY

Project Core features a prioritized set of core vocabulary words called the Universal Core (see Erickson, Geist, Hatch & Quick, 2019). The words that make up the Universal Core can be used alone or in combination to communicate for a range of purposes on countless topics with many different partners. Several formats are available to support student access through direct pointing or touch, eye gaze selection and partner-assisted scanning. Versions with symbols with reduced complexity and high color saturation are available to address the needs of some students with visual impairments. Three dimensional (3D) symbols are available for students who are blind. Additionally,

the Universal Core vocabulary is offered on many commercial communication applications (apps) and speech generating devices (SGDs). Access to open-source formats can be found at: project-core.com/communication-systems.

IMPLEMENTATION MODEL COMPONENTS

Empowering teachers and classroom staff to successfully implement the Project Core teaching practices involves building background knowledge, creating meaningful opportunities to practice with support and constructive feedback from peer teachers and instructional coaches and ensuring fidelity of implementation by engaging in self-reflection and continued professional growth. A series of 12 professional development modules support this implementation. The modules are available for both group and self-directed learning. The versions for group administration, the facilitated modules, provide detailed facilitator guides with scripted presenter notes, pre-recorded video content and structured activities that promote opportunities to practice the new skills and engage in group discussion. The on-demand, self-directed versions of the modules support independent study of the same content through pre-recorded videos and practice activities that are aimed at application of the targeted skills in individual classrooms. Each of the professional development modules, in both the facilitated and self-directed formats, are available at: project-core.com/professional-development-modules/.

Instructional planning guides are provided to support the preparation of lessons that embed the Universal Core vocabulary and the evidence-based teaching practices into common academic and daily routines. The Weekly Literacy Academic Routines Planning Form guides teachers in planning lessons that effectively implement the Universal Core vocabulary and communication instruction during five common emergent literacy routines, including (a) shared reading, (b) predictable chart writing, (c) alphabet and phonological awareness activities, (d) independent writing and (e) independent reading. In addition, the Daily Routines Planning Form guides teachers to use their daily schedule to identify opportunities to teach communication across the school day, outline how adults will demonstrate the use of the Universal Core vocabulary to supplement their own spoken language, and describe the focus for inviting and supporting students' expressive use of the Universal Core vocabulary.

Self-reflection and observation checklists help teachers, coaches and others interested in monitoring fidelity of implementation. Teachers are directed to use the available checklists to engage in self-reflection, support collaborative discussion with peers and guide observations and feedback from instructional coaches as part of their professional development experience. The available checklists focus on general implementation of the Project Core evidence-based practices across literacy and daily

routines. Each of the instructional planning guides and self-reflection and observation checklists are available for download at: project-core.com/instructional-planning-and-reflection/.

DEVELOPMENT AND PILOT TESTING THE PROJECT CORE IMPLEMENTATION MODEL

Iterative development of the Project Core implementation model was guided by the field of implementation science. Implementation science seeks to address research-to-practice gaps by leveraging researcher and practitioner collaborations to understand fully the context, potential barriers and necessary resources for effective delivery of targeted interventions (Fixsen, Blasé, Metz & VanDyke, 2013). The Project Core research and development team worked in collaboration with teachers across 28 initial classrooms to observe and understand their daily activities and academic routines, along with the challenges they face. The team subsequently engaged in iterative development and evaluation of an initial implementation model. This implementation model was evaluated through pilot testing in 57 additional classrooms across four school districts in four states. More than 400 classroom observations were completed to inform refinement of all components of the model and gather outcome data related to change in targeted teacher and student behaviors. Outcome data suggests that (a) teachers improved their knowledge, skill and practice, (b) students had dramatically increased personal access to AAC with useful vocabulary (Geist, Erickson, Greer & Dorney, 2018) and (c) students made gains in overall communication ability (Geist, Erickson, Hatch, Dorney, & Benson-Goldberg, 2019).

BUILDING BRIDGES: EXTENDING THE PROJECT CORE MODEL

Building Bridges from Emergent to Conventional Literacy is a new Stepping-Up Technology Implementation project funded by the United States Department of Education, Office of Special Education Programs (H327190005). Building Bridges will leverage the successful model in Project Core to help students with significant cognitive disabilities and complex communication needs successfully bridge from emergent to conventional literacy and communication, with a specific emphasis on grades third through fifth. This new project will follow the same open-source, universally accessible model established in Project Core to provide effective professional development, implementation and intervention supports that allow classroom teachers to deliver comprehensive communication and literacy intervention to their students with significant cognitive disabilities and complex communication needs. The project will build upon the power of the existing Universal Core vocabulary and the bridges to more robust technologies that have been created by AAC device and app manufacturers and developers (e.g., AssistiveWare, CoughDrop, Crick, PRC/Saltillo, Smartbox, Speak

for Yourself, Tobii Dynavox). It will also build upon the evidence-based emergent literacy practices in Project Core and add a set of evidence-based conventional literacy instructional practices that can be combined to provide comprehensive literacy instruction to students with significant cognitive disabilities and complex communication needs. Working with partner schools, researchers will create implementation and fidelity supports, as well as tools that help teachers make data-based decisions regarding the type and focus of literacy instruction for their students. With a focus on English language arts in grades third through fifth, the Building Bridges project will be aligned with grade level standards in Reading Literature and Information Text, Foundational Skills, Language, Listening/Speaking and Writing.

FINAL THOUGHTS

Teachers and classroom staff can deliver access to personal AAC systems and evidence-based communication and literacy instruction during naturally occurring interactions with students throughout the school day. Project Core provides professional development and planning resources to guide use of core vocabulary from the time students arrive at school to the time they leave, during common academic and daily routines. Professional development and supporting resources emphasize the importance of being attuned to all of the symbolic and non-symbolic ways that students communicate, along with the power of AAC with core vocabulary to support flexible communication across environments, purposes, and communication partners.

The Evolution of Technology in Speech Language Pathology & Related Professions

The evolution of technology is daunting and exciting - frightening and empowering. In many ways, technology is what we allow it to be, and we can either embrace or reject its' advancement within our lives. During my 20 years as a Speech Language Pathologist (SLP) I've born witness to an awe-inspiring technological transformation. Various forms of technology have been integrated into my daily work in ways I never would have imagined when I graduated with my Master's degree from Washington State University in 2000.

I have made the conscious decision to embrace the advancement of technology and stay current with its' ever-changing landscape. Perhaps inspired by my grandpa, a 95-year-old who is active on Facebook and takes his iPad with him to doctor's appointments, I realize it will do me no good to reject using technological tools and opportunities available to me within my practice, as well as my home life.

To provide our younger readers with a little perspective, when I first began working, email was available, but hardly used to the extent that it is today. In fact, I recall that in its' earliest stages (while I was pursuing my undergraduate degree) email was extremely cumbersome and could only be accessed at

KERI JONES is the creator of the Speech Sounds Visualized App and a Speech Language Pathologist at Pullman Regional Hospital, Summit Therapy & Health Services in Pullman, Washington. She received her B.A. in Speech & Hearing Sciences from Washington State University in 1998, and her M.A. in Speech & Hearing Sciences from Washington State University in 2000. Keri's experience includes providing diagnostic and therapy services in the field of speech language pathology in the medical setting for 20 years. Through her hospital employment, she has also held contracts for rural schools, an early intervention program, a home health program, and a skilled nursing facility. She is well versed in working with people of all ages for speech, language, voice, accent modification, cognitive, and swallowing concerns. Keri also had the pleasure of teaching the Introduction to Speech & Hearing Sciences course at Washington State University for the past five years.

a computer lab on campus. When I started my first job at a rehabilitation hospital, I was given a beeper to wear when off campus so that I could be easily reached. My husband, who has always taken pride in being on the cusp of technology, owned one of the first cell-phones, a behemoth of a thing that came in a large leather case. He would unpack it, pull out the long antenna and power it up. It hardly worked!

Like many, I've been awestruck by the staggering technological developments within our field. Participants in this technological revolution also included Special Education Teachers, Occupational and Physical Therapists, and certainly Assistive Technology Specialists. Whatever the advancements were outside of our field, many of us sought ways to integrate these into our teachings and therapies, in order to make access to this technology available for our patients, clients, and students. Could we even go so far as to say that we have functioned as technology activists? The SLP's in particular are driven by an all-encompassing passion to help people access communication, this being a human right for all to behold. Communication occurs in many forms other than verbal, and we have actively sought new and exciting options to provide our patients, clients, and students for decades. As a result, SLP's and Assistive Technology Specialists have been at the helm of the technological revolution for decades.

Indeed, the need to be aware of the latest and greatest forms of Augmentative & Alternative Communication (AAC) has been the driving force behind staying atop the ever-changing technological advancement.

SLP's and Assistive Technology Specialists were using small hand-held computers in the form of AAC devices decades before other consumers held iPhones, iPads, tablets and laptops. We've been prescribing and programming these hand-held computers since the 1980's when Ed Prentke and Bill Romich created their first amazing AAC device.

The stakeholders in AAC have long-recognized the distinctive voice of an AAC "talker" well before the voice of Siri became recognized by the masses. In fact, I vividly remember the first time I helped a patient obtain a Prentke-Romich device, and begin to use this voice, back in 2001. It was a tremendous piece of technology to behold! I marveled that this was essentially a hand-held portable computer with seemingly endless possibilities for programming and communication.

As technology evolved, our communication devices became increasingly more sophisticated, as well as more portable and lightweight. Meanwhile, use of budding technology became much more relevant to treatment modalities apart from AAC. It was actually during this period of our technological revolution that many of us were forced to consider when it was appropriate to use the burgeoning technology, versus when it was appropriate to stick to the "old school" techniques and strategies such as books and good-old fashioned picture/flash cards.

We've learned that the old adage, "everything in moderation" applies to our teaching and therapy strategies too.

Remember when the word "application" simply meant the action of putting something to use? If we had heard that word prior to 2009, when the iPhone and the App Store was introduced, it would have held a much different meaning than it often does now. Then, in 2010 the iPad was released and changed everything within our field. It was nothing short of revolutionary! I'm sure I wasn't the only SLP waiting in a long line outside the Apple Store to purchase my very first iPad. (I actually lined up the very day they went for sale!) Like many, I immediately recognized the therapeutic potential for the many applications (Apps) the iPad could hold. I knew that this would offer resources and tools that would change my therapy, for the better. I recall being particularly excited for the built-in stopwatch, data tracking, voice recording and of course the motivational Apps that could be used as reinforcement or conversation starters. Incidentally, tremendous credit should be given to Apple that my first iPad still works to this day! I actually use it in therapy on a regular basis. It is noticeably slower than my newer iPad, but certainly serves its' purpose in a pinch.

The invention of the iPad and the associated speech and language Apps offered unprecedented accessibility to people,

worldwide. Once again, the SLP's, Assistive Technology Specialists, Occupational Therapists and Special Education Teachers found themselves at the helm of this flourishing technology, frequently asked to make recommendations for others about which of these new Apps would be most beneficial for use.

The iPad was for sale beginning in April of 2010 and by November of 2010 SLP's were presenting a thorough review of popular Apps at the American Speech Language Hearing Association convention. It's really quite extraordinary how quickly all of this new technology was adopted and embraced for its' accessibility and effectiveness in our therapy sessions!

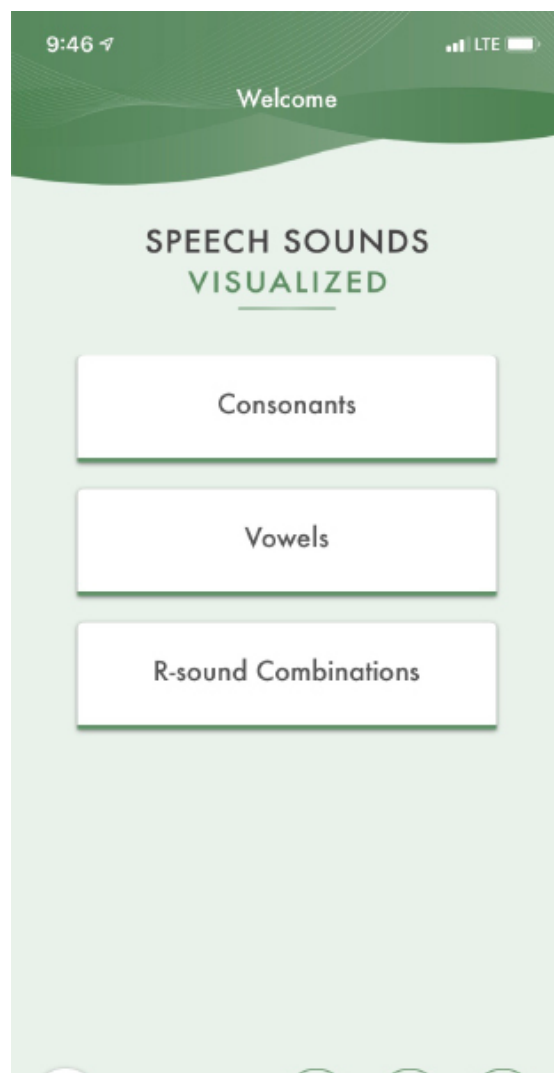

The developers of the early, high-quality Apps such as Tactus Therapies Apps, Virtual Speech Center Apps, Smarty Ears Apps and Super Duper Inc., were the pioneers in this new realm and ought to be given tremendous credit for their foresight and spirit of innovation! They must have known they had accomplished something quite special because by 2012, at least half of SLPs reported using iPads in clinical practice (Bruno-Dowling, 2012) which is quite remarkable given that the App Store first debuted in just 2009.

By 2015 we could find hundreds of valuable Apps for our professions with new ones being added to the App Store on a daily basis. Lists of "Top Apps" sorted neatly per therapy category were developed and updated frequently by various members of our profession. Many of us thought "I have an idea for an App" and some of us even asked "How does one go about making an App?" We could all identify ways that we could use various Apps in our therapy while also staying true to our roots of techniques and strategies that did not include the use of technology. We discovered that there would never be a "perfect" App, just as there will never be a "perfect" therapy tool or approach. Nonetheless, the quest to contribute to the profession in this new and exciting way was alive and well amongst a growing number of SLP's and other therapy professionals. Just as Apps offered greater accessibility to our patients, clients and students, Apps also offered accessibility to those wanted to feel as though they were contributing to the profession.

My own journey into building an App began in about 2015 when I had an idea to visualize how speech sounds are formed through moving x-rays called video-fluoroscopy. After working with an Institutional Review Board and my hospital's imaging department, we had attained a treasure trove of visually stunning videos depicting speech-sound formation. I am fortunate to work for a small but progressive critical access hospital that includes a Center for Learning & Innovation.

Among other functions, the Center supports hospital employees who wish to act on ideas designed to positively impact healthcare and well-being.

Using the imagery that we captured, I wrote a book that was intended to be used as an e-book for students of Speech Language Pathology. But as the rigors of publication became

more evident, the accessibility and appeal of the App Store called out. I proposed the development of an App to Pullman Regional Hospitals' Center for Learning & Innovation. The Center accepted my proposal to create the App that would eventually become Speech Sounds Visualized.

Speech Sounds Visualized is a unique App that allows users to see speech in action, among many other valuable features and benefits. Users select a sound to see how it is formed. Users then practice saying the selected sound in isolation, while recording themselves. Upon play-back the user can hear the difference between their production as opposed to that which is in the video/model. This is building self-monitoring and sound discrimination skills. On gaining success at the sound-in-isolation level, users progress to practicing that sound at the word level, and ultimately at the sentence level.

Speech Sounds Visualized was created primarily for adolescents and adults. There are a plethora of Apps available for small children with speech impairments, but a noticeable gap in the market exists for older children and adults. This population seeks a clear path to learning, absent of unnecessary distrac-

Keri Jones

Carrie Coen

Speech Sounds Visualized

tion. The Speech Sounds Visualized team sought to fill this gap in the market with a robust App that is designed to be straightforward and efficient in helping its' users to accomplish their speech goals.

Many customers have recognized Speech Sounds Visualized as being particularly helpful for older children working on the challenging R sound. We have developed a special section within the App that is devoted to the R. Speech Sounds Visualized has also been particularly beneficial for adults who are seeking accent modification in order to be better understood by others. Still others have used our App as a teaching tool to help clients, patients, students and even those who are studying to be a Speech Language Pathologist better understanding of place, manner and voicing of speech sounds.

While I certainly fully embrace and love technology, I am not an SLP-technology-wizard who is capable of treating people for communication disorders by day, and writing code for an App by night! As a result, we hired a programmer/coder through a global freelancing website called Upwork.com. This is yet another example of astounding development in the world of technology that I have witnessed in my career. The entire process of developing the App was managed through this platform.

As I dove deeper and deeper into the behind-the-scenes world of App technology, I began to feel overwhelmed by how much there was to learn. During these times, I would think of my patients and their families, many of whom had no other

choice but to learn how to use a communication device and/or iPad with an App as their primary means of communication, often under very difficult circumstances. I would also think of my grandpa, who made the conscious decision as his life advanced that he would learn about, and embrace technology to the best of his ability. He saw this as a cognitive challenge to be accepted, as well as a way to stay connected with those who were younger than he. Finally, I would think of all the people who could potentially benefit from our App. There were nights during the process that I would imagine someone living far away in another country, using our App to help them reach their communication goals. These motivations drove me through those challenging months of App development.

We released Speech Sounds Visualized in December of 2017. I am proud to say that our App has now been downloaded thousands of times around the world. It seems that perhaps having these images accessible in the form of an App was much more beneficial than they would have been in the form of an e-book, as was the original intention.

While there are a number of free Apps available, the reality is that developing an App is extremely time-consuming and usually very expensive to build and maintain. Most developers seek to at least recoup their initial investment, or ideally to make enough money to provide necessary upgrades and enhancements to the App. Unfortunately, few developers are able to generate enough income to justify building additional iterations from the original concepts included in the App.

Just as an author does not typically spend years writing a book, to then make it available to the public for free, most App developers are not able to provide their material for free either. The amount charged for the App is often commensurate with the initial investment.

As a clinician of 20 years I could never justify painting the technology portrait as being all sunshine and rainbows. The truth is sometimes the rapid pace of technological development gets away from us. Sometimes I feel as though I could take a two-week vacation only to come back to work feeling as though what I used to know is obsolete! It can feel overwhelming when coworkers and families bring new programs to our attention that we've never heard of before.

We must always adhere to the highest possible standards for evidence-based practice, for all of the children and adults that we serve, yet sometimes we feel it is impossible to keep up on the research behind this ever-changing technology. Further complicating our decision making, there are times that it seems the advancement of the technology is faster than the research needed to support whether or not it is evidence based! Well-intentioned people may request that we use various forms of technology in diagnosis or treatment, when we feel either poorly equipped to do so, or even question the treatment efficacy of doing so.

We are also tasked as providers to give culturally and linguistically appropriate service to a broad population of people. We must remain ever-sensitive to the needs of individuals, which can be quite diverse! Being prepared to meet such broad needs often hinges on having an awareness of cultural heterogeneity as well as a high level of emotional intelligence. There may be times in our professions when the technology available to us in diagnosis and treatment does not seem to meet our critical criteria for cultural sensitivity.

As we progress deeper into the 21st century, we will continue to face new challenges as well as opportunities associated with rapidly evolving technology. I am proud to have made my own contribution to the technology that abounds, in the form of creating Speech Sounds Visualized. I admire the many entrepreneurs within our professions who have helped create the vast array of products that positively impact our field. I feel honored to have been witness to such spectacular technological advancement over the past 20 years. One can only imagine what will occur in the next 20 years! May we enjoy the ride, and choose to embrace the transformation. ■

APP2Speak[®]

Conversation & Communication At Your Fingertips

APP2Speak is a solution for individuals who have difficulty speaking. A simple touch of the photo and talk.

- Photo-Based Software App
- Easy-To-Use
- Customizable Features
- Endless Custom Pages
- Affordable App

Discover the Possibilities!
Imagine how much talking
you can do with APP2Speak.

Closing The Gap

38th ANNUAL
CONFERENCE
October 28-30, 2020

Preconference Workshops:
Monday and Tuesday, October 26-27, 2020

Mystic Lake Center
Prior Lake, Minnesota

Conference Welcome Reception:
Tuesday, October 27, 2020

Assistive Technology in Special Education, Rehabilitation and Everyday Living

CALL FOR PARTICIPATION

SUBMISSION DEADLINE
MONDAY, JUNE 1, 2020

SHARE YOUR EXPERTISE

Groups or individuals who wish to participate in Closing The Gap's 2020 Conference should submit their proposals for one-hour and multiple-hour presentations as soon as possible. Poster sessions will also be considered. The deadline to submit is Monday, June 1, 2020. Directions and information are found within. Please fill out the online proposal form completely; incomplete proposals will not be considered. Online submission is available at:

www.closingthegap.com/call-for-participation-2020

PROPOSALS

Closing The Gap will consider proposals for one-hour or multiple-hour sessions that describe and/or demonstrate successful applications of assistive technology for persons with disabilities.

Proposals are invited that report results of current applications; research; development of hardware, software or adaptive devices; model programs or procedures used by and for persons with disabilities.

Proposals for sessions that demonstrate the use of software programs, mobile apps, adaptive devices or the innovative use of assistive technology are highly encouraged – especially specific how-tos, tips and tricks and product comparisons.

Proposals should focus on practical applications, implementation strategies and best practices, rather than theoretical discourse.

Proposal content should be supported by evidence and should include quantitative performance data.

Proposals for open forums in which participants discuss, comment openly and share ideas and opinions relevant to a primary subject or focus are also encouraged.

CURRENT TRENDS AND TOPICS

Topics will cover a broad spectrum of technology as it is being applied to all disabilities and age groups in education, rehabilitation, vocation and independent living. People with disabilities, special educators, rehabilitation professionals, administrators, service/care providers, personnel managers, government officials and hardware/software developers will share their experiences and insights at what has become known as the best educational AT conference in North America.

REGISTRATION

Presenters may register for the three-day conference at discounted rates. Please visit the registration page for pricing details. Presenters do not have to register for the conference to present; however, only those presenters who have registered may attend conference sessions/exhibits other than their own. All-day preconference workshops are scheduled for October 26 and 27 and cost \$295 for one day or \$510 for two days.

PROCEDURE

Abstract: A 300- to 500-word abstract must accompany the proposal form.
Summary: A separate, 100-word summary must also be submitted for inclusion in the Conference Directory.
Proposal Form: The proposal form must be completely filled out and submitted online.

NOTIFICATIONS

Confirmation of presentation proposal acceptance/declination, and confirmation of specific date and time of accepted presentation will be sent by August 1, 2020.

In offering to present a paper, it is expressly understood that the presentation may be scheduled at any time on any of the conference days at the discretion of the conference organizers.

REGISTRATION OPTIONS

Conference - Wednesday, Thursday, Friday, October 28-30, 2020			
Registration Received	On or before June 30	July 1 - October 16	October 16 - Onsite
Standard Rate	\$505	\$580	\$605
Group Discount - 5 or more			Deduct \$30
Group Discount - 8 or more			Deduct \$50
Group Discount - 20 or more			Deduct \$70
Parent / Individuals with Disabilities <i>(A letter describing your child's disability must accompany registration.)</i>			\$325
Full-time Student Rate <i>(Proof of full-time student status must accompany registration.)</i>			\$325
Presenter / Exhibitor Rate Rate	\$430		\$530

Single Day and Exhibit Hall Only Registration	Price
Thursday Only - October 29	\$320
Friday Only - October 30	\$150
Exhibit Hall Only - Tuesday evening through Friday, October 27-30	\$0

Preconference Workshops Includes Preview of Exhibits – Tuesday	Price
Monday, October 26 or Tuesday, October 27	\$295 per day
BUNDLED PRICING! Monday and Tuesday Bundle (\$80 savings)	\$510

RESNA Two-Day ATP Fundamental Course	Price
Monday, October 26 & Tuesday, October 27	\$650 for RESNA Members; \$800 for non-members

NEW! Conference Registration Includes Breakfast!
Restrictions Apply. Visit www.closingthegap.com/conference for full details.

ADMINISTRATORS PARTICIPATE FREE! BRING YOUR TEAM

When any school district or hospital staff member registers for a preconference workshop or the conference, one administrator from that organization can attend the conference, for **FREE!**

CONFERENCE SCHOLARSHIP

A limited number of scholarships are available for persons with disabilities or parents/guardians of children with disabilities. Scholarships are awarded on a first come, first served basis and one time only per person.

DISCOUNTS

Complete details available online at www.closingthegap.com/conference

- \$25 RETURN DISCOUNT**
 A \$25 "RETURN" DISCOUNT is available to ANY past conference registrant and must be used by JUNE 30, 2020. This discount can be used for any preconference workshops OR conference registration.
- CLOSING THE GAP SOLUTIONS MEMEBER DISCOUNT**
 A \$50 discount is available to Standard Solutions Members. A \$100 discount is available to Premium Solutions Members.
- RESNA MEMBER DISCOUNTS**
 A \$100 discount is available to RESNA Members.

JOIN US

CONFERENCE WELCOME RECEPTION

Tuesday, October 27
4:30 pm - 7:00 pm

Don't Miss Your Chance to Score **EXCLUSIVE** Prizes, Incentives and Offers!

Must be present to be win.

- To ensure attendees receive the negotiated group rate, reservations are required by **FRIDAY, OCTOBER 9, 2020.**

DISKoveries

New iPad Mini and the Apple Pencil

iPad Mini (www.apple.com)

The new iPad Mini was updated and released in March 2019. From the outside, that iPad and the previous one from September 2015 are hard to tell apart. The screen is the same size (7.9" diagonal), the sleep/wake button remains in the same position and the earphone jack is still where it was. Volume controls are

on the right-side edge, the lightning connector and Touch ID button are on the middle bottom. Even the resolution, bezels and battery life remain the same. But let's not be fooled, the new iPad Mini is very different on the inside! There are many upgrades and changes that make it a very significant new choice among tablets.

Here's a brief summary of some of the upgrades and new features of the iPad Mini, also called iPad Mini 5th Generation.

Storage Size: The storage on the iPad Mini now starts at 64 GB and increases to 256 GB.

Weight: iPad Mini weighs .66 of a pound, just a little over a half pound. (This represents almost no change from the .67 of a pound for the iPad Mini 4).

Camera: The iPad rear camera is an upgraded 8 MP f/2.4 camera that can record full HD videos and supports Live Photos. The front Face Time camera is a 7- megapixel camera with an f/2.2 aperture and is capable of recording 1080p video, with Retina flash and wide color capture.

Processor: The iPad Mini has an A12 Bionic chip that has a 66% higher clock speed than its predecessor. The A12 Bionic chip has a 2.49 GHz six-core processor. This accounts for significant improvements in speed.

JOAN TANENHAUS, Joan Tanenhaus, M.A., CCC, Speech-Language Pathologist/ Assistive Technology Specialist, is Founder and Executive Director of Technology for Language and Learning, Inc., a non-profit organization dedicated to advancing the use of computers and technology with children and adults with Special Needs. (e-mail: ForTLL@aol.com)

Display Technology: The iPad Mini has True Tone, a feature that automatically monitors the light in an environment, then adjusts the color and intensity of a screen to make it match the ambient light so that images appear more natural, while also reducing eye strain. It also has a wide color gamut, which is a wider range of reproducible color.

Bluetooth: The iPad Mini has Bluetooth 5.0. (upgraded from Bluetooth 4.0) which offers improved speed and greater range

Apple Pencil Support: The iPad Mini has support for the Apple Pencil (1st Generation). No previous iPad Mini offers this. (See following section for more information about the Apple Pencil and how it can be used).

OS: Both the iPad Mini and the iPad Mini 4 can be used with the new iOS13 and iPadOS.

The iPad Mini (5th Generation), measuring 8 inches x 5.3 inches x .24 inch wide and weighing just .66 of a pound, offers tablet users some very unique advantages. The iPad Mini is a smaller, more portable device. It can be carried around easily, but at the same time, is fully functional. It is easy to hold in one hand, small enough to take out or put away whenever you want. And together with the Apple Pencil (1st Generation), can be used to jot down notes, sign documents, fill out forms and read books, anything you want on the go. This iPad Mini is almost identical in function to the 10.5 inch iPad Air. With iPadOS, the iPad Mini now has multitasking capabilities, organizational features like the Files app, new multi-touch gestures, multitasking features like slide over and split views, the ability to mark-up documents, photos, etc., use of new gestures for copy, paste, undo, Dark Mode and much more. Also, because of its small size, light weight and portability, the iPad Mini is a great device for those using the iPad for Augmentative and Alternative Communication (AAC) purposes.

In addition, the iPad Mini with the Apple Pencil, offers users many options for access while still preserving portability. Whether you prefer using an on-screen keyboard, an external keyboard, speech recognition or writing with a pencil, all options are always with you and available in the one compact device. It has the ability to switch from one to the other, quickly and easily. Combine this with the new software and accessibility features of iOS13 and iPadOS, the large number and quality of apps and accessories available and the iPad Mini joins the other iPads in becoming a powerful learning and educational tool.

So, if your phone is just too small to do what you need, and the iPad you are using at home is too heavy to carry around, the iPad Mini might just be the answer for you. (Watch for more information and details about iOS 13 and iPadOS, USB-C connectivity on the iPad Pro, using the iPad for mouse access (trackball, mouse, etc.) and with external hard drives-in upcoming articles.)

The Apple Pencil 1st Generation: Pencil & Pencil Charge (www.apple.com)

THE APPLE PENCIL: (WWW.APPLE.COM)

The Apple Pencil (1st Generation) is a 7-inch Bluetooth digital stylus that works with the iPad Mini 5. One end of the pencil is the writing tip and the other end has a magnetic removable cap with a lightning connector underneath for charging. The Apple Pencil charges quickly, 15 seconds gives you about 30 minutes of use and a full charge usually takes about 15 minutes. It makes writing a very natural and comfortable experience. While using it, you can rest your hand on the iPad screen without any interference. You don't have to worry about hand placement, just write like it's a piece of paper.

The Apple Pencil has many applications for individuals with Special Needs. It's a powerful tool in the areas of notetaking, organizational skills, scheduling and calendar applications, annotating text files, PDFs and photos and filling out and signing forms. In addition, it's an impressive art tool and is supported by many specialized art apps.

Some examples of its use include the following: The Apple Pencil can be used to turn paper worksheets or children's homework into iPad worksheets. Just take a picture of the sheet, find the picture in Photos, press 'Edit' on the upper right, select the circle with three dots on the bottom right and choose Markup. Pick pencil, color and have your students or children start filling in their answers. You can use the same procedure to markup anything, even putting captions on your photos before sharing them. It's also good for "Precision Pointing"- using like a stylus

even when a program is not optimized for Apple Pencil use. For example, the Apple Pencil will work for scrolling, swiping, tapping small buttons as well as typing with the on-screen keyboard. There is also an on-screen keyboard available from the App Store called Swype (www.swype.com) that allows the users to slide their finger or the Apple Pencil across the keyboard, passing over other letters, with a single, continuous movement, without lifting. This works very well with the Apple Pencil, speeding up typing and reducing the motor task required in lifting and tapping each individual letter. With upgrade to iOS13/iPadOS, this function is built in (called QuickPath) and can be done with the Apple Pencil and the Apple on-screen keyboard.

ASSISTIVE TECHNOLOGY SOLUTIONS FOR THE APPLE PENCIL

If the grip width or texture of the Apple Pencil is not comfortable for a user with special grapho-motor needs, consider some of the following adaptations to enhance grip and writing positions:

Plus Ergo for the Apple Pencil (www.plusergogrips.com)

PLUS ERGO FOR THE APPLE PENCIL (WWW.PLUSERGOGRIPS.COM)

The Plus Ergo is an ergonomically designed grip for the Apple Pencil. It is made of soft silicon and is twice as wide as the Apple Pencil. It provides an option for users of the Apple Pencil who find it too thin to grip for writing.

Ztylus Apple Pencil Case and Ztylus Slim Apple Pencil Case
(www.Ztylus.com)

ZTYLUS APPLE PENCIL CASE AND ZTYLUS SLIM APPLE PENCIL CASE (WWW.ZTYLUS.COM)

These two cases for the Apple Pencil, available in white, black, plastic or aluminum, offer different sized grip options for users. They also have other features, such as a built-in clip which prevents the pencil from rolling away, and place to store the cap when the pencil is being charged. They also will protect the pencil tip when the pencil is not in use.

TechMatte Apple Pencil Charging Adapters
(www.techmatte.com)

TECHMATTE APPLE PENCIL CHARGING ADAPTERS (WWW.TECHMATTE.COM)

If you like plugging the pencil directly into the Lightning port at the base of the iPad but find the pencil angle difficult to use, these adapters provide options for charging. Remove the cap and insert your Apple Pencil's Lightning connector into the TechMatte adapter and plug the other end of the TechMatte adapter into the iPad's Lightning port. These adapters come in two sizes: 3.5 inches long and 1 foot long. Each of these cables provides a more flexible connection between devices and even allows you to place the pencil on top of or beside the iPad during the charging, instead of having it stick out from the iPad. A 3 foot charging cable is also available and designed to charge the Apple Pencil with your current USB wall charger.

Poetic Lumos Back Cover for the iPad Mini 5th Generation (www.poeticcases.com)

POETIC LUMOS BACK COVER FOR THE IPAD MINI ([WWW.POETICCASES.COM](http://www.poeticcases.com))

This soft plastic back cover for the iPad Mini with a built in pencil holder is very helpful for always knowing where your Apple Pencil is and keeping it safe. It fits together with the Apple Smart Cover (which protects the front of the iPad) and provides protection for the back of your iPad without adding any bulk or weight.

PencilSnap (www.twelvesouth.com)

PENCILSNAP (WWW.TWELVESOUTH.COM)

If you have iPad Mini with a Smart Cover, you will appreciate PencilSnap, another great organizational tool. PencilSnap is a leather holder for the Apple Pencil that snaps to the Smart-Cover with hidden magnets. The Pencil fits snugly inside and protects the tip while the magnets keep the pencil safely attached to the iPad Mini. You never have to wonder where your Apple Pencil is. PencilSnap can also be used as a standalone protective case for the Apple Pencil when you don't want to take it along with you.

Small Item Gripping Aid (www.activehands.com)

SMALL ITEM GRIPPING AID (WWW.ACTIVEHANDS.COM)

This Small Item Gripping Aid, from The Active Hand Company, is for those who cannot grip small items because of reduced hand function, poor finger strength or tremors. Available in two sizes, it consists of a neoprene glove and Velcro-palm pad and allows users to hold small diameter items such as the Apple Pencil at any angle needed. See website to understand further how it is designed and used

(Above information has been edited and updated from the original DISKoveries article on the Apple Pencil which appeared in the April-May 2018 issue of Closing The Gap Solutions).

A follow-up article coming soon will be discussing the new and advanced features of iOS 13, iPadOS, the new USB-C connection on the iPad Pro and its powerful new options, the new Apple Pencil 2nd generation, along with new iPad accessibility features. ■

Making Secondary Literacy Accessible for All

Literacy skills for middle school and high school students who receive special education services vary greatly. Many teachers wonder, “How do I meet all of their needs?” and “What curriculum can I use for such a wide variety of kids?” These questions are essential, but the first question that needs to be asked and answered is, “What needs do my students have in literacy?” Until we can answer that question, we won’t know exactly how to meet their needs, or what curriculum could help them gain skills.

According to the National Reading Panel, there are five pillars of reading. These are phonemic awareness, phonics, fluency, vocabulary and comprehension. While people tend to use the terms phonemic awareness and phonics interchangeably, the concepts are different. Phonemic awareness is the ability to hear and manipulate the smallest units of sound, whereas phonics is the ability to recognize the connection between the phonemes and graphemes so students can sound out what is written. The easiest way to remember this is that phonemic awareness involves the individual letter sounds, and phonics involves more of the word families. While some of our students with disabilities may have great needs in these two areas, it’s

important that we don’t get stuck working only on those skills. Just like the pillars that support a roof, if some are missing, the structure is weaker. If we do not address some of the pillar areas of reading, our students will not become stronger, more independent readers.

Another area that needs to be considered when developing the pillars of literacy is the student’s language skills, both expressive and receptive. Language skills are the base of all academic learning. In order for our students to learn subject matter, strategies and higher order thinking skills, they must develop their language skills. (Image 1) These skills are interwoven throughout the pillars of literacy, and need to be taken into consideration when we are planning our literacy intervention for our students.

One of the first considerations, after assessing students’ literacy and language skills, is how they will access the materials needed for learning. Will they be able to access materials without any accommodations or modifications? Will they need minimal accommodations? Will they need significant modifications? Matching students’ needs with the right assistive technology tools and supports is critical. Susan Copeland and

CHRISTY PALMQUIST has been an educator for 27 years, spending 19 years in special education classrooms and the past eight years as the Special Education Literacy Intervention coach for St Paul Public Schools in Minnesota. She has collaborated with colleagues in various departments to make literacy accessible for all students and improve the efficacy of literacy interventions.

HEATHER PRENEVOST is a speech-language pathologist (SLP) and AT consultant for PRC-Salttillo in Minnesota, Iowa and Wisconsin. She was a school-based SLP in Minnesota for 17 years, with six of those years as an AAC support person for secondary schools. She also collaborated with middle and high school literacy classrooms to improve the integration of AAC and literacy instruction.

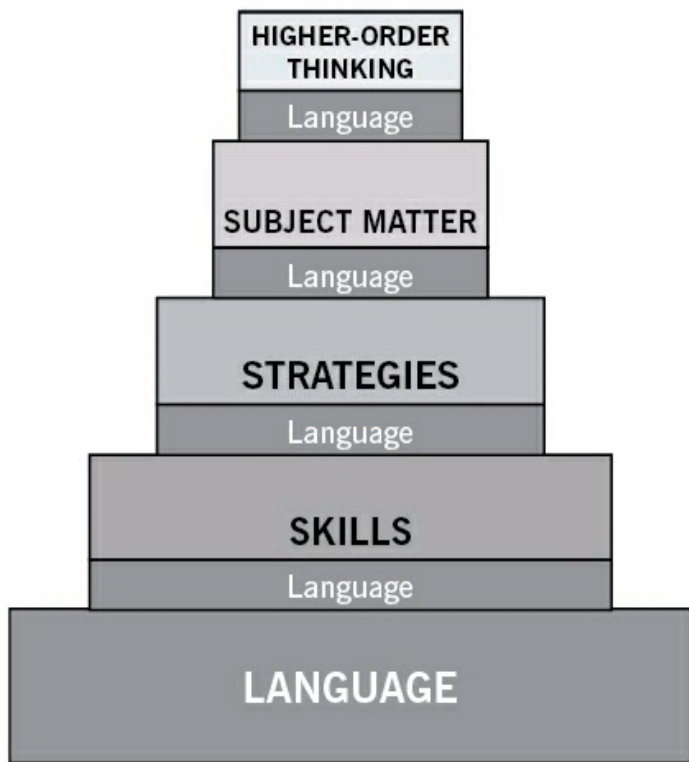

Image 1: The role of language in academic learning. Copyright by Donald D. Deshler and Barbara J. Ehren. Used with permission.

Elizabeth Keefe state in their book *Effective Literacy for Learners with Complex Support Needs*, "Provision of appropriate supports creates a positive interaction between supports and functioning." Taking time to intentionally develop plans for providing the correct technology tools helps maximize the learning opportunities for each student. Conversely, using technology that is ineffective for a particular student can result in little or no growth in language and literacy skills.

Just as there are materials that provide different structural support, our students have different levels of need for support. In the article, "Conceptualizing Supports and the Support Needs of People with Intellectual Disabilities", Thompson, et al states, "Supports act as a bridge between what is, and what can be." Some students need physical supports to help access materials, while others simply need visual cues or checklists to remind them of strategies or next steps. We need to be careful, however, to not simply identify students' deficits, but rather consider the context in which they will be working and socializing to help guide our determinations for what supports would best meet their needs. Providing too much support will enable students to remain dependent learners, while providing too little support will foster frustration and shut down from the student.

With these things in mind, here are some tools and strategies we have found to be effective for a wide range of learners because of the ease of adaptability when scaffolding materials.

VISUALIZING AND VERBALIZING

Visualizing and Verbalizing is a language comprehension strategy from Nanci Bell. We found this to be a terrific entry point for anyone looking to increase expressive language skills, and not just in a speech and language therapy context. These expressive language skills build towards greater comprehension and written language skills. *Visualizing and Verbalizing for Language Comprehension and Thinking* describes the important questioning techniques that stimulate mental imagery, so that the teacher can learn to help students visualize language and verbalize what they have imagined. This imagery-language connection is essential for oral and written language comprehension, as well as critical thinking. This strategy is not only helpful for our students with language deficits, but also those who use AAC and those who are multi-language learners.

Knowing that there are a variety of communication needs in any given class, a strategy like Visualizing and Verbalizing allows for multiple modes of expression. This strategy begins by having students describe a given picture. We found this to be successful for all students, regardless of identified language deficits. Students are taught about the different categories on the visual cue sheet, and how to speak to each of them. (Image 2) As students increase their independence with this skill at the picture level, we begin to move towards single nouns or noun phrases in written form. Students continue to use their visual cue sheet to remind them of the possible details that can be utilized. The progression continues in the same manner to simple sentences, complex sentences, and short paragraphs. Throughout this entire process, students' expressive language needs are taken into consideration, and supports are provided in order for them to participate at an appropriate level. For example, students can participate with one-word utterances either verbally or with their AAC, or complete sentences. The goal is always to have students progress towards a higher level of expressive output.

Image 3

THINKING READING

Thinking Reading, a term used in the Fusion Reading Curriculum, is the act of being aware of your understanding as you read or listen to text. It's the metacognitive work that our students who struggle with reading don't understand. Good readers do this unconsciously while struggling readers don't know that it should be happening. Structures and supports to help students be aware of and understand the process is critical and must be taught explicitly. Thinking Reading is not comprehension questioning, but rather commenting on what thoughts are occurring while reading. This is a significant shift in how teachers and speech language pathologists have typically worked to develop comprehension skills, and will take intentional planning and practice to become a permanent habit.

Using think aloud visuals, (Image 3) teachers model fluent reading and intentional interaction with engaging text. Instead of asking, "How do you think the character felt when...?", the teacher comments, "When the author used this language, it makes me think that the character is feeling..." Teachers reference specific language from the text to help students learn to pick up on clues within the text to increase their comprehension of what is being read. Knowing that these are higher level thinking concepts, we may need to scaffold backwards to some earlier concepts. Students may not be ready to interact with "this relates to...", but may be able to enter in at, "I like this" or "I remember...". As with Visualizing and Verbalizing, there many ways for students to participate, based on their communication

needs and levels of support. It is also critical to remember that while we are accepting multiple levels of expression, we continue to model more complete communication. For example, if a student says, "I remember dog", the teacher can follow up by saying, "That's right, I remember the dog played with the ball outside."

To help students move towards interacting with text, we may need to begin with shared reading. According to Dr Karen Erickson's website *Literacy for All*, shared reading is "the interaction that occurs when a student or group of students and an adult read a book together." Shared reading is not just the adult reading to the students, but making meaning with the students. During shared reading, teachers can use the **CAR** tool to help students begin to interact with the text. In **CAR**, teachers lead with a **Comment** about the text. They stop and wait for students to engage with the comment. If there is no response, teachers **Ask** a prompting question and wait for a response. Finally, if there is still no response, or incomplete response, teachers can **Respond** by adding more information.

VOCABULARY

In the article, "Why Teach Vocabulary?" by Cynthia and Drew Johnson, they state, "Studies have shown that reading comprehension and vocabulary knowledge are strongly correlated, and researchers have found that word knowledge in primary school can predict how well students will be able to comprehend texts they read in high school. Limited vocabulary prevents students from comprehending a text." They also state that, "Informa-

tion from prefixes, suffixes and roots can help students learn and remember words; using word parts can be a particularly useful strategy in reading content-area texts.” Direct instruction around how these affixes can contribute to word meaning is part of the vocabulary strategy used in the Fusion Reading Curriculum. Utilizing word mapping with this strategy enables students to have a more accessible point of entry to increasing their vocabulary, and allows them to make more relevant connections to academic language through the generation of synonyms and/or pictures. The purpose of this strategy is not necessarily mastering vocabulary definitions, but more about exposing our students with more limited vocabulary to higher level words and guiding them to understand that the affixes can provide consistent clues to help them generate working definitions. This strategy also helps them begin to recognize smaller chunks within larger words, which can also assist in building their phonics skills. It is important to note that you can also build up to this level. Based on your students’ needs, you may use compound words, core words, or functional living words as your vocabulary focus.

COMPREHENSION AND RETELLING

A student’s ability to comprehend and retell material they have read or heard plays a critical role in their academic success. Access to certain classes or programs may be determined by how well they demonstrate their ability to do these things. Narrative retell not only addresses the ability to verbally talk about what has been read, it also demonstrates the student’s comprehension of the text. Expressive language deficits may provide an inaccurate picture of a student’s comprehension

of text. In our experiences, we observed that students were able to weave the skills learned in Visualizing and Verbalizing, Thinking Reading, and Vocabulary instruction throughout their work, and enhance their recall of what they read. With explicit instruction and practice, students can then begin to generalize these skills to other areas where they may be asked to sequence or summarize information. Supports in how they express this knowledge can vary from a graphic organizer to WH-retell (Image 3) to AVID’s GIST or Focused Note Taking format. Precursors to these skills may include sequencing of pictures, cause-effect picture series, and beginning-middle-end picture series. Pages can be built into students’ AAC devices to assist them in formulating sentences about what they read and saved for later. An example of this is within the WordPower vocabulary file on Saltillo’s devices, the Stories and Scripts page set can save sentences onto individual buttons, which can then be used to retell a story in the appropriate sequence.

While reading comprehension and retell can be assessed with typical measures, it is also important to remember that this is an ideal opportunity to continue to progress along the continuum of expressive language skills. Making these connections explicit for, and with students, is important to help them understand that, by utilizing these skills and strategies, they are learning to be strategic in their approach to reading. This shift from using a strategy in a controlled practice situation to understanding which strategy will be helpful is essential to becoming a more independent learner.

	<hr/> <p>(who is in the story?)</p>
	<p>is <hr/></p> <p>(what are they doing?)</p>
	<p>at <hr/></p> <p>(where are they doing this?)</p>
	<p>Then <hr/></p> <p>(what happened next?)</p>

FOUNDATIONAL SKILLS (PHONEMIC AWARENESS AND PHONICS)

As with any structure, the foundation is critical. In reading, our foundation is phonemic awareness and phonics. These are the building blocks for all other reading skills. However, while many of our students have not fully developed these skills, focusing on these skills in isolation is not the answer. Historically, focusing on these foundational skills alone until mastery was achieved created a vicious cycle that only served to increase the literacy gap for older students struggling with reading. By providing organic opportunities to learn and practice these skills, students can continue to develop higher level literacy skills and fill in foundational gaps simultaneously.

Alphabet books (Image 5 and Image 6) provide an opportunity to highlight specific phonemes, while also reinforcing sight words and core words—many of which overlap. (Image 7) Creating relevant and motivating lower level books is an easy way to encourage students to engage with text in a predictable format.

Color coded letter tiles provide unlimited opportunities to

build phonics skills. Color coding is optional, but valuable for students who have a more visual connection to learning. These tiles also allow students to manipulate letters to form words and see patterns without the fear of making a mistake. These letter tiles are great tools to help students interact and create word families.

If students are not quite ready to build their own words, then picture sorts can be a tool to use to help identify beginning, middle or end sounds. They can also be utilized to form word families. Both picture sorts and word tiles can give you very specific information on how these foundational skills are developing.

WRITING

While writing is not one of the five pillars of reading, it is a key piece in a comprehensive literacy program. It is essential to remember that there are multiple, acceptable methods of writing. Standard paper-pencil is great; however, keyboarding, speech generating devices and manipulating word tiles are all appropriate methods of written expression. In addition, a progression of skills similar to that in Visualizing and Verbalizing is important. Students should be moving from single word responses to phrases, sentences and paragraphs.

Many of the communication devices utilize a color-coding system to identify different categories or parts of speech in order to aid in formulating sentences. We found that this model provided another level of support for many of our students who did not use AAC. One of the ideas that has grounded all of our practice has been, “What is essential for some, is helpful for all.” Explicitly teaching the color coding to all of the students to help write complete sentences is an example of this practice. It also supports students in their abilities to enhance their writing by including more descriptive language. For example, empty colored blocks representing a noun and a verb can be provided as a framework for students form a simple sentence. Then, additional blocks in colors representing descriptive words, like adjectives and adverbs, can be placed within that simple sentence to provide a clearer picture of what is being written. This can also be done as an extension of the Visualizing and Verbalizing or Narrative Retell activities.

Predictable chart writing is another way to scaffold writing for students who have greater need for support. Ideas are generated together, written on chart paper and then read together. Extension of this activity can include cutting apart sentences and having students put them together in a way that makes sense.

KEY POINTS TO REMEMBER

- A comprehensive approach to literacy instruction, including activities that support the development of skills in all five pillars of reading, is necessary for our older students

Image 7

to obtain the skills needed to become more independent readers.

- Direct instruction in vocabulary is critical to improved reading skills.
- Teaching skills within context is more effective than isolated “drill and kill” practice opportunities.
- Because language and literacy are so intertwined, it is critical to include language-based supports in any literacy intervention.
- Flexibility in defining text, both in reading and in writing, is important to creating an inclusive environment where all needs can be met and all learning styles can be honored.
- Explicit instruction and language around when strategies overlap helps students become more strategic readers, knowing when to use the tools that they have learned.

Providing Emergent Literacy Instruction for Students with Significant Disabilities, Including Cortical Vision Impairment: Setting the Stage for Augmentative Communication

Article Series Summary - When and how to make literacy adaptations for students who have complex communication needs combined with Cortical Vision Impairment can be a difficult task that requires systematic inter-professional collaboration. This article series will focus on the daily emergent literacy routines recommended by Erickson (2017): shared reading, Predictable Chart Writing, alphabet/phonological awareness activities, independent writing and independent reading. To build confidence and meaningful engagement, augmentative and alternative communication is integrated throughout. The following article describes how to create the necessary supports for setting the stage for augmentative communication (AAC). This article does not focus on the features of AAC systems, but rather discusses the necessary supports that adults must put in place in order for students to successfully communicate.

DEANNA K. WAGNER, MS/CCC-SLP, is a speech-language pathologist with over 30 years experience providing consultations and training in the area of assistive technology with an emphasis on augmentative communication. She works with educators and families to achieve goals in the area of AAC selection and implementation through a contract with TherapyOne (nominated two years in a row for the McLean-Yoder Award for Professional Excellence). She has been recognized for volunteer efforts and AAC support services to adults at the non-profit organization VALLEYLIFE, including various Stories of Ourselves literacy projects. She is co-director of Out and About: AAC in the Community. She has presented at local, national, and international conferences.

GRETCHEN HANSER, Gretchen has worked in the field of assistive technology and literacy for students with significant disabilities for over 20 years. She is an educator and an occupational therapist. She has worked in a variety of educational settings developing model classrooms, developing school based assistive technology centers, providing teacher and related service provider trainings, participating in assistive technology assessment teams and working directly with students and staff in the classroom. Her primary focus has been on augmentative and alternative communication and literacy for students with the most significant disabilities. Gretchen has a masters in occupational therapy from the University of North Carolina in Chapel Hill and received her doctorate in education from the University of New Hampshire. She presents at local, national, and international conferences. Gretchen works at the International Academy of Hope in New York City.

CAROLINE MUSSELWHITE, Dr. Caroline Musselwhite is an assistive technology specialist with more than 40 years of experience working with children and adolescents with significant disabilities in a variety of settings, including Head Start, clinics, developmental day programs, homes, and the public schools. Dr. Musselwhite has written a number of textbooks and “how-to” books on a range of topics, and has also authored many books and software programs for youth with disabilities. She has presented thousands of workshops throughout North and South America, Australia, Europe, and Africa, and is a founding member and Fellow of the International Society for Augmentative and Alternative Communication. Honors include: Foundation Fellowship (West Virginia University), Educator of the Year (Association for Retarded Citizens, North Carolina), Honors of the Association, (North Carolina Augmentative Communication Association), and DiCarlo Outstanding Clinician Award (North Carolina Speech-Language-Hearing Association), and ISAAC Fellow.

INTRODUCTION

This series of articles is specifically focused on the importance of providing emergent literacy instruction to students with significant disabilities including cortical vision impairments (CVI) and complex communication needs (CCN). Emergent literacy instruction is quite different from conventional literacy instruction. Conventional literacy instruction focuses on areas such as sight word identification, phonics, spelling, and learning formal comprehension strategies. Emergent literacy focuses on all of the foundational skills that precede conventional literacy, such as simply learning that print carries meaning, how books work, what it means to be a writer, alphabet knowledge and sound awareness skills. Due to their vision, verbal and physical issues, students with CVI have had extremely limited experiences with reading, writing and language. Many of them clearly need rich emergent literacy instruction. Erickson (2017) suggests that emergent literacy comprehensive instruction should include: shared reading, independent reading, independent writing, alphabet instruction and shared writing. Communication opportunities using AAC must be woven throughout each of these areas, as literacy learning occurs through rich social interactions. Instruction needs to be designed in such a way that CVI does not become the gate keeper that limits literacy learning. This article can be used to start a discussion with the educational team about how to weave AAC and communication opportunities throughout the school day, including emergent literacy activities that target meaningful choice-making opportunities.

OVERVIEW OF CORTICAL VISION IMPAIRMENT

CVI is a neurological disorder which impacts the processing of visual information in the brain. It is frequently undiagnosed or unrecognized due to multiple physical/cognitive impairments. In the past decade, knowledge about CVI has grown rapidly (Roman-Lantzy, 2018; Lueck & Dutton, 2015). Roman-Lantzy (2018) developed the CVI Range Assessment tool to functionally define the impact based on 10 specific characteristics, and guide diagnostic interventions. The 10 characteristics are: color preferences, visual field preferences, need for light, need for movement, problems with visual complexity and visual novelty, problems with using vision to guide their reach, visual latency, atypical visual reflexes and problems with distance viewing. The score on the CVI Range categorizes students' abilities into phases of severity.

Phase 1 = Building Visual Behaviors. Students have little functional vision and are learning to simply use their vision to look at something.

Phase 2 = Integrating Vision and Function. Students are learning about what they are looking at and attaching meaning.

Phase 3 = Developing Visual Curiosity. Students have a great deal of vision but require specific instructional support

More information about the general implications for literacy can be found in the October article of this series (Hanser, Musselwhite & Wagner, 2019). Students with CVI may be challenged and at times frustrated by the complexities of communication. They may have difficulties visually attending to facial expressions, looking where somebody else is pointing and discriminating images/symbols on communication displays. It's important for the Teacher of the Visually Impaired (TVI) and the speech/language pathologist (SLP) to collaborate on AAC interventions, so that potential language and communication growth is not limited by visual challenges.

COMMUNICATION & EMERGENT LITERACY INSTRUCTION

While students are learning about the functions of reading and writing, they are also developing language to communicate their thoughts and ideas. Literacy and language are built through experiences. There are no prerequisite skills. Students who have limited verbal abilities will be developing literacy and AAC skills concurrently. Educational goals for emergent literacy and emergent communication by their very nature overlap. Although literacy learning occurs through rich communicative interactions with others, students who don't yet know how to communicate in symbolic ways can still benefit from participation in literacy activities. Figuring out how letters and words work takes time and effort. In order to grow, students need opportunities to communicate about these experiences.

During emergent literacy instruction, students are learning to communicate by:

- Requesting or choosing (e.g., selecting a book to read)
- Describing things (e.g., which colors they want to use for writing or drawing)
- Naming people, places and things (e.g., saying which friend goes next)
- Sharing their own ideas (e.g., during predictable chart writing)
- Commenting and asking questions (e.g., during shared reading)
- Selecting letters and sounds (e.g., during alphabet and sound awareness activities)
- Selecting letters on an alternative pencil (e.g., during independent writing)

As the example below illustrates, students with CVI experience significant problems with most fundamental emergent literacy activities. Even though many emergent literacy activities may appear simple in nature, they can be visually and physically demanding.

“Dear Zoo” Unit. For many years Ms. Cook has used this book, Dear Zoo, (A flap book, by Rod Campbell) with her kindergarten students. She brings out toys and puppets for students to play with and pretend to be the animals. Some of her students come to school already familiar with the book. They point to the words and the pictures (concepts of print). They talk about animal names and characteristics (vocabulary concepts). Students also learn about writing (functions of print). This year Ms. Cook is worried about a new student, Janie. When she was an infant Janie had an infection that resulted in brain damage. The occupational therapist reports that Janie does not have the physical skills to independently lift the book flaps or turn pages. She also doesn’t have the motor skills to write. Her vision teacher reports that Janie has late Phase 2 CVI and cannot visually discriminate the colored drawings in the book. Janie will need instruction that helps her learn to look for and identify visually salient features of each animal, starting with real photographs. According to the speech/language pathologist, Janie’s verbal abilities are limited. During meeting time, shared reading and other academics, Janie can’t request, comment or ask questions.

Teamwork will be necessary in order to plan specific CVI and communication interventions to include Janie in the kindergarten literacy activities without her CVI restricting her learning. This article will provide a discussion of student needs and adult roles and responsibilities for setting the stage for AAC.

CONSIDERING COMPLEXITIES: VISION AND COMMUNICATION

Many variables will affect a student’s ability to benefit from educational tasks. Team members will need to gather and share information about how the student uses his/her vision and how he/she communicates. This is particularly critical when students have limited verbal expression.

Variables that affect functioning and have potential to restrict learning:

- Intrinsic Difficulties – health issues (seizures, headaches, muscle spasms/cramps, inability to control body temperature), trouble initiating and coordinating movements, problems with word-finding, restricted ability to process visual features that distinguish one item from another
- Extrinsic Variables – busy environments that distract from learning, confusing or overwhelming verbal cues and prompts, tasks that are visually frustrating, etc.

According to Tietjen (2019), the primary and most persistent educational impact of CVI often revolves around difficulties with the CVI characteristic: visual complexity. This impacts their ability to attend to literacy materials, communication systems and the environment. Planning a program that is designed to support growth in these areas must consider how complex tasks and environments are balanced throughout the day. Tietjen’s “What’s the Complexity Framework” (2019) offers teams a decision-making process for creating and modifying literacy materials. Tasks can be divided into three categories of complexity: comfortable, challenging and frustrational (rating as green/yellow/red based on increasing complexity). Any task that would be considered “frustrational” (in the red zone) must be modified, adapted or avoided all together. ‘Challenging’ tasks are learning opportunities, in the right environment where distractions are minimized and the student is engaged. Tasks that are rated as ‘comfortable’ can take place in environments that are more complex. Rating the complexity of an environment includes consideration of background noise, movements and visual considerations (i.e. light, distance, clutter or crowding). Rating scale results can be used to adjust students’ schedules to include appropriate levels of supports during literacy and communication instruction. More information is available through Perkins eLearning as a [webinar](#) or multi-week professional on-line [courses](#).

STUDENT STRESS IN THE CLASSROOM

In addition to visual complexity challenges, students with CVI can experience stress which impacts their ability to interact with others. When students are uncomfortable or dysregulated, they may cry, shout, tantrum or withdraw (Dutton, 2015). In their homes and communities, families have identified ways to avoid temper tantrums and distress such as going shopping during less crowded hours, providing window shades in the car, using headphones with soft music and developing plans for fostering feelings of safety (such as sitting in the shopping cart facing mom). In the classroom, when students with CVI experience stress, professionals may not recognize the signals. Teachers and therapists may think that the student is not paying attention and may reprimand the student. Students with CVI may have significant problems paying attention to more than one thing at a time.

Students may stare up into the lights, or they may hang their head down and appear to be asleep. Stress can be triggered by too much sensory information at once (visual, auditory, touch, movement and even smells). Multiple environments and tasks that are visually challenging can have a cumulative effect throughout the school day (Tietjen, 2019). This cumulative effect results in increased fatigue and often a decrease in reliable visual function. Common classroom factors which may trigger stress in students with CVI:

- Too many colors
- Complex or unknown shapes
- Overwhelming number of choices
- Too many questions
- Materials that are positioned too far away or where they can't be easily seen
- Distracting sources of light or movement, such as something fluttering in a window, or a ceiling fan
- Too much movement or noises in the periphery, including noises behind them.

To facilitate student learning, teams will need to identify and minimize things that trigger student stress in the classroom. The following section offers a list of possible solutions.

SOLUTION #1: LEARN TO RECOGNIZE AND ADDRESS STRESS

Stress can appear in many forms. The team should work together to identify the indicators of students' stress and the triggers. Many of these indicators of stress may have previously been mis-interpreted as bad behavior, so it is important that the team does this analysis together in order to get a more complete understanding of the student's needs. Team members can brainstorm activities and routines that are comfortable and calming for the student. See Table 1 for examples. Keep in mind that all students are different and activities that calm them are different. If there is not a TVI on the team, a consult with the district TVI should be requested.

Behaviors When Stressed	Calming Activities	Behaviors When Calm
Humming loudly	Reading about Elmo	Looks at pages for up to 10 seconds
Snoring noises	Listening to "my day" stories	Head down and to the right, eyes closed or unfocused
Kicking feet	ABC Song	Rocking or swinging rhythmically
Closes eyes and won't respond to any questions	Helper singing the alphabet song with silent pauses for student to "sing it in their head"	Melodic Vocalizing
Rubs face, eyes and head	Listening to a favorite audio book on the computer using a head switch to pause/play it	Smiles and squeals

SOLUTION #2: MINIMIZE PASSIVITY BY GIVING STUDENTS CONTROL

Another major contributor to student stress is lack of physical control over their own experiences. Students with CVI who need AAC are likely to have multiple physical challenges. Many won't be able to walk, and learn to rely on others to move them around. This limits their ability to integrate visual information about the world around them. They may also have fine motor challenges in addition to difficulties with visually guided reach, and learn to rely on others to manipulate materials for them. As passive participants their days are spent watching others. When they cannot escape the visual complexities around them, even watching can become stressful. They are at great risk for developing learned helplessness. They may not understand that they can influence outcomes, and have no way to learn self-determination without the help of assistive technology devices. Providing appropriate scaffolds that encourage students to explore, manipulate and ultimately control their environment is crucial. A variety of access tools can be used to operate the computer, iPad or a voice output communication aid (VOCA). Students can learn to turn the pages in an electronic book, play music, activate a message to get attention, activate a series of messages to read a story. Alternate access options may include using other body parts (e.g., head, elbow, leg) and/or eye gaze technologies. Be sure to include the OT/PT on the team when determining how to modify materials to maximize opportunities for students to be actively engaged

in learning experiences, based on an access hierarchy (Cook & Polgar, 2015). Bottom line is: no mastery or readiness is needed for students to use these access tools; they will learn to use them by using them for authentic, motivating tasks.

SOLUTION #3: CREATE A VISUALLY BALANCED SCHEDULE

When the amount of noise and movement in a typical classroom is stressful, students with CVI will need to have frequent breaks. For activities that are particularly visually challenging, visual breaks may be necessary every 5-6 minutes. Tietjen (2019) reminds us that a visual break is a right, and should not be given or taken away based on 'good' or 'bad' behavior. It is important to note that visual breaks can still involve the use of vision.

An activity is considered a visual break when all items are checked:

- √ All adult-driven visual demands cease
- √ Student chooses the activity
- √ Student finds it enjoyable
- √ Doing this activity helps the student recharge
- √ The break is not given as a reward

Team members may give students choices of their favorite calming activities, such as those identified in Table 1. Other examples of breaks could include: meditating in a quiet room with the lights low, imagination games, playing with favorite toy (or fidget), watching a favorite video clip, bouncing on a ball or rocking in a rocking chair. When giving students breaks it is important to make sure that some of the breaks are things students can do by themselves.

When exposed to high levels of visual and auditory clutter, some students with CVI may not be able to complete tasks that seemed relatively easy to complete in a quiet room. When professionals want to work on activities which require more visual attention, they may need to find a quieter, less stimulating environment. The level of complexity of a visual task will vary depending on the student's degree/level of CVI. A balanced schedule will take into consideration student's visual battery and distribute the visual demands throughout the day. Consulting with the TVI when planning literacy activities can guide decision-making so that students can be encouraged to use their vision at comfortable levels of complexity, and to focus on developing their listening skills at other times. Many literacy concepts can be taught through auditory channels, without requiring the student to use vision at the same time.

It is important to find the balance of when to solely use auditory channels, versus when and how to incorporate vision into the activity. Work with the TVI to find daily opportunities for students to use their vision to assist in learning, particularly when students are still figuring out how to use their vision, or to integrate vision with function (Phase I and II). A student with relatively mild CVI (Phase III on the CVI Range) may be able to visually attend to the text in a book when the location of the text is controlled and viewed in a quiet place (such as the resource room). The same student may not be able to visually attend to similar sized text on a daily schedule that includes more visual elements, either on the page (complex array) or around the classroom (complex environment). Tasks that are visually challenging for students (such as visually discriminating letters or printed words) can be scheduled to take place where other competing sensory input is reduced. The example below illustrates interventions designed for a student learning to use his vision (Phase I CVI).

Case Study: Balancing visual demands during emergent writing.

Allen is learning to select letters during emergent writing activities through the use of an "alternative pencil." Allen is familiar with the ABCs from listening to the ABC song. He is comfortable listening as letters are listed and is learning to activate a switch when he hears a letter he wants. Based on input from the TVI, a three-ring binder was designed. Each page is black, and has only one letter with a neon red outline (reducing the complexity of array and highlighting the shape of the letter). This version is designed for partner assisted scanning with auditory plus vision. The partner slowly goes through the pages and says each letter. When there are no other competing sensory distractions (student movements, other conversations, visual clutter), the color and size of the letters are designed to entice his vision. However, the goal of an emergent writing activity is to enjoy the process of self-selecting letters to produce something authentic and personal that he can be proud to share. For his part, Allen was immediately engaged in making his selections through auditory channels. Initially, he was not attending visually to the letters and this was not a requirement for participation in the activity. After three months of writing, it was noted that he was looking at the letters more often, especially when the partner provided pauses and there were no competing noises.

SOLUTION #4: USE FAMILIAR ROUTINES

Using familiar instructional routines can reduce anxiety for students and professionals. Comprehensive emergent literacy instruction as recommended by Erickson (2017) consists of activities which can easily become routines when done on a daily basis:

- Shared reading - group reading of rich, motivating book where students can comment and ask questions.
- Predictable chart writing - 5 step group writing activity which results in a class book. (See Hanser, Wagner & Musselwhite, Closing the Gap 2019 article for more information)
- Independent writing – student chooses a topic to write about and then explores writing with an alternative pencil.
- Alphabet and sound awareness activities – interactive activities which can be woven into daily morning meeting.
- Independent reading – student chooses a book and then explores it independently with appropriate access scaffolds as necessary (See Solution #2 above).

For information and webinars about implementing these activities, see: Dynamic Learning Maps, <https://dynamiclearning-maps.org>; Project Core, www.project-core.com; and Angleman’s Communication Series, www.angelman.org/resources-education/communication-training-series/.

SOLUTION #5: LEARN ABOUT YOUR STUDENTS SPECIFIC CVI NEEDS

Students with CVI require specific modifications, and these modifications are not a ‘one size fits all.’ The types of modifications should be selected based on an assessment of an individual student’s visual functioning (based on results from the CVI Range, updated at least once per year). Table 2 shares modifications for common emergent literacy activities/ routines with examples for differing levels of CVI severity.

Table 2. Sample CVI Modifications during Class Activities / Routines

Activity Routine	Phase I	Phase II	Phase III
Attendance	Don’t expect student to visually scan the room or look at photos/ name cards. List/say names of students in the same order every time.	Emphasize key words “WHO” and/or “SCHOOL” with modified symbols to look at (bold color, simple shapes, sign and/or a texture). List student names (auditory only).	Look at photo cards and/or printed names of students before morning meeting when distractions are reduced. During group times, list names (auditory only).
Group Sharing (What did you do last night/ weekend?)	Record a message from home before group time. During group, student listens to others and then activates a switch to share his message.	Use a home/school journal. Add familiar images for favorite activities to the journal, one per page. List favorite activities, ending with ‘something different’	Practice answers to this question during 1:1 instruction using a robust AAC system. When in a large group, use a home/school journal (Phase II tip).
Choosing a book for Independent Reading	List/say the names of books using partner assisted scanning. Continue to offer favorites and add new options. Always have “something else” be the last choice.	Start a list of favorite books. Can show the student the list while scanning, but they don’t need to look at actual words. Instead, model concepts about print (print goes from left to right and top to bottom when you read). They can look at your hand as it moves across the page. Pause frequently to give students chance to think or look. Always have “something else” be the last choice.	Modify favorite books with visually accessible images or text. Always have “something else” be the last choice.

SOLUTION #6: CONSIDER THE USE OF SUPPORTS/CUES

There are different types of cues and it is important to choose the ones that are most appropriate for students’ CVI needs. Consistent cues can lead to clearer expectations.

Physical Support/Cues: Some students may have tactile defensiveness and/or their muscles may tense at unexpected touch. They may benefit from touching the arm/hand of a partner and then the partner does the reaching and physical exploration of novel items in the environment. This can be very effective as the student is in physical control of starting and stopping the interaction.

Graphic 1: Visual Highlighting Example.

The main character of the *The Story of the Little Mole* is the mole. When introducing the book, the mole is key information that the adult would talk about and describe. Having the picture of the mole highlighted helps draw students' vision to the most important element on the page. Having the text highlighted on a separate page helps distinguish the text from the picture. This helps students learn that pictures are different from text – a very basic concept about print

Visual Supports/Cues: Visual aids can be used to engage students' vision.

Visual Guides: A piece of black paper can be used to cover parts of a page to reduce complexity and focus vision on a particular area.

Colored Highlighting Cues: Bright colored markers can be used to highlight key details of a picture or print. When using colored highlights, it is important to highlight only the key concepts on a page. See Graphic 1.

Flashlight Cues: Using flashlights to direct students' vision can be an easy and quick strategy. Be sure to consult with a TVI regarding the use of light cues; the color of the light may be an important consideration.

Auditory Supports/Cues: Auditory cues can be verbal descriptions of visual items or they can be auditory cues used for communication choices. When working on communication, it is essential that students have access to enough things to say. Many students with CVI may not be able to see the items in a communication array (due complexity), so the items can be represented by auditory cues which are read out loud by the helper or a device. Presenting the auditory cues in the same order supports students' memory which ultimately allows them to communicate more successfully. Using auditory cues is essential for students with CVI. This prevents their vision from restricting their communication.

Case Study: Shared Writing Supports/Cues.

When Janie's teacher is guiding a group writing activity (such as Predictable Chart Writing), there are multiple opportunities for the students to answer the question, "Who?" Janie can be asked "Who is next?" Or "Who has this word?" To provide predictability and help her memorize the list of students, Janie's team organized a communication array that includes the names of the students in her class. Keeping the order the same and using auditory prompts helps Janie learn to anticipate which name comes next. Giving her a switch that she can use to tap through the list of names provides consistency of motor plan. Before asking Janie to choose a friend, her teacher can use the switch to tap through the list and make a choice first. In this way, she provides a model for Janie of expected behavior without giving extraneous verbal explanation or cues. When it is Janie's turn to pick a student, everyone can agree to be quiet so Janie can hear her choices and only react once Janie indicates that she has found the name she wants to select. After Janie selects a name from the auditory list of options, the teacher may ask Janie to use her vision to confirm the selection. She will ask Janie to look at the name card of the student Janie selected (using a 3x6" black card with bright red highlights around the shape of the word, similar to the example for Mole in Graphic 2). Using a single card for each name controls visual demands while Janie is in a group settings. Once she is more automatic in choosing the name of a student from her list, Janie will be able to focus her attention on smaller details, like letters and sounds that make up names of the students (e.g., "Who has a name that starts with L?" — answered using the visual supports. "Who has a name that starts with the /m/ sound?" and "Who has a name that rhymes with Tammy?" — answered using auditory listing).

TEACHING ADULTS TO BECOME EFFECTIVE COMMUNICATION PARTNERS

When considering how a student with limited verbal skills will learn language, attention also needs to be given to what they are doing AND how communication partners respond to them. Adults play a monumental role in fostering student communication; there are a number of important concepts they must learn and do. To avoid pitfalls of passivity and prompt dependency, communication partners need to be ready to encourage and respond from the moment students engage with them. Training adults to be effective communication partners is just as important as teaching the students.

RECOGNIZE STUDENTS' COMMUNICATION ATTEMPTS

Due to their visual and physical issues, students' communication attempts may be overlooked or misinterpreted by others. To provide awareness, team members can complete an inventory of the student's communication attempts, such as the "How I Communicate" Chart in Table 3. Team members should write down exactly what the student does (form/context) as well as what it means (function of the message). Team members can also add how the adults should respond and what the adults should say. This can help everyone respond to the student in a more consistent way.

The table below is an example using the form, "How I Communicate: All Day Every Day OPPORTUNITY," adapted from Bridge School forms and www.praacticalaac.org (September, 2013). The items below illustrate how Sidney communicates; Sidney has cerebral palsy (spastic quadriplegia) and CVI from from a brain injury in utero. Examples include communications using her communication device (an Accent 1000, that she operates with 2 switch step-scanning) and using vocalizations. Although her verbal abilities are limited to mostly open vowels and a few consonants (b, d, m), she has learned over time to differentiate the sounds she makes to approximate other sibilants.

Table 3. Recognizing Student Communication Attempts

What I Do FORM (CONTEXT)	What It Means FUNCTION MESSAGE	What YOU should do (PARTNERS)	What you should SAY and MODEL (PARTNERS)
Initiates conversation by verbally saying "hi"	Signals that she is ready to say something	Let her know when you are ready to listen to her. Give her time to select more than one word while waiting quietly. Notice if she needs to move to a quieter area to talk	Acknowledge the intent of the message before suggesting edits. (For example, you said "want cookie" and if you want one, you could say, "I want a cookie, please")
Subvocalizes "yeah"	Self-talk while listening to auditory prompts from her device	Wait quietly	If she appears frustrated, re-assure that you have time to wait for her, or tell her when you will have more time
Says, "day"	She has a question about the schedule	Check facial expression for frustration or curiosity before deciding how to respond. Talk to her about changes to her schedule.	Start by acknowledging what she said. When there is time and few distractions, encourage her to ask questions about the schedule using her device.
Closes eyes and hangs head down	Finished Stop Visually overloaded	Back off on any requests. Give visual break.	Acknowledge what you see. "I see you have your eyes closed and your head down. That really lets me know that you want a break.

ATTRIBUTE MEANING TO COMMUNICATION ATTEMPTS

When filling in the second column of the "How I Communicate" Table (Function of Message), there may be some expressive behaviors that students demonstrate which are unclear. In these instances, it may be helpful to "attribute meaning" to inconsistent, perhaps unclear or unrelated attempts. Attributing meaning is very simply verbally assigning meaning to something that the partner sees the student doing. Attributing meaning is something adults naturally do with young children who are learning new skills and aren't quite sure about what they are doing. Adults do this in a way that presumes intent and competence, even though the adults may not be sure about what the student really means. This same strategy can be used with students with CVI who may be random, inconsistent and unclear in their intent. Carefully watch the student for ANY type of response, e.g. arm/leg movement, a smile, change of facial expression, head turn, vocalization. Respond by telling the student exactly what you see them doing and then give their observable behavior a possible meaning that might be connected to the activity, and then move

on. By attributing meaning, partners can help shape students' behavior. Over time, students begin to learn the meaning of their behaviors. See Table 4 for examples.

Table 4. Attributing Meaning

What I Do FORM (CONTEXT)	What It Means FUNCTION MESSAGE	What YOU should do (PARTNERS)	What you should SAY and MODEL (PARTNERS)
During a sound awareness activities, Ellie smiles when hearing a tongue twister	Probably signaling enjoyment	Respond and model	Model using their AAC device or light tech board. "I see your smile. I think you LIKE THAT."
During shared reading, Marcus repeatedly taps and bangs a VOCA. He appears to be focused on the VOCA and not the book.	Unclear Perhaps unconnected to activity	Respond and model with encouragement.	"You are hitting your device a lot. I think you really have something to say about this page! Let's stop and read it again and talk about it." The partner pauses. Marcus stops banging on the VOCA, looks up at the partner, reaches out, hits and tries to grab the book. The partner excitedly responds, "Yes let's look at that page! It says..."
During an alphabet game, Adriana doesn't make a choice when given 3 letters (a, g, x). She will just hang her head down, but occasionally vocalizes.	Unclear Perhaps unconnected to activity	Respond with encouragement.	"I think I heard you say something. I wonder if you want to talk about the letters. Check it out! "A" is the first and last letter of your name! And there is "g." "G" is the first letter in your best friend's name "Gary." The other letter is "x." Hmm-I can't think of anything that starts with the letter "x" right now. But, it is on your alternative pencil way at the end of the alphabet." At the end, Adriana doesn't look, but she smiles and vocalizes loudly.

USE PARTNER ASSISTED SCANNING TO ACT AS THE STUDENT'S 'POINTER'

Partner assisted scanning is a way for students to make choices when they cannot physically point to all of the choices. Using partner assisted scanning is especially helpful for students who have problems with "visually guided reach" (a characteristic of CVI). This is when students have trouble looking at something and reaching for it at the same time. Partner assisted scanning is simple. For auditory scanning, the communication partner verbally states choices and when the student hears or sees what they want, they make a yes or no response in some way, e.g. a facial expression, vocalization, head movement, a VOCA programmed with "that's what I want." The communication partner lists each choice, pausing between choices. Students frequently don't choose something the first time, as they may want to hear all of their choices a couple of times. Cycle back through the choices at least three times. Keep talking to a minimum, so students can think and respond. Auditory plus visual partner assisted scanning techniques also consider what the student is looking at while options are listed. Looking and listening at the same time can be difficult for students with CVI. It is important to collaborate with the TVI when determining which visual supports will be appropriate for an individual student. The complexity of visuals may vary based on the familiarity of the task and the environment. Go to Project Core (www.project-core.com) for a Quick Reference Guide about partner assisted scanning.

Case Study: Independent Reading.

Ale loves to listen to his favorite books during independent reading time. Ale has early Phase II CVI and has trouble looking at most books because they are visually too complex. He has a handful of books that have been simplified to accommodate for his limited vision. His teacher makes sure that he also has access to e-books with longer stories and rich vocabulary, so that his language development and exposure to books aren't restricted to what he can see. On this day, an audio book is used because it not visually complex. Ale needs to choose his own book; his teacher offers him 8 choices of books, and includes "something else" as the last option. Due to

Ale's CVI, he can't use his vision to pick a book – an array of 8 choices is too complex. In order to not limit book choices, his teacher uses partner assisted scanning to go through the list of books. When Ale hears what he wants, he uses a head switch plugged into a VOCA programmed with "I want that!" He then uses a switch to control the digital audio book. A cheat sheet is used by all of the staff to help Ale choose books. A cheat sheet is used so that his choices include a range of books that are presented consistently. See Graphic 2.

Graphic 2: Ale's Book Reading Choices Cheat Sheet

Ale's Book Choices

Note to Partner: Read the choices outloud in the following order everytime. Pause between choices to give processing time. Cycle through at least 3 times.

1. Dr. Seuss Books
 - a. If YES: Cat in the Hat, Dr. Seuss ABC, One Fish-Two Fish, Wocket in Pocket, Sneeches
2. Paperbag Princess (on iPad)
3. A book that I wrote
 - a. If YES: I See book, My Favorite Things book
4. New Kid on the Block (on iPad)
5. There's a Monster at the End of this Book (on iPad)
6. Stephannie's Ponytail (on computer on Tumblebooks)
7. Picture Dictionary (on iPad)
8. Something Else

Partner assisted scanning should not be conducted as a conversation. Acting as the pointer for a student is not the same as asking a series of questions. Students need to learn that the choices they make have consequences. Communication partners may need to attribute meaning to behaviors in order to shape and reinforce consistency of "acceptance" and "rejection" communicative acts.

Communication partners need to respond to students' conventional yes/no head movements if possible, since these are universally recognized.

For the student who cannot point, list ONE item at a time and observe the student for their response.

Many students with CVI struggle to communicate YES or NO. Using partner assisted scanning with a list of motivating items can be a great way to work on YES/NO teaching students to respond.

To assist with creating a communication plan, add the student's responses to the "How I Communicate" form. Note what the student does (FORM) and record as an acceptance or rejection (FUNCTION) in the Communication Chart. See Table 5 for examples of how students may say YES or NO. See Table 5.

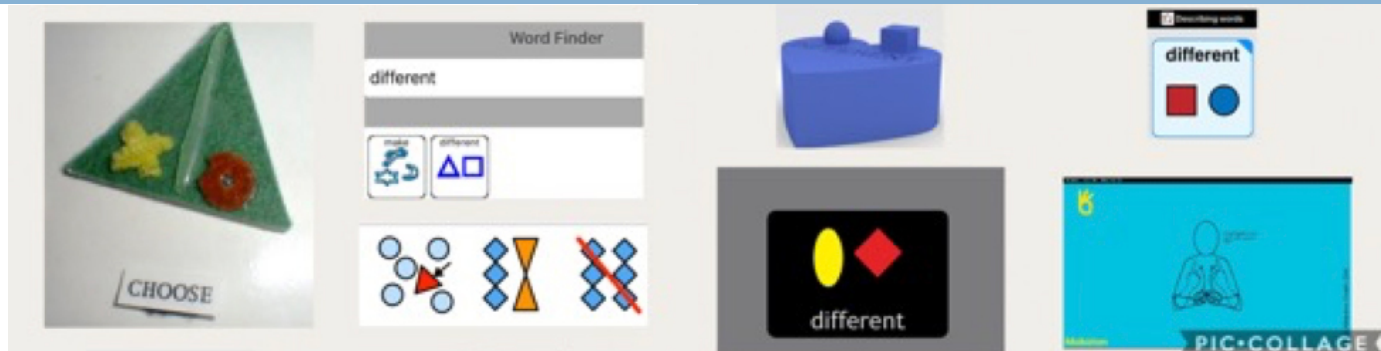

Table 5. Examples of How Students Say YES and NO

What I Do FORM (CONTEXT)	What It Means FUNCTION MESSAGE	What YOU should do (PARTNERS)	What you should SAY (PARTNERS)
Catherine uses a small head switch by her right temple. It is plugged into a VOCA programmed with "that's the one." The class is voting on what movie to watch: Moana or Frozen. She repeatedly hits her switch when the teacher says Frozen.	YES	Immediately acknowledge attempt	"OK, I hear you-it looks like you are telling me you want to watch Frozen!"
Sonya activates the switch on her chest harness (connected to her AAC device which she is learning to use with 2 switch auditory scanning)	YES	Use the "mover" switch to advance the scan indicator to ONE item at a time. Respond only when she confirms.	Let the device list the choices, don't repeat the prompts. Respond to the message she selects as you would if she were talking.
Amy turns her head from side to side when supported with a proprioceptive feedback strategy (Burkhart, 2019)	NO	Partner puts one hand under student's chin and the other hand next to student's cheek. Hands should be ~1" away from skin.	Verbally give Amy the choice. Then say "yes" and lightly tap her chin. This helps Amy know which direction to move her head to say "yes." Do same thing for "no." Say "no" and lightly tap her cheek. Wait for Amy to respond and move her head.
Sidney initiates conversation by saying (verbalizing) "yeah yeah"	YES	Notice when others are making choices and give her the chance to decide if she will select from her device or from your options.	Memorize some of the auditory prompts from her device. Speak choices as a list, not re-phrased as questions.

TEACH STUDENTS TO ASK FOR SOMETHING DIFFERENT

Students who have CVI may appear overly passive, accepting everything and anything offered. In contrast, they may also be overly disagreeable, refusing everything offered. Students with CVI frequently struggle with “visual novelty.” This means that when you show them something new, such as a new choice, they may not know what it is and may automatically look away. This may cause the student to reject new choices which may contribute to unsuccessful communication exchanges. In these situations, being able to ask for something “different,” can give students power. Students may not know that asking for something different is even an option unless they are explicitly taught the concept. Start by searching for signals that the student can easily use to indicate that the he/she would prefer a different choice. Students may use a sound/verbal approximation, a gesture/sign approximation, a symbol on a communication system, or an object-based symbol.

Graphic 3: “Different” Images

The word “different” is one of 36 single words identified by Project Core as [Universal Core](#). These words can be used across countless topics for a range of purposes, and are included in many robust AAC systems and apps. Assistiveware, Crick Software, Cough-Drop, Mind Express, PRC/Salttillo, Smartbox, Speak for Yourself, and Tobii Dynavox all provide vocabulary systems that incorporate the Universal Core vocabulary. Asking for “something else” is also visually represented with an icon for “different” on page 1 of most PODD systems (pragmatically organized dynamic displays), developed by Gayle Porter and adapted for alternate access by Linda Burkhart. More information and a professional development calendar for PODD can be found [here](#).

The “different” symbols displayed in Graphic 3 illustrate the variety of ways that this word may be represented visually in various AAC systems, using two different shapes. For each student, the team must consider whether the student with CVI can pay attention to the visual elements, or if they may need to rely more heavily on spoken/auditory, tactile/touch, or proprioception/movement (including signs/gestures). The two tactile options depicted in Graphic 3 add texture in addition to shape. Although the word “choose” is not one of the 36 Universal Core words, this symbol from [TSBVI](#) may be used for some of the same purposes. To find out more about Universal Core vocabulary displays and professional development opportunities, click [here](#). The sign used in Graphic 3 is a key word signing option, called [Makaton](#).

When the array of choices is too visually complex for students to look at, “different” can be systematically included when using auditory scanning with partner assistance. As the partner lists a set of choices, the partner always says “something different” as the final option. Consistently using this pattern will help build the student’s auditory memory while giving an opportunity to advocate for choices beyond what was initially offered. There are different ways to group auditory choices. The case study below describes a strategy using letters.

Case Study: Sidney Uses Auditory Partner Assisted Scanning with Letters to Communicate “Different.”

Sidney is a 25-year-old woman who has Phase II CVI. She uses the Accent 1000 voice output communication device with auditory 2 switch step-scanning. Although every effort is made to have her high tech device on and ready all day long, she still uses partner assisted scanning on a regular basis. Sometimes her switches are not working and sometimes she just doesn't have time to scan through the icons on a page of words or the letters on the keyboard page. After many years of waiting for partners to give her auditory choices, a plan slowly evolved. Now Sidney and her family have a consistent strategy in place that is working on efficiency, self-advocacy and self-determination. Table 6 shows how they use the letters A, B, C, D to represent choices, with “D” always representing “different.”

Table 6. How Sidney Says DIFFERENT

What I Do FORM (CONTEXT)	What It Means FUNCTION MESSAGE	What YOU should do (PARTNERS)	What you should SAY and MODEL (PARTNERS)
<p>Listens to and responds to choices. Using her voice to say “yeah,” she indicates which letter choice she wants: A, B, C or D when she hears it.</p> <p>If she is using her device to indicate choice, she activates switches which are positioned on her wheelchair headrest. She turns her head to activate the switches. Sometimes she quietly says “yeah” as she selects the first part of a longer sequence (self talk/affirmation).</p>	Confirmation signal of her choice from a list	<p>List 3 choices, saying... A is ____ B is ____ C is ____ D for “different choice” or “don’t know”</p> <p>Don’t ask her to look at choices that are far away, visually complex, unfamiliar, or when there is a lot of background noise.</p>	<p>Encourage her to look at her choices when items are within 12”, familiar and/or not visually complex.</p> <p>When she says “D” ask if she needs more information.</p> <p>Describe visually salient features to help her use her vision to see the difference(s) between her choices.</p>

TEACH STUDENTS TO ASK FOR HELP OR CLARIFICATION

Learning to ask for help provides students with opportunities for self-determination at a young age. Once we know that students have a way of asking for help, we can encourage them to make an attempt before asking for help. Understanding that visual novelty can impact a student's comfort level, knowing that they can ask for help can also reduce stress. Asking for clarification is a complex social (pragmatic) skill that needs to start when students are young. This is particularly important for students whose visual systems are not the same as their typically sighted peers. Asking for clarification is not the same as answering/asking a true/false question. Clarification statements are naturally offered to comfort young children (e.g., “You said you want some cake, but I don’t know which kind you want if you don’t tell me. I have chocolate and vanilla.”) Frequently students just need more information before making a choice. See examples in Table 7 below. Victor and Rachel have Phase I CVI. Sidney has Phase II CVI. See Table 7.

Table 7. Examples of How Students Ask for HELP

What I Do FORM (CONTEXT)	What It Means FUNCTION MESSAGE	What YOU should do (PARTNERS)	What you should SAY and MODEL (PARTNERS)
During shared reading, Victor says “mama” loudly	Request for help	Re-assure him that you are nearby. Quietly and gently touch his arm.	You can raise your hand when you need help. Helper connects it to activity: “Do you want help to turn the pages?”
During independent writing, Rachel is choosing topic to write about. Rachel puts her head down when listening to the choices. To say “yes,” Rachael usually picks her head up when she hears what she wants. Sometimes Rachael doesn’t pick up her head which is her way of communicating “I don’t know.”	Request for clarification Waiting for more information	Recognize that she did not accept the choices being offered after 3 repetitions.	If you can’t decide, you can tell me “I don’t know” and I’ll give you more information. MODEL saying “I don’t know” by touching the red button on her tray to activate the message.
During Predictable Chart Writing, Sidney repeatedly activates her switches without making a selection on her device. Her face starts to look tight and flushed.	Looking for help She can’t find the word she is looking for to add to the predictable chart	Ask her if she needs help finding a word. Offer to give a suggestion or show her how to find a word another student used.	Provide her with an example/idea, using the Word Finder tool (in her device) to show the location of a word choice.

For more information on Communication Partner Training, go to:

- Angelman Syndrome Foundation Communication Series Training Webinar, link [here](#). Maureen Nevers (2015) shares how our interactional style impacts the communication opportunities of our students.

- Tabi Jones-Wohleber (2018) 'Model as a MASTER PAL' training modules, link [here](#). Tabi says that when learning interactions are limited to questioning the student, then questioning primarily takes the form of testing. Our students may experience text anxiety over and over all day long.

SUMMARY

Communication is undeniably an integral component of literacy instruction. For students who have complex communication disorders with CVI, the use of robust AAC is a necessary element. Literacy activities contain multiple opportunities for communication which in general, support students in learning more formal AAC systems. For example, during shared reading, students need opportunities to make comments and ask questions. During writing and alphabet activities, students make choices of letters, words, symbols and pictures. During independent reading, students can choose their own books. The beauty of these types of communication opportunities within emergent literacy activities is that there are no right or wrong answers. Emergent literacy is all about exploration, experimentation and interaction – a perfect context for learning how to use AAC. While there are no student prerequisites for getting started with AAC, there is plenty of work for the adults to set the stage for AAC by addressing students' unique CVI issues, such as visual complexity in AAC devices and educational materials and sensory overload from task and/or environmental factors. Left unchecked, these factors can contribute to student stress/shutdown. Adults need to learn to recognize indicators of student stress, triggers and solutions for controlling stress and reducing the complexity (e.g. give visual breaks, use of AT to decrease student passivity, use of appropriate cues, use of familiar instructional routines, careful balance of vision demands during literacy activities). Students with CVI require individualized adaptations based on their specific CVI needs. Balancing complexity can be accomplished for some students by reducing the environmental complexity when they are involved in tasks that are visually challenging. The level of complexity of a visual task will vary depending on the student's degree/level of CVI. Adults need to be clear about the specific adaptations and may benefit from collaboratively creating a visually balanced schedule. In general, understanding and minimizing student stress will help facilitate student's attention/interest for using AAC. Adults also need to learn how to be effective communication partners. A collection of communication tools/strategies are needed throughout the day, varying from light tech to high tech, depending on student needs, specific tasks and environmental complexities. Supports and adaptations should be part of a team-based collaborative approach that empowers students and fosters self-determination. Working in collaboration with the TVI and SLP, robust communication systems that include voice output/feedback can be an integral element of ongoing learning, empowering our students to realize that they have something to say.

UPCOMING LIVE WEBINARS

PROFFESIONAL DEVELOPMENT

CEUs are provided by the AAC Institute and are available for live webinars at no additional fee (does not include sponsored webinars unless noted). A 60-minute webinar = 0.1 CEUs. A 90-minute webinar = 0.2 CEUs

Literacy Skills for Students who are Deafblind

By Jennifer Schroeder

Tuesday, February 11, 2020

3:30 pm – 5:00 pm (Central Standard Time)

This webinar will focus on showing educators different levels of literacy and ways to adapt those levels to a student with Deafblindness. This will include stages of reading as well as stages of writing, how to determine where your student is, and how to know when your student is ready to move on to the next stage.

During the presentation, the presenter will show videos and pictures of students who are Deafblind engaged in literacy activities ranging from pre-reading skills to grade level reading as well as stage 1 writing skills through grade level writing.

Create the Ultimate Classroom for Students with Autism and/or Intellectual Disabilities

By Mo Buti

Thursday, February 20, 2020

3:30 pm – 5:00 pm (Central Standard Time)

Do you teach or support a classroom of students with autism or intellectual disabilities and want to have the best program where students will progress making educational, social and behavioral gains? If yes, you have come to the right place! During this webinar, you will be guided through steps to take to create an awesome program, demonstrating strategies,

examples and links supporting all areas (school culture, classroom environment, academics, behavior, social, sensory, health and hygiene, transition and more). Attend this fast-paced webinar and leave with ideas to improve your program!

Access to Math

By Mark Coppin

March 5, 2020

3:30 pm – 5:00 pm (Central Standard Time)

While many students may struggle at times with math and math concepts; students with physical or sensory impairments struggle to even access math activities. Many teachers and support professionals struggle with finding ways for students to access the math curriculum. There are however, several apps and extensions that can make math more accessible to all students. This webinar will discuss apps and extensions for making math activities accessible. We will cover various calculator apps, electronic math paper apps, accessible math apps, math extensions and other ways to make math more accessible.

Why Didn't I Think of That? Creative AAC Tips and Tricks

By Maggie Judson and Jeanna Antrim

Thursday, March 19, 2020

3:30 pm – 5:00 pm (Central Daylight Time)

Have you hit a wall in coming up with creative AAC support and implementation ideas? Is

Pinterest letting you down? Can you not spend one more dollar at Teachers Pay Teachers? If you answered yes to any of these questions, then you need a webinar where you get an AAC idea a minute! We'll share quick and simple ideas around the areas of aided language input and AAC implementation. We'll cover a variety of simple, practical AAC ideas that will have you saying, "Well, that's a fun idea! Why didn't I think of that!?"

With two decades of combined experience working with students with complex communication needs who use AAC, we have come across plenty of situations that have required creative ideas and solutions. And we want to share all of those ideas with you! Expect a session filled with short, quick, easy to implement AAC tips and tricks. We'll share lots of ideas so that you can go back to work tomorrow morning with plenty of inspiration!

Supporting Emergent and Basic Math on the iPad

By Mark Coppin

Thursday, May 7, 2020

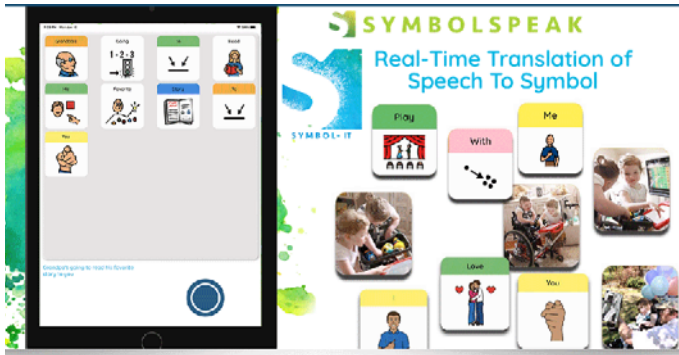

3:30 pm – 5:00 pm (Central Daylight Time)

Basic math skills are needed to make store purchases, determine necessary quantities, calculate distances and more. There are some basic math skills that every student can and should learn during their math education program. This webinar will cover a wide variety of apps that work on emergent math concepts such as numbers, counting, patterns, etc... through basic concepts such as addition, subtraction, multiplication, division, decimals and fractions. Participants in this webinar will discover solutions and apps to support their students as they continue down the path toward math literacy.

SymbolSpeak – Symbol-It, Real-Time Speech to Symbol Translation

- Picture symbols are color coded by their part of speech using to the Modified Fitzgerald color coding system
- Speak with symbols in real-time! Symbol-It provides a natural and fun way to translate your speech into picture symbols in real time. With Symbol-It in hand, any English speaker can communicate with a Symbol Speaker without having to learn to use a speech generating device or app!

[LEARN MORE](#)

key2enable – a-blinX, The Eye Blink Switch

SYMBOL-IT

Real-Time Speech to Symbol Translation

Symbol-It makes it easy for all English speakers to naturally speak to the Symbol Speaker in their language.

- Picture symbols from the leading companies in the industry
- Symbol customization
- A light and a dark color mode make the display more comfortable on the eyes.

Communicate with the blink of an eye.

Accessibility with the slightest movement.

Empower yourself in the blink of an eye.

a-blinX picks up the blinking of the eyes to extend the possibilities of interaction of people with severe motor disabilities.

COMMUNICATE

With it, it is possible to write and vocalize sentences in the TelepatiX app to communicate with the people around you.

INTERACT

To use any computer and browse the internet, write and even play using the blink of an eye, just connect a-blinX to Key-X – Multifunction Smart Keyboard.

Even without Key-X, it is possible to connect a-blinX directly to your computer and use specific software that works by scanning, like Windows Virtual Keyboard.

Hundreds of thousands of people with dyslexia, learning disabilities, visual impairments, physical disabilities, and other reading barriers have read millions of Bookshare books. It has empowered them to study for school, pursue careers, and read for fun. Why do so many people use Bookshare?

[LEARN MORE](#)

Bookshare – Read Your Way

READ YOUR WAY - EBOOKS FOR PEOPLE WITH READING BARRIERS

A Bookshare makes reading easier. People with dyslexia, blindness, cerebral palsy, and other reading barriers can customize their experience to suit their learning style and find virtually any book they need for school, work, or the joy of reading.

WHY USE BOOKSHARE?

SignGlasses – Improving Learning for Deaf Students

IMPROVING LEARNING IN THE CLASSROOM

SignGlasses patented technology enables students to receive live sign language interpreting and captioning service overlaid on top of the classroom environment through smart glasses and other mobile devices.

AN ENTIRE PLATFORM

SignGlasses offers you an entire software suite that works seamlessly with the glasses and other devices. Students can

re-watch every lecture with the interpreting or captioning overlaid, take their own timestamped notes, and bookmark important parts of the lecture.

STUDENT TOOLS

For the first time deaf students will be able to review lectures and classes after the fact. All classes using their system are recorded, and can be played back with sign language interpreting or captioning. With a single click Deaf students can bookmark parts of the lecture to review later.

Logitech – Adaptive Gaming Kit

CUSTOMIZABLE CONTROLS FOR XBOX ADAPTIVE CONTROLLER

The Adaptive Gaming Kit is a collection of high performance, durable buttons and triggers for the Xbox Adaptive Controller to unlock the possibilities of play. Logitech G worked with different accessibility organizations to develop

a comprehensive set of controls for ultimate configurability and flexibility

READY TO GAME

The Adaptive Gaming Kit unlocks the potential of your Xbox Adaptive Controller with a powerful set of tools. With 12 plug-and-play buttons and triggers, you can arrange and attach them as needed, using the included hook-and-loop gaming boards or set of ties to place them anywhere. This customizable, flexible solution is designed to fit a wide range of needs.

PLAY WITH POSSIBILITY

Easily configurable to suit your gaming needs, the Adaptive Gaming Kit includes a large assortment of button types and sizes to connect to your Xbox Adaptive Controller.

Obi – The First Dining Robot of its Kind

INDEPENDENT, INCLUSIVE DINING

Obi is the first of its kind, revolutionary dining device for individuals who lack upper extremity function.

With the momentary touch of a switch, Obi allows users to select between four compartments of food and to command when the food is captured and delivered to their mouth.

Obi increases independence, social interaction, and effective food capturing like never before!

INTENDED USERS

Obi accommodates a spectrum of people who have difficulty feeding themselves. Diners should possess the ability to safely, and successfully, operate Obi as well as the ability to chew and swallow without assistance.

Tellus I5 by Jabbla – We All Have A Voice

JABBLA

Communicating...making yourself heard...interacting...

For some people, communication is always going to be a challenge. Jabbla develops technology that assists people with communication challenges.

Jabbla products are known for their industry leading innovative technology, dependability, and quality craftsmanship.

Each one has multiple access methods and adaptable software, so they can be customized to each individual user. It is the individual user that is most important to Jabbla.

After all, their motto is: we all have a voice.

TELLUS I5

RELIABLE DESIGN

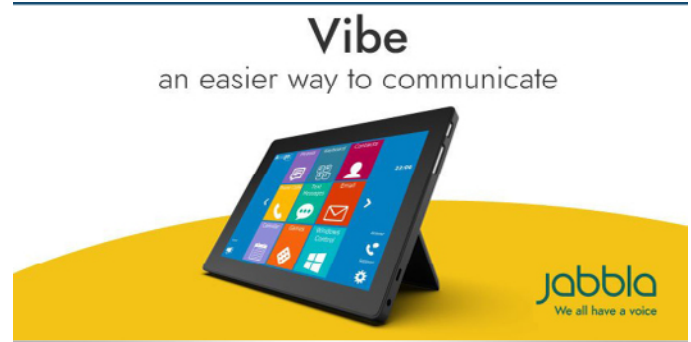

The Tellus i5 is their newest member of the Tellus family. A perfect match between reliable functionality and attractive design. The Tellus i5 has integrated eye tracking, resulting in an all-in-one solution for users who rely on their eyes to communicate, to work with a computer or to control the environment. Intel i5 processor and Windows 10 based, ready to run various software programs, but especially built to take the best out of Mind Express.

DESIGNED FOR LANGUAGE DEVELOPMENT

Top notch Mind Express applications such as Amego or Score turn this fully dedicated piece of technology into a highly functional AAC device. NoveltyThe integrated eye gaze results into a streamlined and sustainable device. Its sleek design is above all a great match for daily use. In addition you can wake the device up from sleep using the eye gaze. Due to this efficient use of battery, your autonomy increases.

[LEARN MORE](#)

Jabbla – Vibe – An Easier Way to Communicate

Vibe is the showpiece for active users. Its practical size makes this lightweight device a highly portable communication tool. With an integrated display at both the front and

back, we can speak of a unique device in the field of augmentative communication.

The front consists of the familiar 10" touchscreen, which makes it a very practical size. The internal second display on the back makes it easier to communicate in a natural way. Face-to-face communication with friends, family and carers becomes more natural. Also, powerful speakers have been integrated in the modern design, making it easy to understand what you are saying.

The Vibe has also won two gold awards: the European Product Design Award and Henry van de Velde Consumer Award.

Say what you want to say, in your own way, when and to whom you want to. This is the main purpose of PODD (Pragmatic Organized Dynamic Display). The program was developed by Australian speech therapist Gayle Porter. The vocabulary is organized according to a practical logic. This means you can quickly see whether you are telling a story, asking a question or making a joke. This compensates for the fact that you cannot use your surroundings, controlled movements, facial expressions or intonation.

CONTINUOUS LANGUAGE IMMERSION

The combination of logically organised symbol books and modeling (= friends, family and other carers who serve as models for learning and imitating) encourages a continuous language immersion. It all works through the combination of a paper version, the PODD books and a digital version that runs on Mind Express. To do this, you need to purchase a PODD license and you need PCS symbols.

COMBINE WIBE WITH SCORE

SCORE is a symbol based vocabulary that grows in line with the language development of the user, so you can start working with it from an early age. Thanks to a fixed core vocabulary and a fringe vocabulary that can be expanded, SCORE can be tailored to your needs. This symbol based vocabulary has been developed in collaboration with the University of Cologne and works in Mind Express 4.

University research has shown that we use approximately 200 core words daily. These make up 80 % of our spoken language. In SCORE, the core vocabulary is always visible and clear. The core words are conveniently organized around the customisable and expandable fringe vocabulary. The communication boards offer core words as a basis, as well as

a fringe vocabulary for expansion. The intention is that you keep building up your sentences from these core words. The fringe vocabulary evolves with the user. Although the board expands, the structure, color code and position are preserved. Everything you've learned is exactly where you expect it to be. This is extremely useful when modeling.

American Printing House for the Blind – Jupiter Portable Magnifier

JUPITER PORTABLE MAGNIFIER

The Jupiter Portable Magnifier is a sleek and compact device that helps users of all ages, who are visually impaired, see the world in high definition.

Jupiter is very easy to use. Whether it's in the classroom, workplace, or at home – this powerful magnifier allows you to continue those activities that bring joy to everyday life, while exploring new opportunities for lifelong education.

CAMERA MODES:

- Reading: excellent for reading a book, prescription bottle labels, completing a homework assignment, etc.
- Distance-view: magnifies up to 150x and is great for viewing a presentation, guest speaker, instructor, etc., at the front of a classroom/venue.
- Self-view: serves just like an HD mirror, and is perfect for applying make-up and other grooming activities.

FEATURES:

LCD Screen Size: 13"

Weight: Apprx. 8 lbs.

Three camera modes: Reading, Distance-view, Self-view

LED screen with adjustable light brightness.
35 color contrasting color modes to select according to your viewing preference and comfort.
Jupiter's durable and portable design allows you to take this easy-to-use magnifier on the go!

INCLUDES:

- Jupiter Portable Magnifier unit
- Power adapter
- Carrying pouch
- User Manual (large print)

12 volt NI-MH High Capacity Battery and Charger

Adaptive Switch Laboratories, Inc.

Price: \$295

Device: switch interface

Disability: physical

The ASL 515 is a 12 volt power source with charger that is used with 12 volt DC sensors without a power wheelchair. This high capacity battery will last up to two days before charging.

12/24 Volt AC Power Source Wall Plug

Adaptive Switch Laboratories, Inc.

Price: \$60

Device: switch interface

Disability: physical

The ASL 505 is for accessories or 12 or 24 volt sensors to plug into the wall for use with computers and ACC devices.

2 ECU Interface Cable with 2 Mono Plugs

Adaptive Switch Laboratories, Inc.

Price: \$180 - \$210

Device: environmental control

Disability: physical

ASL 802-2, 802-3 and 802-4 converts directional commands from the ECU port into separate mono plugs. It has two, three, or four output jacks from the left and right signal on the driver control that can be used for tilt, recline, computer/communication access or any device that requires a mono.

2-Switch

Compusult Limited

Price: \$129 - \$159

Device: keyboard emulator, mouse emulator, switch interface

Disability: cognitive, learning, physical

The 2-Switch is a USB-based device that can be preprogrammed with two keyboard inputs, two mouse actions or one keyboard input and one mouse action. The 2-Switch DIP is a user-configurable version of this product.

4 Choice Sequential Scanner for the Visually Impaired

Enabling Devices

Price: \$429.95

Device: dedicated communicator, speech output

Disability: cognitive, physical, speech

Our communicator provides illumination of your icons. It is also extremely flexible, four scan modes, choice of the number of fields to use and two mounting systems.

4-Level Communication Builder

Enabling Devices

Price: \$357.95

Device: dedicated communicator, speech output

Disability: cognitive, physical, speech

Communication Builder now with four levels. Comes with four easy to change frames (one, two, four, eight and 16 window options). Retains all your recordings on all four levels when switching between frames. Total record time is 300 seconds.

6dot Braille Label Maker

LoganTech

Price: \$749

Device: alternative keyboard, braille input, braille output

Disability: vision

The 6dot Braille Label Maker has everything you need to create high quality Braille labels in any language. Powerful but simple, the 6dot's ergonomic design makes it easy for children and adults of all ages to label practically anything at home, school, the office or on the go.

Attainment Company, Inc.

Price: \$39

Device: speech output

Disability: cognitive, learning, speech

Great sound quality and volume on this six message voice output device. Each message area is 1 1/2 x 1 5/8-inch. Device size 12 3/8 x 2 1/4 x 1/2 inch. Two AAA batteries included.

Attendant Alert

Adaptive Switch Laboratories, Inc.

Price: \$570

Device: environmental control

Disability: physical

The ASL 522 can be activated by a single switch which makes a high pitch beep until the switch is no longer activated. It can either be powered by a 9 volt battery or a power wheelchair. Switch not included.

Attendant Control Device

Adaptive Switch Laboratories, Inc.

Price: \$642

Device: environmental control

Disability: physical

The ASL 510 is a four directional digital attendant override with D9 pin for ASL

digital attendant port with reset/mode change capability. When in drive mode the reset switch when activated will perform as a passive stop switch. This device will work in conjunction with the digital drive control.

Balloon Switch

Technical Solutions Australia

Price: \$300

Device: switch, switch interface, environmental control

Disability: physical

An extremely sensitive squeeze switch, the Balloon Switch uses electronic circuitry to analyze tiny squeezing actions and produce a controlled switch signal. Intended for people with extremely weak movement.

Battery Device Adapter

AbleNet, Inc.

Price: \$15

Disability: cognitive, physical

Convert any battery operated toy or appliance into a switch activated device. Just place the copper disc between the battery contact and a battery in the device, connect a switch and your students are ready for action. How to guide included.

Battery Interrupter

Adaptation, Inc.

Price: \$14

Device: switch, environmental control

Disability: cognitive, learning, physical

The Battery Interrupter is used to modify battery-operated devices and toys for switch input. It has a standard 3.5 mm jack and comes in two sizes (for AA, AAA and C, D batteries).

Battery Interrupter

Adaptive Tech Solutions

Price: \$11.96 - \$13

Device: switch interface

Disability: physical

Insert our battery interrupter between AA / AAA, or C/D batteries to make most items switch enabled. Our disks have been coated to prevent corrosion so the adapters can be used for years.

Beam

Origin Instruments Corp.

Price: \$149

Device: switch, switch interface

Disability: physical

Beam is a wireless switch transmitter that can be paired with a HeadMouse or Swifty. When used with the HeadMouse, Beam allows adaptive switch users to make mouse clicks wirelessly. Swifty is a USB switch interface with wireless receiver. Up to three switches can be plugged into Beam.

Bee-Bot

Terrapin Software

Price: \$89.95 - \$89.95

Device: dedicated communicator

Disability: learning, physical

Bee-Bot is a colorful, sturdy little robot that follows commands entered via built-in command buttons and is a fun way for young children to learn coding. Press arrow keys for forward, back, left and right to create a program and then press GO to send Bee-Bot on its way. Lights and sounds confirm each command. Bee-Bot can execute up to 40 commands at a time.

BG Remote Attendant Control

Adaptive Switch Laboratories, Inc.

Price: \$1078 - \$1468

Device: switch interface

Disability: physical

The ASL 520BG allows a parent/aide to have control over one or more directions of a power wheelchair by a wireless control. It can be used as a training tool or as a full attendant control device and is compatible with all wheelchair electronics that allow for digital control.

BIG Blue-tooth Keyboard

RJ Cooper and Associates

Price: \$199 - \$199

Device: alternative keyboard, keyguard

Disability: cognitive, learning, physical, vision

Large/big/oversize key and print keyboard, colored-rows or yellow keys, for iPad. Bluetooth/wireless, can be used with iPad, Android, or any computer w/Bluetooth. Comes with stand to angle keyboard at 70 degrees for one-handed hunt-and-peckers. Keyboard available for tremors or accidental keypress prevention.

Big Buddy Button

AbleNet, Inc.

Price: \$65

Device: switch

Disability: cognitive, learning, physical
Made for persons with moderate-severe upper extremity and motor disabilities. Features a 4- $\frac{1}{2}$ inch target area and can be activated with just 5.3 ounces of force. Auditory and tactile feedback. Activate by pressing anywhere on the large, colorful surface. Available in red, yellow, green, and blue.

Big Red Switch

AbleNet, Inc.

Price: \$65

Device: switch

Disability: cognitive, learning, physical, vision

The Big Red switch offers a 5-inch activation surface with tactile and auditory feedback, but with a twist. Our iconic switch tops can be removed and replaced with the color of your choice: Red, Blue, Yellow or Green. It's all up to your own style, tastes or specific vision needs.

Big Talk Triple Play

Enabling Devices

Price: \$185.95

Device: dedicated communicator, speech output, speech trainer

Disability: cognitive, learning, physical, speech

Versatile communicator with single, sequential and random message capabilities. Push the round plate and your prerecorded words can be played back in single, sequential or random order. Device has four levels. Record up to 75 seconds per level for a total of 300 seconds.

BigKeys Keyboards

AbleNet, Inc.

Price: \$149 - \$149

Device: alternative keyboard, environmental control

Disability: cognitive, physical, vision

BigKeys keyboards for computer access provide users large, high-visibility keys that are easy to see. In addition, for users who lack fine motor movements, the larger keys provide a larger strike area that is easier to access compared to standard keyboards.

BIGmack Communicator

AbleNet, Inc.

Price: \$135

Device: switch, dedicated communicator, speech output

Disability: cognitive, learning, physical, speech

Record any message directly into this single message tool and press its large activation surface for crystal clear, single message playback. BIGmack communicator has a large, 5-inch activation surface. Students connect with teachers, classmates and the world around them.

BIGtrack 2

AbleNet, Inc.

Price: \$85 - \$85

Device: mouse emulator, switch, environmental control

Disability: cognitive, physical

BIGtrack 2 is USB mouse that includes a large 3-in / 7.62-cm trackball and oversized left and right click buttons. BIGtrack 2 can be used with one or two switches and includes an easy-to-use drag lock feature.

Bite Switch - G-Switch Series

GlassOuse Assistive Device

Price: \$49

Device: switch

Disability: cognitive, learning, physical

Bite Switch comes with a 3.5mm jack and it can be paired perfectly with GlassOuse v1.2 or any kind of adapted device offering 3.5mm jack input as a switch control. Covered with a non-carcinogenic material, silicone cover protects the switch module and it is easy to change and clean.

BJOY Hand

Westminster Technologies

Price: \$185 - \$185

Device: mouse emulator

Disability: physical

The BJOY Hand is an ultra sensitive joystick designed to be used with a slight movement of your finger. Thanks to the ergonomic design and very sensitive joystick, the device can be held in one hand for computer access with a very slight movement of the user's finger. This device works with the BJOY Software in order to modify mouse operations like pointer speed, orientation, button functions and many others. All settings are saved in the device so you can take it with you wherever you go.

BJOY Ring Kit

Westminster Technologies

Price: \$614 - \$854

Device: mouse emulator

Disability: physical

The BJOY Ring Kit offers the ability to use the joystick of your wheelchair as a mouse control for your computer. This kit includes the BJOY Ring, two switches for left and right click ability, and the appropriate adapter to connect the switch to the BJOY Ring. Wired and wireless versions of this product are available.

BJOY Stick

Westminster Technologies

Price: \$260 - \$465

Device: mouse emulator

Disability: physical

Make moving your mouse easier with your choice of BJOY Stick. Choose from two different designs for ease of use based on upper body strength and range of motion. The BJOY Software allows these devices to be tailored to the user's needs and capabilities. Use the BJOY Software in order to modify the mouse operations like pointer speed, orientation, button functions, etc. All settings are saved in the BJOY Device so you take them with you wherever you go. HIMS inc.

Blaze ET DAISY Multi-Player with OCR

HIMS Inc.

Price: \$795

Device: optical character recognition, speech output

Disability: cognitive, vision

Blaze EZ is a digital book player with WiFi and OCR camera for the visually impaired. It features stand-alone, single-button OCR capture and read aloud capabilities. Simple navigation gives quick access to music, radio, books and printed materials. Now supports output to HIMS Braille displays.

BlindShell Classic Accessible Mobile Phone

BlindShell

Price: \$349 - \$349

Device: alternative keyboard, voice recognition, large print, speech output

Disability: cognitive, hearing, learning, physical, vision

The BlindShell Classic is an accessible mobile phone for the visually impaired and seniors. This phone uses the very popular "Candy Bar" style and utilizes a full physical keypad. Featuring a screen reader, which reads out every single aspect of the phone, and smartphone features such as voice control, voice dialing, voice dictation, the BlindShell Classic mobile phone is the perfect solution for anyone who doesn't want to or isn't able to use a smartphone. Jam-packed full with over 30 apps and features, this is the perfect solution for anyone who wants to stay in touch with loved ones but struggles to use a modern smartphone.

Blue-Bot

Terrapin Software

Price: \$119.95

Device: dedicated communicator

Disability: cognitive, physical, speech

Blue-Bot is a Bee-Bot robot with a Bluetooth connection. Use the command keys to send Blue-Bot forward and back or turn left and right or command it from an Android or iOS tablet with the free downloadable apps.

Blue-Bot Tactile Reader

Terrapin Software

Price: \$129.95 - \$129.95

Device: alternative keyboard

Disability: vision

The Blue-Bot TacTile Reader is a unique, hands-on programming device to control Blue-Bot. Press the connect button to pair Blue-Bot with the TacTile Reader. Then place individual tiles, each representing a Blue-Bot command, sequentially on the TacTile Reader. Press the GO button and watch Blue-Bot move step-by-step through the program while the TacTile Reader lights up each command as Blue-Bot performs it. Want to change the program? Just switch the order of the tiles and press GO again. The TacTile Reader combines the excitement of Blue-Bot with a concrete, hands-on immersion in coding.

Blue2 Bluetooth Switch

AbleNet, Inc.

Price: \$195 - \$185

Device: mouse emulator, switch, environmental control

Disability: cognitive, physical, speech
Blue2 is the most widely used Bluetooth switch interface for tablets, mobile phones, and computers. Blue2 allows you to quickly and easily connect one or two accessibility switches to your device via a Bluetooth connection.

Bluetooth Small Switch

RJ Cooper and Associates

Price: \$99 - \$99

Device: switch, switch interface

Disability: physical

A 3" round, green, Bluetooth switch for iPad, Android, Mac, or Windows. Capable of controlling switch-friendly apps, Switch Control compatible apps, the Music app, Camera, and other standard apps.

Bluetooth Super-Switch

RJ Cooper and Associates

Price: \$184 - \$184

Device: switch, switch interface

Disability: physical

Large (5"), round switch with built-in interface. Works with all switch-friendly apps, and Switch Control compatible ones.

Box One 4 All

Tech4Freedom

Price: \$400 - \$500

Disability: vision

Small device fitted with sensors obtaining and analysing surroundings information and transmitting it to the user through his/her own smartphone.

Braille Label Maker Kit

Westminster Technologies

Price: \$775 - \$895

Device: braille output

Disability: vision

The Braille Label Maker is portable and easy to use anywhere. It comes with both a built in Braille keyboard and a QWERTY keyboard. This enables a non-Braillist to create Braille labels too. The powered embossing makes for high quality Braille labels that are easy to read. An automatic cutter provides effortlessly clean label cuts without the need for scissors.

Braille Sense Polaris

HIMS inc.

Price: \$5795

Device: braille input, braille output, printer

Disability: hearing, speech, vision

BrailleSense Polaris offers a new standard in blind-friendly applications with the latest in cutting edge technology. We've kept the traditional computer interface that has contributed to the popularity of other BrailleSense models. BrailleSense Polaris supports Google Apps, making it easy to utilize Google services like Drive, Docs, Sheets, and Slides as millions of other students do everyday.

Braille Sense U2

HIMS inc.

Price: \$4595

Device: braille input, braille output, speech output

Disability: hearing, vision

This 32-cell Braille notetaker has exclusive features including Excel viewer, Twitter, Quick Browser, YouTube and advanced word processor. Terminal clipboard allows for composing text on Braille Sense then sending completed block together to iPhone, iPad, Android or computer. LCD display allows parents and teachers to assist or deaf-blind to communicate.

Braille Sense U2 MINI

HIMS inc.

Price: \$2995

Device: braille input, braille output, speech output

Disability: vision

This 18-cell Braille Notetaker has advanced features for students and professionals.

Exclusive applications include Excel Viewer, Twitter, Quick Browser, YouTube, advanced word processor and Terminal Clipboard for composing text on Braille Sense and sending completed block of text all at once to iPhone, iPad, android device or computer.

Braille Sense U2 QWERTY

HIMS inc.

Price: \$4595

Device: alternative keyboard, braille output, speech output

Disability: vision

This 32-cell Braille Notetaker has a QWERTY keyboard and advanced features for students and professionals. Exclusive applications include Excel Viewer, Twitter, Quick Browser, YouTube, advanced word processor and Terminal Clipboard for composing text on Braille Sense then sending completed block all at once to iPhone, iPad, android device or computer.

BrailleCoach - Braille Teaching Device

Westminster Technologies

Price: \$1425 - \$1425

Device: speech output

Disability: vision

The BrailleCoach is a unique way to learn Braille - enabling the student to work independently between lessons. The device has three modes of Braille learning. Mode 1 is letters and dots, mode 2 is letters only and mode 3 is letters and words. Additional blank and pre-programmed sounds tags are available to extend learning.

BrailleNote Touch +

HumanWare

Price: \$4195 - \$5695

Device: braille input, braille output, speech output

Disability: vision

The ever-innovative BrailleNote Touch Plus combines the simplicity and accessibility of a note taker with the power and efficiency of a modern smartphone or tablet. Supported by the Android Oreo platform, it expands the entire experience and fulfills today's digital expectations. BrailleNote Touch Plus is hands down the most up-to-date, powerful and efficient braille note taker on the market! Available with a 32 cell braille display or an 18 cell braille display

Braillo 300 S2

American Thermoform Corporation

Price: \$23000

Device: braille output, printer, speech output

Disability: vision

Braillo 300 Braille embosser is a reliable and dependable embosser for true Braille production. At 300 CPS using continuous Braille paper, it offers exceptional Braille quality and consistency. Its combination of speed, durability, reliability are the reasons why it is used by most of the largest Braille production facilities.

Braillo 450 S2

American Thermoform Corporation

Price: \$35000

Device: braille output, printer

Disability: vision

The Braillo 450 S2 is an ideal embosser for those that need increased Braille output over the 300 S2, but not the speed and scalability of the 600 S2. It shares the same chassis as the 300 S2, but internal components are upgraded to ensure superior dot quality and consistency at these higher embossing speeds. Using continuous/fanfold Braille paper and embossing at 450 CPS (1,350 pages per hour), it will be a trusted, high speed asset to your business

Braillo 600 S2

American Thermoform Corporation

Price: \$45000

Device: braille output, large print, printer, speech output

Disability: vision

The Braillo 600 S2 Braille embosser is the faster, more robust counterpart to the Braillo 450 S2. Embossing at 600 CPS (1,800 pages per hour), it is the fastest continuous/fanfold embosser available, and it offers remarkable dot quality and dependability. Its combination of speed, reliability and quietness are the reasons why its predecessor, the Braillo 600, is used across the world by most of the largest Braille production facilities. Unique to the 600 S2 is that it is built upon a chassis that can be upgraded to a Braillo 600 SR as your Braille production needs expand.

Braillo 600 SR

American Thermoform Corporation

Price: \$79500

Device: braille output, large print, printer, speech output

Disability: vision

The Braillo 600 SR braille embosser meant for large volume Braille production. This Braille embosser is unique, as it uses paper rolls instead of continuous tractor feed paper. Using paper rolls helps to save money on paper expenses and also eliminates the need for a burster and its operator.

Braillo 650 SF

American Thermoform Corporation

Price: \$128000

Device: braille output, printer, speech output

Disability: vision

The Braillo 650 SF is the worlds only fully automated Braille book production system.

Send a file and pick up a finished, folded, covered and stapled book. The Braillo 650 SF makes on-demand Braille publishing possible.

Braillo 650 SW

American Thermoform Corporation

Price: \$88000

Device: braille output, printer, speech output

Disability: vision

Braillo 650 SW Braille Embosser is an advanced Braille embosser that employs a paper cutter for two or four page-per-sheet format, and a stacking unit engineered to handle large format production. This machine is ideal for creating both magazines and textbooks.

BrainPort Vision Pro

Wicab, Inc.

Price: \$10000

ing products and literacy aids. We have loaner programs for many products.

Keys-U-See Large Print Keyboards

AbleNet, Inc.

Price: \$35 - \$35

Device: alternative keyboard, large print

Disability: learning, physical, vision

Keys-U-See large print keyboards are replacement keyboards for anyone having a hard time seeing letters on their keyboard. Our large print keyboards come in a variety of colors including high-contrast yellow keys and black type, a scientifically proven combination proving easier to see with certain types of visual impairment.

Keys-U-See Wireless Keyboard and Mouse

AbleNet, Inc.

Price: \$59

Device: alternative keyboard, large print

Disability: learning, physical, vision

Keys-U-See is a large print, wireless black keyboard with yellow keys and includes a wireless optical mouse with scroll wheel. Keys-U-See has been designed specifically for those with conditions that cause visual impairment or low vision. With a bigger and bolder typeface, the keys are easier to see.

KinderBoard

AbleNet, Inc.

Price: \$55

Device: alternative keyboard, large print

Disability: cognitive, learning, physical, vision

KinderBoard has colored 1-inch keys, two USB ports on the side of the case and F-keys. Keyboard has keylocks for safety, and is great for younger children who may find it difficult to use a standard keyboard, with color-coded vowels, consonants, numbers and function keys. Helps reinforce basic rudiments.

LaZee Mouse Cursor

LaZee Tek

Price: \$499

Device: mouse emulator

Disability: physical

Alternative computer access designed to fit the user's user's abilities, also for tablets and smartphones. Self-contained lightweight unit can be head mounted or used elsewhere as the user desires. Reliable tilt-sensor technology provides extremely smooth and accurate cursor movements. No software required. Compatible with all click/dwell software.

LaZee Mouse Pro

LaZee Tek

Price: \$799

Device: mouse emulator

Disability: physical

This alternative computer access device is designed to fit the user's abilities, also

for tablets and smartphones. This self-contained lightweight "headmouse" uses reliable tilt-sensor technology producing extremely smooth and accurate cursor movements. Clicking performed via microphone utilizing sound detection. No software required. Compatible with all hardware and software.

LaZee Mouse Switch

LaZee Tek

Price: \$649

Device: mouse emulator

Disability: physical

Alternative computer access designed to fit the user's abilities, also for tablets and smartphones. Self-contained lightweight unit can be head mounted or used elsewhere as desired. Reliable tilt-sensor technology provides extremely smooth accurate cursor movements. Clicking performed via external switch(es). No software required. Compatible with all hardware and software.

LessonBoard

AbleNet, Inc.

Price: \$25

Device: alternative keyboard, large print

Disability: cognitive, learning, physical, vision

All thumbs? Hunt-and-peck? Need to improve your touch-typing speed? LessonBoard's a standard-size computer keyboard with a patented color-coded by finger layout to show correct finger placement, reduce chances of forming bad habits, and improve precision and speed. Correct keyboarding can help those with cognitive or physical differences that restrict learning.

Let's/Speak 24 Plus

Advanced Multimedia Devices, Inc.

Price: \$258 - \$353

Device: speech output

Disability: cognitive, hearing, learning, physical, speech

4 core messages, 10 levels of communications standard, 10 seconds per message standard. Overlay uses standard letter size paper, no need to cut overlays, just Print-N-Go

Let's/Speak 6 Plus

Advanced Multimedia Devices, Inc.

Price: \$238 - \$333

Disability: cognitive, hearing, learning, physical, speech

For people who have physical disabilities which affect all their limbs it can be difficult to control a computer. Nous: lets people control assistive software by blinking. It only uses your intentional blinks, so you can still blink comfortably.

NOVA Chat 10

Saltillo Corporation

Price: \$3895 - \$5395

Device: speech output

Disability: speech

NOVA Chat 10 has the largest display of any Chat communication device. It offers the Chat Software on an Android platform. Like all Chats, NOVA Chat 10 offers a durable yet sleek portable design, with features that include switch scanning, Social Chat and many other features.

NOVA Chat 5

Saltillo Corporation

Price: \$2995 - \$4495

Device: speech output

Disability: speech

NOVA Chat 5 is the smallest of the NOVA chats with a 5.0 inch display and weighing in at only 0.95 pounds. NOVA Chat 5 offers a durable yet sleek design, with features that include switch scanning, Social Chat, IVONA speech synthesizer and many other Chat features.

NOVA Chat 8

Saltillo Corporation

Price: \$3495 - \$4995

Device: dedicated communicator, speech output

Disability: speech

NOVA chat 8 is a communication system that offers the well-known Chat software on an Android platform. Like all "Chats," NOVA chat 8 offers a durable yet sleek portable design, with features that include an 8" display, switch scanning, IVONA speech synthesizer, and many other Chat features.

NuEyes e2

NuEyes Technologies

Price: \$2795

Device: optical character recognition, speech output

Disability: vision

Headworn Electronic Magnifier for Low Vision that is Evenly Balanced and Comfortable to Wear. Unlike other products that are simply a VR headset smartphone holder, the e2 was designed from the ground up to be evenly balanced on your face for maximum comfort. Because the e2 is a self-contained device, it eliminates the added weight and heat of a smartphone that is simply inside a VR holder. We are the only all-in-one device designed to help the visually impaired with maximum comfort

allowing it to be worn for extended periods of time.

ONYX Deskset HD

Freedom Scientific, Inc.

Price: \$2295 - \$2695

Device: large print

Disability: vision

The ONYX Deskset HD lets you read what you want, across the room or at your desk. The 3-in-1 flexible camera provides document reading, distance viewing, and self-viewing modes, with 125x magnification, 33 high-contrast color modes, and advanced features like Freeze Frame, Focus Lock, and a unique RF remote control.

ONYX Portable HD

Freedom Scientific, Inc.

Price: \$2495 - \$2495

Device: large print

Disability: vision

This compact, portable video magnifier is designed for busy students and professionals who have trouble reading printed text and distant objects. The 3-in-1 video magnifier connects to a monitor or PC and is foldable and lightweight so you can take it to work or school and anywhere in your home.

Orby Switch

Origin Instruments Corp.

Price: \$39.95

Device: switch

Disability: physical

Disability: physical

The ASL 209 projects a cone shaped, invisible beam of light to an adjustable maximum distance of 21 inches. Switch activation occurs when any object passes through or is detected in the target area.

PLEXTALK Pocket Accessible DAISY Player / Recorder

Freedom Scientific, Inc.

Price: \$275

Device: switch, speech output

Disability: vision

Read books, play music, keep memos, record in a wide range of formats. Small, slim and light - at just over 2 x 4 inches and under 4 ounces - the PLEXTALK Pocket keeps up with your needs. Records with DAISY 2.02 structure. Wireless Web radio and podcasting.

Pneumatic Switch

Adaptive Switch Laboratories, Inc.

Price: \$360

Device: switch

Disability: physical

The ASL 308 is a dual function switch that is also known as a Sip and Puff switch. A sip will activate one switch while a puff will activate the other switch.

Pneumatic Switch Kit

Adaptation, Inc.

Price: \$59

Device: switch

Disability: cognitive, physical

Use this switch to activate with only a puff of air. It can be used with all kinds of squeeze toys, bottles and balls. It allows you to create your own object-based switch.

PowerLink 4 Control Unit

AbleNet, Inc.

Price: \$255

Device: switch, environmental control

Disability: cognitive, learning, physical, speech

The PowerLink 4 allows switch users to control up to 2 electrical appliances with single switches. Features 6 unique modes of control that allows you to define exactly how, and for how long, appliances will be turned on.

PRiO

PRC-Salttillo

Price: \$3995

Device: alternative keyboard, keyboard emulator, switch, speech output, speech trainer

Disability: cognitive, learning, physical, speech

The PRiO® is an iPad-based communication tool featuring the popular LAMP Words for Life® language system. The PRiO is configured as a dedicated device to meet the functional specifications of the Medicare/Medicaid funding requirements, and is locked from computer access and all other non-communication functions.

PRiO-mini

PRC-Salttillo

Price: \$3995

Device: alternative keyboard, keyboard emulator, switch, speech output, speech trainer

Disability: cognitive, learning, physical, speech

The PRiO®-mini is an iPad-based communication tool featuring the iPad mini and the popular LAMP Words for Life® Vocabulary. The PRiO-mini is configured as a dedicated device to meet the functional specifications of the Medicare/Medicaid funding requirements.

Pro-Bot

Terrapin Software

Price: \$129.95 - \$129.95

Device: dedicated communicator

Disability: learning, physical

Pro-Bot offers an enticing, engaging and hands-on experience with Logo technology and robotic controls. Program Pro-Bot's route with the on-board arrow and number keys, then press go and watch Pro-Bot zip along following your instructions. Insert a pen and watch Pro-Bot draw as it moves. Sound, light, and touch sensors are built in, providing additional coding options.

Prodigy Desktop

HumanWare

Price: \$1595 - \$1795

Device: optical character recognition, large print, speech output

Disability: vision

Prodigy Desktop is an affordable electronic magnifier that incorporates both the Diamond Edge Text as well as speech access to people with low vision.

Proximity Switches

Advanced Multimedia Devices, Inc.

Price: \$325 - \$645

Device: switch

Disability: physical

Our sensor switches are designed to meet the needs of people with limited movement, strength or endurance. Activating a communicate device to express ones needs is achieved by using one of our sensor switches. They are capable of detect eye blinks, muscle twitches and the weakness of muscle movements.

ProxPAD

LoganTech

Price: \$1249

Device: dedicated communicator, speech output

Disability: cognitive, learning, physical, speech, vision

The ProxPAD is a large single location communication and learning aid that uses a RFID sound tag card. It is an excellent choice for persons with physical, visual or cognitive impairments who require tangible objects or other sight cue to initiate communication.

ProxTalker

LoganTech

Price: \$2995

Device: speech output

Disability: cognitive, learning, speech

The Logan ProxTalker is an augmentative communication device that offers the first moveable picture communication with a voice output. Encoded picture sound tags produce voice output when placed on any of the five device buttons and pressed. Tags can be customized with any image and sound.

Puff Switch - G-Switch Series

GlassOuse Assistive Device

Price: \$129

Device: switch

Disability: cognitive, learning, physical

Puff Switch is designed for GlassOuse V1.2, yet you can connect it to any kind of adapted device offering a mono 3.5mm jack plug in for external switch controls. Other than regular sip and puff systems, Puff Switch uses an electronic microphone, which allows you to do clicking actions via simple puffs.

Put-Em-Arounds

Enabling Devices

Price: \$99.95

Device: dedicated communicator, speech

output, speech trainer

Disability: cognitive, hearing, learning, physical, speech

These talking wall switches allow nonverbal children to initiate communication throughout their day. Record your message and have the children actively participate with their peers, family, teachers, etc. Put-Em-Arounds allow recording time for up to 20 seconds. Recording and rerecording requires only the push of a button.

Quad Button Digital Switch with D9 Connector

Adaptive Switch Laboratories, Inc.

Price: \$450

Device: switch interface

Disability: physical

The ASL 523 with D9 Connector is usually used in conjunction with a multi function tilt interface for direct access to tilt, recline, elevate and power legs.

Quha Zono

Grasp Assistive Technologies

Price: \$999

Device: mouse emulator

Disability: physical

Quha Zono is the only wireless grysoscopic mouse designed for special needs. The Quha Zono makes it possible to use a computer in a flexible way, when you cannot use an ordinary mouse. Your movements control the cursor on the screen, allowing you to select, click and drag items on your desktop. It is extremely light weight and since it is completely wireless there are endless ways to wear it. Quha Zono works straight out of the box allowing full access to your computer.

QuickTalker 12

AbleNet, Inc.

Price: \$185

Device: dedicated communicator, speech output

Disability: cognitive, learning, physical, speech

Easy-to-use, go-anywhere communicator. With QuickTalker 12, your students will be ready to start communicating in minutes. The variety of message locations and 12 minutes of total recording time, five available levels provide the flexibility you need to customize the learning outcomes for each student.

QuickTalker 23

AbleNet, Inc.

Price: \$205

Device: dedicated communicator, large print, speech output

Disability: cognitive, learning, physical, speech

Easy-to-use, go-anywhere communicator. With QuickTalker 23, your students will be ready to start communicating in minutes. The variety of message locations and 18 minutes of total recording time, five available levels provide the flexibility you need

to customize the learning outcomes for each student.

QuickTalker 7

AbleNet, Inc.

Price: \$165

Device: dedicated communicator, large print, speech output

Disability: cognitive, learning, physical, speech

Easy-to-use, go-anywhere communicator. With QuickTalker 7, your students will be ready to start communicating in minutes. The variety of message locations and six minutes of total recording time, five available levels provide the flexibility you need to customize the learning outcomes for each student.

Randomizer Gamer

Adaptation, Inc.

Price: \$169

Device: switch, speech output

Disability: cognitive, learning, physical, speech

The Randomizer records multiple messages and plays them back in random order. It has two independent levels for easy recording with 90 seconds per level. Modes of operation include single message, jumble (messages occur in random order, or eliminator (messages occur in random order but do not repeat once played).

Remote Emergency Stop Switch

Adaptive Switch Laboratories, Inc.

Price: \$735 - \$1185

Device: switch

Disability: physical

The ASL 504 allows a power wheelchair to be stopped remotely within a range of 20 feet. It will stop the wheelchair with the activation of one switch and will allow it to move again when it is turned off. This switch is helpful when intervention is needed during training.

Reveal 16

HumanWare

Price: \$2995 - \$3895

Device: large print

Disability: vision

Reveal 16 is an intuitive, easy to use and foldable digital magnifier that offers an unmatched crisp, and crystal-clear image quality thanks to its 10x optical zoom camera. Designed for seniors and elementary students, it enables to read documents, textbooks and newspapers as well as to write down notes. Reveal 16 also allows you to view distant objects like an artwork, your own backyard or even the whiteboard.

Reveal 16i

HumanWare

Price: \$3995 - \$4895

Device: optical character recognition,

large print, speech output

Disability: vision

Reveal 16i is a smart all-in-one device that allows you to video chat with friends, check your emails, watch videos on YouTube, download applications from Play Store and have all the printed material read to you thanks to its integrated Optical character recognition (OCR) and Text-to-speech (TTS) capabilities. You can also open your books and take digital notes before sharing them with others thanks to Reveal 16i. It has an integrated touchscreen allowing you to customize your experience. You can choose to use the touchscreen like you would with a tablet or use the buttons.

Revibe Connect

Revibe Technologies

Price: \$119.95 - \$119.95

Disability: cognitive, learning

Revibe reminds students to get back to work. Instead of an embarrassing tap on the shoulder from their teacher, they feel a gentle, automated vibration from Revibe on their wrist. This type of redirection empowers students to complete their work independently, improving their self-confidence.

RoboDesk - Robotic Mobile Device Mount

Prehensile Technologies

Price: \$2000 - \$3000

Device: switch interface, environmental control

Disability: physical

RoboDesk is a robotic wheelchair mount for mobile devices. It allows a user to independently deploy, position, and store mobile devices using accessible switches from a power wheelchair. RoboDesk mounts on the side rail of your wheelchair and can be powered from the chair or with an external battery.

RoboTable - Robotic Overbed Table

Prehensile Technologies

Price: \$2500 - \$3500

Device: switch interface, environmental control

Disability: physical

RoboTable is a robotic overbed table for beds, recliners, and wheelchairs. It allows a user to independently deploy, position, and store mobile devices using a remote or accessible switches from a bed or chair.

Robots4Autism

Westminster Technologies

Price: \$4950 - \$4950

Disability: cognitive, learning, speech

Robots4Autism is a solution to help students with autism learn and generalize the social, emotional, and behavioral skills. The development of these skills will help them

interact more effectively with other people and allow them to self-regulate.

Rock Adapted Joystick

AbleNet, Inc.

Price: \$725

Device: mouse emulator, environmental control

Disability: cognitive, physical, vision

The Rock Adapted Joystick features functionality of a traditional mouse in a joystick that requires minimal hand movement. Includes 3 interchangeable joystick handles - a straight stem, a T-bar, and large soft ball.

Romeo 60

HumanWare

Price: \$3495 - \$3495

Device: alternative keyboard, braille output, speech output

Disability: vision

ETC Romeo 60 is the most powerful and portable Braille single-side embosser ever made in the market. Romeo 60 prints 60 CPS. Wi-Fi, Bluetooth compatible, High Quality American Synthetic Speech, lighted keys & lighted control panel, braille translator included

RUBY Handheld Video Magnifier

Freedom Scientific, Inc.

Price: \$545

Device: large print

Disability: vision

Freedom Scientific's smallest handheld video magnifier yet, with powerful magnification from 2x to 14x and bright four-inch screen. Fold out the handle to magnify as with a magnifying glass, or fold the handle and lay the RUBY flat on a page. Runs on included rechargeable batteries or AAA alkaline batteries.

RUBY HD Handheld Video Magnifier

Freedom Scientific, Inc.

Price: \$645

Device: large print

Disability: vision

The RUBY HD brings you crystal-clear images and advanced features in a compact product with a 4.3-inch screen. The lightweight design is only 8 ounces. Features include 20 high-contrast color modes, Reading Lines and Masks, Freeze Frame, easy flip-out handle, and the ability to store and transfer images.

RUBY XL HD Handheld Video Magnifier

Freedom Scientific, Inc.

Price: \$895

Device: large print

Disability: vision

The RUBY XL HD has a 5-inch screen and a high-definition camera with the sharpest possible image from 2x to 14x. It has 20

high-contrast color modes, Reading Line/Masks, Freeze Frame, ability to store and transfer images, and a built-in reading stand that holds the screen at a comfortable angle.

SARA (Scanning And Reading Appliance)

Freedom Scientific, Inc.

Price: \$2395 - \$2395

Device: optical character recognition, braille output, large print, speech output
Disability: vision

Scans and reads in human sounding voices. Use with a display screen to magnify and customize background color schemes, type style, color, size and spacing. Save documents to or read from CD. Also plays audio elements of DAISY books and comes with a starter library of public domain books.

SARA CE - Camera Edition Scanning and Reading Appliance

Freedom Scientific, Inc.

Price: \$1895 - \$1895

Device: optical character recognition, speech output
Disability: vision

SARA CE is the next-generation self-contained scanning and reading appliance. Place a printed page under the camera, and the SARA CE instantly starts reading it to you with RealSpeak human-sounding speech. Add a 19- or 22-inch monitor to access the customizable low vision features.

Saucer Switch

Enabling Devices

Price: \$59.95

Device: switch, switch interface
Disability: learning, physical

This handy switch is specially designed for individuals who are unable to control or sustain the hand or wrist movements necessary to operate traditional plate switches. The Saucer Switch is activated with just a light touch.

Say-It Talking Button

RJ Cooper and Associates

Price: \$49 - \$69

Device: speech output
Disability: physical, speech

A simple 5" round, green, talking button, with 20 seconds of good quality recording time. 3 AAA batteries included.

SciPlus-2200 Scientific Calculator

Sight Enhancement Systems

Price: \$347

Device: alternative keyboard, large print
Disability: vision

Base model large button, big display scientific calculator designed specifically for users with low vision. Performs scientific, statistical and trigonometric calculations, and fractions. Performs a comprehensive

set of advanced mathematical and statistical functions.

SciPlus-2500 Scientific Graphing Calculator with Speech

Sight Enhancement Systems

Price: \$531

Device: alternative keyboard, large print, speech output
Disability: vision

Large button, big display scientific graphing calculator. Performs scientific, statistical and trigonometric calculations, and fractions. Evaluates functions, and mathematical expressions, plots equations.

Sequencer

Adaptation, Inc.

Price: \$169

Device: speech output
Disability: cognitive, learning, physical, speech

The Sequencer is a voice output communication aid that incorporates the use of sequential messaging. The Sequencer has two levels with 90 seconds per level. Levels are independent for easy recording. Can also be recorded like a single message device.

Shifu Orboot

PlayShifu

Price: \$49.99 - \$49.99

Orboot is a unique Augmented Reality Globe (AR) Globe. Makes learning about the world fun and interactive. Meant for ages 4 to 10. Packed with more than 400 wonders and 1000 facts. Enhanced with engaging voice-overs, stories, poems, and regional music. Covers six categories: wildlife, cultures, cuisines, monuments, inventions, maps.

Shifu Plugo Count

PlayShifu

Price: \$49.99 - \$49.99

Unravel mysteries with numbers and arithmetic. Solve math challenges through stories. 5 Games, 250+ levels in the app. Hands-on Math learning (+ - √ ó √Σ). Customize number ranges, formats & more according to child's grade.

Shifu Plugo Tunes

PlayShifu

Price: \$49.99 - \$49.99

Plugo Tunes: Music Learning Kit. Get friendly with musical notes, learn to play the piano, and build musical intelligence. Master the basic 8 notes. Learn to play more than 50 songs. Compose your own music. Easily transition to a keyboard.

Sip/Puff Breeze

Origin Instruments Corp.

Price: \$160

Device: switch, switch interface
Disability: physical

Connects directly to USB ports on computers, tablets and phones, speech generating devices and provides hardware emulation of mouse, keyboard, and joystick buttons; works with iPad using Apple adapter. The integrated pneumatic port connects directly to a range of available user interface options.

Sip/Puff Breeze with Gooseneck

Origin Instruments Corp.

Price: \$295

Device: switch, switch interface
Disability: physical

Connects directly to standard USB port on computers, tablets, phones, speech generating devices and provides hardware emulation of: mouse, keyboard, joystick buttons; works with iPad using Apple adapter. Breeze has a range of available user interface options, including Gooseneck. Flexible steel gooseneck and the ball-and-socket mount enable easy and secure mouthpiece positioning.

Sip/Puff Breeze with Headset

Origin Instruments Corp.

Price: \$295

Device: switch, switch interface
Disability: physical

Connects directly to standard USB port on computers, tablets, phones, speech generating devices and provides hardware emulation of: mouse, keyboard, joystick buttons; works with iPad using Apple adapter. Breeze connects directly to a range of available user interface options, including the Sip/Puff Headset.

Sip/Puff Gooseneck

Origin Instruments Corp.

Price: \$150

Device: switch
Disability: physical

The Sip/Puff Gooseneck features a universal clamp that attaches to table tops, beds and wheelchairs. The flexible steel gooseneck and the ball-and-socket mount enable easy and secure mouthpiece positioning. The filtered mouthpiece is replaceable and a thin, pliable connecting tube interfaces to Sip/Puff Switch or Breeze.

Sip/Puff Headset

Origin Instruments Corp.

Price: \$150

Device: switch
Disability: physical

This head referenced design maximizes compatibility with other assistive technologies, like HeadMouse that employ head movement. A replaceable mouth tube is held in position with an integral stainless steel forming wire. A thin, pliable connecting tube interfaces to Sip/Puff Switch or Breeze.

Sip/Puff Switch

Origin Instruments Corp.

Price: \$160

Device: switch
Disability: physical

The Sip/Puff Switch translates sips and puffs into independent switch closures. Batteries or external power are not required. Test buttons are integrated to assist in application testing. A twist-on pneumatic interface provides for direct connection to a range of available user interface options, including Headset and Gooseneck.

Sip/Puff Switch with Gooseneck

Origin Instruments Corp.

Price: \$295

Device: switch
Disability: physical

The Sip/Puff Switch translates sips and puffs into independent switch closures. Batteries or external power are not required. Test buttons are integrated to assist in application testing. A twist-on pneumatic interface provides for direct connection to a range of available user interface options, including the Gooseneck.

Sip/Puff Switch with Headset

Origin Instruments Corp.

Price: \$295

Device: switch
Disability: physical

The Sip/Puff Switch is a pneumatic switch. It can be used in any switch application. The headset mounts comfortably over the top of both ears and behind the head, making it less visible than typical headsets. It includes replacement mouth tubes, a switch box and 1/8-inch (3.5mm) connection cables.

Skoog for PC

Westminster Technologies

Price: \$179 - \$179

Disability: cognitive, learning, physical
Skoog is an accessible, tactile cube that allows children with differing abilities to join an orchestra or band and take part in a range of music-making activities. Skoog's adjustable sensitivity and easy integration with GarageBand make it perfect for any inclusive music activity. Used together, Skoog and iPad expand the potential of music therapy for young children with cerebral palsy, autism, Down's Syndrome and other developmental delays by offering hands-on opportunities to create and control sound expressively. Skoog's sensory-friendly tactile nature helps greatly in developing new skills and promoting physical interaction with technology.

Smart 3

Jabbla

Price: \$3995

Device: dedicated communicator, speech

output

Disability: cognitive, speech

Smart 3 is a handheld AAC device with a 4.3-inch touch screen and built-in high quality amplified speakers.

Smart Reader

Enhanced Vision

Price: \$1795 - \$1795

Device: optical character recognition, large print, speech output

Disability: vision

A Full Page OCR system that is deal for reading magazines, books, newspapers, recipes and any other printed material. Simply position your document and press a button, in a few seconds Smart Reader begins to read aloud. A user friendly Control Console offers tactile buttons. Attach headphones for privacy.

Smart Reader w/13.3 Monitor

Enhanced Vision

Price: \$2245 - \$2245

Device: optical character recognition, large print, speech output

Disability: vision

A Full Page OCR system and 13.3 battery operated monitor that is deal for reading magazines, books, newspapers, recipes and any other printed material. Read along and listen as Smart Reader reads your printed documents aloud. A user friendly Control Console offers tactile buttons. Attach headphones for privacy.

Smart/128 & Smart/128 Bundle

Advanced Multimedia Devices, Inc.

Price: \$985

Device: dedicated communicator, speech output

Disability: speech

Our Smart/128 device features 128 locations that allows for visual scene communication. Key features are the optional grids for different locations 128,32,16,8,4. The overlay designers software for developing your overlays. The interchangeable flash cards for endless levels and page sets. And durability at the highest standard.

Smart/Scan 32 Pro

Advanced Multimedia Devices, Inc.

Price: \$1795

Device: dedicated communicator, speech output

Disability: speech

The Smart/Scans are lightweight multilevel communication devices that combine direct select with the benefits of scanning. These devices have Real-Voice audio reproduction. Recording time controlled Time-Lock technology. We have added built-in LEDs surrounding the locations to completely illuminate the icon scanned for greater visual prompts.

Smart/Scan 8 Pro

Advanced Multimedia Devices, Inc.

Price: \$1595

Device: dedicated communicator, speech output

Disability: speech

Smart/Scan are lightweight multilevel communication devices that combine direct select with the benefits of scanning. Customize your scanning patters in addition to standard row column and step. We have added built in LEDs surrounding the locations to completely illuminate the icon scanned for greater visual prompts.

Smart/Speak

Advanced Multimedia Devices, Inc.

Price: \$785

Device: dedicated communicator, speech output

Disability: speech

The Smart/Speak is multilevel communication device designed to aid communication through direct selection. The Smart Series uses a flash card to store sound files and software called Overlay Designer Pro to create unlimited communication page sets. A programmer box is provided to download files directly to the devices flash card.

Smart/Talk

Advanced Multimedia Devices, Inc.

Price: \$685

Device: dedicated communicator, speech output

Disability: speech

The Smart/Talk is a multilevel communication device designed to aid communication through direct selection. The Smart Series uses a flash card to store sound files and software called Overlay Designer Pro to create unlimited communication page sets. A programmer box is provided to download files directly to the devices flash.

SmartNav AT

RJ Cooper and Associates

Price: \$399 - \$599

Device: mouse emulator

Disability: physical

A mouse alternative that allows people with good head control to completely control their computer. A tiny reflective dot is stuck to the forehead or nose. A transmitter/receiver sends infrared beams out and senses reflections from the dot.

Snow 4.3

Zoomax

Price: \$349 - \$349

Disability: vision

Snow 4.3 is a handheld video magnifier. Featuring a 4.3-inch screen, there are buttons to decrease and increase magnification up to 16X, and a button to change from natural color to high contrast mode. Snow 4.3 is extremely lightweight and small enough to fit in your pocket.

Specs Switch

AbleNet, Inc.

Price: \$65

Device: switch

Disability: cognitive, learning, physical
A 1 3/8-inch activation surface, this switch is small enough to be worn, but is most often used as a mounted switch. The Specs Switch includes three bases: a standard flange base, a space saving flush base and a strap for mounting around items. 24-inch strap included.

SpeechWatch

Gus Communication Devices Inc

Price: \$299.99 - \$299.99

Device: dedicated communicator, speech output

Disability: cognitive, hearing, learning, speech

The SpeechWatch is the world's first stand alone AAC/speech "device" that is worn on the wrist and is ideal for children and adults with autism, aphasia (stroke), Parkinson's, or any condition that affects their ability to communicate with friends and family.

Sphero Edu

Sphero

Price: \$49.99 - \$2500

Sphero Edu uses app-enabled robots to foster creativity through discovery and play, all while laying the foundation for computer science. Our program goes beyond code with collaborative STEAM activities, nurturing students' imaginations in ways no other education program can. Cross-platform apps are approachable for all skill levels, allowing us to reach as many minds as possible. Think outside the box and inspire your future. This is Sphero Edu.

StepPAD

Attainment Company, Inc.

Price: \$49

Device: speech output

Disability: cognitive, learning, speech, vision

A cognitive support tool that plays back instructions/steps of multistep tasks. Record up to 29 steps for up to eight different tasks. Ergonomically designed, light weight, portable.

String Switch

AbleNet, Inc.

Price: \$65

Device: switch

Disability: cognitive, learning, physical
Ideal for persons with limited finger and hand mobility and those with minimal strength. Takes only a slight pull to activate. Features a one-year warranty.

Sunu Band - Sonar Smart Watch

Westminster Technologies

Price: \$299 - \$299

Disability: vision

Sunu Band is a sonar smartband that improves navigation for the visually impaired. Sunu Band combines sonar or echolocation with gentle precise vibrations to inform the user about objects or obstacles within their environment. It augments awareness of the user's personal space, reduces accidents and ultimately improves confidence while providing a more fluid and enjoyable mobility.

SuperTalker FT

AbleNet, Inc.

Price: \$410

Device: switch, dedicated communicator, speech output

Disability: cognitive, learning, physical, speech

The NEW SuperTalker FT includes four interchangeable keyguards that can be used to create a communication device with one, two, four, or eight message locations. SuperTalker FT contains a Feather Touch activation surface that is sensitive enough to detect the lightest of touches. Eight recording levels give you the ability to record up to 64 unique messages.

Swell Form Graphics Machine

American Thermoform Corporation

Price: \$1390.99

Device: braille output, large print, printer

Disability: vision

The Swell Form Graphics Machine (often referred to as a fuser) is a simple, fast and low cost method of creating stunning tactile maps, diagrams, text and graphics. This machine has revolutionized the process of creating tactile images for the visually impaired - simply duplicate your drawing or map onto Swell Touch paper using your copy machine or by hand, and pass it through this heat machine. All the black areas swell. Extremely reliable and user friendly.

Swiftly

Origin Instruments Corp.

Price: \$79.95

Device: keyboard emulator, mouse emulator, switch interface

Disability: physical

Swiftly is a USB switch interface in an extremely compact, convenient design. Supporting up to 2-wired or 3-wireless switches through Beam, this pint-sized powerhouse can output mouse clicks, joystick buttons and keyboard functions without any special driver software. With an Apple adapter it can be used with an iPhone or iPad.

Switch Click USB

AbleNet, Inc.

Price: \$145

Device: switch interface

Disability: cognitive, learning, physical

A switch and interface in one. Simply plug it into any USB port on your computer and press to simulate a left mouse click, while

maintaining full access to your keyboard and mouse. Also features an external switch jack to accommodate any single switch.

Switch Director

Technical Solutions Australia

Price: \$150 - \$150

Device: switch, switch interface

Disability: physical

Use one switch to operate two-switch activated devices of almost any type. The Technical Solutions Switch Director will let you send your switch pulses to the device you want to control.

Switch It Up! Switch

Adaptive Tech Solutions

Price: \$28.5

Device: switch

Disability: cognitive, learning, physical, speech, vision

Our Switch It Up! switch controls any switch adapted device. Rubber feet assist in keeping the switch from sliding. Button surface area measures 2.75" inches across and requires approximately 3 ounces of pressure to activate. Available in yellow and red.

Switch Latch and Timer

AbleNet, Inc.

Price: \$135

Device: switch

Disability: cognitive, physical

Add the functionality of a Switch Latch and Timer (SLAT) with our Wireless SLAT Receiver. You'll have four modes of control: timed seconds, timed minutes, latch, and a direct mode that operates just like an original switch.

SwitchBoard

Adaptation, Inc.

Price: \$199

Device: switch

Disability: cognitive, learning, physical
The SwitchBoard has six built-in pressure switches with clear overlay pockets in which you can place pictures, symbols or add objects. Simply plug the cords into the external switch jacks of any communication aid. It has very light activation pressure and is made with durable high density plastic.

Switches (AbleNet)

AbleNet, Inc.

Price: \$45 - \$995

Device: switch, environmental control

Disability: cognitive, learning, physical, speech, vision

AbleNet manufactures and distributes a wide range of switches of various sizes. AbleNet offers a lifetime limited warranty on Big Red, Jelly Bean, Specs, String Switches and Jelly Beamers.

SwitchHopper

RJ Cooper and Associates

Price: \$99

Device: switch interface

Disability: cognitive, physical, speech
SwitchHopper provides a place to plug switches into a computer. It has three switch inputs and is shaped to look like a frog. With installation of the accompanying software, you can configure each button to be any mouse button event or keystroke you would like.

TabAccess

Zyrobotics

Price: \$149

Device: switch interface

Disability: physical

TabAccess is a bluetooth switch interface for tablets. TabAccess enables interaction with tablet apps through connection of multiple accessible devices such as sip/puff, button switches, grasp switches. TabAccess is Android and iOS compatible as well as compatible with iOS switch control events.

TableTapper

Adaptation, Inc.

Price: \$149 - \$149

Device: switch

Disability: physical

By tapping on nearly any surface the TableTapper is in contact with, a battery-operated device can be activated. The TableTapper effectively turns a tabletop into a tap-sensitive switch. It is suitable for individuals with limited movement or motor control.

Taction Pad

Adaptation, Inc.

Price: \$18 - \$65

Device: switch

Disability: cognitive, physical

Clear, adhesive-backed, touch sensitive patches that can turn nearly any surface or object into a switch. Simply peel the backing off and stick it to nearly any surface or object. Taction Pads will only work with Adaptation devices unless used with a LinkSwitch or Taction Pad Adaptor.

Taction Pad Adaptor

Adaptation, Inc.

Price: \$69 - \$69

Device: switch

Disability: cognitive, learning, physical, speech

The Taction Pad Adaptor allows you to use your Taction Pad with any device. Simply plug the Taction Pad into the adaptor and the adaptor into the device.

Talk 4 with Levels

Enabling Devices

Price: \$275.95

Device: dedicated communicator, speech output, speech trainer

Disability: cognitive, learning, physical, speech, vision

Talk 4 Communicator has 12 levels and single switch illuminated auto scanning. Device has light touch switch membrane, 300 seconds of record time, adjustable scan speed, volume control and on/off auditory cueing.

Talkable 2

Enabling Devices

Price: \$141.95

Device: dedicated communicator, speech output, speech trainer

Disability: cognitive, learning, physical, speech

Compact dual message communicator allows for simple communication. Record two messages, 10 seconds each. Comes with clear covers for your icons. Requires 4-AA Batteries.

Talkable 2 for the VI

Enabling Devices

Price: \$142.95

Device: dedicated communicator, speech output

Disability: hearing, learning, physical, speech, vision

Two different colored switches outlined in black to draw attention to switch and make it easier to locate target area. Features: 20 seconds recording time, records two messages, two output jacks. Size: 7.5 inches long x 2.75 inches high x 4.5 inches wide. Requires 4 AAA Batteries.

Talkable 3

Enabling Devices

Price: \$151.95

Device: dedicated communicator, speech output, speech trainer

Disability: cognitive, learning, physical, speech

Triple message communicator allows the user to record three 5-second messages. Three jacks allow you to simultaneously activate a toy or devices for immediate reinforcement. Comes with clear cover for your icons. Requires 4-AA batteries.

SOFTWARE

101 Animations

RJ Cooper and Associates

Price: \$0

Special Skill: cognitive redevelopment, early childhood, adapted keyboard/switch access

Disability: cognitive, physical

Skill Level: infant/toddler, preschool, elementary

Operating System: Windows, Mac

Each activation of the switch causes one of 101 large, loud animations to be played. All Windows and Mac OS's supported.

2 + 2

RJ Cooper and Associates

Price: \$59

Special Skill: early childhood

Disability: learning, physical, vision

Skill Level: elementary, secondary

Operating System: Windows, Mac

This is a talking math facts program. You can edit the facts list and use addition, subtraction, multiplication and division with numbers up to 999, even decimals. An easy-to-follow scan system is built in for single switch operation, if desired. 2+2 has drill mode, test mode and help function.

AAC Evaluation Genie

Tip Top Apps

Price: \$12.99

Special Skill: communication, scanning, single switch, multi switch, speech output, diagnostic

Disability: cognitive, learning, physical, speech

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Operating System: iOS (Apple)

AAC Evaluation Genie is an informal diagnostic tool that is intended to assist speech-language pathologists and others with identifying skill areas that relate specifically to the language representation methods commonly found on augmentative communication systems. Includes both English and Spanish language options for testing.

ABA Worksheets

ABA Materials Pty Ltd

Price: \$46

Special Skill: cognitive redevelopment, communication, early childhood, language development, large print

Disability: learning, speech

Skill Level: infant/toddler, preschool, elementary

Operating System: Windows

Designed originally for children with autism on an ABA program, this CD holds over 60 Powerpoint files with a total of over 2000 printable worksheets. Topics include: Attributes, Emotions, Sequences, Observation, Reading, Writing, Prepositions, Genders.

Abilipad

AppyTherapy

Price: \$19.99

Special Skill: basic living skills, cognitive

redevelopment, communication, early childhood, eye-hand coordination, language development, vocational, adapted keyboard/switch access, large print, scanning, single switch, multi switch, speech output, authoring system

Disability: cognitive, learning, physical, speech, vision

Skill Level: preschool, elementary, secondary, adult

Operating System: iOS (Apple)

Abilipad is a customizable keyboard and adaptive notepad, with word prediction and text-to-speech. You can design keyboards with audio, letters, words, sentences and images. Link keyboards for unlimited applications: word and picture banks, sentence building, spelling, storytelling, language games and communication boards. Languages: English, Spanish, French and German.

AbleNet Equals Math Program

AbleNet, Inc.

Price: \$2395

Special Skill: basic living skills, early childhood, IEP/IPP

Disability: cognitive, learning, physical

Skill Level: preschool, elementary, secondary

Operating System: Windows, Mac, iOS (Apple), Android, Chrome

Equals Math Program is a Pre K-12 curriculum that provides mathematics instruction for educators who work with students in special education or in alternative education programs. It encompasses pre-readiness math skills, fundamental math skills and higher order math skills. Lessons provide three levels of instruction: mild, moderate and severe.

Access Algebra

Attainment Company, Inc.

Price: \$129 - \$399

Special Skill:

Disability:

Skill Level: secondary

Operating System:

Access Algebra is a research-based math curriculum for high school students who have moderate-to-severe developmental disabilities, including those with an intellectual disability or autism. The curriculum gives students access to content their high school peers are learning, but with the adaptations and support they may need to succeed. The curriculum accommodates students who have unique needs, including those who are nonverbal and those whose math skills are at an emergent numeracy level.

Access Language Arts iPad app

Attainment Company, Inc.

Price: \$39.99

Special Skill: cognitive redevelopment, communication, language development, adapted keyboard/switch access, large print, scanning, single switch, multi switch,

speech output

Disability: cognitive, learning, physical

Skill Level: elementary, secondary, adult

Operating System:

Adapted stories: Neighbors, Sadako and a Thousand Paper Cranes, The Diary of Anne Frank, and We Beat the Streets. Five-step sequence: Preview, vocabulary instruction, read the adapted story, comprehension questions, sequencing activity. Research has shown to be highly effective in teaching language arts skills aligned to standards.

Access Language Arts software

Attainment Company, Inc.

Price: \$99

Special Skill: cognitive redevelopment, communication, language development, adapted keyboard/switch access, large print, scanning, single switch, multi switch, speech output

Disability: cognitive, learning, physical

Skill Level: elementary, secondary, adult

Operating System: Windows, Mac

Adapted stories: Neighbors, Sadako and a Thousand Paper Cranes, The Diary of Anne Frank, and We Beat the Streets. Five-step sequence: Preview, vocabulary instruction, read the adapted story, comprehension questions, sequencing activity. Research has shown to be highly effective in teaching language arts skills aligned to standards.

Access Language Arts: WRITE Software

Attainment Company, Inc.

Price: \$99 - \$990

Special Skill: language development

Disability: learning, physical

Skill Level: secondary

Operating System:

A researched and standards-based approach for secondary students practicing reading and writing skills. Prompts students to write grade-aligned opinion paragraphs for nonfiction and fiction and improves reading comprehension and vocabulary development. Can be used as a complement to Teaching to Standards: English Language Arts or a stand-alone curriculum.

Accessible Literacy Learning (ALL) Reading Program Software

Tobii Dynavox

Price: \$79.99

Special Skill: communication, early childhood, language development, scanning, single switch, multi switch

Disability: cognitive, learning, physical, speech

Skill Level: elementary, secondary

Operating System: Windows

The ALL Reading Program Software is designed specifically to teach basic reading skills to students who are non-verbal and

is accessible through touch/eyegaze/scanning. It enables students to bypass oral responses at all stages of instruction, allowing even the most challenged students to learn to read. Free trial available.

Accessibyte Arcade

Accessibyte

Price: \$150 - \$150

Special Skill: basic living skills, cognitive redevelopment, early childhood, language development, vocational, adapted keyboard/switch access, large print, speech output

Disability: cognitive, hearing, learning, physical, vision

Skill Level: preschool, elementary, secondary, adult

Operating System: Windows, Mac, iOS (Apple), Android, Chrome, Other
Accessibyte Arcade is a collection of fun, funky & fully accessible games for students with disabilities. Log in to a highly visual and entirely audible gaming experience from home or school. Graduate challenge for players of all skill levels, or remove the challenge and focus on fun!

Activity Trainer - US Version

Accelerations Educational Software

Price: \$99 - \$499

Special Skill: basic living skills, communication, early childhood, eye-hand coordination, language development, vocational

Disability: cognitive, learning

Skill Level: preschool, elementary

Operating System: Windows

The Activity Trainer (AT) is the first software designed to make video modeling (VM) practical. VM increases acquisition rates of skills. The AT has a library of over 300 activities and you can create your own. The AT adds to VM task analysis, sequences, organization by student, data collection, and video to image and image to text transitions. These features make the Activity Trainer a powerful addition to your toolbox to improve outcomes of your students.

Advanced Comprehension Therapy

Tactus Therapy Solutions

Price: \$24.99 - \$24.99

Special Skill: cognitive redevelopment, communication

Disability: cognitive, learning, speech

Skill Level: elementary, secondary, adult

Operating System: iOS (Apple), Android

Challenge your understanding with listening and reading exercises for sentences - perfect for mild or moderate aphasia.

Advanced Language Therapy

Tactus Therapy Solutions

Price: \$74.99 - \$74.99

Special Skill: cognitive redevelopment, communication

Disability: cognitive, learning, speech

Skill Level: elementary, secondary, adult

Operating System: iOS (Apple), Android

Take aphasia therapy to the sentence level & beyond with 4 apps that strengthen listening, talking, reading, & writing. Free trial available.

Advanced Naming Therapy

Tactus Therapy Solutions

Price: \$24.99 - \$24.99

Special Skill: cognitive redevelopment, communication

Disability: cognitive, learning, speech

Operating System: iOS (Apple), Android
Express yourself better with challenging word-finding exercises for aphasia and cognitive-communication problems. Free trial available.

Advanced Reading Therapy

Tactus Therapy Solutions

Price: \$24.99 - \$24.99

Special Skill: cognitive redevelopment, communication, language development

Disability: cognitive, learning, speech

Skill Level: elementary, secondary, adult
Operating System: iOS (Apple), Android
Enjoy reading again with paragraph-level passages to suit all abilities and built-in tools to help you understand text better.

Advanced Writing Therapy

Tactus Therapy Solutions

Price: \$24.99 - \$24.99

Special Skill: cognitive redevelopment, communication

Disability: cognitive, learning, speech

Skill Level: elementary, secondary, adult
Operating System: iOS (Apple), Android
Strengthen digital communication skills with functional typing, spelling, and composition exercises for adults. Free trial available.

Affect Recognition Tool

Nurogames GmbH

Price: \$0 - \$12

Special Skill: basic living skills, cognitive redevelopment, communication, early childhood, eye-hand coordination, language development, vocational, scanning, telecommunications, voice recognition, diagnostic

Disability: cognitive, learning, physical, speech

Skill Level: elementary, secondary, adult
Operating System: Windows

The Affect Recognition Software serves as a basis of the recognition of the learners' affect states. Its goal is to gather behavioural cues of the learner from the Platform Agents (PAs) - devices and apply innovative machine learning techniques in order to interpret them into comprehensive affective cues that tell the story of the learner's uptake of the learning objective(s).

Alexicom AAC

Alexicom Tech

Price: \$0

Special Skill: communication, language development, adapted keyboard/switch

access, scanning, single switch, multi switch, speech output

Disability: speech

Skill Level: preschool, elementary, secondary, adult

Operating System: iOS (Apple), Android

Price: \$4 - \$50

Special Skill:

Disability:

Skill Level:

Operating System:

The Viscardi Center's Digital Accessibility suite of services, Document Accessibility Remediation and Closed Captioning and Audio Description ensures existing, or newly created, electronic documents and video files are fully accessible to people with visual and physical disabilities, and aging individuals, using assistive technologies and screen reading software.

Dino-DOT

Academic Software, Inc.

Price: \$20

Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, adapted keyboard/switch access, scanning, single switch

Disability: cognitive, learning, physical

Skill Level: infant/toddler, preschool, elementary

Operating System: Windows

Connect the dots and colorful animated dinosaurs appear before your eyes. Number concepts, counting, sequencing skills and special perception are involved in play. Games can be selected using patterns of three, six, nine or 12 dots. Mode of play, difficulty level, auditory feedback and scan speed can be controlled manually.

Dino-FIND

Academic Software, Inc.

Price: \$20

Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, adapted keyboard/switch access, scanning, single switch

Disability: cognitive, learning, physical

Skill Level: infant/toddler, preschool,

elementary

Operating System: Windows

Dino-Find is a game of concentration stimulating memory and pattern recognition and providing scanning practice. Dinosaurs are selected randomly. One to six matching pairs can be displayed. Switch users make selections using row/column or linear scanning. Mode of play, difficulty level, auditory feedback and scan rate can be controlled manually.

Dino-GAMES

Academic Software, Inc.

Price: \$60

Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, adapted keyboard/switch access, scanning, single switch

Disability: cognitive, physical

Skill Level: infant/toddler, preschool, elementary

Operating System: Windows

All 4 early-childhood educational games: DinoDOT (spatial-perception, counting & sequencing skills); DinoFIND and DinoLIKE (memory and pattern-recognition); and DinoMAZE (cause & effect and directionality learning). Adjust difficulty level and other settings for each game independently. DinoGAMES work with keyboard, mouse, or external single-switch and provide early scanning practice opportunities.

Dino-LIKE

Academic Software, Inc.

Price: \$20

Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, adapted keyboard/switch access, scanning, single switch

Disability: cognitive, learning, physical

Skill Level: infant/toddler, preschool, elementary

Operating System: Windows

Single switch users select dinosaurs identical to a target dinosaur. The discrimination level can be set manually, choosing a match and two distracters, a match and one distracter, or the match alone. Color, shape and orientation of dinosaurs are used to enhance pattern matching skills. Can be controlled manually.

Dino-MAZE

Academic Software, Inc.

Price: \$20

Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, adapted keyboard/switch access, scanning, single switch

Disability: cognitive, learning, physical

Skill Level: infant/toddler, preschool, elementary

Operating System: Windows

Colorful, motivating exercises where dinosaur characters move through mazes to reach goals with reinforcement through music and animation. Single switch users choose between cause and effect activities

BACK TO
CONTENTS

or games involving decisions about which directions the animated characters should go to get from start to finish. Can be controlled manually.

Discrete Trial Trainer - US Version

Accelerations Educational Software
Price: \$99 - \$499

Special Skill: basic living skills, communication, early childhood, eye-hand coordination, language development, vocational, single switch, multi switch
Disability: cognitive, learning
Skill Level: preschool, elementary
Operating System: Windows
The Discrete Trial Trainer is an automated teaching tool for independent learning by individuals developmentally 2 to 9 years old. The Discrete Trial Trainer is a robust and affordable virtual teaching assistant.

DocsPlus

Crick Software, Inc.
Price: \$495 - \$4500

Special Skill: basic living skills, communication, language development, vocational, adapted keyboard/switch access, optical character recognition, scanning, single switch, multi switch, speech output, authoring system

Special Skill: communication, language development, optical character recognition, scanning, speech output, voice recognition

Disability: cognitive, learning, physical, speech, vision

Skill Level: elementary, secondary, adult

Operating System: Windows, Mac, iOS (Apple), Android, Chrome

Our Read & Write family of literacy

software makes the web, documents and files more accessible - any time, any place, and on any platform/device. It's great for people with dyslexia and other learning difficulties, English Language Learners, or anyone who needs a little extra help with their studies. The easy-to-use, intuitive toolbar is available on PCs, Macs, tablets and Chromebooks.

ReaderQ

Quillssoft Ltd.

Price: \$0

Special Skill: basic living skills, communication, language development

Disability: cognitive, learning

Skill Level: elementary, secondary, adult

Operating System: Chrome

Display web pages without distractions. Adjust text display for optimal reading.

Read the text to get a general understanding. Go to one or a few paragraphs of particular interest. Actively re-read that text. Select key words/phrases as cues for later paraphrasing making use of visual feedback to be selective (these are copied for you in a list which you can shuffle). Review your selections and understand how they connect with one another. Copy and paste selections into your favorite word processor where paraphrasing becomes 'connect the dots' and plagiarism is reduced

Reading Comprehension at the Paragraph Level

LocuTour Multimedia

Price: \$3.99 - \$3.99

Special Skill: language development

Disability: cognitive

Skill Level: elementary, secondary

Operating System: iOS (Apple)

This app has 37 stories that contain facts about history, nature and human interest stories. The student is asked to determine the main idea of the story, answer some questions that rely on facts in the story and make an inference that is supported by the story.

Reading Comprehension Booster

Merit Software

The Berenstain Bears Get in a Fight

Wanderful Inc.

Price: \$3.33 - \$4.99**Special Skill:** basic living skills, communication, early childhood, language development**Disability:** learning, speech**Skill Level:** infant/toddler, preschool,

elementary, secondary

Operating System: Windows, Mac, Android, Chrome

Read and play along with Brother and Sister Bear as a little morning grumpiness turns into an all-day fight - arguing and fighting. Do they even remember why they are fighting? Can anything make them stop? For children of all ages, this story teaches lessons on avoiding arguments and disagreements.

The Berenstain Bears In The Dark - interactive storybook

Wonderful Inc.

Price: \$3.33 - \$4.99

Special Skill: basic living skills, communication, early childhood, language development

Disability: learning, speech

Skill Level: infant/toddler, preschool, elementary, secondary

Operating System: Windows, Mac, iOS (Apple), Android, Chrome

This is an imaginative interactive reading experience with fully animated content featuring the popular Berenstain Bears. This story springs to life on every page. Read and play along as a spooky story keeps the entire Bear family up all night long but learn not to be afraid in the dark.

The Bully Book

Do2Learn

Price: \$0

Special Skill: basic living skills, cognitive redevelopment, communication, early childhood

Disability:

Skill Level: preschool, elementary

Operating System: Windows, Mac, iOS (Apple), Android, Chrome

Users are prompted to select one of three characters, Ally, Pearl or Jeremy. Each character narrates an account of a bullying incident in which Pearl, who is autistic, is upset by Ally's cruelty, and Jeremy comforts her. Watercolor illustrations accompany each narrative, also providing alternate perspectives on the event. The story lines are each delivered as printable pages. Free at do2learn.com.

The Click to Read Bundle

Marblesoft-Simtech

Price: \$169

Special Skill:

Disability:

Skill Level:

Operating System:

Marblesoft and AIMEE Solutions combined to produce a new series of early literacy programs for children with special needs. Disability: learning, speech

Skill Level: infant/toddler, preschool, elementary, secondary

Operating System: Windows, Mac, iOS (Apple), Android, Chrome

This is an imaginative and interactive reading experience with fully animated content loved by children and parents alike. A special favorite of Autistic children. Every page of this classic Aesop's fable comes to life. Read and play along as the Tortoise proves that slow and steady wins the race.

The TV Teacher Handwriting Programs

The TV Teacher, LLC

Price: \$25 - \$175

Special Skill: communication, early childhood, eye-hand coordination, language development

Disability: cognitive, hearing, learning

Skill Level: preschool, elementary

Operating System: Windows, Mac, iOS (Apple), Android, Chrome, Other

The TV Teacher's award-winning handwriting program uses visual demonstrations of writing letters, numbers, and shapes using rhythmic chants and repetition. Using DVDs, flash drives, or online, this multi-sensory approach makes breakthroughs for children with special needs. Additional skits and vocabulary words have kids running to write with Miss Marnie!

The vOICE for Android: Seeing with Sound

Peter Meijer

Price: \$0

Special Skill: basic living skills, scanning

Disability: vision

Skill Level: elementary, secondary, adult

Operating System: Android

The vOICE for Android translates live camera views into sounds, thereby targeting sensory substitution applications and synthetic vision for the blind. Includes real-time talking OCR, talking color identifier, talking compass and GPS based talking locator.

The vOICE Learning Edition: Seeing with Your Ears

Peter Meijer

Price: \$0

Special Skill: basic living skills, optical character recognition, scanning

Disability: vision

Skill Level: elementary, secondary, adult

Operating System: Windows

The vOICE Learning Edition software translates images from a PC camera (webcam) into sounds that you hear via your stereo headphones, thus targeting synthetic vision for the totally blind. This product is free.

The Writing Machine

Tip Top Apps

Price: \$0.99

Special Skill: cognitive redevelopment, communication, early childhood, eye-hand coordination, language development, scanning, single switch, multi switch

Disability: cognitive, learning, physical, speech

Skill Level: preschool, elementary

Operating System: iOS (Apple)

The Writing Machine presents early language and literacy concepts that introduce how one picture and one word go together. From this foundation, your child/student will begin to understand additional pre-literacy concepts including how to read text from left to right and to tell words from letters. Direct select and scanning access options are available.

TheraSimplicity

TheraSimplicity Inc.

Price: \$49 - \$49

Special Skill: basic living skills, cognitive redevelopment, communication, early childhood, language development, vocational, instructional management

Disability: cognitive, learning, speech

Skill Level: preschool, elementary, secondary, adult

Operating System: Windows, Mac, Android

TheraSimplicity: online, anytime, anywhere access, create and customize your materials. A virtual portfolio of high-quality, user-friendly therapy and educational materials that you can customize and use anytime, anywhere. All you need is an Internet connection.

ThoughtQ

Quillsoft Ltd.

Price: \$14.99 - \$14.99

Special Skill: basic living skills, communication, language development

Disability: cognitive, learning

Skill Level: elementary, secondary, adult

Operating System: Chrome

ThoughtQ for Chrome is a unique product that helps a student think outside of their own language box. Starting with an initial topic word or phrase, it uses its own worldwide knowledge to suggest a list of words/phrases that others have used when writing about that area. These suggestions are then linked to an embedded Google Custom Search to find relevant and interesting web pages with less effort while helping the student gain greater knowledge. All students can benefit.

Train Talk

LocuTour Multimedia

Price: \$4.99

Special Skill: basic living skills, communication, language development

Disability: cognitive, speech

Skill Level: preschool, elementary

Operating System: iOS (Apple)

Train Talk is for children who love to talk about trains. This app helps direct that conversation to learn to ask and answer WH questions. There are 128 pictures with question prompts and sample answers to encourage turn taking, spontaneous speech, conversational skills and auditory comprehension.

Train Time

LocuTour Multimedia

Price: \$9

Special Skill: cognitive redevelopment, communication, early childhood, language development, adapted keyboard/switch access, scanning, single switch

Disability: cognitive, hearing, learning, speech

Skill Level: preschool, elementary, secondary, adult

Operating System: Windows, Mac

Consists of language, attention and memory games designed specifically for children with autism. The language games teach vocabulary, syllable segmentation, sound blending, reading and spelling. The attention games teach matching, same-to-same and figure-ground discrimination. Adults with stroke/ traumatic brain injury can use the CD to recover language and memory skills.

Turn Taking

Judy Lynn Software, Inc.

Price: \$49

Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, single switch, multi switch

Disability: cognitive, learning, physical

Skill Level: infant/toddler, preschool, elementary

Operating System: Windows

The program is designed to teach the concept of waiting your turn. When a student's prompt appears, the student presses their switch, keyboard key, or touch window to reveal a section of a picture. Once the entire picture is displayed, a video clip reward related to the picture is played.

Turn-Talking

RJ Cooper and Associates

Price: \$1.99 - \$59

Special Skill: communication, language development

Disability: cognitive, physical, speech

Skill Level: preschool, elementary, secondary

Operating System: Windows, Mac

This software takes the user on a guided tour of taking turns in a conversation. A supervisor writes a script and has a person, close in age to the user, record the user's phrases. Turn-Talking then conducts that conversation.

Typ-O HD - Writing is for Everybody!

THERAPY BOX LIMITED

Price: \$11.99

Special Skill: basic living skills, communication, language development, vocational

Disability: learning, speech, vision

Skill Level: preschool, elementary, secondary, adult

Operating System: iOS (Apple)

Typ-O HD is an easy to use dyslexia app that helps you write without spelling errors. Typ-O HD uses a powerful word prediction engine and a sophisticated spelling error model to help you write, even if your spelling isn't perfect. The integrated synthetic voice let you hear the word prediction suggestions before selecting and check your text before emailing or pasting it into other applications. The app is designed for children or adults with dyslexia.

Type-A-Word

OT-Care

Price: \$1.99 - \$2.99

Special Skill: language development, large print

Disability: cognitive, learning, physical, vision

Skill Level: infant/toddler, preschool, elementary

Operating System: iOS (Apple), Android, Chrome

Begin the process of teaching the letters on the keyboard in order to spell words. You create the word to be typed. Each letter of the word is then presented in turn. When the correct key is pressed a fun picture is shown and sound for that letter is played

Retrain the brain with interactive cancellation exercises that help you assess and treat left neglect.

Vital

Vital

Price: \$399

Special Skill: optical character recognition, speech output

Disability: learning, vision

Skill Level: preschool, elementary, secondary

Operating System: Windows, Mac, Android

From tables to graphs to maps, create digital, accessible learning content with Vital that can be explored by students with visual impairments on tablets. At Vital, we believe that all students should be provided truly accessible learning content. Whether created for a student with a visual impairment, ADHD, autism or dyslexia, students can explore and learn through sensory channels that best fit their learning style. Students with visual impairments can explore the tablet through their sense of touch by feeling vibrations, much like exploring tactile graphics, and listen for audio cues and text-to-speech. Learn more at www.vital.education.

Vocabulary Fitness

Merit Software

Price: \$79

Special Skill: cognitive redevelopment, communication, language development

Disability: cognitive, learning

Skill Level: elementary, secondary, adult

Operating System: Windows

Vocabulary Fitness provides students with interactive vocabulary lessons to help them master commonly confused and misused words. After an assessment, students work at their own pace and receive help and contextual feedback throughout. Scores are kept in a record management system that allows teachers to view and print results.

Vocabulary Stretch

Merit Software

Price: \$79

Special Skill: cognitive redevelopment, language development

Disability: cognitive, learning

Skill Level: elementary, secondary, adult

Operating System: Windows, Mac

Helps students recognize words in different contexts and understand the derivation of many English words. Students advance as they demonstrate readiness. A convenient record management system tracks scores and allows teachers to view detailed reports. Designed for students in grades 4 through 10 and can be used by older students.

Vocal Legacy Voice

VocaliD

Price: \$1499 - \$1499

Special Skill: communication, language development, speech output, telecommunications, voice recognition

Disability: speech

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Operating System: Windows, Mac, Android

VocaliD's Legacy voice allows a person at risk of losing their voice to bank and

preserve their voice for free in our Human Voicebank. Later, should they wish to, they can invest to have our engineering team build them their unique personal digital voice for use with our text-to-speech app, MyVocaliD and other compatible TTS apps and AAC devices. Voicebanking to preserve once Legacy requires the person to be able to read about 3500 sentences into our virtual recording studio - don't worry, we'll guide you through the process.

VocaliD BeSpoke Voice

VocaliD

Price: \$1499 - \$1499

Special Skill: communication, language development, speech output, telecommunications, voice recognition

Disability: physical

Skill Level:

Operating System: Windows, iOS (Apple), Android

The VocaliD humanizes the voice inside any device that speaks. A BeSpoke voice is for speechless individuals who are able to produce 2-3 seconds of sound. From that sound, we are able to extract their vocal DNA which can then be blended with the voice from a surrogate in our human Voicebank. Our proprietary voice blending technology blends the two together to craft a single unique digital voice, uniquely recognizable, that can then be used with our text-to-speech app, MyVocaliD or other TTS apps and AAC devices.

VocaTempo

THERAPY BOX LIMITED

Price: \$99.99

Special Skill: basic living skills, communication, eye-hand coordination, language development, vocational, speech output, voice recognition

Disability: hearing, learning, speech, vision

Skill Level: preschool, elementary, secondary, adult

Operating System: iOS (Apple), Android

For the first time, people with dysarthria can use voice commands to communicate. VocaTempo is the world's first voice input augmentative and alternative communication (AAC) app. It is designed for people with dysarthria and allows them to use voice commands to speak phrases.

WayFinder

AbleLink Smart Living Technologies

Price: \$349.99 - \$349.99

Special Skill: basic living skills, cognitive redevelopment, vocational, authoring system, instructional management

Disability: cognitive, learning

Skill Level: secondary, adult

Operating System: iOS (Apple), Android

WayFinder uses GPS-based personalized audio and visual cues to support independent travel via bus systems and on foot. Specific travel routes can be created and activated from the GPS location. Users then receive customized audio and visual

instructions, prompting them through route navigation. Available for the iPhone and Android phones.

What's Cool About Music iPad app

Attainment Company, Inc.

Price: \$39.99

Special Skill: basic living skills, cognitive redevelopment, language development, adapted keyboard/switch access, large print, scanning, single switch, multi switch

Disability: cognitive, learning, physical

Skill Level: preschool, elementary, secondary, adult

Operating System:

Blends six interactive books with the power of music to build literacy skills and engage students of any age in a wide range of musical content. Features professional narration, concept review, music samples, and strong narrative photographs. Students explore melody, rhythm, musical styles, instruments and the history of music.

What's Cool About Music software

Attainment Company, Inc.

Price: \$99

Special Skill: cognitive redevelopment, language development, adapted keyboard/switch access, large print, scanning, single switch, multi switch

Disability: cognitive, learning, physical

Skill Level: preschool, elementary, secondary, adult

Blends six interactive books with the power of music to build literacy skills and engage students of any age in a wide range of musical content. Features professional narration, concept review, music samples, and strong narrative photographs. Students explore melody, rhythm, musical styles, instruments and the history of music.

What's Different?

Do2Learn

Price: \$0

Special Skill: cognitive redevelopment, language development

Disability: cognitive, learning

Skill Level: preschool, elementary

Operating System: Windows, Mac

What's Different? explains categories of objects, such as animals or clothing.

Four objects are displayed and the player clicks on the object that is not part of that category. Special learning features include randomly generated choices to avoid patterning and only positive rewards. This product is free.

Wheel of Sounds

Judy Lynn Software, Inc.

Price: \$39

Special Skill: eye-hand coordination, scanning, multi switch, speech output

Disability: cognitive, physical, speech,

vision

Skill Level: infant/toddler, preschool

Operating System: Windows

Wheel of Sounds is a switch-activated game that plays an object's sound when the object is selected by the spinner. The spinner is activated by either step scanning, timed scanning, a single switch press, a mouse or touch screen.

Wheels on the Bus

Marblesoft-Simtech

Price: \$115

Special Skill:

Disability:

Skill Level:

Operating System:

Students love the song Wheels on the Bus with 3-D animations. Students can sing along with nine song verses, read a story, learn what else goes and play with nine prepositions. This is another Steps to Learning program with changeable format and data collection.

Wheels!

RJ Cooper and Associates

Price: \$59

Special Skill: eye-hand coordination

Disability: physical

Skill Level: elementary, secondary, adult

Operating System: Windows

Wheels! is a fully immersive 3D action game, designed specifically for SAM-Joystick and other alternative input devices (trackball, keyboard, mouse, IntelliKeys). It is very forgiving, has incremental levels, pie throwing clowns and robots. Great sound effects and music and important feedback for power wheelchair training.

Who, What, When, Where, Why

LocuTour Multimedia

Price: \$4.99

Special Skill: basic living skills, cognitive redevelopment, communication, early childhood, language development

Disability: cognitive, speech

Skill Level: preschool, elementary

Operating System: iOS (Apple)

Explore traditional WH questions along with 17 additional question categories. The twenty-three categories of questions are: Who, Whose, What, When, Where, Why, How, How Many, Which, Do/Does, Did, Have/Has/Had, Was/Were, Is, Are, May I, Can, Will, Would, Should, Could, If and Negation. It requires moderate level inference skill.

Wild, Woolly, Wonderful Critters

LocuTour Multimedia

Price: \$1.99

Academic Software, Inc.

Price: \$150

Special Skill: , adapted keyboard/switch access, scanning, single switch

Disability: physical

Skill Level: elementary, secondary, adult

Operating System: Windows

A new, enhanced version of WinSCAN, an advanced, multi-function, single-switch interface for PC users at home, school, or work. WinSCAN CS provides independent control access to educational, productivity, multimedia, and recreational software for Windows 8 or 10. Navigate the desktop; run applications, games and CDs. Surf the Internet with WinSCAN!

Woot Math

Woot Math

Price: \$5.77

Special Skill: basic living skills, diagnostic, IEP/IPP, instructional management

Disability: learning

Skill Level: elementary, secondary, adult

Operating System: Windows, Mac, iOS (Apple), Android, Chrome, Other

Woot Math helps teachers bring mathematics to life through research-backed tools for adaptive learning and formative assessment.

Word Practice

LocuTour Multimedia

Price: \$4.99

Special Skill: early childhood, language development

Disability: learning, speech

Skill Level: preschool, elementary

Operating System: iOS (Apple)

A beginning level app for early language learners. Colorful drawings or photos are presented in three categories: Common Verbs, Contrast Words like over/under and Animals. Listen and learn the vocabulary word, or imitate the speech model. The app provides a model for step-by-step transition to full sentences.

WordComplete (Innovation Management Group, Inc.)

Innovation Management Group, Inc.

Price: \$99.95 - \$3500

Special Skill: language development, vocational, adapted keyboard/switch access

Disability: learning, physical

Skill Level: elementary, secondary, adult

Operating System: Windows

WordComplete adaptively predicts the word you are entering and gives you choices from it's dictionary. Dictionary comes with a basic list, then adds new

words as you type them. You can import or create multiple dictionaries to suit your needs. Sorts alphabetical and often used. Windows 2000 thru Windows 10

WordComplete (RJ Cooper and Associates)

RJ Cooper and Associates

Price: \$59

Special Skill: communication

Disability: learning, physical, speech

Skill Level: elementary, secondary, adult

Operating System: Windows

Utility that provides candidates for completing words within any software.

Choices can be spoken for preview and are presented inline with the insertion point.

Customizable word list. Great for slow typists, emerging literacy, LD and Down Syndrome.

WordQ

Quillsoft Ltd.

Price: \$139.3 - \$199

Special Skill: basic living skills, communication, language development, speech output, voice recognition

Disability: cognitive, hearing, learning, physical, speech, vision

Skill Level: elementary, secondary, adult

Operating System: Windows, Mac

WordQ is a writing skill improvement and compensation tool that works on top of any Windows or MacOS application where students write. WordQ helps students create better quality written work with greater independence and ease with less stress. Intelligent word prediction suggests words appropriate for elementary and secondary school levels. Students write faster and produce more, and get help with spelling and grammar with as little as one or two keystrokes.

WordQ 5

Quillsoft Ltd.

Price: \$75 - \$199.99

Special Skill: communication, language development, speech output

Disability: hearing, learning, physical, speech

Skill Level: elementary, secondary, adult

Operating System: Windows, Mac, iOS (Apple), Chrome

WordQ 5 supports users of all ages by offering state-of-the-art word prediction, speech feedback, proofreading, enhanced topical web searches to help with researching for projects and papers, and more. WordQ can be used virtually anywhere you type on a computer, online or off, helping users realize their full potential and gain confidence in their ability to express their thoughts and ideas.

WordQ 5 Pro

Quillsoft Ltd.

Price: \$99 - \$279

Special Skill: communication, language development, speech output

Disability: learning, physical, speech

Skill Level: secondary, adult

Operating System: Windows, Mac, iOS (Apple), Chrome

WordQ 5 Pro is a writing skill improvement and compensation tool that works on top of any Windows or MacOS application where you write, both online and offline. Both post-secondary students and professionals can benefit from using WordQ 5 Pro, including English Language Learners (ELL), Second Language Learners, and struggling writers.

WordQ for Chrome

Quillsoft Ltd.

Price: \$14.99 - \$14.99

Special Skill: basic living skills, communication, language development, speech output, voice recognition

Disability: cognitive, hearing, learning, speech

Skill Level: elementary, secondary, adult

Operating System: Chrome

WordQ for Chrome is an easy-to-use text editor for Chromebooks with writing skill improvement and compensation tools. All students benefit, including English Language Learners (ESL), Second Language Learners (ELL), and struggling writers.

Words and Their Stories

FableVision Learning

Price: \$30 - \$3300

Special Skill: communication, language development

Disability: learning

Skill Level: elementary, secondary, adult

Operating System: Windows, Mac

This online vocabulary resource applies the WATS (Words And Their Stories) system, a vocabulary acquisition process based on inductive reasoning, process to general vocabulary study, standardized test preparation and literature specific vocabulary that is then combined with activities designed to improve reading comprehension skills. Additional licenses available.

Workplace Readiness

The Conover Company

Price: \$5 - \$25

Special Skill: vocational, adapted keyboard/switch access, large print, speech output, IEP/IPP

Disability: cognitive, hearing, learning, physical, speech, vision

Skill Level: elementary, secondary, adult

Operating System: Windows, Mac, iOS (Apple), Android, Chrome, Other

Workplace Readiness helps users to acquire the critical soft skills they need to achieve success. With soft skills such as a positive attitude, communication, critical thinking, teamwork and interpersonal skills, this system is a must for building success skills for school, workplace and life in general.

WriQ

Texthelp

Price: \$0

Special Skill: cognitive redevelopment, communication, language development, speech output, voice recognition, instructional management

Disability: speech, vision

Skill Level: elementary, secondary, adult

Operating System: Chrome

WriQ is a new Add-on from Texthelp that helps teachers score and keep track of students' spelling, punctuation and grammar errors so you can focus on the things computers can't score. WriQ auto-scores your students' docs and tracks the following measures over time: -Time spent writing -Text Maturity -Spelling error rate -Grammar error rate -Punctuation error rate -Percentage error free -Correct Word Sequences score The teacher dashboard gives you a clear graphical view of your students' writing activity, and let's you track their progress over time. And It's Free, WriQ is completely free for now, but over time additional, premium, features will be added. For a limited time, as a thank-you to everyone who scores 100 student writing passages to help us out, we'll give you free access...for life!

Wrise

AssistiveWare

Price: \$59.99

Special Skill: language development, speech output, authoring system

Disability: learning, vision

Skill Level: elementary, secondary, adult

Operating System: Mac

Wrise is a Mac word processor that makes reading and writing accessible for everyone. Designed to support reading comprehension and text composition, it can also be beneficial for individuals with dyslexia. With Text to Speech, word highlighting, zoom and EasyReading mode texts become more comprehensible and easier on the eyes.

Write on Handwriting: Cursive

Write-On Handwriting

Price: \$1.99 - \$2.99

Special Skill: communication, early childhood

Disability: learning

Skill Level: preschool, elementary

Operating System: iOS (Apple)

Conquering Cursive App for iPad is a developmentally sound app supported by research and years of educational experience. The Write-On Handwriting app fully engages students through multi-sensory instruction of letter and number patterns. The design is age-neutral and provides both instruction and practice modes suitable for all learners.

Writing Therapy

Tactus Therapy Solutions

Price: \$24.99 - \$24.99

Special Skill: cognitive redevelopment, communication, language development

Disability: cognitive, learning, speech

Skill Level: preschool, elementary, secondary, adult

Operating System: iOS (Apple), Android
Build independence as you improve your spelling skills with engaging exercises to help you relearn to write single words. Free trial available.

WYNN Reader

Freedom Scientific, Inc.

Price: \$99

Special Skill: communication, language development, vocational, large print, optical character recognition, speech output, IEP/IPP, instructional management
Disability: cognitive, learning

Skill Level: elementary, secondary, adult
Operating System: Windows

Auditory and visual presentation of material transforms printed and electronic text into understandable information for struggling students. Includes text-to-speech, built-in Web browser, dictionaries, highlighters, spelling and homophone checker. Highlight live on the Web and extract into a separate document. WYNN Reader includes all features except OCR and scanning.

WYNN Wizard

Freedom Scientific, Inc.

Price: \$595

Special Skill: language development, vocational, large print, optical character recognition, speech output, IEP/IPP, instructional management

Disability: cognitive, learning

Skill Level: elementary, secondary, adult
Operating System: Windows

Auditory and visual presentation of material transforms printed and electronic text into understandable information for struggling students. Includes text-to-speech, built-in Web browser, dictionaries, highlighters, spelling and homophone checker. Highlight live on the Web and extract into a separate document. WYNN Wizard includes all features, including OCR and scanning.

ZoomText 11 Magnifier

Ai Squared

Price: \$395 - \$495

Special Skill: communication, vocational, large print

Disability: vision

Skill Level: preschool, elementary, secondary, adult

Operating System: Windows

ZoomText Magnifier enlarges and enhances everything on your computer screen, making all of your applications easy to see and use. Exclusive 'xFont' technology displays crystal clear text at all magnification levels. ZoomText Camera feature magnifies print materials. Enhanced Web Finder provide faster searching, navigation and reading on Web pages.

ZoomText 11 Magnifier/Reader

Ai Squared

Price: \$600 - \$700

Special Skill: communication, large print, speech output

Disability: vision

Skill Level: preschool, elementary, secondary, adult

Operating System: Windows

Combining the features of ZoomText Magnifier with a powerful set of reading tools, ZoomText Magnifier/Reader lets you see and hear what you are doing in all of your applications. Have your documents, Web pages and email read to you right through your computer speakers, even while you doing other tasks.

ZoomText Express

Ai Squared

Price: \$49.99 - \$69.99

Special Skill: large print

Disability: vision

Skill Level: preschool, elementary, secondary, adult

Operating System: Windows

ZoomText Express magnifies (up to 2x) and enhances everything on your computer screen, eliminating eyestrain and fatigue that comes from squinting at the screen. ZoomText Express eliminates screen glare and makes everything easier to find and follow. Now you can use your computer with greater comfort and ease.

ZoomText ImageReader

Ai Squared

Price: \$749 - \$949

Special Skill: vocational, large print, speech output

Disability: vision

Skill Level: preschool, elementary, secondary, adult

Operating System: Windows

ZoomText ImageReader is a software and camera solution that makes printed text accessible to people who are visually-impaired, including books, magazines, business documents and more. Put the printed item underneath the camera, snap a picture, and a few seconds later the text appears in large fonts and is read aloud.

ZoomText Mac

Ai Squared

Price: \$399 - \$499

Special Skill: vocational, large print, speech output

Disability: vision

Skill Level: preschool, elementary, secondary, adult

Operating System: Mac

ZoomText Mac is a powerful computer access solution designed for the visually impaired. Through a combination of magnification, enhancements to colors, pointers and cursors, and a WebReader tool, ZoomText Mac provides you with complete access to applications, documents, email and the Internet.

ZoomText USB

Ai Squared

Price: \$495 - \$795

Special Skill: large print, speech output

Disability: vision

Skill Level: preschool, elementary, secondary, adult

Operating System: Windows

With ZoomText USB, you can install and run ZoomText whenever and wherever you need to (with administrative privileges), without having to purchase additional licensing. Once ZoomText has been installed on a system, ZoomText will automatically start up each time you plug in the USB drive.

OTHER AT

10 Foot TriFold Portable Wheelchair Ramp

Express Ramps

Price: \$519.95 - \$519.95

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult
Disability: physical

The Advantage Tri-Fold Ramp from EZ-Access offers the length required for wheelchairs and scooters to access mini and full-size vans, go up a number of steps, or raised landings. Advantage Tri-Fold Ramps split into 2 pieces, have anti-slip coatings, and feature bottom transition plates that make loading a breeze.

2-Point Padded Hip Belt

Bodypoint Inc.

Price: \$60 - \$129

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Highest quality materials and advanced design details make Bodypoint belts the top choice of therapists and wheelchair users around the world. Our padded hip belt with two points of attachment is built for maximum functionality, durability, and all-day user comfort. Three pull styles and five buckle styles accommodate individual needs.

4 Switch Proximity Tray Array

Adaptive Switch Laboratories, Inc.

Price: \$4480 - \$5316

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

The ASL 106 offers four proximity sensors that allow the driver to operate a power wheelchair. These sensors can be positioned inside a tray or at any available switch site. It was designed for those who have problems maintaining a switch that requires pressure or contact.

4-Point Padded Hip Belt

Bodypoint Inc.

Price: \$82 - \$167

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Four points of attachment on this belt ensure the pelvis stays in an aligned, stable position, secure against the wheelchair seat and back supports. Primary straps position the belt while secondary straps anchor it into position. Bodypoint's high quality materials and design details ensure maximum functionality, durability, and all-day comfort.

5 Foot TriFold Portable Wheelchair Ramp

Express Ramps

Price: \$219.95 - \$219.95

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult
Disability: physical

The Advantage Tri-Fold Ramp from EZ-Access offers the length required for wheelchairs and scooters to access mini and full-size vans, go up a number of steps, or raised landings. Advantage Tri-Fold Ramps split into 2 pieces, have anti-slip coatings, and feature bottom transition plates that make loading a breeze.

5 Little Ducks with BSL Signs Kindle

Co-Sign Communications (inc DeafBooks.co.uk)

Price: \$3.14 - \$3.14

Product Type: adapted play/manipulative, instructional material, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary

Disability: cognitive, hearing, speech

Available from amazon.com Thirty-five pages in fixed page landscape format to keep the relevant text with the signs. Part of a series to promote essential early learning skills. Well-loved counting Nursery Rhyme to enjoy with your child. Double-tap the sign graphics for pop-up text to describing the movements.

5 Little Men in a Flying Saucer with BSL Signs Kindle

Co-Sign Communications (inc DeafBooks.co.uk)

Price: \$3.24 - \$3.24

Product Type: adapted play/manipulative, instructional material, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary

Disability: cognitive, hearing, learning, speech

Available from amazon.com Thirty-five pages in fixed page landscape format to keep the relevant text with the signs. Part of a series to promote essential early learning skills. Well-loved counting Nursery Rhyme with signs to enjoy with your child. Double-tap the sign graphics for pop-up text describing the movements.

6 Foot TriFold Portable Wheelchair Ramp

Express Ramps

Price: \$249.95 - \$249.95

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult
Disability: physical

The Advantage Tri-Fold Ramp from EZ-Access offers the length required for wheelchairs and scooters to access mini and full-size vans, go up a number of steps,

or raised landings. Advantage Tri-Fold Ramps split into 2 pieces, have anti-slip coatings, and feature bottom transition plates that make loading a breeze.

6610 CHEST SUPPORT

Danmar Products, Inc.

Price: \$150

Product Type: seating/positioning/mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, physical

A core of moldable material surrounded in soft foam provides a comfortable chest support that can form to follow body contours. There are strap attachments on the Yokes for wheelchairs, travel chairs and strollers, and the lap belt has pivot mounts for optimal adjustability.

6611 CLEAR CHEST SUPPORT

Danmar Products, Inc.

Price: \$130

Product Type: seating/positioning/mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, physical

Flexible yet durable, this easy-to-use design has no bulky hardware and is hardly noticeable! It offers positioning for individuals who benefit from having their upper body stabilized and hips held at a proper angle. It can be used with most standard, high back or custom wheelchairs and strollers.

6615 SPLIT CLEAR CHEST SUPPORT

Danmar Products, Inc.

Price: \$130

Product Type: seating/positioning/mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, physical

This flexible yet durable anterior support provides a firm fit, and is designed to be easy on and off. It can be adjusted for seasonal clothing changes and growth. Made of heavy duty 1/8" thick clear PVC vinyl, it will last much longer than harnesses made of fabric.

6620 MODULAR CHEST SUPPORT

Danmar Products, Inc.

Price: \$195

Product Type: seating/positioning/mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, physical

We have surrounded a core of moldable material with soft foam to create a chest support that is comfortable and can be formed to follow body contours. The yoke arms and lap belt pivot, allowing for tailored adjustments for ultimate comfort.

6626 TRUNK SUPPORT SYSTEM

Danmar Products, Inc.

Price: \$150

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, physical

Designed for use in a wheelchair or custom seating system, this system provides firm support by using an inner core of molded nylon, with a vinyl-coated soft form cover for comfort and ease of cleaning, and can be permanently mounted to the back of a chair.

6760 UTENSIL HANDLES

Danmar Products, Inc.

Price: \$23

Product Type: adapted play/manipulative, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical

Versatile and comfortable, these handles will hold eating utensils, personal hygiene items, activity brushes and crayons. Specially contoured sections fit into the hand and have a slide-buckle strap that can be easily adjusted for fit. Available in Blue, Orange or Red and sizes Small or Large.

6762 THERAPY HANDLES

Danmar Products, Inc.

Price: \$26

Product Type: adapted play/manipulative, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical

Versatile and comfortable, these handles will hold eating utensils, personal hygiene items, activity brushes and crayons. They come with a 1" foam extension to position the thumb and help with grip. Utensils can be placed in the end of the handle or in the thumb extension.

6763 HANDY HELPERS

Danmar Products, Inc.

Price: \$9.95

Product Type: adapted play/manipulative, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical

This simple, snap-on device allows a person to self-feed. It's easy to use, soft and comfortable, and comes with a spoon as shown. The vinyl-coated foam is easy to clean with warm soapy water.

6764 KNOB HOLDER

Danmar Products, Inc.

Price: \$13

Product Type: adapted play/manipulative, instructional material, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool,

elementary, secondary, adult
Disability: cognitive, learning, physical
 This attachment fits into the end of the Utensil or Therapy Handle, and is used to positioning a writing instrument. Using this holder makes a pen or pencil's angle adjustable, which makes writing easier. and, no matter what position the hand is in, the user can see what is being drawn or written.

6766 TOY HOLDER

Danmar Products, Inc.

Price: \$17

Product Type: adapted play/manipulative, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical

This simple, snap on device allows an individual to interact with a small toy placed in his/her hands. Velcro bands are used to hold a toy in place, while webbing attaches around the palm or wrist. It can be adjusted to fit any size. Sold as a pair.

6767-A COMBO UTENSIL HANDLE & KNOB HOLDER

Danmar Products, Inc.

Price: \$39

Product Type: adapted play/manipulative, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical

This all-in-one tool combines the Utensil Handle (#6760) and the Knob Holder (#6764) with Anchor Strap.

6767-B COMBO THERAPY HANDLE AND KNOB HOLDER

Danmar Products, Inc.

Price: \$42

Product Type: adapted play/manipulative, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical

This all-in-one tool combines the Therapy Handle (#6762) and the Knob Holder (#6764) and Anchor Strap.

6770 MIBOWL HOLDER

Danmar Products, Inc.

Price: \$45

Product Type: instructional material, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical

This new design makes self-feeding easier than ever! Suction cups hold our foam bowl holder in place, preventing movement around the table. Use with our Handy Helpers (6763) for even more eating independence. The bowl is included and our vinyl-coated foam is easily cleaned with warm soapy water.

6771 MIPLATE HOLDER

Danmar Products, Inc.

Price: \$45

Product Type: adapted play/manipulative, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical

This new design uses suction cups to hold the plate in place, preventing movement around the table, making self-feeding easier than ever! Use with our Handy Helpers (6763) for even more eating independence. Our vinyl-coated foam is easily cleaned with warm soapy water.

6775 MITABLE TOPPER

Danmar Products, Inc.

Price: \$55

Product Type: adapted play/manipulative, seating/positioning/mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical

This soft foam table topper makes hard surfaces safer than ever, protecting heads and hands from making contact while also protecting table surfaces during art activities. The foam is vinyl-coated and easy to clean with warm soapy water.

6780 MITABLE TOPPER KIT

Danmar Products, Inc.

Price: \$99

Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical

Comes complete with Table Topper Pad, Bowl or Plate Holder, and Handy Helper with spoon. The suction cups on the Bowl or Plate Holder sticks right to the Table Topper Pad and will not move. All components are vinyl-coated and easy to clean with warm soapy water.

6785 MIMITTS

Danmar Products, Inc.

Price: \$105

Product Type: adapted play/manipulative, seating/positioning/mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, physical

Our all-foam mitts are specially designed to help absorb and deflect the impact when an individual strikes out. They can be applied and secured quickly with Velcro straps, protecting both the wearer from injuring themselves as well as possibly injuring person(s) nearby; clean with warm soapy water.

6809 HENSINGER WITH HIGH BACK

Danmar Products, Inc.

Price: \$130

Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical, speech, vision

Revolutionary in the world of cervical collars, this soft but supportive foam collar braces the head by supporting the occiput and jawline, and is 1" taller in the back. Helping to maintain mid-line head positioning results in improved breathing, swallowing and simplified feeding and aids with social interaction and awareness.

6810 HENSINGER HEAD SUPPORT

Danmar Products, Inc.

Price: \$125

Product Type: seating/positioning/mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical, speech, vision

Revolutionary in the world of cervical collars, the soft yet supportive foam is designed to brace the head by the jawline. It can be used with a chest support or mounted to a permanent seating system.

6815 HENSINGER HEAD SUPPORT WITH MOUNT BAR

Danmar Products, Inc.

Price: \$152

Product Type: seating/positioning/mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical, speech, vision

Social interactions and learning skills may be achieved more easily if the head is comfortably positioned while using feeder seats. The preformed bar has a Hensinger Head Support (6810 or 6809) attached. Specify size of feeder seat and Hensinger when ordering.

6826 ANTERIOR HEAD SUPPORT

Danmar Products, Inc.

Price: \$126

Product Type: learning aid, seating/positioning/mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical, speech, vision

Help to combat chin drop with this head support which provides firm yet gentle lifting of the chin, and lateral support of the head. There is a padded roll around the rear strap for a comfortable finish.

6828 SIDE-OPENING HEAD SUPPORT

Danmar Products, Inc.

Price: \$145

Product Type: seating/positioning/mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, physical, speech, vision

Secure, soft and very supportive, this head support opens on the side for easy on/off. It provides firm yet gently lifting of the chin, as well as lateral and occipital support of the head. The vinyl coating is easily cleaned with warm soapy water.

6833 SWIRL COLLAR

Danmar Products, Inc.

Price: \$69

Product Type: learning aid, seating/positioning/mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical, speech, vision

This swirl of soft foam wraps around the neck and has an adjustable Velcro closure in the rear, which makes fitting a breeze and encourages easy movement from side-to-side. Used for minor to moderate support, the Swirl can be used with any seating system and by individuals who are ambulatory.

6855 SOFT DEFLECTOR

Danmar Products, Inc.

Price: \$100

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult

Disability: learning, physical, vision

This small, lightweight and discreet toileting aid can attach to any toilet seat; snap on the front or clamp to the rim. The vinyl-coated foam is easy to clean with warm soapy water, and fits onto our Toilet Seat Cover with Reducer Ring (#6850).

6856 PERSONAL DEFLECTOR

Danmar Products, Inc.

Price: \$108

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult

Disability: physical

For standard deflectors that are too bulky and make toileting difficult, our personal deflector with a flexible preformed waistband, holds our soft deflector in place. Can be adjusted up and down, as well as side-to-side, and is easily cleaned with warm soapy water.

6858 PRIVACY APRON

Danmar Products, Inc.

Price: \$120

Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, learning, physical

Made to fit both open front and round styles of standard toilet seats (and our #6850 Toilet Seat Cover with Reducer Ring), this toileting aid can be mounted using a bracket or clamped onto the rim. Our germ resistant, vinyl-coated foam is easy to clean with warm soapy water.

6860 CHANGING STATION KIT

Danmar Products, Inc.

Price: \$164.95

Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation

Skill Level: elementary, secondary, adult

Disability: cognitive, hearing, learning, physical

Our germ resistant, vinyl-covered foam is soft and easy to clean using warm soapy water. Soft and cushiony, the pad and forehead/chin rest add comfort while the J-Clips hold everything in place. Contains Changing Pad, Chin/Forehead Rest and J-Clips.

7 Foot TriFold Portable Wheelchair Ramp

Express Ramps

Price: \$299.95 - \$299.95

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult

Disability: physical

The Advantage Tri-Fold Ramp from EZ-Access offers the length required for wheelchairs and scooters to access mini and full-size vans, go up a number of steps, or raised landings. Advantage Tri-Fold Ramps split into 2 pieces, have anti-slip coatings, and feature bottom transition plates that make loading a breeze.

8 Foot TriFold Portable Wheelchair Ramp

Express Ramps

Price: \$379.95 - \$379.95

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult

Disability: physical

The Advantage Tri-Fold Ramp from EZ-Access offers the length required for wheelchairs and scooters to access mini and full-size vans, go up a number of steps, or raised landings. Advantage Tri-Fold Ramps split into 2 pieces, have anti-slip coatings, and feature bottom transition plates that make loading a breeze.

8720 DELTA SWIM SYSTEM

Danmar Products, Inc.

Price: \$120

Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation

Skill Level: elementary, secondary, adult

Disability: cognitive, hearing, learning, physical

This component system is designed to aid in progressive swimming development, perfect for ambulatory individuals with postural balance and arm control. As swimming skills improve, pads can be removed to help achieve independence.

8721 PAD PLUS

Danmar Products, Inc.

Price: \$45

Product Type: adapted play/manipulative,

learning aid, seating/positioning/mobility, sensory stimulation

Skill Level: elementary, secondary, adult

Disability: cognitive, hearing, learning, physical

Offered to modify the Delta Swim System (#8720) and the Tri-Swim (#8728), the Pad Plus may be attached to the front section to add buoyancy and raise the body position in the water.

8723 SECTIONAL RAFT

Danmar Products, Inc.

Price: \$240

Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical

For individuals who are insecure in the water or non-ambulatory, the Sectional Raft supports and cradles the body, while allowing water to flow around the body, enabling interaction with the environment and helping to reduce anxiety.

8724 SWIM RINGS

Danmar Products, Inc.

Price: \$87

Product Type: adapted play/manipulative, instructional material, learning aid, seating/positioning/mobility, sensory stimulation

Skill Level: elementary, secondary, adult

Disability: cognitive, hearing, learning, physical

Create your own personal flotation device with these versatile rings! Sets may be snapped together for neck, chest, torso, or body support, and the individual rings can be added or removed to adjust for comfort, and to increase or decrease flotation.

8725 HEAD FLOAT

Danmar Products, Inc.

Price: \$105

Product Type: adapted play/manipulative, instructional material, learning aid, seating/positioning/mobility, sensory stimulation

Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical

Independence for everyone- there is no need to support the head manually, and hands are free! Superb cushioning allows the head to rest without pressure on the spinal column, which encourages neutral positioning.

8727 DOLPHIN FLOAT SYSTEM

Danmar Products, Inc.

Price: \$172

Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation

Skill Level: elementary, secondary, adult

Disability: cognitive, hearing, learning, physical

Designed for physically involved individuals who have head/neck control, but may need to compensate for uneven weight. Using the side pads helps minimize a user's tendency toward lateral rotation, and the front chest pad provides additional lift and is removable.

8729 STABILIZER BAR

Danmar Products, Inc.

Price: \$120

Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation

Skill Level: elementary, secondary, adult

Disability: cognitive, hearing, learning, physical

Helps maintain balance and equilibrium during walking/gaiting pool exercises. It is also great for resting on or extending out in front for kicking drills, as well as workouts for individuals with mild arthritis. The amount of flotation can be adjusted by adding or removing rings.

8730 COMFORT MAT

Danmar Products, Inc.

Price: \$160

Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation

Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, learning, physical

Designed for use in the many situations where foam padding would be welcome. Place at the pool's edge to ease entry/exit. In the locker room, they insulate against the cold tile floors, and provide changing comfort. They make a great flotation raft too.

8735 HEAD FLOAT & STABILIZER BAR

Danmar Products, Inc.

Price: \$200

Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation

Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical

This combination helps keep the face out of the water, and works well not only for swimmers with Athoid CP but also for those who roll sideways and backwards. Now they can stretch and turn their heads when interacting with others without tipping or rolling.

9708 SOFT COMFY CAP

Danmar Products, Inc.

Price: \$96

Product Type: adapted play/manipulative, instructional material, learning aid, seating/positioning/mobility, sensory stimulation, telecommunications

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

Our lightest, coolest helmet yet! This stylish, head-hugging design made of compression-molded foam offers a uniquely comfortable fit, weighing only 3 ounces. It provides maximum ventilation and retains limited body heat, and is easy to clean with warm, soapy water.

9709 Hard Top Comfy Cap

Danmar Products, Inc.

Price: \$131

Product Type: adapted play/manipulative, instructional material, learning aid, seating/positioning/mobility, sensory stimulation, telecommunications

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

Our lightest, coolest Hard Shell Helmet yet! This 11.5 ounce helmet is made of a compression-molded inner foam liner attached to a hard plastic exterior. The stylish design is extremely well-ventilated and retains limited body heat. It's easy to clean, using warm soapy water.

9817 HALO HELMET

Danmar Products, Inc.

Price: \$174

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

Ideal for individuals who do not need full head coverage. A band of 5-8" soft, vinyl-coated foam surrounds the head at the forehead level, and extends down to cover the temporal and occipital areas. It's easy to clean with warm soapy water. Average weight is 10 ounces.

9820 SOFT SHELL HELMET

Danmar Products, Inc.

Price: \$123

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

This lightweight helmet is constructed out of 1/2" thick shock-absorbing foam and is fully ventilated without compromising head coverage. It's vinyl-coated with our Fabricat which does not allow for bacteria growth, and is easy to clean with warm soapy water. Average weight is 8 ounces.

9821 HARD SHELL HELMET

Danmar Products, Inc.

Price: \$160

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

This headgear is both comfortable and effective in reducing the risk of injury. A

strong polyethylene shell covers a shock-absorbing foam liner which is vinyl-coated and easy to clean with warm soapy water. It allows for ventilation without compromising head coverage. Average weight is 17 ounces.

9822 HARD SHELL HELMET WITH FACE GUARD

Danmar Products, Inc.

Price: \$260

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

This protective helmet features a shock-absorbent foam liner which is riveted to a strong polyethylene outer shell. A clear polycarbonate face guard is attached to the outer hard shell. There is an eye opening for an unobstructed view and a mouth opening for maximum ventilation. Weight averages 25 ounces.

9823 CHIN GUARD

Danmar Products, Inc.

Price: \$50

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

This 1/2" thick foam guard fits comfortably over the chin area and can be worn with every helmet except for the 9822 Hard Shell Helmet with Face Guard. It is soft yet shock-absorbent and easily cleaned with warm soapy water. Weight averages 1.5 ounces.

9824 HARD SHELL HELMET WITH FACE BAR

Danmar Products, Inc.

Price: \$208

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

A clear 2" wide polycarbonate bar is securely attached to our 9821 Hard Shell Helmet so that it can't move, to reduce the risk of injury to the facial area. The shock absorbent foam liner is vinyl-coated and the entire helmet is easy to clean with warm soapy water. Weight averages 21 ounces.

9825 DELUXE HARD SHELL HELMET

Danmar Products, Inc.

Price: \$171

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning,

physical, speech, vision

This sporty version of our 9821 Hard Shell Helmet adds a decorative visor and rubber chin cup, adding style and flair. Our shock-absorbent foam is riveted to a strong, polyethylene outer hard shell, allowing ventilation without compromising head coverage. Easily cleaned with warm soapy water. Weight averages 18 ounces.

9829 FULL COVERAGE HELMET

Danmar Products, Inc.

Price: \$152

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

This lightweight helmet is constructed out of 5-8" vinyl-coated foam and covers more of the temporal and cheek areas, as well as the area around the ears and nape of the neck. It's easy to clean with warm soapy water. Average weight is 10 ounces.

9830 CLEAR HELMET

Danmar Products, Inc.

Price: \$220

Product Type: adapted play/manipulative, instructional material, learning aid, seating/positioning/mobility, sensory stimulation, telecommunications

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

This clear polycarbonate helmet is well-ventilated and edged with soft foam. We include 8 moveable pads that can be used to adjust the sizing and elevate specific areas of the helmet away from wound sites. It is easily cleaned with warm soapy water.

9836 NEWBORN CAP

Danmar Products, Inc.

Price: \$83

Product Type: seating/positioning/mobility

Skill Level: infant/toddler

Disability: cognitive, hearing, learning, physical, speech, vision

This ultra-lightweight helmet is made from soft, 3/8" shock-absorbent foam and is fully ventilated. It's coated in vinyl so it's easy to clean with warm soapy water. A soft chinstrap holds the cap in place, and the ribbon on the front allows for moderate growth.

9910 SOFT COMFY CAP WITH DESIGN

Danmar Products, Inc.

Price: \$142

Product Type: adapted play/manipulative, instructional material, learning aid, seating/positioning/mobility, sensory stimulation, telecommunications

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

Our lightest, coolest helmet yet! This stylish head-hugging design of compression-molded foam offers a uniquely comfortable fit, and weighs just 3 ounces. It provides maximum ventilation and retains limited body heat, and is easy to clean with warm soapy water. Choose from Butterfly or Camouflage design.

A Child's Book of Signed Prayers

Co-Sign Communications (inc DeafBooks.co.uk)

Aeromesh® Calf Panel

Bodypoint Inc.

Price: \$96 - \$108

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult

Disability: physical

Bodypoint® Calf Panels keep feet safely and comfortably on wheelchair foot plates.

Wide strap distributes pressure across a broad calf region, especially useful for those in tilt or reclined position. Smooth, porous Aeromesh® fabric provides air circulation and comfort while a stiffener layer maintains panel shape, eliminating folding and buckling.

Aeromesh® Calf Strap

Bodypoint Inc.

Price: \$73 - \$85

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult

Disability: physical

Bodypoint® Calf Straps keep feet safely and comfortably on wheelchair foot plates. A two-layer design blends comfort and function, and keeps feet from falling without bruising skin. Smooth, porous Aeromesh® fabric against the legs provides air circulation and comfort while a stiffener layer maintains its shape, eliminating folding and buckling.

Aeromesh® Rapid-Dry Bath Belts

Bodypoint Inc.

Price: \$89 - \$107

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult

Disability: physical

Bodypoint Bath Belts can be worn across the chest, abdomen, hips or legs to stabilize position while bathing or in the pool. Unique Aeromesh® fabric allows water, soap, dirt and air to pass through freely while protecting skin and promoting hygiene. Three length-adjustable styles are compatible with most major shower chair brands.

Aeromesh® Shower Chair Calf Support

Bodypoint Inc.

Price: \$70 - \$70

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult

Disability: physical

A calf strap designed specifically for shower chairs! Silky, porous Aeromesh® material is soft on skin while allowing soapy water, dirt and air to pass through. Attaches to all major models using sewn-in clips; no hardware required. The 4" height supports legs but does not interfere with chair operation.

Aira

Aira

Price: \$89 - \$199

Product Type: seating/positioning/mobility

Skill Level: adult

Disability: vision

Aira develops assistive technology that connects the blind with certified agents via smart glasses and a dashboard that

allows agents to see what the blind person sees real time. Agents help users accomplish a range of tasks from navigating streets, recognizing faces, and traveling the world. Prices are per month.

All-Turn-It Spinner

AbleNet, Inc.

Price: \$125

Product Type: adapted play/manipulative, learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical, speech

The switch activated All-Turn-It Spinner, with a built-in external switch jack, enables random selections for choosing groups or playing games of chance like Bingo. Also a fun alternative to rolling dice. Requires two C batteries (not included).

Animal Number Quiz download

Co-Sign Communications (inc DeafBooks.co.uk)

Price: \$1.99

Product Type: adapted play/manipulative, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary

Disability: cognitive, hearing, learning, speech

British Sign Language (BSL) resource for individuals or small groups. Count the animals and click on the number to find out if correct or return you to the right place. Great on interactive whiteboard. Sign and word graphics.

Ankle Huggers®

Bodypoint Inc.

Price: \$138 - \$146

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

The original, patented solution for wheelchair users to stabilize the lower legs without immobilizing the feet. They reduce joint stress by holding at the ankle, and improve safety, comfort and tolerance for sitting. New 2018 model features variable zones of flex and a low-profile buckle plus easy hook-and-loop adjustments to get the right fit every time. Includes Footman Loop Kit for mounting to footplates and detachable Pull Loops to make buckle release easier.

Arm Anchor

Rifton Equipment

Price: \$75 - \$95

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Quickly fastens (and unfastens) onto any flat surface area of equipment, furniture, or

a wheelchair to facilitate activities in the classroom, at work, or at home. No slipping or shifting with the industrial strength 4-inch diameter suction cup. Lock the suction cup lever to attach the Arm Anchor.

Caregiver Alert

Adaptive Tech Solutions

Price: \$42.53

Product Type: adapted play/manipulative, telecommunications

Skill Level: elementary, secondary, adult

Disability: hearing, physical, speech

Our wireless attendant call button system allows people with limited or no finger use to activate the button using a switch. This chime is loud, travels through walls

up to 75 feet. Can be used with an external switch for those with limited finger use.

CB100 - Compound Bow Mount

Be Adaptive Equipment, Inc.

Price: \$609 - \$609

Product Type: adapted play/manipulative

Skill Level: elementary, secondary, adult

Disability: physical

Model CB100 is designed for individuals with limited hand and arm movement and strength. This piece of equipment works on most all models of compound bows and can be used with right hand or left hand bows. It allows the limited mobility user to pivot the bow left and right and up and down while the mount holds the entire weight of the bow. The CB100 mount requires the use of a Draw-Loc or similar product (which is not included) to hold the bow at full draw for the user.

Chest Belt

Bodypoint Inc.

Price: \$71 - \$101

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult

Disability: physical

A comfortable, low-profile postural support option for users with limited hand function or those who prefer chest support without a buckle. New flexible molded end-tab is easy to grab, and upgraded hook-and-loop material holds securely but is smooth to the touch. Optional slip-on pads sold separately.

CJT Suction Cup Table Stand

CJT Mounting

Price: \$225 - \$450

Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical, speech, vision

The heavy duty suction base keeps your device in place for hours. The CJT suction cup table stand is perfect for tablets and small devices.

CJT/LOCLINE SWITCH MOUNT

CJT Mounting

Price: \$225 - \$525

Product Type: adapted play/manipulative, seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

The CJT and Locline universal mount combines the flexibility of Locline with the strength and stability of the CJT Griptight Base Connector. The CJT Griptight base is fast and easy to attach and remove from your wheelchair, bed frame, walker, activity chair, or ET Roller.

Classroom Audio Technology

Lightspeed Technologies, Inc.

Price: \$895 - \$3500

Product Type: learning aid, sensory stimulation, telecommunications

Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, speech

In today's dynamic classroom, it's no longer enough to have the best speech intelligibility possible. Lightspeed's audio systems provide clear communication during whole group instruction plus two way audio to each small group. This allows teachers to monitor small groups, redirect off-task behavior, and encourage collaboration. Our classroom audio distribution systems help every student and assist those who need it most.

ClipDifferent Jr. Automatic Nail Clipper

ClipDifferent

Price: \$149 - \$149

Product Type: adapted play/manipulative, sensory stimulation

Skill Level: preschool, elementary, secondary

Disability: cognitive, hearing, learning, physical, speech, vision

The ClipDifferent Jr. is a revolutionary, first-of-its-kind, automatic fingernail clipper that safely trims children's (ages 5+) fingernails with the simple touch of a button. It's perfect for children and parents who have a hard time trimming their children's fingernails and dislike the messy, process. You'll have to see it to believe it, kids actually have fun using it!

ClipDifferent Pro Automatic Nail Clipper

ClipDifferent

Price: \$149 - \$149

Product Type: adapted play/manipulative, sensory stimulation

Skill Level: secondary, adult

Disability: cognitive, physical, vision

The ClipDifferent Pro is a patent-pending, carefully engineered fingernail clipper that transforms this repetitive task into an easy experience. The safe fingernail slot prevents skin from coming into contact with the trimming mechanism (even those with full vision loss can use it safely). In addition, it catches the nail clippings in a drawer, eliminating the mess of this routine task. It's also compact and contains a rechargeable battery that can last months between charges.

Compact Activity Center

Enabling Devices

Price: \$149.95

Product Type: adapted play/manipulative, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary

Disability: cognitive, learning, physical

This small-scaled activity center is designed to provide sensory stimulation and cognitive activity for the infant or child whose physical mobility may be limited due to positioning needs. Features five different exciting activities that light up, vibrate or play music.

Compact Joystick - Single/ Dual Switch

Adaptive Switch Laboratories, Inc.

Price: \$1280

Product Type: seating/positioning/
mobility

Skill Level: infant/toddler, preschool,
elementary, secondary, adult

Disability: physical

The ASL 133 and 134 are fully proportional with a unique shape and size which makes it easier to grab and manipulate. It has a textured end for a tactile feel making it easier to hold and a reset switch in the top of the joystick cap.

Deafness + Music

CymaSpace

Price: \$0

Product Type: sensory stimulation

Skill Level: adult

Disability: hearing

Myles de Bastion is a musician who also happens to be Deaf. His search for ways to bridge his passion for music with his Deaf identity led him to develop technology that enables sound to be experienced as light and vibration.

DeCoste Writing Protocol

Don Johnston, Inc.

Price: \$25 - \$529

Product Type: instructional material

Skill Level: elementary, secondary, adult

Disability: cognitive, learning

In this age of accountability and assessment, your district needs a process to evaluate writing issues for students with disabilities. Unfortunately, many districts don't have a systematic way to do this. The DeCoste Writing Protocol is a formative assessment tool that helps educators identify factors affecting an individual student's ability to produce writing. The Writing Protocol compares a child's individual performance across handwrit-

ing and keyboarding tasks. It examines spelling performance and writing skills so educators make more informed decisions about instructional strategies and the appropriate use of technology to meet classroom demands.

Described and Captioned Media Program

Described and Captioned Media Program

Price: \$0

Product Type: instructional material

Skill Level: infant/toddler, preschool,
elementary, secondary, adult

Disability: hearing, vision

DCMP's is a federally funded project administered through the National Association of the Deaf. Our mission is to promote equal access to communication and learning through described and captioned educational media. We provide a free online library of accessible videos for students who are deaf, hard-of-hearing, blind, low-vision, and deaf-blind.

Disability: physical

Universal headset mount with stylus pointer for head controlled tablet and smartphone use. This offering contains

a full functional head pointer solution, containing a headband with a mounting plate and stylus pointer. The stylus pointer is available in four options that differ in length and bend-ability.

Headpod Dynamic Head Support

PACIFIC REHAB

Price: \$495 - \$495

Product Type: adapted play/manipulative, seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, physical

A dynamic head support device which can be applied to almost anything with a headrest while the child is upright, wheelchair, walker, stroller, stander, bike or activity chair. The child is able to move in full rotation, as well as chin tuck and extension, but not head drop. As the child acquires strength, the upper band is relaxed and they are able to move within their plane of strength. It is a completely different philosophy from head restraints and collars, which tends to atrophy musculature further due to lack of movement. The Headpod can only be used when the child is upright, to begin within their point of balance. A functional aide during power wheelchair use, Aug Comm and feeding. Any time that fatigue prevents function. It is not to be used for van or bus transport.

Hi-Speak

Ambrospeak Ltd

Price: \$40

Product Type: telecommunications

Skill Level: elementary

Disability: physical, speech

Conversations are now made possible for respiratory care patients on 24/7 support. Hi-Speak can aid speech through the tough plastic CPAP masks. Inexpensive, simple and proven helpful with ALS/multiple sclerosis patients and in other applications. Visit www.hispeak.co.nz for more information. Email HiSpeak@clear.net.nz for shipping quotations

Draw Your World

Price: \$0 - \$4.5

Product Type: instructional material, learning aid

Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, learning, physical

Hold the Pencil is a pamphlet with simple instructions and tips to encourage a comfortable pencil grasp. A selection of pencil grippers are shown that help position the fingers into the tripod grasp. Much of the information is available free on the authors' site: <http://www.drawyourworld.com/writing>.

Hoonuit's Professional Development and Data Analytics

Hoonuit

Price: \$200

Product Type: instructional material, learning aid, sensory stimulation, telecommunications

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

Hoonuit provides continuous and in-depth resources to support ongoing learning to meet the PD requirements redefined by ESSA, but also to ensure teachers are prepared and empowered to reach every student effectively. With the Every Student Succeeds Act (ESSA) implementation upon us, clear and accessible reporting is evolving. The additional transparency is important, but the new reporting requirements are putting added strain on already scarce time and resources. Hoonuit supports your accountability reporting efforts without sacrificing the access to data you need to make decisions.

Hoonuit's Professional Development Solution

Hoonuit

Price: \$800

Product Type: instructional material, learning aid, sensory stimulation, telecommunications

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

The one-time workshop or professional development days are a thing of the past. For districts to ensure the learning opportunities they provide their teachers and staff are positively impacting student success, administrators are diving deeper to challenge the quality and delivery of PD. Hoonuit provides continuous and in-depth resources to support ongoing learning to meet the PD requirements redefined by ESSA, but also to ensure teachers are prepared and empowered to reach every student effectively.

Hybrid Dual Arm Mount'n Mover with Pow!r Shoulder

BlueSky Designs

Price: \$4800 - \$4800

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical, speech, vision

Optional wedge and handle.

Lifton Duo Residential Elevator

Lifton Residential Elevators

Price: \$22000

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

The Lifton Residential Elevator is unlike any other home elevator on the market and has been designed to move the passenger quickly from floor to floor in the home. It

is a luxury lifestyle product which offers homeowners with a fantastic way of 'future proofing' their home for use in later life.

Limitless Stylus

Westminster Technologies

Price: \$73 - \$79

Product Type: adapted play/manipulative

Skill Level: preschool, elementary, secondary, adult

Disability: physical

The Limitless Stylus is optimized for users with limited hand mobility and is a simple design that wraps around the users wrist with two Velcro straps. The stylus is angled perfectly to fit the contours of the user's hand and has been designed for long term use and optimal comfort. It can be used on any touchscreen device to gain more control and precision with every click!

LM100 - Limited Mobility

Be Adaptive Equipment, Inc.

Price: \$609 - \$609

Product Type: adapted play/manipulative

Skill Level: elementary, secondary, adult

Disability: physical

Be Adaptive Equipment Model LM100 is a limited mobility unit designed for use by people with limited use or paraplegics that cannot hold a gun up. Designed for individuals with limited hand and arm movement and strength. The unique design of the equipment makes the weapon seem almost weightless to the person using it and allows them to have a full range of motion, up, down, and side to side. The simplicity of the LM100 allows it to hold all pistols, crossbows, rifles, and shotguns. The LM100 does not include a power trigger mechanism. If you lack hand movement and need assistance with this, you can purchase our TM100 (power trigger mechanism) and use it with this piece of equipment.

Look at Math

Attainment Company, Inc.

Price: \$34 - \$289

Product Type: instructional material

Skill Level: secondary

Single Switch Scanner

Adaptive Switch Laboratories, Inc.

Price: \$3852 - \$6612

Product Type: seating/positioning/mobility

Skill Level: secondary, adult

Disability: physical

The ASL 101 has a display module that illuminates 5 LED's for forward, right, left, reverse and select. The scan rate is adjustable and is best used for someone that only has one switch site available and other means for driving have been ruled out as an option.

Sip and Puff Head Array

Adaptive Switch Laboratories, Inc.

Price: \$4730 - \$5802

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

The ASL 109 combines simple sip and puff controls with head movements. This system is designed for those with lateral head movement and weak breath control volume. The driver control is typically used with individuals with high level spinal cord injury.

Skoog 2.0

Skoogmusic

Price: \$199.95

Product Type: adapted play/manipulative

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical, vision

Skoogmusic makes musical instruments we can all play. And we really do mean everyone! Play, jam and create music right out the box. We call it 'musicplay.'

Skwitch

Skoogmusic

Price: \$49.95

Product Type: adapted play/manipulative, learning aid, sensory stimulation

Skill Level: preschool, secondary, adult

Skwitch is the brand new musical instrument from Skoogmusic. But we think it's so much more. Think of it as Skoog's compact, nimble little brother. Or sister. And it clips straight on to your iPhone, so within minutes you have a piece of accessible tech that you can use to create music, learn coding and more. It's a bit like magic, but better.

Slip-on Pads

Bodypoint Inc.

Price: \$43 - \$51

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Slip-On Pads slide over webbing to add padded comfort to basic non-padded chest or hip belts, providing greater pressure distribution. Non-wrinkling, flexible fabric resists dirt and grime, and rounded edge binding avoids skin irritation. Three sizes to fit 1", 1.5" and 2" webbing.

SmartKnitKIDS Seamless Sensory Garments

Knit-Rite, Inc.

Price: \$7.95 - \$19.99

Product Type: sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

Bumps, seams, ouchies, burglars, or nuggies. By whatever name they're called, seams and lumps and bumps can be a nuisance. SmartKnitKIDS Seamless Products have taken the woes out of clothes and help to keep the morning routine in check. In 2003, SmartKnitKIDS, a brand of Knit-Rite, Inc., started receiving requests from parents for a completely seamless sock. It seemed that all the seamless socks available had a flat or handlinked seam across the toes. To a sensitive child, this was still a bother; there was still a toe seam. With over 90 years of medical textile expertise, Knit-Rite used parent feedback to create a patented 100% seamless sock with added comfort features for sensitive feet.

Social Skills at School: Elementary

Attainment Company, Inc.

Price: \$199

Product Type: adapted play/manipulative, instructional material, learning aid

Skill Level: elementary

Disability: cognitive, learning, physical, speech

The updated Social Skills at School: Elementary is a perfect social skills program for elementary students with autism, intellectual, or behavioral disabilities. A skills-based curriculum for elementary students to develop an understanding of behavioral cues and expectations of a typical school day.

Enabling Devices

Price: \$179.95

Product Type: adapted play/manipulative, learning aid, sensory stimulation

Skill Level: preschool, elementary, secondary

Disability: cognitive, learning, physical, vision

Used for developing the concept of cause and effect. Movement of the beads will turn on a built-in music box. When the beads are manipulated, the music stays on. It can also be used as a capability switch without music when connected to any toy or device.

Speech and Language Songs

SpeechandLanguageSongs

Price: \$0 - \$25

Product Type: instructional material, learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, speech

Speech and Language Songs creates speech therapy songs that help children communicate more effectively. These songs are written, performed, and recorded by a certified Speech-Language Pathologist, Stephen Kneese, MA, CCC-SLP. A new song is posted to YouTube every Monday at 5:00pm EST.

Square Panda Phonics Playset

Square Panda Inc.

Price: \$119 - \$119

Product Type: adapted play/manipulative, instructional material, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary

Disability: cognitive, hearing, learning, physical, vision

Square Panda is an award-winning complete phonics learning system with multi-sensory instruction. Learners in early literacy environments engage in tactile, auditory, and visual learning through physical smart letters that interact with a library of 10 free learning games, creating a highly-engaging, multisensory early literacy instructional experience.

Stages

Attainment Company, Inc.

Price: \$69 - \$199

Product Type: instructional material

Skill Level: preschool, elementary, secondary

Disability: learning, physical

A seven-stage framework for cognitive and language development. Covers learner considerations, relevant issues, communication strategies, tips for evaluating software, and a skills checklist before moving on to the next stage. Includes references to research and published articles and provides recommendations for software, apps, and manipulatives materials.

Stayflex Chest Support

Bodypoint Inc.

Price: \$155 - \$177

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Provides wheelchair users firm trunk control with free shoulder movement. Patented, dual-stretch-zone construction eliminates upwards shift at the neckline when leaning forward, minimizing strangulation risk. Carefully selected materials optimally balance stretch and resistance, and quick-release swivel buckles allow easy removal. Available in two widths and with or without zipper. New MD (multi-directional) Pull Straps allow set up on the spot as a front-pull or a rear-pull.

Steady Stylus

ShapeDad

Price: \$28 - \$48

Product Type: adapted play/manipulative

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

T-shaped stylus for tablet and smartphone for assistive grip aids. It is available in two versions: regular and mini.

Stepping Out Into the Community

Attainment Company, Inc.

Price: \$299

Product Type: adapted play/manipulative, instructional material, learning aid

Skill Level: secondary

Disability: cognitive, learning, physical, speech

Stepping Out is a comprehensive community-based instruction (CBI) curriculum that includes a task analysis for 18 community outings including grocery shopping, eating at restaurants, using the bank, and going to the movie theater. A community-based instructional program for students to achieve independence outside of school.

Storytime Revised Book and Electronic files

Creative Communicating

Price: \$50

Product Type: adapted play/manipulative, instructional material, learning aid, sensory stimulation

Skill Level: preschool, elementary

Disability: cognitive, hearing, learning, physical, speech

Save hours of time coloring and collecting pictures by using this ready-to-print software. An instructive step-by-step approach is introduced for building immediate success with early literacy skills and communication.

Straight Joystick Handle

Bodypoint Inc.

Price: \$79 - \$79

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Bodypoint's Straight Joystick Handle for power wheelchairs is perfect for users who do best with a vertical grip. It is easy to control using only the last joint of the fingers, and can be cut to length to meet individual user needs.

Sub-ASIS Compatible Belt

Bodypoint Inc.

Price: \$87 - \$173

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Customize pressure relief while enhancing stability, fit and comfort with a Sub-ASIS Compatible Hip Belt. Unique gel-filled sub-ASIS pads (sold separately) attach inside

belt to fill anatomical gaps and prevent belts from digging or riding up, improving control of obliquity and rotation while minimizing bladder pressure. Two-point and four-point styles.

Suitcase Wheelchair Ramps

Express Ramps

Price: \$99.95 - \$389.9

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult

Disability: physical

These portable aluminum ramps are designed to be safe and easy to use on a variety of surfaces and support up to 800 pounds. Please see our Web site for all the ramps we carry.

Support Station

Rifton Equipment

Price: \$2690 - \$3558

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult

Disability: physical

Primarily for use in schools, day-hab and rehab settings, the Support Station provides necessary support for hygiene care while standing. Saves caregivers backs and provides dignity for client.

Swell Touch Paper

American Thermoform Corporation

Price: \$132.99 - \$228.99

Product Type: instructional material, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: vision

Swell Touch Paper is utilized for Tactile Graphics machines manufactured by Zychem, PIAF, and Reprotronics. This paper swells along specified black lines and diagrams when being used with these heat processors.

Switch Fiber Optic Arrays

Adaptive Switch Laboratories, Inc.

Price: \$4150 - \$5470

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

The ASL 107, 108 are two or four fiber optic switches that allow the driver to operate a power wheelchair. These sensors can be positioned inside a tray or at any available switch site. Typical users are individuals with extremely limited movement such as MD, MS, ALS and SMA.

Switch Poser

RJ Cooper and Associates

Price: \$49

Product Type: adapted play/manipulative

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

Inexpensive vacuum type device that holds switches at angles.

Switch-Adapted Call Chime

RJ Cooper and Associates

Price: \$59

Product Type: adapted play/manipulative

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Includes two transmitters, each with a different tone, communicates without wires up to 100 feet with the chime.

Switch-Adapted Game

Controllers

RJ Cooper and Associates

Price: \$69 - \$149

Product Type: adapted play/manipulative

Skill Level: elementary, secondary, adult

Disability: physical

Standard controllers for all game consoles, available with a variety of adaptations, such as SWITCH JACKS for major game functions, joystick extensions, movement of trigger buttons, etc.

Table Top Suction Mount for iPads

AbleNet, Inc.

Price: \$75 - \$75

Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, learning, physical, speech, vision

Table Top Suction Mount provides a quick, easy way to mount almost any AbleNet switch or small dedicated speech generating device (SGD) to a smooth surface like a table or desktop. Two easy lock and release suction cups secure it while the pivoting arm allows positioning of the switch device.

TabletTable

Attainment Company, Inc.

Price: \$179

Product Type: instructional material

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: learning, physical

An accessory for helping students to reach and view the screen of an iPad. Includes a built-in handle and a convenient storage space for chargers or other supplies. Provides an ergonomic, 22-degree angle design and offers solid construction and nonskid bottom for security and stability.

TactileTalk Toolkit

Attainment Company, Inc.

Price: \$499

Product Type: adapted play/manipulative, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: vision

Focuses on both communication and literacy skills by combining tactile symbols

with voice output. Tangible symbols represent objects, activities, places, people and concepts. Several objects are organized on transparent sheets with borders and other symbols made with special tactile paint. These sheets function as overlays for an iPad screen.

Taking on Tough Words

Attainment Company, Inc.

Price: \$34

Product Type: instructional material

Skill Level: elementary, secondary

Disability: learning, physical

A researched curriculum consisting of 90, 15-minute lessons for reading and spelling multisyllabic words. Integrates phonics rules and word recognition skills while providing increasingly difficult, sequenced and scripted lessons. Ideal for older elementary through high school students.

Talk It Rock It Animation Station Videos

Talk It Rock It

Price: \$20 - \$30

TM100 - Trigger Mechanism

Be Adaptive Equipment, Inc.

Price: \$334 - \$334

Product Type: adapted play/manipulative

Skill Level: preschool, elementary,

secondary, adult

Be Adaptive Equipment Model TM100 is a vacuum actuated trigger system that attaches to your trigger guard. Is simple to install on any weapon with a standard trigger guard. The unique design of the mechanism allows it to fire most weapons if placed anywhere inside of the trigger guard. The simplicity of the set up allows the trigger mechanism to be moved from one weapon to another easily and quickly. The TM100 fires the weapon by a very slight suction on the blue tube in the picture which is attached to the control box. The control box is attached to the stock of the weapon with a Velcro cinch strap. The mechanism operates on 12 volt DC power and comes with a pigtail that can be attached to one of the batteries in your power chair or attached to an auxiliary battery.

Toe Straps

Bodypoint Inc.

Price: \$26 - \$26

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Add our durable, hook-and-loop toe straps to slotted wheelchair footplates to limit aggressive foot rotation and dorsiflexion. Length is fully adjustable and can be trimmed shorter as needed. For enhanced foot positioning needs, consider our Ankle Huggers Support Straps instead. Use them alone or in conjunction with toe straps.

Topcat Access

Lightspeed Technologies, Inc.

Price: \$1562 - \$4270

Product Type: learning aid, sensory stimulation, telecommunications

Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, speech

Teachers love Topcat because it delivers both multimedia audio and their instruction to every corner of the room without shouting at the top of their lungs. The IT team likes the easy, wireless ceiling installation and lack of interference with all the other technology in the building.

Trimline Shoulder Harness

Bodypoint Inc.

Price: \$107 - \$119

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult

Disability: physical

Focused shoulder retraction for wheelchair users with two separate, adjustable padded straps that comfortably accommodate asymmetry. Each shoulder can be independently controlled while keeping the chest clear for maximum freedom of movement. New MD (multi-directional) Pull Straps allow it to be set up on the spot as a front-pull or a rear-pull harness.

Twirling Bead Chain

Enabling Devices

Price: \$239.95

Product Type: adapted play/manipulative, learning aid, sensory stimulation

Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

Feel the cool beads! Activate the built-in red gumball switch and the carousel begins to turn causing the colorful cool beads to gently touch your hand as they spin by. In addition, upbeat music plays and red and blue lights sparkle. Great sensory experience that also teaches cause and effect.

U-shaped Joystick Handle

Bodypoint Inc.

Price: \$79 - \$79

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Our U-Shaped Joystick Handle provides maximum wheelchair driving control for those with limited hand function. The curved, "goalpost" design with waterfall edge is form-fitting and ergonomic, comfortably cradling hands while keeping them from sliding off. Available in two widths to fit different hand sizes, and can be custom-molded with hot water.

Unique Learning System

N2Y, LLC

Price: \$554.51

Product Type: instructional material, learning aid

Skill Level: preschool, elementary, secondary, adult
