Volume 40 - Number 6

ANNUAL RESOURCE DIRECTORY

2022
Edition

A guide to the latest assistive technology products for children and adults with disabilities. It is the culmination of an extensive search for the latest software, hardware and other assistive technology products that are on the market today, as well as their producers.

EDITOR'S NOTE: There is no charge for inclusion in the Resource Directory. Listings are based on editorial questionnaires, phone interviews and materials provided by producers. Listings are not advertisements nor is their inclusion in the Directory an endorsement or guarantee by Closing The Gap. Descriptions are edited materials submitted by producers. They are not product reviews. Information provided is as current as possible at publication time.

Literacy, Letters, & Language: Embedding Opportunities for Students with Complex Communication Needs

Summary:

Comprehensive literacy instruction for learners with significant disabilities is a critical component of the formal instructional years and beyond. This article will highlight embedded instructional experiences that teach alphabet knowledge and phonological awareness, so learners can apply knowledge gained during explicit instructional experiences to the world around them. It is critical that language and literacy are the foundation for students to achieve independent, autonomous communication.

A SHARED VISION

ALL learners can learn to read and write.

Comprehensive literacy instruction **MUST** occur for ALL learners with complex communication needs.

If you educate and support learners with significant disabilities, you play an imperative role in their literacy development. You are a part of something special. You are a member of a life-changing team!

When we have a shared vision of what our students are capable of learning, we believe in their ability to learn to read and write. We believe our students are entitled to high quality instruction that occurs across instructors and environments. We put no limits on their ability to learn literacy and language. We believe that their access to high quality instruction is not only their right, but one of the most important factors in achieving independence and autonomy in their adult lives.

LAUREN SHEEHAN is a special education teacher with over fourteen years experience working with learners with complex communication needs. Currently, Lauren teaches in a public high school and also works as an adjunct instructor. Lauren has an undergraduate degree in special education, and dual master degrees in special education and curriculum and instruction. She also has a certificate in assistive technology. Lauren's experiences include providing comprehensive literacy instruction, supporting learners who use AAC, alternative access and assistive technology use. Lauren has presented at local and national conferences on multiple topics in special education, literacy instruction and assistive technology.

ASHLEY LARISEY is a licensed Speech-Language Pathologist and clinical educator. Ashley's work experiences over the past 11 years include public and private therapeutic day schools, speech/language clinics, and early intervention. Ashley also serves as an adjunct clinical supervisor at Saint Xavier University and teaches a module specific to the use of technology in the field of Speech/Language Pathology. Ashley has extensive experience working with children and adults who use Augmentative and Alternative Communication (AAC) systems, and has presented at local and national conferences on AAC.

EMERGENT VS. CONVENTIONAL LITERACY INSTRUCTION

While all students are entitled to receive comprehensive literacy instruction, implementation will vary depending on the current skill set of the learner. When determining what instructional strategies will be most effective in teaching literacy, we defer to the following four questions taken from *Comprehensive Literacy for All* (Erickson & Koppenhaver, 2020) to guide the decision making process.

- Does the student understand that print has meaning?
- Does the student know most of the letters, most of the time?
- Does the student actively engage during shared reading?
- Does the student have a means of communication and interaction? (Erickson & Koppenhaver, 2020)

If answers to the above questions are all “yes”, then the student’s literacy instruction will include conventional literacy instructional strategies (guided reading, independent writing, independent reading, and word study). Additional information regarding conventional literacy instruction can be found in the resources section.

However, if the answer is “no” to any of the above four questions, emergent literacy strategies are recommended to establish a solid foundation of skills. This will foster further literacy growth as students transition from emergent to conventional instruction as literacy skills continue to develop and evolve over time.

Jane Farrall's emergent literacy graphic organizer

When working with emergent literacy learners, it is recommended that instructors spend 90-135 minutes daily using strategies, including shared reading, predictable chart writing, alphabet knowledge and phonological awareness, independent writing, and self-selected reading. Of this, 20-30 minutes should be spent focusing on alphabet and phonological awareness skills.

EXPLICIT VS. EMBEDDED INSTRUCTION

When focusing on alphabet knowledge and phonological awareness, it is critical to ensure that we include both explicit and embedded instruction throughout the day. Explicit instructional strategies are those which follow a specified scope and sequence and are relatively short in duration (about 15-20 minutes). Explicit instructional strategies for alphabet instruction include the explicit alphabet instructional routine (Jones, et al, 2013), which focuses on letter identification, letter sound identification, recognizing the letter within text, and producing the letter form. Letters are targeted throughout six instructional cycles (e.g. alphabetic order, frequency of use, order of sound acquisition).

However, embedded instructional strategies, which will be the primary focus of this article, provide learners with context and meaning. It is often the application of embedded instructional strategies where we see students make connections between what they are learning and its practical use within their immediate lives. We know from experiences within our instructional settings that learners require ongoing exposure, embedded instruction, and repetition with variety. Embedded instruction often occurs outside of the confines of tabletop classroom activities, which is what makes it so powerful.

WHAT IS ALPHABET KNOWLEDGE AND PHONOLOGICAL AWARENESS?

Letters and language naturally occur during comprehensive literacy instruction. Knowing how we define alphabet knowledge and phonological awareness is necessary to identify what instruction your learners may need. Educators must know what skills are targeted within each. Just as we use the most common ingredients to bake a cake, educators must know the elements of alphabet instruction and phonological awareness.

Alphabet knowledge is, “the ability to name, distinguish and produce the shapes, and identify the sounds of alphabet letters.” (Erickson & Koppenhaver, 2020)

This includes:

- letter identification
- letter sounds
- recognizing letters in text
- producing letter forms.

Phonological awareness are, “skills that include recognizing and cognitively manipulating units of oral language such as word, syllables, onsets and rimes.” (Erickson & Koppenhaver, 2020) This also includes rhymes and alliteration.

When focusing on emergent literacy, our focus is often on shallow vs. deep phonological awareness skills. Deep phonological awareness skills examine the ability to recognize and manipulate the smallest units of spoken language, which are speech sounds (e.g. decoding and spelling), while shallow skills focus on greater units (e.g. words, syllables, onset, rimes). For the purposes of this article, we are focusing on shallow skills (Schuele & Boudreau, 2008).

GETTING STARTED

Learning environments are active, busy and curious. In order for embedded instruction to occur naturally throughout your setting, educators should consider the following:

Purpose- Remember why your learner(s) need alphabet knowledge or phonological awareness instruction embedded into their day. Many learners need ample opportunities to work on targeted skills outside of the blocked, explicit instruction period. Emergent literacy learners need repetition, authentic learning experiences and access to literacy across environments. Without purpose, we have no direction for what we do.

Plan- Outline how you will embed alphabet knowledge and phonological awareness into your daily instructions and routines. Identify learner strengths and consider areas to strengthen. Use your trusted planning tool or lesson template and plan for embedded instruction to occur. We know there are many opportunities for impromptu and “on the spot” teaching to occur, however, we suggest you identify set times within a lesson, during the day or week when you can plan for embedded alphabet and phonological awareness instruction. This will also help other staff understand when instruction will occur. Working with other educators and related services? Co-plan with members of your team to maximize time, resources and targeted areas of need.

This could look like weekly co-planning time between the teacher and speech-language pathologist (SLP) to identify letters and letter sounds to embed into instruction and therapy. Both educators can work on specific letters (teacher) and letter-sounds (SLP) that a learner may struggle with. Both educators then plan for embedded opportunities to target these skills to increase exposure in various contexts and purposes.

During the planning process, you might identify instances in which multiple strategies would be appropriate for a learner. For instance, during a shared reading activity, you might identify several examples of the letter of the day being used within the text. Examples of embedded instruction could include

pointing to the targeted letter within the text, counting the syllables within target words, or counting the number of words within a sentence. Despite the differences in overall focus, we often find in literacy instruction that our work does not exist in a silo. There is a high level of overlap between skill sets and instructional strategies that are used to develop literacy skills.

Prepare- Consider what materials and tools you will need. Individualize learner materials to provide alternative access, communication and positioning needs. Materials with high durability will provide for long lasting use. You want to spend less time creating materials and more time using them! Consider materials that can be used in a variety of settings and with multiple learners. Many settings have paraprofessional staff who can help with preparing materials. You can also look for help from parent volunteers or individuals looking to fulfill service hours. Learners can also be part of the process; this allows for learners to understand the purpose of the materials and tools if they are part of the development, creation and organization. Learners can then customize materials to increase engagement and excitement for their use!

Alphabet materials on learner desk.

Placement- Identify where you will store your materials that you have prepared. We recommend having quick and easy access to your prepared materials. Storage options can vary and having your tools ready increases the likelihood of others using them on a consistent basis. This can include physical items such as clear bins, rolling carts, command hooks, pocket charts, desk storage, clear page protector, whiteboards and much more. Place materials in locations where embedded instruction would occur naturally! You should also consider placement of digital materials. This can include shared Google drives, Jamboard, Book Creator and other technology-based resources.

We have found that having access to both paper-based and digital tools, at any given time, ensures for flexible implementation.

Alphabet cards on command hook.

Letter board next to smartboard.

ALPHABET INSTRUCTION (EMBEDDED LEARNING EXPERIENCES)

A variety of strategies can be used to support embedded alphabet instruction.

ALPHABET BOOKS

Alphabet books bring a variety of options into embedded instruction. They provide opportunities to highlight letter names, letter-sounds and upper and lowercase letters in print. Use learner data from your explicit instruction to drive your selection of books. A learner who is challenged with the letters g, p and q would benefit from alphabet books that provide multiple opportunities to read those letters, locate in print and hear letter-sound relationships. If a learner needs more access to uppercase and lowercase letter instruction, select a text that has multiple proper nouns that provide increased access to uppercase letters on each page.

Alphabet books can be created with a student using their preferences and interests. There are many apps that allow for learners to create their own, such as Pictello, Book Creator or Story Creator. Other platforms include Google Slides, Jamboard or Powerpoint. Learners can add their own photos or select photos and images online. A learner who struggles to identify the letter p could write a book using photos from a cooking experience. A photo of them pouring the pancake mix can be added with text under the image. Other photos and text you can add include a pan or plate. This provides multiple purposes for a text to be read, all while creating opportunities for embedded alphabet instruction. You can also access readily available alphabet books on Tarheel Reader (<https://tarheelreader.org/>) by searching for a targeted letter. You can create your own account and write your own books that can be accessed using a variety of methods (switch, touch screen, keyboard) and across multiple settings (school, home, community).

I see the bear in the ice.

Alphabet book targeting the letter i using Google Slides with an animated polar bear GIF.

GAMES

Learners of all ages enjoy game-based learning. Embedded instruction can occur in familiar games (Bingo, Monopoly, Wheel of Fortune) or by creating your own games. Survey your students to identify preferred game experiences. Some games require adaptation to make accessible but the overall idea is to allow for embedded instruction to occur naturally within the context of a game. Your learners may not realize you are working on letter identification or recognizing specific letters in print during all the fun!

Chain Reaction game on Powerpoint targeting the initial letter g.

If you have a learner who enjoys computer-based games, you could use a PowerPoint game template such as Chain Reaction (<https://www.rusnakcreative.com/gameshows>) to identify action words that begin with the letter g. Providing embedded experiences with the use of first letter cueing is a helpful repair strategy for individuals who use AAC.

NAMES

Learner names provide authentic and personalized embedded alphabet instruction. Think about your current setting. How many times do your learners read, identify or spell their names? Erickson and Koppenhaver (2020) share, “there is no other single word that is more personally relevant” for our learners to have access to in print. Use names to point to letters as you read (both individual, peer or staff names), identify the uppercase letter at the beginning or initial letter-sounds. The number of opportunities we have access to learner names can provide endless access to embedded letter identification.

Interactive name graphic using Canva.

Bingo game targeting uppercase letters using template from Lessonpix.

Add some fun into the mix by creating personalized letter posters, name cards or graphics using Canva ([www.Canva.com](https://www.canva.com)). Creating opportunities to write their name for a variety of purposes (attendance, volunteer choices, lunch orders and more) increases embedded instruction. Standard writing tools or alternative pencils can be used. To learn more about alternative pencils, visit the Center of Literacy and Disability Studies, at the University of North Carolina, Chapel Hill (<https://www.med.unc.edu/ahs/clds/alternative-pencils/>).

Volunteer sign-up board using alternative pencils.

ENVIRONMENTAL PRINT

Letters are everywhere! So much variety of print can be found within our educational environments and community settings. Environmental print appears on signs, labels and logos. When our learners bring their attention to environmental print, we model that letters have a purpose in our world. We are actively involving our learners in these experiences, rather than rote instruction in isolation to simply match a picture to picture. We draw attention to the letters we see, to the sounds letters represent and to the context in which we read print.

Draw attention to the letters in the EXIT sign when you walk in the hallway, point to letters on the logo of a pretzel snack at lunch or read student created posters advertising the Homecoming dance.

SCAVENGER HUNTS

Allow students to actively explore and seek letters. Scavenger hunts provide a similar approach as environmental print, but instead, target individual letters, groups of letters, letter-sound representations or uppercase and lowercase letters. Scavenger hunts can be used to provide movement breaks during the day. Consider working with your Occupational or Physical Therapist

to plan for scavenger hunts during therapy. Use fun tools such as clipboards, sticky notes, stickers or occluders. Scavenger hunts also create collaborative learning opportunities.

Learner using stickers during a letter scavenger hunt within a Dynamic Learning Maps familiar text.

Learners reads a Readtopia (Building Wings) graphic novel, from Working Together/ The Gold Bug unit, while identifying uppercase letters (LessonPix bookmark) within a text.

Having access to tools and materials that support alphabet instruction is imperative. LessonPix (www.lessonpix.com) is an online resource for custom made learning materials for educators and parents. Lessonpix templates support a wide range of literacy learning. Learners read a page within a Readtopia graphic novel to identify the letter B. The bookmarks are used for scavenger hunts within a text. Many times, we think learners must move and “go” on a scavenger hunt, but consider ways you can embed this strategy quickly into your classroom. (Readtopia, by Building Wings, is a comprehensive literacy curriculum that is designed for learners with complex needs. To learn more about Readtopia, visit the Don Johnston website at www.donjohnston.com.)

PHONOLOGICAL AWARENESS (EMBEDDED LEARNING EXPERIENCES)

RAPS AND RHYMES

Songs are a great way to bring awareness to rhyming words, but it can also be challenging for educators to identify songs that are age respectful when targeting these skills with older learners. Raps can be used in place of nursery rhymes to teach phonological awareness skills like syllableness, rhymes, and alliteration. One of the biggest challenges with using music is that we cannot control the tempo - when listening to a song with higher beats per minute (BPM), educators can have trouble bringing attention to some of the aspects of phonological awareness within a song. However, when we create our own music and raps, we can control the pacing to slow the tempo down and increase emphasis on a specific aspect of phonological awareness.

I am cold/bold/old rap created within google slides.

The iPad iOS apps Rap Maker and Auto Rap by Smule offers background music that can be used to create custom raps. Within the previous example, the focus is on the letter I (embedded alphabet knowledge), with additional attention being given to the rhyming words bold, cold, and old. A bitmoji of the classroom teacher is used with the letter I in ice to highlight letter sound correspondence.

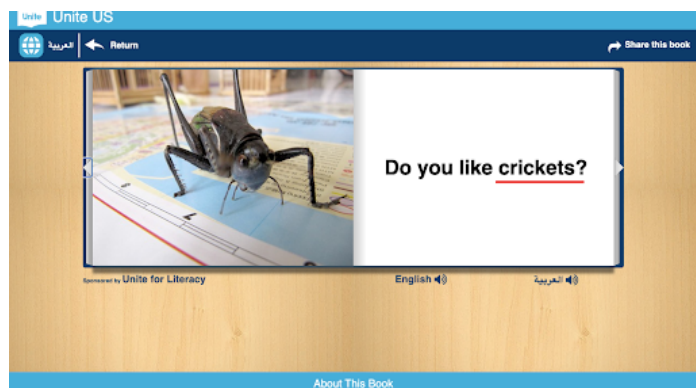

A Thanksgiving poem from Animated Step by Steps (Dr. Carol Goossens)

Poetry can also be used to highlight the connection between rhyming words. One of the benefits of focusing on rhyming words within text is that students can see the similar visual features between rhyming words (e.g. rime -ell is highlighted through markup tools in the words *shell* and *well*).

SHARED READING

When we review the strategies used to support learners in emergent literacy instruction, shared reading has a distinct focus separate from alphabet knowledge and phonological awareness. The focus within shared reading is *interaction*, and helping students learn to actively engage throughout the shared reading experience. There are many helpful trainings available to support educators in guiding students during shared reading (CAR and CROWD models: <https://www.share-reader.org/professional-development/>).

A sample text from a book within Unite for Literacy. A cricket appears on the page with the text, "Do you like crickets?" The word "crickets" is underlined in red.

Unite for Literacy (www.uniteforliteracy.com) is a free online and app based resource that contains a large library of short picture books that come in more than 50 languages. Many of the texts within Unite for Literacy contain repetitive lines (e.g. "Where do ____ sleep?" "I can help ____.") Repetitive lines can be helpful in providing learners with repetition with variety and allow focus on the fill-in phrase. For example, syllableness can be targeted for the different words used to fill-in the repetitive text (e.g. "Do you like crickets?"). Learners can pat, clap, fist bump, or high five the number of syllables with each fill-in word.

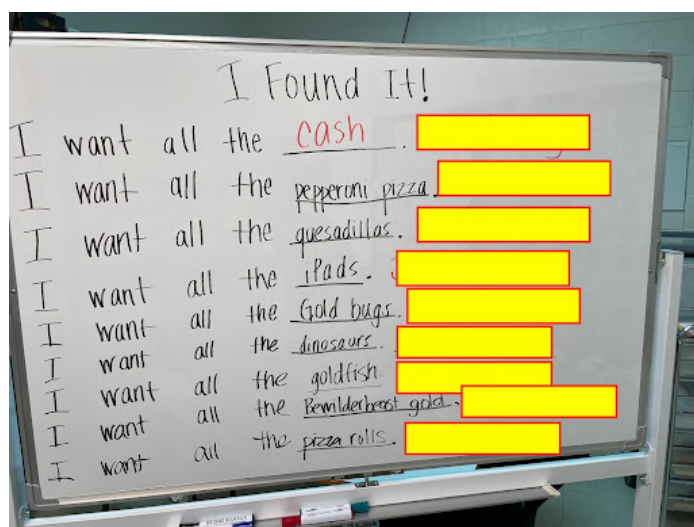

A sample text from a book within Epic books that focuses on alliteration.

Epic Books (www.getepic.com) is a resource that is free to educators which contains a large library of books, videos, and audiobooks which can be filtered by age, reading level, genre, language, and more. Using the search tool, books can be located by focusing on a specific aspect of phonological awareness. While your comments about the text might initially be student led and driven, you can then expand upon those to include targeted comments focusing on aspects of phonological awareness (e.g. "I hear four words that start with 'l'" (focus on the sound it represents versus the letter) → Leroy, lizard, long, leap."

PREDICTABLE CHART WRITING

Predictable chart writing, while a separate instructional strategy, can be used in conjunction with both alphabet knowledge and phonological awareness activities.

A predictable chart with the sentence stem "I found all the ____"

Day two (re-read the chart) is a great time to review the chart with a particular focus in mind. This might be a letter, word, or concept of print. This step can be easily overlooked in practice, but in our experience, can be one of the most important steps within predictable chart writing in terms of honing on specific skill sets. When we review the chart which contains a similar sentence stem (e.g. Bugs are ____), we can take these opportunities to focus on aspects of phonological awareness including counting the number of words in each sentence, identifying the number of syllables within the fill-in phrase, looking for rhyming words, or highlighting instances of alliteration. Raps and chants can also be used to re-read the chart.

Note: While the above examples are specific to phonological awareness, shared reading and predictable chart writing also provide multiple opportunities to embed alphabet instruction. Within both components of comprehensive literacy instruc-

tion, educators can identify options for embedded instruction targeting letter identification, letter sounds, recognizing letters in text and producing letter forms. During shared reading, attention can be drawn to an uppercase letter C in a character's name or the initial /c/ sound can be articulated when read within the text. We can highlight this by saying, "I hear that /c/ sound for c in the word *catch*," as we point to the letter, or word, in print. During predictable chart writing, an abundance of opportunities are available as we write the chart, re-read the chart and write our book. Multiple exposures to the chart provide for various work with letters when write the chart ("We can bring *money*, *money* starts with *m*,") letter-sounds when re-reading the chart ("I hear an /m/ sound in *money*,") or producing the letter by typing on a keyboard when creating a book.

CLOSING THOUGHTS:

In our experiences teaching older learners in high school, many of whom are considered emergent literacy learners, we hear time and time again from parents and students alike that one of the most important goals they have is to learn to read and write. We have also seen far too often that teams have "thrown in the towel" on teaching literacy by the time that students enter their high school years. However, we know that when given comprehensive literacy instruction using a team-based approach, that students CAN learn to read and write, despite their age, disability, or diagnosis. It truly is life changing.

Our Experience with Robot-Assisted Intervention at MOVIA

Summary:

Providing successful interventions to children with ASD is very challenging. Robotic-Assistive Technology is showing promising results in this area. MOVIA Robotics has developed tools to provide Robot-Assisted Intervention to the special needs community. Timothy Gifford, founder of MOVIA Robotics describes how RAI works and how it is beneficial to neuro-diverse individuals and the supporting community. This article details results, and lessons learned from RAI's use in over 60 schools and by over 50 families.

MOVIA Robotics is committed to helping those in the special needs community to achieve their potential. We want to help them gain skills and confidence to be able to be successful at home, in school, and on the job. We provide tools for teachers and specialists for use in the classroom. Our tools also help clinicians provide therapeutic interventions. These benefits are also available to families in the home as well.

Robot-Assisted Interventions (RAI) makes this all possible. With the HomePal, a family can provide RAI to their child with an economical package. The Teacher's Aide provides the educational community with a sophisticated training intervention for their students. With our latest product, the TheraPal, the clinical community can provide therapeutic benefits to individuals within their practice. It's all in an easy-

TIMOTHY GIFFORD is the founder of Movia Robotics Inc and is a researcher at the University of Connecticut. Gifford has consulted and presented internationally on Robot Assisted Intervention Autism, Artificial Intelligence, Virtual Reality, Collaborative Robotics, Human Perception and Assistive Technology. Gifford's research has been funded by the National Science Foundation and the National Institutes of Health among others. Gifford has several publications and has been cited multiple times. Gifford and UCONN were jointly awarded a patent for a novel therapeutic technique utilizing robots. Gifford held the position of Director of the Advanced Interactive Technology Center at the University of CT. and was the Scientist in Residence at The Connecticut Science Center. Gifford is a serial entrepreneur who has created several companies in robotics, artificial intelligence and virtual reality. He has an IP portfolio including licenses with UCONN and other entities. Gifford is active in international business development and is a founding member of Hartford Health Works as well as being a member of the Global Business Council. Gifford's companies have done work for NASA, IBM, Biogen, Bank of Boston, The World Economic Forum and GTE among others. Gifford has won awards for business development, virtual reality implementation, filmmaking and animation. Gifford led the team that built the first Virtual Reality Exhibit at the Smithsonian Institution. Movia Robotics received the Business Champions Award and the Gold Award for Social Impact.

to-use form. These tools are now being used in schools, homes, and clinics worldwide.

ROBOT-ASSISTED INTERVENTION

With Robot-Assisted Intervention (RAI), the robot leads the child through the activities designed to teach skills, provide social practice, and interact in a therapeutically beneficial way. The facilitator- who may be the parent, the teacher, a therapist, or other caregivers- initiates and oversees the session. The child or adult who is receiving the intervention interacts with the robot naturally by speaking with the robot, through gestures, and by tapping on the tablet.

Individual sessions with the robot are made up of several activities, each tailored to the child's needs. There are a variety of activities that can be delivered with RAI including lessons, stories, and games. RAI is an engaging tool that has been shown to be able to reach typically developing individuals, people with ASD, as well as those with other disabilities such as Down Syndrome, Intellectual and Developmental Disabilities, and ADD. This assistive technology helps the facilitator deliver content using proven methodology. The paradigm works one on one and with small or large groups. The RAI system reduces the workload for the facilitator by providing the interactions, engaging the individual in the intervention, freeing the facilitator to monitor the progress and assess the individual's progress.

MOVIA's RAI system is a tool to help the individual and the facilitator, who is providing the intervention. The facilitator and the robot work together as a team to deliver the interventions. The robot is semi-autonomous, meaning it works on its own while collaborating with the facilitator. The facilitator is always in control, making sure that the individual is understood by the robot, and it is acting appropriately as it responds. Some instructional and therapeutic systems available today are controlled entirely by artificial intelligence (AI). The long-term effects on children of AI-driven interventions have not been fully researched. This is one of the reasons that our system always has a person in the loop to provide control and oversight. We have found that having the therapist, teacher, or parent working together with the robot as a team is the safest and most effective method for providing interventions.

During the sessions, the robot takes on different roles, depending on the context of the interactions. Sometimes the robot is a playmate, a teacher, or even a therapist. The robot moves back and forth between these different roles, depending on how the individual is responding and what's needed for the different interactions.

WHY A ROBOT?

Most children and adults love robots. Both typically developing individuals and those on the spectrum are engaged

by interacting with the robots. Children and adults with ASD respond particularly well to the robots. The robots are animate like people, but they are simpler. They are less confusing or distracting than a person. The individuals treat the robots as a social entity. This social status is an opportunity to use the robot as a social trainer, leading the children and adults through interactions and activities that teach them about social skills and give them an opportunity to practice. These social interactional activities give the children a safe opportunity to test behaviors and to experiment. The robot's voice is non-judgmental, enabling individuals to be more at ease with their interactions and their behaviors. A safe, non-judgmental environment allows for confidence-building in the learning and practice of social skills. The individual can then take the skills they have learned and try them with their cohorts at home, in the classroom, and on the job.

Robots don't get tired or bored, they provide consistently repeatable performance. The actions of the robot are dynamic yet predictable; this consistency is very helpful and comforting for people with ASD. The robots are infinitely patient. They'll repeat the same interaction repeatedly and never get impatient. This is very calming for the children.

Children and adults are well-motivated to interact with the robots and go through the different types of interventions. The robots are both the training and the reward. With RAI, in most cases, there is no need to provide additional rewards for doing the work of the lessons.

Research shows that working with robots is beneficial. Working with a robot is more effective than learning from an animated character on a tablet. Being in the same physical space with a robot, interacting socially stimulates more of that individual's brain and nervous system. This has been shown to lead to better learning and retention. The robot's humanoid form stimulates mirror neurons which fire when we see another person do an action that we can do. This activation of the mirror neurons helps the individual to better understand and connect with the robot.

The robots and the RAI system provide many benefits for the individual with special needs and for the facilitator. The individual with ASD is motivated and engaged by the robot. The simple yet dynamic structure of the robot is socially accessible for the individual. The technical aspects of the RAI tool provide labor-saving intervention delivery and data collection benefits for the facilitator.

The individual with ASD finds RAI calming and enjoyable. The robot is providing the lesson delivery and the focus of the individual is on the robot. The facilitator is freed up to monitor the session, providing inputs as necessary and assessing the progress of the individual. The support that RAI provides to the facilitator lowers their stress as well.

MOVIA FAMILY OF ROBOTS

The Robot-Assisted Intervention (RAI) system works across many different kinds of robots. This allows us to provide the appropriate robot for a specific situation. Our complete curriculum will work with all the robots. The NAO robot, which has been a stalwart of the educational and research community for many years, is a very sophisticated robot and provides for a very high level of movement and interaction. The Misty, too, is a cool robot that is often chosen by older kids because it has more of a science-fiction feel to it. Often schools like to use the iPal, which is a taller robot to work with groups. Families often choose the Kebbi robot, which is smaller and more economical.

SYSTEM OVERVIEW

The Robot-Assisted Intervention (RAI) system is designed as an appliance. It is a turnkey solution that is easy to use. There is no programming or other technical skills needed to operate the system. In addition to a robot, the hardware includes a tablet and a laptop. All the equipment is configured and ready to go when the customer receives it. The software is very easy

to use. It has been tested and refined through several iterations in collaboration with teachers, specialists, and parents. The software ensures simple consistent lesson delivery.

The MOVIA team provides full training and support. The MOVIA system has automatic data collection to track the progress of the individual. All the data is stored following HIPAA, COPPA, and FERPA compliant practices. All the curriculum is developed by professionals with experience in early childhood education and special needs.

MULTIPLE EVIDENCE-BASED TECHNIQUES

The robot interactions and the structure of the activities are based on evidence-based techniques.

Many of the interactions follow the tenets of Applied Behavioral Analysis (ABA) which is the accepted standard for ASD individuals with autism in many school and therapeutic settings. Our ABA-compliant activities include discrete trial procedures, reinforcement, prompting, and skill shaping.

Social and Emotional Learning (SEL) cultivates not just children's academic skills, but their whole development and

Ethan and Kebbi - How Robot-Assisted Instruction Has Impacted The Life Of A 15-Year-Old With Autism
<https://www.youtube.com/watch?v=4gS08RAaqi0>

integration into classroom and social settings. Our SEL is aligned with the Collaborative for Academic, Social, and Emotional Learning (CASEL) bringing together activities in self-awareness, self-management, responsible decision making, relationship skills, and social awareness.

Embodied Cognition views social and cognitive abilities as grounded in bodily nervous system structures and capacities. Appropriately coordinated movement helps the individual to achieve appropriate interaction. Our embodied social communication content includes Social, nonverbal communication skills (joint attention, gaze shifting), imitation, coordination, postural control skills, and interpersonal coordination.

CURRICULUM

Our curriculum focuses on four main areas. The first is learning readiness skills. These are skills to help the individual to be successful in the learning environment. These include joining a group and staying focused, and it overlaps with social skills. Next are social skills. The third is activities for daily living while the fourth is basic academics. All the different types of skills are necessary for an individual to succeed.

With the engagement ability of the system to keep the child motivated and to keep them on task we find that it's a very effective educational tool. It works not only for the areas of deficit but across the board for many kinds of skills and tasks. This makes it a very effective tool for teaching academics.

We have several lessons and activities that teach calming techniques. The intention is to give the children the ability to deal with their emotions and stress. These include sensory breaks, breathing, and counting techniques.

RAI FOR SOCIAL PRACTICE

People with autism want to be successful socially, but they often do not have the tools to do it. RAI can provide very specific skills training around each of these social skills. Importantly, the system offers the opportunity to practice these skills in a safe environment. The robots will not be offended. Robots never get bored, nor react negatively; this is very positive for the child to have a chance to practice these skills and then take them back to use when they are with their cohort.

Often children with autism will become very tentative and reserved and lose confidence because they may do something which is very off-putting to a friend and that friend may back away. This is distressing to the child with ASD, particularly if they do not quite know why it happened. Each time they practice with the robot, however, they are having a successful social experience. This can be quite significant for the individual who may not have many successful social interactions on a regular basis. RAI provides the opportunity to not only teach

the individual about social skills but to give them confidence through practice and familiarity to use those social skills.

RAI SUPPORTS COLLABORATION

Robot-Assisted Instruction is a great support for collaboration. Training in social skills related to joining a group, turn-taking, imitation, and apologizing are examples of basic skills that help the individual to be successful in collaborative situations.

Another area that RAI is uniquely suited for is theory of mind, with activities to help demonstrate and educate about perspective-taking. Perspective-taking is particularly difficult for people with ASD. The individual has difficulty seeing the world from another perspective. In fact, they often have an expectation that everyone has their individual perspective. We are developing activities to demonstrate that another person may have a completely different perspective on a situation. These exercises may also help to improve the individual's empathy, joint attention, and joint action. These are all key to helping the individual to be successful socially.

RAI can be used to facilitate inclusion by having the robot interact with groups where some of the members are neurotypical and some of the members are neurodiverse. In this situation, the robot can communicate to the different members of the group with different levels of complexity. Each of the individuals can follow the interaction appropriately and still have a group interaction. The robot acts as the leader and mediator between the children. The focus is not on any one individual, but rather on the robot and the interaction. This takes the focus off of the particular child who may have special needs and may not be able to do specific types of activities at the same level as the others. Inclusion activities are also very important for the typically developing community to have experience with individuals with special needs in a positive way.

Each of these activities promotes and supports success with their friends. Every successful interaction leads to more self-confidence and long-term gains. Our goal is to provide the child with benefits that can change their trajectory. We can help them early on by helping them to attain skills and opportunities to build their confidence.

This has the potential to improve their performance throughout their academic career. This can make a tremendous difference for a child. One of the main goals of our company and our long-term vision is to help these individuals become helpful members of society. Our goal is to help them have more independence and to acquire skills that are beneficial and valuable within the community.

RESULTS FROM CLINICAL TRIALS AND FIELD TESTING

The multiple components of the Robot-Assisted Intervention (RAI) system have been tested in controlled trials and in pilot

Neurodiverse Children Therapies That Teach And Are Supportive Using MOVIA's TheraPal
<https://www.youtube.com/watch?v=TgX9Tl2rQtY>

tests. We have found that the system is very beneficial. We found an improvement in spontaneous and appropriate verbalizations. We see an increase in joint attention bids. Caregivers have reported an increase in engagement and compliance. Students have often achieved mastery of skills within grade-level goals that are set in the individualized education plan. Parents, teachers, and clinicians report the generalization of skills, meaning the individual demonstrates the learned skill or behavior in situations where the robot is not present. There was little evidence of novelty effect. The individuals remain engaged with the robot after months of interactions.

BENEFITS OF RAI

The benefits of Robot-Assisted Instruction are many and growing. We're learning more every day. One of the things that has become clear is that it reduces the workload on teachers, parents, and therapists and increases their observation time. While the child focuses on the robot the facilitator can focus on the experience of the child. The robot leads the child through the different activities as the facilitator observes, supports, and

guides the system to the best effect. There is flexibility built-in, so the facilitator can adjust pacing or change other aspects of the intervention delivery. Data is collected by the system, freeing the therapist to work more closely with the child.

RAI helps to reduce the anxiety and stress on the educators and students. The focus for the child is on the robot. It reduces the stress for the facilitator because they're not needing to hold themselves so rigidly and to provide the interactions in a flat or emotionless way. The stress on the child is lowered because the robot, although very dynamic in its interactions, is very repetitive and predictable. This is an effective combination of these qualities. The robot does not do the same thing every time, but the robot does deliver instruction in a similar way each time. That similarity from session to session is calming and predictable, yet dynamic, and spontaneous. That predictability lowers the stress for the child while the robot's neutral, non-judgmental voice, and the reliable positive interaction are very calming for the child.

The child is motivated to work with the robot and finds it to be a pleasant experience. The child will spend more time on task, and this increased time on task leads to reduced time to

outcomes. This is one of the areas that we're looking at within our research. The clinicians, teachers, and parents are telling us there is definitely a benefit to the interactions offered through the Robot-Assisted Instruction. They report that they have seen the skills learned with the robot being used by the children in many different situations.

RAI is being used successfully in the community. The Teacher's Aide has been deployed to over 60 schools around the world. The HomePal is now being used in over 50 homes. Several schools have been using the current version of the product for multiple years. Our initial family customers have renewed their subscriptions. They have been using the system for a year and a half. This is heartening for us because this means that one, the child and robot are able to maintain engagement for that long period of time, and two, our constant updating of material keeps the child learning and growing.

The facilitators find the system is easy to use and that it has a clear benefit for the children and adults with ASD so that the parents are willing to keep using it over that long period of time. Robot-Assisted Intervention is an exciting new paradigm for learning and therapy. Our library of lessons, activities and therapeutic interventions is growing rapidly. We look forward to growing the community of people using our tools, and to continuing to help children and adults to learn and grow.

FINANCIAL DISCLOSURES

This work was done in a collaboration between several Public-School Districts and other institutions and families by MOVIA Robotics with the intention of developing and refining commercial products and services for the benefit of special needs students and service providers in the ASD community. The author holds a position at MOVIA Robotics and has a conflict of interest.

Aspects of the system are based on initial research at the University of Connecticut funded by the National Institute of Mental Health:

IMH through R21 and R33 awards (1R21MH089441-01, 5R21MH089441-02, 4R33MH089441-03 Anjana Bhat PI, Timothy Gifford COI). ■

Closing The Gap 40TH ANNUAL

Plan now to join us, in-person and/or virtually, for the

40TH ANNUAL CONFERENCE OCTOBER 19-21, 2022

Pre Conference Workshops: October 17-18, 2022

NEW LOCATION! HILTON MINNEAPOLIS HOTEL

Located in the heart of downtown Minneapolis (14-min from the airport), guests will experience luxury, modern amenities, indoor pool and sauna, Starbucks coffee, UPS store, and all-day dining on site. It's all just steps away from restaurants, bars and nonstop entertainment.

We're excited to return to in-person conferencing!

Overwhelmingly, the feedback from presenters, exhibitors and attendees indicate they're ready to return to in-person conferencing. For those who aren't ready to return to in-person events, we'll be offering a virtual option as well. **Whatever your preference, we have an option to fit your needs.**

Registration rates announced February 15

CONFERENCE

EXHIBIT & SPONSORSHIP OPPORTUNITIES

Network, Learn and Share

Internationally renowned and respected, Closing The Gap has a 40-year history as the industries leading provider of year-round AT resources and training.

Each Fall, individuals turn to the Closing The Gap Conference to see first hand the latest products, to network and to learn.

In addition, as the first AT conference of the school year, exhibitors will have the opportunity to connect with high-level, influential, decision-makers at the beginning of school funding and budget cycles.

[EXHIBIT AND SPONSORSHIP DETAILS](#)

CALL FOR PROPOSALS

Share Your Knowledge and Expertise

Closing The Gap will consider proposals for one-hour or multiple-hour sessions that describe and/or demonstrate successful applications of assistive technology for persons with disabilities.

Groups or individuals who wish to participate should submit their proposals for one-hour and multiple-hour presentations as soon as possible.

Call for Proposals will open February 15, 2022.

Deadline to submit is Monday, May 2, 2022.

Making Play Possible with Easy AdaptATions

When we treat children's play as seriously as it deserves, we are helping them feel the joy that's to be found in the creative spirit. It's the things we play with and the people who helped us play that make a great difference in our lives." - Fred Rogers

Never underestimate the importance of play in child growth and development! Removing barriers and providing access to young children with differing abilities can expand play repertoires and opportunities to socialize. Whether working virtually or face to face, simple adaptations with easily found materials can make play experiences more meaningful. Find potential "barrier busters" in homes, Dollar Stores, hardware stores, and online by "looking at the world through AT colored glasses!"

There is a direct correlation between childhood experiences and independence, attitudes, and success in adulthood. The learning that takes place in the early months of life and beyond through meaningful interaction with people and objects during everyday activities and routines, including play, lays the foundation for understanding the world around us. The importance of play in child growth and development cannot be underestimated. According to Fred (Mr.) Rogers, "Play is often talked about as if it were a relief from serious learning. But for children, play is serious learning. Play is really the work of childhood." Play includes exploration using the senses, ex-

amining how toys and materials "work", discovering new ways to use materials, practicing and refining skills, and more. When children have difficulty playing or fully engaging with their environment, valuable learning opportunities are missed. Play expands the imagination and impacts understanding of cause and effect, communication, and social engagement. Play provides a foundation for the development of higher-level language and learning skills. However, children with disabilities may have different experiences with play which are often limited by difficulty grasping, manipulating, exploring, or assembling play materials. Thus, how they play, play activities they

JUDITH SCHOONOVER, MEd, OTR/L, ATP, FAOTA is an occupational therapist and former elementary school teacher. She is certified as an assistive technology professional (ATP) by RESNA and was a founding member of the Loudoun County Public Schools Assistive Technology Team. Judith has provided direct services in schools for more than 44 years and is a nationally and internationally recognized speaker presenting on the topics of school-based occupational therapy, transition, literacy, and assistive technology. She has authored numerous articles, and chapters in *Early Childhood: Occupational Therapy Services for Children Birth to Five*, *Occupational Therapy for Children* (6th-8th eds.), *Best Practices in School Occupational Therapy*, *Assistive Technologies*, and *Occupational Therapy and Transitions: A Cross-System Perspective*. She participated in National Association of State Directors of Special Education (NASDSE) workgroups addressing response to intervention (RTI), transition, and virtual schools. Currently, Judith represents AOTA on the National Joint Committee (NJC) for the Communication Needs of Persons with Severe Disabilities; she is a Strand Advisor for The Assistive Technology Industry Association (ATIA) Conference and serves on the editorial board of the *Assistive Technology Outcomes and Benefits (ATOB) Journal*.

select or are provided with, and what they learn from their playing are affected.

Successful participation in play is influenced by the ability to access the environment, participate, and become engaged. Using the principles of Universal Design for Learning, including multiple means of engagement, multiple means of representation, and multiple means of action and expression, it is possible to create meaningful play experiences. Zabala and Mistrett (2011) suggest early childhood teams use the SETT Framework to determine strengths and barriers, asking themselves what the child needs to do, what is preventing them from “doing”, and considering their current interests and abilities. Teams should then review the child’s daily environments (home, playground or daycare, playground, etc.), and discuss who else is in those environments, what equipment and materials are available, and what resources exist for the caregivers. In “setting” children up for successful play experiences, it is important to think about the child’s interest in play, their frustration level, play opportunities with family and peers, and the child’s ability to physically manipulate objects and engage in sensory exploration.

Providing options for movement and exploration allows children to develop new skills and learn more about the world around them. Positioning and mobility supports can make the difference between encountering obstacles and providing access to play. “Children with mobility limitations have been shown to also demonstrate limitations in cognition and attention, spatial awareness, visual perception and postural responses, and social and emotional development. In the realm of spatial awareness, children are reported to lack object permanence and are not appropriately wary of heights” (Tots ‘n Tech, 2012). Often, the foundation for successful play experiences begins with equipment and strategies used for positioning, seating, and mobility to improve body stability, provide proximal trunk, and head support needed for viewing and accessing the environment. The [Wisconsin Assistive Technology Initiative \(WATI\) documents](#) give an excellent overview of Assistive Technology for Seating, Positioning and Mobility and could be considered a valuable resource to determine what positioning options are needed. There are many easily found materials that can function as a starting point, a workable solution, or as a prototype for a more sophisticated or long-range positioning device. Easily found materials include rolled towels, bolsters, pool noodles, laundry baskets, and PVC pipe creations, used alone or in tandem with traditional furnishings. Specifically shaped bolsters for propping or seating can be constructed from items found around the house or community including large cans, oatmeal boxes, mailing tubes, and more. These items can be taped together if necessary to reach the desired length and wrapped with foam or towels for comfort. Customizable seating can be as simple as placing a pool noodle or rolled towel at the back

of a chair and anchoring a box with the front legs of a chair so that the child sits securely with their feet flat and their back is supported. A floor-sitting barrel seat can be constructed from a 5-gallon plastic bucket found in most hardware stores. A U-shaped cut is made in the bucket so that a child sitting in the resulting “chair” is provided with trunk support. Adding a cushion seat and or pool noodle around the hips helps provide a snug fit. This customizable solution can be cut high for children who require a great deal of support or low for those that do not. It can be cut off periodically to gradually decrease support as needed. Directions for the barrel seat can be found on the fabricatesolution@udel.edu website. [Additional suggestions for positioning](#) can be found on the Center for Technology and Disability website, however, that site may be closing at the end of 2021.

The Let’s Play! Projects from the University at Buffalo identified a number of strategies to consider when creating a successful play environment, beginning with light tech approaches to readily available toys. Making small modifications and adaptations, changing one or more components of the toy, or engineering the environment can promote a wider range of play opportunities. The Let’s Play! Projects suggest that adaptations to attach, stabilize, make the toy easier to hold, or confine the toy can be made with readily located materials.

Environmental Supports for Accessible Play	
POSITIONERS	Mats, wedges, Boppies, bean bag chairs, cylindrical pillows, booster seats, T-stools, footrests, laundry baskets
STABILIZERS	Velcro™, (Rubbermaid) shelf liner, suction cups, carpet squares, magnets or magnetic tape, cookie sheets
CONFINERS	Hula hoops, box lids, planter bases, trays, inflatable boats or swimming pools, tents
ATTACHERS	Links, snaps, Velcro™, shoelaces, straps, binder clips, shower curtain rings
HIGHLIGHTERS	Colored tape, colored Velcro™, Wikki Stix, yarn, contrasting background
EXTENDERS	Model Magic, spice bottles, knobs, sponge rollers, popsicle sticks, paint sticks, PVC pipe
SIMPLIFIERS	Limited number of toy or piece choices, contrasting color surface, removing clutter
Adapted from Let’s Play! Projects	

These basic support items can be the foundation for an in-

dividual intervention, or for a tool kit that can be gathered and used to adapt many commercially found toys to make them more accessible to all children. Many of those items can be gathered from Dollar Stores, home improvement stores as well as garage sales, kitchens, and junk drawers. The [We Are Teachers](#)

Image 1: A variety of items including farmer and animal puzzle pieces, matching picture symbols, and a musical toy depicting a farm scene are stabilized and displayed by Velcroing them to a carpet square.

Image 2: A commercial magnetic dress up doll and clothing is attached to a cookie sheet and fastened to an adjustable angled PVC frame. Note visuals related to play activity in foreground.

website has a huge list of [Dollar Store hacks](#) that might serve as inspiration. Simple items such as Dollar Store carpet mats can be used for stabilizing toys. They have a flat knap which is Velcro sensitive and they are thin enough to cut into customizable sizes. It is easy to create a mash-up of several different toys to go along with a theme. For example, a musical toy, puzzle pieces, and visuals Velcroed to a carpet square can illustrate a song such as Farmer in the Dell or a story about life on the farm (Image 1). Dollar Store cookie sheets can be used for all kinds of displays and to stabilize toys secured with magnets (Image 2). Because of their raised edges they can be used to contain parts and pieces of various toys, puzzles, magnetic letters and so on, as well as act as boundaries for painting and messy play (think shaving cream). Dollar Store plastic shoeboxes with lids can be converted into small DIY lightboxes, or "[shoebox play tasks](#)". Shoebox play tasks can be created from repurposed items such as bottle caps, shoe-laces, small toys, and so on based on the child's interest. The lid of the box can serve as the play surface with Velcro applied to secure toys or parts of activity. Holes can be cut in the lid for "put in" activities. Best of all, when playtime is over, the shoebox can also function as a storage container for all the parts (Image 3).

Image 3: Dollar Store plastic shoebox, pom poms, snack containers, and tongs become a color sort by Velcroing snack containers on the lid of the box. Store items inside box.

Image 4: A variety of tools for play can be constructed from PVC pipe and connectors including grasping assists and tablet or toy holders.

Image 5: Flexible PVC toy spinner. Change toys with the season, theme, or interest of the child.

PVC

PVC pipe, PVC joints, and PVC cutters, found at any hardware store carrying plumbing supplies can be used to build and customize an endless array of play supports (Image 4). This inexpensive material is lightweight, fairly easy to cut, and many of the items constructed from easels to sensory tables can be disassembled in minutes. PVC is sold in various lengths and diameters. A 10-foot length of 1/2 in diameter PVC pipe costs less than \$3. The connecting joints (T joints, elbow joints, end caps) range from around \$0.35 to a dollar and are less expensive if bought in bulk. PVC can be combined with toys and other items of interest. The [Paths to Literacy](#) website provides ideas on how to engage children using PVC frames as starting points. A large clear plastic lidded jar “threaded” on a PVC frame so that it can be spun can offer endless possibilities for exploration (Image 5). The [PVC: Practical, Versatile, Cheap AT Supports](#) booklet from the ATEN Coordinating Unit at Orange County Schools in Florida contains easy-to-follow directions for switch stands, tilting eye gaze frames, mobile floor stands, toy “corrals” and much, more. For additional PVC DIY ideas, type DIY PVC (fill in the blank) into your browser.

EASELS

Easels can be used to support books, communication displays, pictures and other objects providing an angle that is easily viewed. They are especially useful for children who cannot hold these materials themselves. Additionally, easels allow play partners to display materials and have their hands free to assist the child during play. Easels can be [constructed from PVC](#), from the U-shaped cardboard packaging insert found in some bed

sheet sets that keep the sheets stacked and folded, from pizza boxes, or by turning a three-ring binder inside out and stabilizing it on shelf liner. An advantage of using the three-ring binder as an easel is that it can also be used to display step-by-step pictures inserted into sheet protectors to guide or structure play activities. [Pizza box easels](#) are great inexpensive do it yourself supports. They are lightweight, portable, and adjustable. Depending on how they are assembled, they can be collapsed and art tools and materials can be stored inside (Image 6).

Image 6: Collapsible pizza box easel can double as an art supply container.

SENSORY: BAGS AND BOTTLES AND BALLS AND BINS!

Sensory learning is an important aspect of growth and development for all children. Information taken in through seeing, hearing, touching, tasting, and moving help children learn about the world around them. For certain children, sensory experiences are inaccessible due to differences in the way they hear, or see. For others, sensory experiences are aversive. There are many ways to provide sensory experiences so that children can receive the cognitive, language, fine motor, or social benefits sensory play provides. Play doughs are often associated with sensory play yet children with sensory sensitivities may not be able to tolerate the overall feel, texture, or scent of the dough, and ingredients in some commercial and homemade doughs may trigger allergic reactions. Options for providing successful dough experiences include introducing it gradually, trying homemade (and even edible) doughs, having the child participate in making the dough, covering the dough in plastic, or placing it in a bag so the child does not have direct contact with the dough, and adding a preferred or calming scent to the dough. Expanding sensory experiences can also be accomplished through the creation of sensory bags. Sensory bags are a way for children who mouth objects or resist coming in contact with certain items or surfaces to safely explore different textures, colors, and sounds. Simply type “sensory bags” in your browser for hundreds of ideas. Here are [forty-eight quick sensory bags to make for your kids](#) to get you started. Along the same line, sensory bottles are other ways to display and explore objects of interest and can serve as tools that can help children self-regulate. Sensory balls are created with balloons and fillings such as flour, lentils, or play dough. Sensory bins also serve as containers/confiners for structured exploration. They can be purchased from school supply or craft stores or created from plastic totes and lids. Add a PVC frame and you have a height adjustable sensory table which can be disassembled and stored in the tub (Image 7). There are wonderful free resources online such as rules for using sensory tables, sensory bin scavenger hunts and checklists, I Spy language activities, and more. The [OT Toolbox](#) website has a virtual sensory room that can be downloaded. When you click on the sensory objects in the sensory room, you will be directed to different on-line sensory tools.

ADAPTING BOARD GAMES

There are many ways to adapt board games so that everyone can play. If the board game is too difficult, the rules can be changed, and the number of choices, spaces, or cards can be reduced. Game boards and cards can be scanned to enlarge them, then laminated for durability. Add a foam piece or felt furniture pad on the corner of each game card to separate them or build up the entire card with sticky back fun foam. Velcro can be added to game boards and game pieces so that

Image 7: Height sensory table constructed from PVC pipe, connectors, and a plastic tub with lid can be filled with a variety of items. Table can be disassembled and stored in tub.

Image 8: Make game pieces easier to manage like a hands free card holder from a pool noodle or a di shaker plastic jar.

pieces remain upright and in place and provide a multi-sensory way to count spaces, and spaces can be highlighted for visibility and borders. Textures can be added to dice, spinner, gameboards, and game pieces using puffy paints, Wikki Stix, fun

foam, etc. to make them easier to feel and grasp. Dice can be enlarged and “shaken” using a digital pair or rolled inside a jar to prevent them from scattering. Game or playing cards can be held and arranged for viewing by placing them in the teeth of a hairbrush, in slits cut in egg cartons or cardboard shoebox lids, in a large chip bag clip and any number of other items found around the house (Image 8).

PUZZLES

Puzzles provide learning and enjoyable experiences for children of all ages and abilities and may increase eye-hand coordination and dexterity skills. Assembling puzzles helps to develop learning skills through repetition and problem solving. By carefully choosing and adapting puzzles, a varied assortment can be available to meet the needs of all students. Sometimes simply cutting notches in the side of each of the puzzle pieces may make them easier to grasp, or adding handles such as knobs, thread spools, PVC pipe sections or joints. If the child cannot grasp a handle, a small piece of loop Velcro can be placed on the top of each puzzle piece and a mitt or cuff with hook Velcro can be placed on the child’s hand. Magnets can also work. A metal thumbtack can be pounded into each puzzle piece. Then, the child can use a mitt, strap, or stick with a magnet on it to remove the puzzle pieces.

To keep the puzzle from sliding around during play, attach suction cups to the bottom of the puzzle, use a non-slip material such as shelf liner, or Velcro the puzzle to a carpet square to keep it in place. A spring clamp or C-clamp can also be used to hold the puzzle on a table or tray. Puzzle pieces can also be attached to the puzzle using lengths of elastic to keep them within reach (Image 9).

Add additional sensory features to puzzle pieces by gluing on buttons, knobs, fabric, and other items. Caution and frequent inspection should be conducted to ensure such adaptations are firmly secured to eliminate potential choking hazards. Use black cloth or white cloth on the table under the puzzle pieces to provide contrast between the pieces and the background. If the child has trouble visually discriminating the edges of puzzle pieces that are very similar when in the puzzle, outline each piece using a permanent marker in a high contrast color to make the edge more visible, or outline the edge of the top surface of each piece with clear glue to create a slightly raised edge to help the child discriminate the shape by touch.

ADAPTING BOOKS

Adapting books can enhance literacy experiences and exemplifies the UDL principle of providing multiple means of representation. Adaptations include making books easier to manipulate (turning pages or holding) and text easier to understand (simplified, changed) and remember. The original idea of the story is maintained but may include altered text,

Image 9: Puzzle pieces with enlarged knobs are fastened to puzzle with lengths of elastic. Puzzle is stabilized on carpet square.

clear visual representations, and manageable page layouts to increase the potential for participation. Book adaptations can be prop- or paper-based or created electronically using software programs or apps. Scaffolds designed or displayed with “everyday technologies” such as mobile technology, commonly used software such as PowerPoint, web-based tools such as Google slides, Tar Heel Reader, Tar Heel Shared Reader, Book Creator, and classroom manipulatives provide a multitude of creative opportunities for everyone to engage in reading activities (Schoonover & Norton Darr 2016). Copyright laws allow for the creation and use of books in an alternate format solely to make the book accessible to persons with disabilities. A copy of the original book is required when using an adapted book. Consider also developing original stories with the child as the “star” or main character. Photos and items experienced by the child and familiar family voices narrating may also pique interest.

Much like potential accessibility solutions for board game pieces and toys, here are suggestions for simple adaptations that work well for providing access to hard copies of books:

- **Create space between pages with page “fluffers”** (foam, weather stripping, sponges, giant paper clips, clothespins) to make them easier to turn. A trip to the office supply store can provide you with many possibilities. Decorative plastic clips and the assorted sizes of bulldog clips are just two that can be used straight out of the package. Clip “fluffers” of your choice to the pages of the book at intervals starting near the bottom of the first page and placing them an inch or two higher on each page progressing through the book.
- Use book holders for stabilization (recipe book holders, card holders, acrylic display frames, easels), or place hoop Velcro on the outside covers of the book and attach to a carpet square.

Image 10: Lit Kit A mash up of books and toys such as this one centering around the word go can become a playful learning experience.

The [Paths to Literacy](#) site promotes the design, provision and enjoyment of tactile books for children who are blind or partially sighted and provides advice and information about designing, producing, using, buying, and borrowing tactile books. Additional resources for making story boxes, using story boxes with older children, making and using page turners, making object books, making squishy books, creating interactive sensory books using objects, and making reflective books can be found on [The Nevada Dual Sensory Impairment Project](#). Ways to adapt books are numerous and limited only by your imagination. Consider expanding the reading experience into a “Lit Kit” with related stories, puppets, visuals, props, games, and songs (Image 10). Provide readers with a voice and a choice using visuals and or incorporating their customary communication method (Image 11).

SWITCHES

Off the shelf battery operated toys can be switch-adapted with online instructions and materials from a hardware store. For example, Therese Willkomm provides instructions on how to create a [business card switch](#) and [battery interrupter](#) for pennies. Positioning the switch and device may require the use of mounts to put each object in the optimal position for access. Mounts can be fabricated from easily found materials such as non-skid shelf liner, suction cups, Velcro, PVC pipe, and C-clamps (Image 12).

DIGITAL PLAY

There are many free online sites for children to engage in digital play with and without switches. Check out [Free Websites to Use with Switches in a Special Ed. Classroom](#), [Switching Skills](#), [Ian Bean SENict](#), and [Toy Theatre](#). Tar Heel Gameplay has a collection of free, easy-to-play, and accessible videos. Each game is speech enabled and may be accessed using multiple

Image 11: Give readers a voice and a choice with a visual choice board.

Image 12: PVC switch holder allows the user to use a swipe motion to contact switch.

interfaces, including touch screens and 1 to 3 switches. Register to create your own. It only takes minutes to make an activity with your student's specific interests in mind. Choose a video from YouTube and upload it. You can set stop intervals or have them occur randomly. Targets to resume play can be placed around the screen to help eye gaze users learn to access different quadrants of the screen.

For children who have difficulty using a standard mouse for computer games and electronic books, add Velcro to the button to provide a tactile or visual cue, or add a block, bottle cap, or plastic ring to the button to enable physical access. A one-button mouse may be an alternate solution. Remember to explore mouse accessibility options (slow down speed, increase cursor size, mouse trails, etc.). Touch screen navigation can be enhanced through the use of grids as well as taking advantage of accessibility options such as AssistiveTouch,

STRUCTURING PLAY

Research suggests children with disabilities may not play in the same manner as their typically developing peers (Barton, et al, 2019). Just as shared reading guides and supports literacy experiences and partner assisted communication models and enhances language development, it may be necessary to "teach" and model play behaviors. Hasbro Toys and The Autism Project have collaborated to provide free [TOYBOX TOOLS](#), to provide a form of structure to help children understand and engage in play. Instructional videos, printable materials and play-mats have been designed to help children learn how to play with selected (Hasbro) toys and games as well as support families, caregivers, and teachers to make play with these items more fun and enjoyable at the child's own pace. [Resources](#) include Countdown Timers to encourage an understanding of time passing, Wait Cards to cue child when it is time to wait, Turn Taking Cards to visually communicate whose turn it is to play with a toy or game, Help Cards to cue child to request help and provide an alternative means of communicating that need, Break Cards to assist child in requesting a break when play becomes frustrating, First/Then Board and Sequencing Boards, Play Mats, and Play Books. Play Books include up to three levels: basic play, expanding play, and social play. Each Play Book includes basic text to support the activity and actual photographs illustrating each page. Similarly, the Melissa and Doug Toy Company has partnered with the American Academy of Pediatrics to offer [The Power of Play](#) digital booklet which contains practical ideas for parents, caregivers, and professionals who work with children, including:

- Play advice and resources for parents
- Play guides based developmental stages that help address behaviors such as managing big feelings, making friends, and paying attention

- Play to the Rescue" ideas to help caregivers refrain from the temptation of handing a child a digital device at restaurants, in cars, on bad-weather days, and during everyday errands and routines.

The play behaviors developed in childhood including exploration, social interaction, problem-solving, and persistence to task provide a foundation for the skills needed for life. With the right expectations and interventions, it is possible to enhance participation in play. Removing barriers and providing access to young children with differing abilities can expand play repertoires. Whether working virtually or face to face, simple adaptations with easily found materials can make play experiences more meaningful. When solutions are easy to find, understand, and implement, they are more likely to be used, and can serve as a gateway to acceptance of more complex interventions. Looking at the environment through "Assistive Technology glasses" and acting upon what is seen can make the difference between children watching play from the sidelines and being active participants. Imagine the possibilities!

UPCOMING LIVE WEBINARS

PROFFESIONAL DEVELOPMENT

CEUs are provided by the AAC Institute and are available for live webinars at no additional fee (does not include sponsored webinars unless noted). A 60-minute webinar = 0.1 CEUs. A 90-minute webinar = 0.2 CEUs

Making Switch Activities Fun!

By Heidi Brislin
Monday February 21, 2022
3:30 pm – 5:00 pm (Central Standard Time)

Heidi Brislin, Occupational Therapist and Assistive Technology Specialist in the Edmonds School District and Special Education Technology Center and the owner of Heidi Brislin OT Consulting in Kingston, WA. Heidi has extensive experience in school-based practice and outpatient adult rehab settings. She is a graduate of Boston University and University of Washington. Heidi is passionate about teaching teams to create authentic learning opportunities for all children, improving literacy skills, switch access, power mobility and helping children become autonomous communicators.

Includes 0.2 IACET CEUs, 1.5 ACVREP and/or Closing The Gap Issued Certificates of Contact Hours.

Description

What? You can do that with a switch? We all learn best when we are interested, engaged, and excited about what we are doing. Research shows that students who are switch users need frequent opportunities to practice their switch skills using a wide variety of engaging activities and be able to practice them across settings.

In this session, you will learn to create fun and engaging switch activities using GoTalkNow and a PowerLink4 for – well, almost anything. This session will also include fun activities to participate in the Arts. This session will be jam packed with ideas and you will leave with resources you can use right away, that you can share with families and train staff!

Heidi Brislin, Occupational Therapist and Assistive Technology Specialist in the Edmonds School District and Special Education Technology Center and the owner of Heidi Brislin OT Consulting in Kingston, WA. Heidi has extensive experience in school-based practice and outpatient adult rehab settings. She is a graduate of Boston University and University of Washington. Heidi is passionate about teaching teams to create authentic learning opportunities for all children, improving literacy skills, switch access, power mobility and

helping children become autonomous communicators.

Learning Outcomes:

1. Participants will be able to describe at least one switch accessible activity to allow for participation in general education science, art and/or music classes..
1. Participants will learn to create 3 different switch activities using GoTalkNow Lite on the iPad to work on auto or step scanning.
2. Participants will learn 3 ways to use the Power Link to create fun, motivating, and inclusive learning and leisure activities.

Supporting Emergent Writing with AAC Systems

By Heidi Rabe
Thursday, March 10, 2022
3:30 pm – 5:00 pm (Central Standard Time)

Heidi Rabe, M.A., CCC-SLP/L is a Speech-Language Pathologist, Owner, Authentic Expression, LLC with over 20 years of experience working with children and adults with a variety of complex communication challenges and specializes in AAC.

Includes 0.2 IACET CEUs, 1.5 ACVREP and/or Closing The Gap Issued Certificates of Contact Hours.

Description

People with complex communication needs are often not given opportunities to write. Research shows emerging writers benefit from using alternate pencils, such as their AAC systems, and seeing others using the same method to compose for authentic purposes. This webinar will demonstrate how emerging writers can use their AAC systems to compose using a variety of authoring tools for authentic purposes.

We will review the writing process, give examples of how emergent writers can use their AAC systems to write, and discuss the balance of a combining spelling/alphabetic formulation and whole-word composition. Supporting emerging writers can be fun, meaningful, and authentic and this webinar will

REGISTER NOW!

UPCOMING LIVE WEBINARS

give work samples and practical tips to engage your emergent writers.

Heidi Rabe, M.A., CCC-SLP/L is a Speech-Language Pathologist, Owner, Authentic Expression, LLC with over 20 years of experience working with children and adults with a variety of complex communication challenges and specializes in AAC.

Learning Outcomes:

1. Participants will be able to describe at least 3 authentic purposes your students can use speech-generating devices to compose written work during the day.
1. Participants will be able to compare and contrast using alphabetic and whole word methods of composition for emergent writers.
1. Participants will be able to describe at least 3 strategies to support emergent writing.

AAC / AT Coaching Models Explained

By Heidi Rabe

Wednesday, April 6, 2022

3:30 pm – 5:00 pm (Central Daylight Time)

Includes 0.2 IACET CEUs, 1.5 ACVREP and/or Closing The Gap Issued Certificates of Contact Hours.

Description

When you hear the word coach, what do you think of? A fancy bus or where most of us sit on planes? Someone giving directions in the moment, calling plays, instructing repeated practice, or providing resources? There are many different types of coaching and evidenced-based coaching strategies. In order to support our students/clients, professionals need to have a variety of coaching strategies in their toolboxes.

During this presentation, relationship-driven, stakeholder-centered, and client-centered models will be discussed, including pros and cons of each. We will also discuss different coaching techniques within each model to help guide participants to choose an appropriate coaching model for their students/clients and setting(s).

Heidi Rabe, M.A., CCC-SLP/L is a Speech-Language Pathologist, Owner, Authentic Expression, LLC with over 20 years of experience working with children and adults with a variety of complex communication challenges and specializes in AAC.

Learning Outcomes:

1. Participants will be able to describe at least 3 differences between relationship driven, teacher centered, and student centered coaching.
2. Participants will be able to identify at least 5 clients/students/teams that student-centered coaching would be appropriate for.
3. Participants will be able to identify at least 3 new coaching techniques to support your current caseload.

LOG IN TODAY!

Do you need to document your learning?

Members simply view an archived webinar and, upon completion, can request CEUs and/or certificate a of contact hours. *It is really just that simple.*

Adaptation Inc. – LinkSwitch

The LinkSwitch is a switch-latch timer that enables individuals to activate battery-operated devices using any adaptive switch with a standard plug. Simply plug both the switch and the toy or other battery operated device into the LinkSwitch, then touch the switch to activate. All LinkSwitch devices come with dual-channel modes and add latching, timing, and reverse timing capabilities to battery-operated devices.

Introducing TD Pilot: Eye tracking for iPad

TD Pilot is an eye-controlled communication device for iPad. Designed to empower people with conditions such as ALS/MND, spinal cord injury or cerebral palsy to communicate and use their favourite apps, this iPadOS-based speech generating device features the world's leading eye tracker.

TD Pilot provides native integration of eye tracking in iPadOS and has been certified to meet Apple performance standards. It enables communication and full use of iPad apps for people with disabilities, via eye control and other access methods.

T-Mobile Accessibility – IP Relay and IP Relay App.

Both IP Relay and IP Relay Mobile App from T-Mobile allow people who are Deaf, Hard of Hearing, DeafBlind or have a Speech Disability to use an internet connection, a computer or mobile device (Mobile App – Android or iOS-powered device to connect with) and a relay operator. You type what you want to say to the operator, then the operator relays the message to your caller and types their response back to you.

(IP RELAY) FEATURES AND BENEFITS

- Save your conversation
- Choose language preference (English, Spanish)
- Ability to make Spanish language relay calls
- Ability to make Two-line Voice Carry Over (VCO) calls
- Ability to make Two-line Hearing Carry Over (HCO) calls
- Change font size/colors and background colors
- Ability to manage typing transmission speed
- Ability to receive Text Mail when you are not available to answer IP Relay call
- Live online chat with Accessibility Care
- Make 911 emergency calls

(IP RELAY) FEATURES AND BENEFITS

- Make and receive IP Relay mobile app calls
- Works on Android OS 6.0 or higher and iOS 9 or higher
- Ability to save conversations
- Ability to receive Text Mail when you are not available to answer IP Relay call
- Ability to make Spanish language relay calls
- Ability to change font size/colors and background colors
- Access to phone's contact list, call history, and live Accessibility Care representatives.
- Make 911 emergency calls (Although IP Relay can be used for emergency calling, such emergency calling may not function the same as traditional 911/E911 services.)

CSS MicroSystems GmbH – Call Safe! With Your Communication Device

ASSURED CALLING! WITH YOUR COMMUNICATION DEVICE

Communication via language and writing is an important basic need. Being able to call other people is also an important form of communication, and being able to call confidently is perhaps the most important. The possibility of calling assistants or relatives by radio outside of the room creates security, more privacy and thus a significant increase in quality of life. For those communicating, an important addition to their communication device supports.

A flexible, wireless call system is particularly important if people are not looked after individually or if the domestic situation does not make complete monitoring possible. It helps to avoid emergency situations or simply to give a feeling of security.

Across several rooms, it is often difficult acoustically to hear ringing tones from communication devices with certainty.

With AssistX Mobil, calls can be triggered directly via the electronic communication aid via touchscreen, eye control or scanning. The device only needs to have environmental control functions (infrared or Easywave radio).

AssistX Mobil can also be controlled directly with sensors and buttons. In addition, alarm outputs from pulse oximeters or ventilators can be used to trigger calls.

Calling is often the most important and fundamental way of communication. Here AssistX Mobil is a practical, safe and flexible tool.

Cosmo by Filisia – Creative Learning for People with Special Education Needs and Disabilities

Cosmo is an award-winning system that changes the way that early years learners and young people with SEN train their physical, cognitive and communication skills.

- Smart, dynamic buttons
- Specialist designed iPad activities
- Curriculum based lesson plans
- Data-driven game play for home or the whole classroom

HOW IT WORKS

- Cosmo has 14+ activities designed by teachers, and occupational, physical and speech & language therapists
- Use Cosmo to train: Turn-taking, Sequencing, Joint attention, Storytelling, Coordination, Leadership skills, Acoustic Reactivity, Cause&Effect, Vocalisation and more

Eschenbach Introduces the New Vario Digital 22 FHD Foldable Desktop Video Magnifier for Patients with Vision Loss

Eschenbach Optik of America, Inc. just introduced the Vario Digital 22 FHD, its new foldable and transportable desktop video magnifier for patients with macular degeneration, diabetic retinopathy and other eye diseases causing vision loss. Like the original 16-inch model, the device features an easy-to-use interface and compact design, but it also includes expanded features such as an even larger 21.5" full HD monitor with optical/digital zoom and an increased magnification range of 1.6x – 100x.

The Vario Digital 22 FHD has large tactile buttons and turn dials with voice output when in the menu mode making it extremely easy for those with vision loss to operate. It provides bright LED illumination which is adjustable to provide uniform, shadow-free viewing. And the widescreen format of 16:9 and a tilting camera provide a large viewing area making it easier for users to read large documents like newspapers.

Touch Your World – Dot Pad by Dot Incorporation

Dot Pad is a multi-layered braille display. With active braille cell technology to show graphs such as shapes and sizes of figures and images. This will bring tactile communications from reading to visualization. Simply put, it is an iPad for the blind. As a multi-layered braille display (300 cells; 10 x 30), Dot tactile display will be able to show images, graphics, and 2-dimensional figures, and more.

Access any lengthy information such as e-mails and e-books, formulaic calculations, graphical representations, and data input.

It can provide a general framework for improving learning and teaching of Science, Technology, Engineering and Mathematics (STEM) for the visually impaired students.

Dot Pad is a multi-layered braille display. With active braille cell technology to show graphs such as shapes and sizes of figures and images. This will bring tactile communications from reading to visualization.

Introducing OXSIGHT Onyx® – Enjoy the Gift of Intelligent Vision

THE MOST ADVANCED SMART GLASSES THEY'VE EVER MADE – USE THEM STRAIGHT OUT OF THE BOX.

- **Wearable** - The smallest and lightest VI smart glasses in the category – up to 75% smaller than the nearest competitor. Wear them as glasses, use as a hand-held magnifier or keep on a lanyard for when you need them.
- **Simple** - Through years of development and conversations with users, they've refined their products to be the simplest and fastest to use smart glasses you can get. From rapid smart charging to tactile buttons and adjustable lenses, Onyx are ready for you to use immediately.
- **Intelligent** - Thanks to their smart technology you can enjoy a range of effects and automatic recognition of objects, text and faces. Onyx are ready to ensure you get the most from your vision.

SEE MORE, ON THE GO

Easy to pick up and use immediately, OXSIGHT Onyx has a range of intelligent features that enhance your vision in an instant. From face recognition and tracking, text detection, automatic night mode and even a TV mode, you can see better in every moment.

How Teachers Are Using the eGlass Lightboard

eGlass is an illuminated transparent writing glass with a built-in camera, that captures your face and writing in the same picture, boosting student engagement to unprecedented levels. Imagine never turning your back to write again. Imagine a tool that will help you close the gap. That's eGlass.

HOW IT WORKS

- Integrated camera captures writing and teacher's face
- The image is 'flipped' so writing reads left-to-right
- Connects to computer via USB cable
- LED lighting is injected into glass
- Live video is displayed on projector or flat panel
- Any existing lesson plans, any format can be brought on eGlass and written on

DESIGNED FOR THE CLASSROOM

- Write on eGlass normally. ChromaClear technology gives ink a vivid glow.
- Built-in camera captures the instructor's writing and face, and flips the image so students see it correctly.
- Plug into laptop to display image and add digital content.
- Plug into screen or projector to display in-class.

Rifton – Pacer Gait Trainer – The therapist inspired gait training system

DYNAMIC. READY TO GO EVERYWHERE.

Gait training has come a long way since we introduced our first model in the 1980s, and our Pacer continues to evolve and improve to meet our customers' needs. Over the years your suggestions have helped us keep our design at the cutting edge.

WHY DYNAMIC?

Walking is complex. When they talk about dynamic gait training they refer to the often unobserved but significant shifts of body and weight that occur in typical gait patterns. In the therapy community there is a growing consensus that a well-positioned pelvis in combination with dynamic movement is critical to successful gait training. A specialized gait trainer, like the Pacer, helps achieve this proper positioning and provides the dynamic weight-bearing and weight-shifting needed for a more natural gait pattern and easier stepping.

12 volt NI-MH High Capacity Battery and Charger

Adaptive Switch Laboratories, Inc.

Price: \$295.00

Device: switch interface

Disability: physical

The ASL 515 is a 12 volt power source with charger that is used with 12 volt DC sensors without a power wheelchair. This high capacity battery will last up to two days before charging.

12/24 Volt AC Power Source Wall Plug

Adaptive Switch Laboratories, Inc.

Price: \$60.00

Device: switch interface

Disability: physical

The ASL 505 is for accessories or 12 or 24 volt sensors to plug into the wall for use with computers and ACC devices.

2 ECU Interface Cable with 2 Mono Plugs

Adaptive Switch Laboratories, Inc.

Price: \$180.00 - \$210.00

Device: environmental control

Disability: physical

ASL 802-2, 802-3 and 802-4 converts directional commands from the ECU port into separate mono plugs. It has two, three, or four output jacks from the left and right signal on the driver control that can be used for tilt, recline, computer/communication access or any device that requires a mono.

2-Switch

Compusult Limited

Price: \$129.00 - \$159.00

Device: keyboard emulator, mouse emulator, switch interface

Disability: cognitive, learning, physical

The 2-Switch is a USB-based device that can be preprogrammed with two keyboard inputs, two mouse actions or one keyboard input and one mouse action. The 2-Switch DIP is a user-configurable version of this product.

4 Choice Sequential Scanner for the Visually Impaired

Enabling Devices

Price: \$429.95

Device: dedicated communicator, speech output

Disability: cognitive, physical, speech

Our communicator provides illumination of your icons. It is also extremely flexible, four scan modes, choice of the number of fields to use and two mounting systems.

4-Level Communication Builder

Enabling Devices

Price: \$357.95

Device: dedicated communicator, speech output

Disability: cognitive, physical, speech

Communication Builder now with four levels. Comes with four easy to change frames (one, two, four, eight and 16 window options). Retains all your recordings on all four levels when switching between frames. Total record time is 300 seconds.

6dot Braille Label Maker

LoganTech

Price: \$749.00

Device: alternative keyboard, braille input, braille output

Disability: vision

The 6dot Braille Label Maker has everything you need to create high quality Braille labels in any language. Powerful but simple, the 6dot's ergonomic design makes it easy for children and adults of all ages to label practically anything at home, school, the office or on the go.

6dot BrailleCoach

LoganTech

Price: \$995.00

Device: dedicated communicator, speech output

Disability: cognitive, learning, physical, speech, vision

The Logan BrailleCoach Braille training device accelerates attainment of Braille literacy by allowing convenient, self teaching of Braille. Prerecorded and easy to customize Braille embossed tags trigger BrailleCoach audio output for independent, interactive learning.

7-Level Communication Builder

Enabling Devices

Price: \$369.95

Device: dedicated communicator, speech output, speech trainer

Disability: cognitive, learning, physical, speech

The 7-Level Communication Builder is a self-contained communication device. It allows the user to record and play back from one, two, four, eight or 16 different messages per level. There are seven levels for recordings. Total record time is 300 seconds.

7-Message Take and Talk Go! Board

Enabling Devices

Price: \$249.95

Device: dedicated communicator, speech output, speech trainer

Disability: cognitive, learning, physical, speech

Record seven messages up to 35 seconds each. You then play the message back by removing or placing one of the 3 x 3-inch icons on one of the light sensitive compartments. Wall mounting hardware included.

8-Pin Extension Cable

Adaptive Switch Laboratories, Inc.

Price: \$78.00

Device: environmental control

Disability: physical

The ASL 811 8-Pin Extension Cable has 8-pin round connectors on each end and is to be used as an extension for an ASL drive control package.

Accent 1000

PRC-Salttillo

Price: \$7295.00

Device: keyguard, switch, dedicated communicator, environmental control, speech output, speech trainer

Disability: cognitive, learning, physical, speech

Accent 1000 offers advanced functionality and user-friendly features, making communicating fast and easy. With its portability and bright 10-inch display, Accent 1000 is easy to access and provides an extensive vocabulary. It's also available as a powerful host for our NuEye Tracking System. The Accent 1000 is configured as a dedicated device to meet the functional specifications of the Medicare/Medicaid funding requirements.

Accent 1400

PRC-Salttillo

Price: \$7595.00

Device: keyboard emulator, switch, speech output, speech trainer

Disability: cognitive, learning, physical, speech

Accent® 1400 is a dedicated speech-generating device (SGD) that offers user-friendly features to make communicating fast and easy for individuals with speech impairments. The large 14" screen is the perfect choice for individuals with complex access needs or those who want larger icons. The Accent 1400 also offers multiple access options and accommodates the NuEye® Tracking System and the NuPoint® Head-tracking System. The Accent 1400 is configured as a dedicated device to meet the functional specifications of the Medicare/Medicaid funding requirements.

Accent 800

PRC-Salttillo

Price: \$6595.00

Device: keyguard, switch, dedicated communicator, speech output, speech trainer

Disability: cognitive, learning, physical, speech

Accent® 800 is a dedicated SGD, locked from running Windows applications meeting Medicare and Medicaid funding guidelines. The Accent 800 offers advanced functionality and user-friendly features, making communicating fast and easy. It's the smallest and most portable PRC device that offers Unity®, the proven language system from PRC.

Acrobat HD - mini ultra 13.3 w/Rolling Case

Enhanced Vision

Price: \$2595.00 - \$2595.00

This flexible 3-in-1 video magnifier with built-in 13.3 battery operated monitor is ideal for near, distance and self-viewing. Rotate the camera for reading, writing, grooming and magnifying images at distances. Acrobat is perfect for work, school or home. A small compact size and case make it easy to transport.

Acrobat HD - mini ultra 13.3"

Enhanced Vision

Price: \$2525.00

This flexible 3-in-1 video magnifier with a built-in 13.3 battery operated monitor is ideal for near, distance and self-viewing. Rotate the camera for reading, writing, grooming and magnifying images at distances. Acrobat is perfect for work, school or home and its small compact size make it easy to transport.

Acrobat HD ultra Arm w/13.3 Monitor

Enhanced Vision

Price: \$2345.00 - \$2345.00

Device: large print

Disability: vision

A flexible long or optional short arm offered with a 13.3 battery operated monitor, this 3-in-1 video magnifier is ideal for near, distance and self-viewing. Rotate the camera for reading, writing, grooming and magnifying images at distances. Acrobat offers a complete system for those at work, school or home.

Acrobat HD ultra LCD 20"

Enhanced Vision

Price: \$2295.00 - \$2295.00

This flexible 3-in-1 video magnifier is ideal for near, distance and self-viewing. By rotating the camera, you can read, write, groom and magnify images at any distance. The Acrobat offers a complete system for those at work, school or home. Offering a 20" high resolution HD LCD.

Acrobat HD ultra LCD 20" w/Rolling Case

Enhanced Vision

Price: \$2380.00 - \$2380.00

This flexible 3-in-1 video magnifier is ideal for near, distance and self-viewing. By rotating the camera, you can read, write, groom and magnify images at any distance. The Acrobat offers a complete system for those at work, school or home. Offering a 20" high resolution HD LCD and easy transport rolling case.

Acrobat HD ultra LCD 22"

Enhanced Vision

Price: \$2595.00 - \$2595.00

This flexible 3-in-1 video magnifier is ideal for near, distance and self-viewing. By rotating the camera, you can read, write, groom and magnify images at any distance. The Acrobat offers a complete

system for those at work, school or home. Offering a 22" high resolution HD LCD.

Acrobat HD ultra LCD 22" w/ Rolling Case

Enhanced Vision

Price: \$2700.00 - \$2700.00

This flexible 3-in-1 video magnifier is ideal for near, distance and self-viewing. By rotating the camera, you can read, write, groom and magnify images at any distance. The Acrobat offers a complete system for those at work, school or home. Offering a 22" high resolution HD LCD and easy transport rolling case.

Acrobat HD ultra LCD 24" w/ Rolling Case

Enhanced Vision

Price: \$2900.00 - \$2900.00

This flexible 3-in-1 video magnifier is ideal for near, distance and self-viewing. By rotating the camera, you can read, write, groom and magnify images at any distance. The Acrobat offers a complete system for those at work, school or home. Offering a 24" high resolution HD LCD and easy to transport rolling case.

Acrobat HD ultra Long or Short Arm

Enhanced Vision

Price: \$1995.00 - \$1995.00

Device: large print

Disability: vision

Offered with a flexible long or optional short arm, this 3-in-1 video magnifier is ideal for near, distance and self-viewing. By rotating the camera, you can read, write, groom and magnify images at any distance. The Acrobat offers a complete system for those at work, school or home.

Adapt-It Pack

Adaptation, Inc.

Price: \$64.00 - \$64

Device: switch, environmental control
Disability: cognitive, learning, physical
Our simple-to-use Adapt-It Pack has everything needed to make a battery-operated toy switch accessible. The Adapt-It Pack includes: Mini Pal Pad, Battery Interrupter, battery-operated toy (two AA batteries included) and easy-to-follow photo instructions

Adjustable Proximity Switch

Adaptive Switch Laboratories, Inc.

Price: \$660.00

Device: switch

Disability: physical

The ASL 208 is a single function switch has an adjustable activation range of touch to 1/2 inch. Activation occurs when it senses a hand or another part of the body in the activation area. It can be built with a mono port and be either 12 or 24 volt.

Allora 2

Jabbla

Price: \$950.00

Device: keyboard, switch, dedicated communicator, speech output

Disability: speech

Allora is an easy-to-use keyboard-based text-to-speech communicator. Any message written on the clear display is read out clearly and comprehensibly in a high quality natural sounding voice. The Allora 2 also includes a detachable wireless speaker and display.

AllTalk

Lingraphica

Price: \$7500.00

Device: alternative keyboard, mouse emulator, speech output

Disability: speech

Lingraphica's most versatile communication device, designed to help people with communication disorders easily and quickly communicate their feelings, wants, and needs. The AllTalk easily converts into four different positions. It's also available with EyeGaze* technology to help individuals with physical limitations who need a hands-free device to communicate.

AMAneo BTi

CSS MicroSystems GmbH

Price: \$365.00 - \$365.00

Device: mouse emulator, switch

Disability: physical

The Assistive Mouse Adapter AMAneo BTi allows people who cannot operate a touch screen to operate iPad and iPhone with any mouse. Even for people with hand tremor, the operation of iPad and iPhone is easier or even possible at all.

AMAneo USB

CSS MicroSystems GmbH

Price: \$2755

Device: mouse emulator, switch

Disability: physical

The Assistive Mouse Adapter AMAneo USB helps people with hand tremors control a computer mouse more easily by filtering out shaky hand movements. It can be adjusted to compensate tremors of varying intensities.

Amigo HD

Enhanced Vision

Price: \$995.00 - \$995.00

Amigo HD displays amazing crystal clear HD images with vibrant colors, at any distance, on a large 7 inch widescreen LCD. Place it directly on your reading material or hold it up to view an item at a distance. Read price tags, menus, labels, street signs and more, anywhere!

Annie - Braille Literacy Device

Thinkerbell Labs

Price: \$950 - \$1150

Device: alternative keyboard, braille input, switch, braille output, speech output

Disability: vision

Annie, the world's first Braille literacy device helps the visually impaired learn to read, write and type in Braille, on their own, through audio-guided gamified content. The interactive content on Annie is designed to keep the student engaged through lessons, games, and challenges built in partnership with Braille experts.

Applicator

Inclusive TLC

Price: \$165.00 - \$165.00

Device: switch interface

Disability: cognitive, learning, physical

The APPLICATOR is a Bluetooth Switch Interface that has been specifically designed for the AT Market. Careful consideration of the needs of switch users has resulted in a device that provides both ease of use and great functionality in one single unit.

Assistive Technology Kit

Westminster Technologies

Price: \$3890 - \$3890

Disability: cognitive, learning, physical, speech

The Assistive Technology Kit includes a well-rounded assortment of assistive technology for switch access, computer/tablet access, communication, switch and communication device mounting, and activities.

AssistX Mobil

CSS MicroSystems GmbH

Price: \$730.00 - \$750.00

Device: switch

AssistX Mobil is a safe, flexible, radio-based call system for intensive care at home, in residential groups, homes and clinics. A wide variety of sensors and buttons, but also communication devices and medical devices can be used to trigger the call. Several transmitters and receivers can be combined.

AT Computer Switch Interface CSI-2

Atec Inc.

Price: \$69.95

Device: alternative keyboard, keyboard emulator, mouse emulator, switch interface

Disability: cognitive, physical

AT Computer Switch Interface CSI-2 supports five switches, six key definitions with mouse and one low price. Now you can navigate with either cursors or mouse and access the most software titles. Works with all operating systems without the need for software drivers. (Examples include: Windows OS, Apple OS, Android, etc).

AT Fishing lure #8 Bright Orange with Black Eye 3 Pack

Atec Inc.

Price: \$5.00 - \$6.50

Device: environmental control

Disability: physical, vision

AT Fishing lure 3 pack is the easiest threading jig on the planet. It is great for people with vision or physical disabilities. See the full line at www.Atengineering.us

AT Ultra Light 1 HD Switch

Atec Inc.

Price: \$19.95

Device: switch

Disability: physical

The Ultra Light 1 HD Switch is an all purpose accessible Switch with light activation force and tactile and audible feedback, reusable sticky base, six colorful, cleanable and durable switch tops. It is perfect for someone with limited range of motion to allow control of any device from Xbox adaptive controller, computers and AAC to toys and ECUs.

AT Ultra Light Cheek Switch

Atec Inc.

Price: \$49.95

Device: switch

Disability: physical

The AT Ultra Light Cheek Switch is a wearable switch activated with cheek, chin, or head movement. It has light activation force with tactile and audible feedback. It is perfect for someone with limited range of motion to allow control of any device from Xbox adaptive controller, computers and AAC to toys and ECUs.

AT Ultra Light Chin Switch

Atec Inc.

Price: \$49.95

Device: switch

Disability: physical

This is a wearable switch that mounts around the neck to provide chin switch control. It has light activation force, tactile and audible feedback. It is perfect for someone with limited range of motion to allow control of any device from Xbox adaptive controller, computers and AAC to toys and ECUs.

AT Ultra Light Hand Switch

Atec Inc.

Price: \$49.95

Device: switch

Disability: physical

This is a wearable switch that mounts around the hand to provide finger switch control. It has light activation force, tactile and audible feedback. It is perfect for someone with limited range of motion to allow control of any device from Xbox adaptive controller, computers and AAC to toys and ECUs.

AT Ultra Light HD Finger Switch

Atec Inc.

Price: \$49.95

Device: switch

Disability: physical

BACK TO
CONTENTS

This is a wearable switch that fits like a ring around your finger to provide switch control. It has light activation force, tactile and audible feedback. It is perfect for someone with limited range of motion to allow control of any device from Xbox adaptive controller, computers and AAC to toys and ECUs.

AT Ultra Light Wrist Switch

Atec Inc.

Price: \$69.95

Device: switch

Disability: physical

The AT Ultra Light Wrist Switch is a wearable switch requiring very little movement to activate, and has light activation force with tactile and audible feedback. It is perfect for someone with limited range of motion to allow control of any device from Xbox adaptive controller, computers and AAC to toys and ECUs.

Attainment Talker 24

Attainment Company, Inc.

Price: \$39.00

Device: speech output

Disability: cognitive, learning, speech

Great sound quality and volume on this 24 message voice output device. Each message area is 3/4 inch. Device size 12 3/8 x 2 1/4 x 1/2-inch. Two AAA batteries included.

Attendant Alert

Adaptive Switch Laboratories, Inc.

Price: \$570.00

Device: environmental control

Disability: physical

The ASL 522 can be activated by a single switch which makes a high pitch beep until the switch is no longer activated. It can either be powered by a 9 volt battery or a power wheelchair. Switch not included.

Attendant Control Device

Adaptive Switch Laboratories, Inc.

Price: \$642.00

Device: environmental control

Disability: physical

The ASL 510 is a four directional digital attendant override with D9 pin for ASL digital attendant port with reset/mode change capability. When in drive mode the reset switch when activated will perform as a passive stop switch. This device will work in conjunction with the digital drive control.

Balloon Switch

Technical Solutions Australia

Price: \$300.00

Device: switch, switch interface, environmental control

Disability: physical

An extremely sensitive squeeze switch, the Balloon Switch uses electronic circuitry to analyze tiny squeezing actions and produce a controlled switch signal. Intended for people with extremely weak movement.

Battery Device Adapter

AbleNet, Inc.

Price: \$15.00

Disability: cognitive, physical

Convert any battery operated toy or appliance into a switch activated device. Just place the copper disc between the battery contact and a battery in the device, connect a switch and your students are ready for action. How to guide included.

Battery Interrupter

Adaptive Tech Solutions

Price: \$13.39

Device: switch interface

Disability: physical

Insert our battery interrupter between AA / AAA, or C/D batteries to make most items switch enabled. Our disks have been coated to prevent corrosion so the adapters can be used for years.

Battery Interrupter

Adaptation, Inc.

Price: \$14.00

Device: switch, environmental control

Disability: cognitive, learning, physical

The Battery Interrupter is used to modify battery-operated devices and toys for switch input. It has a standard 3.5 mm jack and comes in two sizes (for AA and AAA and C and D batteries).

Beam

Origin Instruments Corp.

Price: \$149.00

Device: switch, switch interface

Disability: physical

Beam is a wireless switch transmitter that can be paired with a HeadMouse or Swifty. When used with the HeadMouse, Beam allows adaptive switch users to make mouse clicks wirelessly. Swifty is a USB switch interface with wireless receiver. Up to three switches can be plugged into Beam.

Bee-Bot

Terrapin Software

Price: \$89.95

Device: dedicated communicator

Disability: learning, physical

Bee-Bot is a colorful, sturdy little robot that follows commands entered via built-in command buttons and is a fun way for young children to learn coding. Press arrow keys for forward, back, left and right to create a program and then press GO to send Bee-Bot on its way. Lights and sounds confirm each command. Bee-Bot can execute up to 40 commands at a time.

BG Remote Attendant Control

Adaptive Switch Laboratories, Inc.

Price: \$1078.00 - \$1468.00

Device: switch interface

Disability: physical

The ASL 520BG allows a parent/aide to have control over one or more directions of a power wheelchair by a wireless control. It can be used as a training tool

or as a full attendant control device and is compatible with all wheelchair electronics that allow for digital control.

BIG Blue-tooth Keyboard

RJ Cooper and Associates

Price: \$199.00 - \$199.00

Device: alternative keyboard, keyguard

Disability: cognitive, learning, physical, vision

Large/big/oversize key and print keyboard, colored-rows or yellow keys, for iPad. Bluetooth/wireless, can be used with iPad, Android, or any computer w/Bluetooth. Comes with stand to angle keyboard at 70 degrees for one-handed hunt-and-peckers. Keyboard available for tremors or accidental keypress prevention.

Big Buddy Button

AbleNet, Inc.

Price: \$65.00

Device: switch

Disability: cognitive, learning, physical

Made for persons with moderate-severe upper extremity and motor disabilities. Features a 4" -inch target area and can be activated with just 5.3 ounces of force. Auditory and tactile feedback. Activate by pressing anywhere on the large, colorful surface. Available in red, yellow, green, and blue.

Big Red Switch

AbleNet, Inc.

Price: \$65.00

Device: switch

Disability: cognitive, learning, physical, vision

The Big Red switch offers a 5-inch activation surface with tactile and auditory feedback, but with a twist. Our iconic switch tops can be removed and replaced with the color of your choice: Red, Blue, Yellow or Green. It's all up to your own style, tastes or specific vision needs.

BIG Step-by-Step

AbleNet, Inc.

Price: \$195.00

Device: switch, speech output

Disability: cognitive, learning, physical, speech

AboutMove into multi-message communication with the BIG Step-by-Step speech device. Activate the large colored top to play the first message. When done, activate the top again to play another message. New sequences of messages are easily and quickly recorded to the BIG Step-by-Step on the fly, or use the levels pre-record up to three sets of messages ahead of time.

Big Talk Triple Play

Enabling Devices

Price: \$185.95

Device: dedicated communicator, speech output, speech trainer

Disability: cognitive, learning, physical,

speech

Versatile communicator with single, sequential and random message capabilities. Push the round plate and your pre-recorded words can be played back in single, sequential or random order. Device has four levels. Record up to 75 seconds per level for a total of 300 seconds.

BIG TalkingBrix

AbleNet, Inc.

Price: \$255

Device: speech output

Disability: cognitive, learning, physical, speech

BIG TalkingBrix is a set of three BIG single-message communication devices that can be used individually or attached to create a multi-message communication device. Each BIG TalkingBrix can play a message up to 10-seconds long.

BigBlu VisionBoard

AbleNet, Inc.

Price: \$125.00

Device: alternative keyboard, large print

Disability: learning, physical, vision

The wireless BigBlu VisionBoard offers a significant advantage by improving readability and reducing eyestrain with big 1-in/2.54-cm square keys. The large, bold black-on-white letters and numbers are easy to see with a contrast ratio of 21:1 and are almost 250% larger than the print on standard keyboards.

BIGmack Communicator

AbleNet, Inc.

Price: \$135.00

Device: switch, dedicated communicator, speech output

Disability: cognitive, learning, physical, speech

Record any message directly into this single message tool and press its large activation surface for crystal clear, single message playback. BIGmack communicator has a large, 5-inch activation surface. Students connect with teachers, classmates and the world around them.

BIGtrack 2

AbleNet, Inc.

Price: \$85.00

Device: mouse emulator, switch, environmental control

Disability: cognitive, physical

BIGtrack 2 is USB mouse that includes a large 3-in / 7.62-cm trackball and oversized left and right click buttons. BIGtrack 2 can be used with one or two switches and includes an easy-to-use drag lock feature.

BIGtrack Wireless

AbleNet, Inc.

Price: \$125.00

Device: mouse emulator

Disability: cognitive, learning, physical

BIGtrack Wireless is a mouse designed for users who have difficulties with fine motor

control. The large 3-in (7.62-cm) trackball and the broad base of BIGTrack Wireless make it easy to move the mouse cursor while using gross motor movements of the hand, arm, or foot.

Bite Switch - G-Switch Series

GlassOuse Assistive Device

Price: \$49

Device: switch

Disability: cognitive, learning, physical
Bite Switch comes with a 3.5mm jack and it can be paired perfectly with GlassOuse v1.2 or any kind of adapted device offering 3.5mm jack inputs as a switch control. Covered with a non-carcinogenic material, silicone cover protects the switch module and it is easy to change and clean.

BJOY Hand

Westminster Technologies

Price: \$185

Device: mouse emulator

Disability: physical

The BJOY Hand is an ultra sensitive joystick designed to be used with a slight movement of your finger. Thanks to the ergonomic design and very sensitive joystick, the device can be held in one hand for computer access with a very slight movement of the user's finger. This device works with the BJOY Software in order to modify mouse operations like pointer speed, orientation, button functions and many others. All settings are saved in the device so you can take it with you wherever you go. Computer/laptop NOT included. Compatible with computers, tablets and smartphones which are cursor-controlled.

BJOY Ring Kit

Westminster Technologies

Price: \$614 - \$854

Device: mouse emulator

Disability: physical

The BJOY Ring Kit offers the ability to use the joystick of your wheelchair as a mouse control for your computer. This kit includes the BJOY Ring, two switches for left and right click ability, and the appropriate adapter to connect the switch to the BJOY Ring. Wired and wireless versions of this product are available..

BJOY Stick

Westminster Technologies

Price: \$260 - \$465

Device: mouse emulator

Disability: physical

Make moving your mouse easier with your choice of BJOY Stick. Choose from two different designs for ease of use based on upper body strength and range of motion. The BJOY Software allows these devices to be tailored to the user's needs and capabilities. Use the BJOY Software in order to modify the mouse operations like pointer speed, orientation, button functions, etc.

All settings are saved in the BJOY Device so you take them with you wherever you go.

Blaze ET DAISY Multi-Player with OCR

HIMS inc.

Price: \$795.00

Device: optical character recognition, speech output

Disability: cognitive, vision

Blaze EZ is a digital book player with WiFi and OCR camera for the visually impaired. It features stand-alone, single-button OCR capture and read aloud capabilities. Simple navigation gives quick access to music, radio, books and printed materials. Now supports output to HIMS Braille displays.

BlindShell Classic Accessible Mobile Phone

BlindShell

Price: \$349 - \$349

Device: alternative keyboard, voice recognition, large print, speech output

Disability: cognitive, hearing, learning, physical, vision

The BlindShell Classic is an accessible mobile phone for the visually impaired and seniors. This phone uses the very popular "Candy Bar" style and utilizes a full physical keypad. Featuring a screen reader, which reads out every single aspect of the phone, and smartphone features such as voice control, voice dialing, voice dictation, the BlindShell Classic mobile phone is the perfect solution for anyone who doesn't want to or isn't able to use a smartphone. Jam-packed full with over 30 apps and features, this is the perfect solution for anyone who wants to stay in touch with loved ones but struggles to use a modern smartphone.

Blue-Bot

Terrapin Software

Price: \$119.95

Device: dedicated communicator

Disability: cognitive, physical, speech

Blue-Bot is a Bee-Bot robot with a Bluetooth connection. Use the command keys to send Blue-Bot forward and back or turn left and right or command it from an Android or iOS tablet with the free downloadable apps.

Blue-Bot Tactile Reader

Terrapin Software

Price: \$129.95 - \$129.95

Device: alternative keyboard

Disability: vision

The Blue-Bot TacTile Reader is a unique, hands-on programming device to control Blue-Bot. Press the connect button to pair Blue-Bot with the TacTile Reader. Then place individual tiles, each representing a Blue-Bot command, sequentially on the TacTile Reader. Press the GO button and watch Blue-Bot move step-by-step through the program while the TacTile

Reader lights up each command as Blue-Bot performs it. Want to change the program? Just switch the order of the tiles and press GO again. The TacTile Reader combines the excitement of Blue-Bot with a concrete, hands-on immersion in coding.

Blue2 Bluetooth Switch

AbleNet, Inc.

Price: \$220.00

Device: mouse emulator, switch, environmental control

Disability: cognitive, physical, speech
Blue2 is the most widely used Bluetooth switch interface for tablets, mobile phones, and computers. Blue2 allows you to quickly and easily connect one or two accessibility switches to your device via a Bluetooth connection.

Bluetooth Small Switch

RJ Cooper and Associates

Price: \$99

Device: switch, switch interface

Disability: physical

A 3" round, green, Bluetooth switch for iPad, Android, Mac, or Windows. Capable of controlling switch-friendly apps, Switch Control compatible apps, the Music app, Camera, and other standard apps.

Bluetooth Super-Switch

RJ Cooper and Associates

Price: \$184 - \$184

Device: switch, switch interface

Disability: physical

Large (5"), round switch with built-in interface. Works with all switch-friendly apps, and Switch Control compatible ones. Also compatible with Android.

Bluetooth Tiny switch

RJ Cooper and Associates

Price: \$49 - \$49

Device: keyboard emulator, mouse emulator, switch

Disability: physical

A small, 1" round Bluetooth button that can 'send' a variety of keystrokes, clicks, or A/V events to a Bluetooth host (i.e. iPad, iPhone, Android tablet, Chromebook, PC, Mac). It works with switch-friendly apps as well as iOS's Switch Control and Android's Switch Accessibility. It comes with a hand strap that holds it securely in a person's fist/hand as well as our super-Velcro for placement on a flat surface (vertical or horizontal).

Braille Label Maker Kit

Westminster Technologies

Price: \$775 - \$895

Device: braille output

Disability: vision

The Braille Label Maker is portable and easy to use anywhere. It comes with both a built in Braille keyboard and a QWERTY keyboard. This enables a non-Brailleist to create Braille labels too. The powered embossing makes for high quality Braille

labels that are easy to read. An automatic cutter provides effortlessly clean label cuts without the need for scissors.

Braille Sense Polaris

HIMS inc.

Price: \$5795

Device: braille input, braille output, printer

Disability: hearing, speech, vision
BrailleSense Polaris offers a new standard in blind-friendly applications with the latest in cutting edge technology. We've kept the traditional computer interface that has contributed to the popularity of other BrailleSense models. BrailleSense Polaris supports Google Apps, making it easy to utilize Google services like Drive, Docs, Sheets, and Slides as millions of other students do everyday.

Braille Sense U2

HIMS inc.

Price: \$4595.00

Device: braille input, braille output, speech output

Disability: hearing, vision

This 32-cell Braille notetaker has exclusive features including Excel viewer, Twitter, Quick Browser, YouTube and advanced word processor. Terminal clipboard allows for composing text on Braille Sense then sending completed block together to iPhone, iPad, Android or computer. LCD display allows parents and teachers to assist or deaf-blind to communicate.

Braille Sense U2 MINI

HIMS inc.

Price: \$2995.00

Device: braille input, braille output, speech output

Disability: vision

This 18-cell Braille Notetaker has advanced features for students and professionals. Exclusive applications include Excel Viewer, Twitter, Quick Browser, YouTube, advanced word processor and Terminal Clipboard for composing text on Braille Sense and sending completed block of text all at once to iPhone, iPad, android device or computer.

Braille Sense U2 QWERTY

HIMS inc.

Price: \$4595.00

Device: alternative keyboard, braille output, speech output

Disability: vision

This 32-cell Braille Notetaker has a QWERTY keyboard and advanced features for students and professionals. Exclusive applications include Excel Viewer, Twitter, Quick Browser, YouTube, advanced word processor and Terminal Clipboard for composing text on Braille Sense then sending completed block all at once to iPhone, iPad, android device or computer.

BrailleCoach - Braille Teaching Device

Westminster Technologies

BACK TO
CONTENTS

Price: \$1425**Device:** speech output**Disability:** vision

The BrailleCoach is a unique way to learn Braille - enabling the student to work independently between lessons. The device has three modes of Braille learning. Mode 1 is letters and dots, mode 2 is letters only and mode 3 is letters and words. Additional blank and pre-programmed sounds tags are available to extend learning. The BrailleCoach comes with 26 Braille alphabet tags, a set of programming tags and a carrying bag.

BrailleNote Touch +

HumanWare

Price: \$4195.00 - \$5695.00**Device:** braille input, braille output, speech output**Disability:** vision

The ever-innovative BrailleNote Touch Plus combines the simplicity and accessibility of a note taker with the power and efficiency of a modern smartphone or tablet. Supported by the Android Oreo platform, it expands the entire experience and fulfills today's digital expectations. BrailleNote Touch Plus is hands down the most up-to-date, powerful and efficient braille note taker on the market! Available with a 32 cell braille display or an 18 cell braille display

Braillo 300 S2

American Thermoform Corporation

Price: \$23000.00**Device:** braille output, printer, speech output**Disability:** vision

Braillo 300 Braille embosser is a reliable and dependable embosser for true Braille production. At 300 CPS using continuous Braille paper, it offers exceptional Braille quality and consistency. Its combination of speed, durability, reliability are the reasons why it is used by most of the largest Braille production facilities.

Braillo 450 S2

American Thermoform Corporation

Price: \$35000**Device:** braille output, printer**Disability:** vision

The Braillo 450 S2 is an ideal embosser for those that need increased Braille output over the 300 S2, but not the speed and scalability of the 600 S2. It shares the same chassis as the 300 S2, but internal components are upgraded to ensure superior dot quality and consistency at these higher embossing speeds. Using continuous/fanfold Braille paper and embossing at 450 CPS (1,350 pages per hour), it will be a trusted, high speed asset to your business.

Braillo 600 S2

American Thermoform Corporation

Price: \$45000**Device:** braille output, large print, printer, speech output**Disability:** vision

The Braillo 600 S2 Braille embosser is the faster, more robust counterpart to the Braillo 450 S2. Embossing at 600 CPS (1,800 pages per hour), it is the fastest continuous/fanfold embosser available, and it offers remarkable dot quality and dependability. Its combination of speed, reliability and quietness are the reasons why its predecessor, the Braillo 600, is used across the world by most of the largest Braille production facilities. Unique to the 600 S2 is that it is built upon a chassis that can be upgraded to a Braillo 600 SR as your Braille production needs expand.

Braillo 600 SR

American Thermoform Corporation

Price: \$79500**Device:** braille output, large print, printer, speech output**Disability:** vision

The Braillo 600 SR braille embosser meant for large volume Braille production. This Braille embosser is unique, as it uses paper rolls instead of continuous tractor feed paper. Using paper rolls helps to save money on paper expenses and also eliminates the need for a burster and its operator.

Braillo 650 SF

American Thermoform Corporation

Price: \$128000**Device:** braille output, printer, speech output**Disability:** vision

The Braillo 650 SF is the world's only fully automated Braille book production system. Send a file and pick up a finished, folded, covered and stapled book. The Braillo 650 SF makes on-demand Braille publishing possible.

Braillo 650 SW

American Thermoform Corporation

Price: \$88000**Device:** braille output, printer, speech output**Disability:** vision

Braillo 650 SW Braille Embosser is an advanced Braille embosser that employs a paper cutter for two or four page-per-sheet format, and a stacking unit engineered to handle large format production. This machine is ideal for creating both magazines and textbooks.

BrainPort Vision Pro

Wicab, Inc.

Price: \$10000.00**Device:** dedicated communicator**Disability:** vision

The BrainPort Vision Pro is an oral electronic vision aid that provides electro-tactile stimulation to aid profoundly blind patients in orientation, mobility, and object recognition as an adjunctive device to other assistive methods such as the white cane or a guide dog. The device is a

non-surgical solution for profoundly blind individuals.

Braze Sentina (AS-0033)

Braze Mobility Inc.

Price: \$2000**Disability:** cognitive, hearing, learning, physical, vision

The Braze Sentina can attach to any wheelchair and provides 180 degrees of rear-view blind spot coverage! The Sentina is easy to mount and is fully customizable.

Bright Box

Adaptation, Inc.

Price: \$129.00 - \$129**Device:** switch**Disability:** cognitive, learning, physical, vision

The Bright Box has a visual display that is activated when the user presses the top of the surface. The Bright Box can be used as a visual cue to aid in locating the device for persons with low vision or for any nighttime user.

Bright Box Tactile

Adaptation, Inc.

Price: \$149.00**Device:** switch**Disability:** cognitive, learning, physical, vision

The Bright Box Tactile has visual and tactile feedback. The visual feedback and tactile feedback can be employed independently of each other. The Bright Box Tactile can be used to activate any battery-operated device with a standard 1/8-inch jack.

Buddy Button

AbleNet, Inc.

Price: \$65.00**Device:** switch**Disability:** cognitive, learning, physical

The Buddy Button provides tactile and auditory feedback, is 2.5-inches in diameter and requires a force of 7 ounces in the center and 5.3 ounces at periphery. Unsurpassed durability that now comes in seven great colors and designs.

Button Switch

Adaptive Switch Laboratories, Inc.

Price: \$180.00**Device:** switch**Disability:** physical

The ASL 305 is a momentary switch that has an activation button the size of a dime and requires medium force for activation.

Calculator with keyguard

Turning Point Therapy and Technology, Inc.

Price: \$75.00**Device:** keyguard**Disability:** physical

Casio large display/large button basic function calculator with keyguard.

CANDY 4 HD II Handheld

HIMS inc.

Price: \$595.00**Device:** large print**Disability:** vision

CANDY 4 HD is a handheld video magnifier that magnifies near or near distance up 1x - 20x. The flip-away handle lets you use it as a stand or handheld magnifier. Capture and save Up to 5 images. Easily customize 4 selectable color modes from a number of preset combinations.

CANDY 5 HD II Handheld Video Magnifier

HIMS inc.

Price: \$695.00**Device:** large print**Disability:** vision

CANDY 5 HD is a handheld video magnifier that magnifies near or near-distance 1x-22x. The three-position handle can be used left or right-handed as a stand or handheld magnifier. Mirror view mode is great for grooming. Image capture lets you save up to 5 images. User-customize 4 selectable color modes.

Cheap Talk 8 - 6 Level Communicator

Enabling Devices

Price: \$319.95**Device:** dedicated communicator, speech output, speech trainer**Disability:** cognitive, learning, physical, speech

Our 6-Level Communicator is ideal for teaching language skills. Record 48 six-second messages on six levels. Messages can be recorded and rerecorded as often as you wish. Available in three colors.

Chester Mouse

AbleNet, Inc.

Price: \$22.00**Device:** mouse emulator

Disability: cognitive, learning, physical
Young children can be confused about whether to use the right or left button on a mouse and using drag-and-drop and click-and-move can be frustrating. Welcome Chester Mouse, a tiny single-button mouse with no scroll wheel, that's easy to control and made of rugged plastic for strength and durability.

Choice

AbleNet, Inc.

Price: \$195.00**Device:** switch, dedicated communicator, speech output**Disability:** cognitive, learning, physical, speech

The Choice provides an exciting option for easy-tech, quick-ready communication. Allowing you to skip a message without it playing in its entirety. Press the activation surface repeatedly, and skip multiple messages to get to your desired message. Three levels for increased flexibility. When you find it, release the activation surface to play the message.

Chromebooks

Google

Price: \$119 - \$1299

Device: alternative keyboard, braille input, keyboard emulator, switch, voice recognition, braille output, large print, printer, speech output

Disability: cognitive, hearing, learning, physical, speech, vision

Chromebooks are a range of simple yet powerful devices with built-in accessibility, productivity and security features to help enhance teaching and learning, wherever it takes place.

Closed Caption Display Units

Compusult Limited

Price: \$895.00 - \$8995.00

Device: large print

Disability: hearing

Compusult's Caption Display units provide large format LED output of closed captions from analog video sources, captioning/transcription software and Compusult's Caption Display software. The Caption Displays provide four lines of 32 characters, with character heights ranging from 0.7- to 4-inches. For more details, please visit .

Cognixion ONE

Cognixion

Disability: speech

The World's First Brain Computer Interface with Augmented Reality Wearable Speech ® Generating Device.

Enabling Devices

Price: \$269.95

Device: dedicated communicator, speech output, speech trainer

Disability: cognitive, learning, physical, speech

The Communication Builder is equipped with five easy to change frames, which allows you to refine communication choices as the person develops new skills. Record your messages with the simplest push of a button. Light, durable and easy to carry with a built-in handle. Total record time is 300 seconds.

Compact Switch

RJ Cooper and Associates

Price: \$49.00

Device: switch

Disability: cognitive, physical, speech

Round 1-inch compact switch that makes a nice click sound when activated.

Connect 12

HumanWare

Price: \$2695.00 - \$2995.00

Device: alternative keyboard, optical character recognition, large print, speech output

Disability: vision

The New Prodigy Connect 12 is more than a powerful digital magnifier with desktop and distance viewing. This ideal solution for students of all ages opens the window

to an intelligent Android world, allowing free and open access to more than a million apps.

Control Bionics CCS

Control Bionics Inc.

Price: \$0 - \$13500

Device: switch, voice recognition, dedicated communicator, environmental control, speech output

Disability: cognitive, hearing, learning, physical, speech, vision

Control Bionics CCS (Complete Communication System) is an out of the box solution for those living with paralysis and loss of speech. The system includes a 10" display device, built-in communication software, and the NeuroNode 3.0! The NeuroNode 3.0, the latest generation of the world's leading wearable EMG control device, it's packed with new added benefits, Ai making it more intuitive and flexible than ever. With the Control Bionics CCS users are able to communicate with friends and family, send and receive emails and text messages, browse the web, watch videos and movies, read the news, play games, control their home environmental control systems, and more.

CooperCar II

RJ Cooper and Associates

Price: \$999 - \$1399

Disability: cognitive, physical

The original CooperCar, 1991-1999, was placed 848 times around the world. Some are even still in use! The CooperCar II is a resurrection of this successful toy/tool/vehicle for severely physically (and possibly cognitively) challenged young children (up to 50 lbs). It can be controlled by 1-4 switches, or an optional joystick. It turns electrically on its large 2 wheels (no steering wheel). An optional Wireless Remote Override is available. The firmware on the controller is similar to switch parameters on a computer. Time (so that a short activation of a switch/joystick movement can result in longer movements of the vehicle), Acceleration (for those that startle easily), and Speed. The CooperCar II is a viable alternative for youngsters to a VERY expensive power wheelchair! Or, for those severely cognitively impaired, the world's greatest cause/effect device.

Cordless Switch Interface

RJ Cooper and Associates

Price: \$99.00

Device: switch interface

Disability: physical

Provides two switch inputs for plugging switches into a computer. Once plugged in, the switch(es) become standard mouse clicks. With installation of the accompanying SwitchHopper software you can configure each button to be any mouse-button event or keystroke that you would like.

Crick USB Switch Box

Crick Software, Inc.

Price: \$159.00

Device: switch interface

Disability: physical

Plugs into your computer and connects your switches. It will work instantly with Clicker and DocsPlus, with no setup required. For other switch accessible software, we have included USB Keys software, a small application that converts switch presses from the USB switch box into key presses or mouse clicks.

Cup Switch

AbleNet, Inc.

Price: \$85.00

Device: switch

Disability: cognitive, learning, physical

The Cup switch is one of our most durable switches. The IP67 rating of the new Cup switch means that it is resistant to dust and dirt, and can be submerged in water with a depth up to 1-meter for up to 30-minutes.

Cushion Grip Switch

Enabling Devices

Price: \$45.95 - \$47.95

Device: switch

Disability: cognitive, hearing, learning, physical, speech, vision

A fantastic sensitive switch that fits most hands. Just slip it over your hand and you can use a palmer grasp or roll it on a tray or tabletop to activate any device or toy. Now comes in two sizes - Medium and Small.

DaVinci HD/OCR

Enhanced Vision

Price: \$3295.00

DaVinci is a high performance desktop video magnifier, featuring Full HD, selective text-to-speech OCR and a 3-in-1 camera. Experience the joy of reading again with high definition color and contrast, crystal clear images, and vibrant colors. DaVinci will read any printed text aloud with the push of a button.

DaVinci Pro HD/OCR

Enhanced Vision

Price: \$3995.00

DaVinci Pro is a high performance desktop video magnifier, featuring a 3-in-1 camera (see near, intermediate, and far), Full HD and selective text-to-speech OCR. Experience the joy of reading with high definition color and contrast, crystal clear images, and vibrant colors. DaVinci Pro will read any printed text aloud with the push of a button

Dipsy

Adaptation, Inc.

Price: \$39.00

Device: switch

Disability: cognitive, learning, physical

This tilt-sensitive switch can be attached to the head, arm, finger or any appropriate

object and can be used for posture training. The Dipsy is activated by a 30-degree tilt which makes it less prone to false activation. Includes a headband and two finger mounts. Price Reduced.

Dot Box Switch

Adaptive Tech Solutions

Price: \$33.94

Device: switch

Disability: physical

Our Dot Box Switch has a 1" raised circular activation surface that requires moderate pressure (average fingertip pressure). Has a generous 6' cord with standard 1/8" (3.5mm) jack and rubber feet on the bottom. A nice general switch that can also be used to encourage finger isolation.

Drink-Partner Insulated Tumbler

Mealtime Partners, Inc.

Price: \$74.95 - \$74.95

Disability: cognitive, physical

The Drink-Partner Drinking System can accommodate an Insulated Tumbler in the cup holder, as an alternate drink container to the bottle that is provided with the Drink-Partner Drinking System. The Insulated Tumbler is an assistive drinking aid that provides hands free drinking for individuals with disabilities. The Drink-Partner Insulated Tumbler will fit in any of the Mealtime Partners Front Mounted Drinking Systems Cup Holders as well as the Drink-Partner Cup Holder. The Insulated Tumbler holds 16-ounces of hot or cold liquid. It keeps liquids hot or cold for several hours. The tumbler has a screw-on stainless steel lid that has flex tubing integrated into it. The flex tube contains the drinking tube from which the user drinks. Once positioned, the flex tube will hold the drinking tube in position, until it is adjusted.

Dual Button Mechanical Switch with Stereo Plug

Adaptive Switch Laboratories, Inc.

Price: \$360.00

Device: switch interface

Disability: physical

The ASL 524 with Stereo Plug will allow you to use both mechanical switches with one switch port. For instance right and left mouse click or recline and tilt.

Dual Switch Input Adaptor

Adaptive Switch Laboratories, Inc.

Price: \$20.00

Device: switch interface

Disability: physical

The ASL 817 allows two mono port switches to have the same mono output or can allow for two output switch functions from one single switch port.

Dual Switch Latch and Timer

AbleNet, Inc.

BACK TO
CONTENTS

Price: \$215.00

Device: switch

Disability: cognitive, learning, physical
Choose our Switch Latch and Timer whenever you need to add modes of control to any switch accessible toy or appliance. Use with any pre-adapted device, or use our battery device adapter to create your own adapted toy or appliance. This unit allows two people to activate their own devices simultaneously.

Duo

AbleNet, Inc.

Price: \$50.00

Device: mouse emulator

Disability: cognitive, learning, physical
Duo is a wireless mouse for everyone. With Duo, a user can easily control the mouse cursor with fine motor or gross motor movements. Left- and right-clicks are controlled with accessibility switches or the standard left- and right-click buttons on Duo. Duo can also be used as a stand-alone switch interface and works with switch scanning software that utilizes left- or right-clicks.

Edge Talker

Eyegaze Inc.

Device: dedicated communicator, speech output

Disability: speech

The Edge Talker is a dedicated speech generating device that allows direct select access and is compatible with switch and headmouse access. When the communicator needs eye gaze access, the Edge Talker is upgraded to the Eyegaze Edge via our Encore camera installation! Ideal for people who don't yet need eye tracking but need a rugged AAC solution, the Edge Talker includes a protective case with kickstand, carrying handle, and detachable keyboard and trackpad that act as a screen protector during transport. The Edge Talker includes the Eyegaze Inc. team's technical know how and fantastic customer service!

AbleNet, Inc.

Price: \$88.00**Device:** switch**Disability:** cognitive, physical

Activated by pressing down on the top of the switch with a feather light touch - just 0.4-oz/11.3-g of pressure required!

MicroLite Switch

Adaptive Switch Laboratories, Inc.

Price: \$180.00

Device: switch

Disability: physical

The ASL 312 is an extremely light touch mechanical switch. Activation occurs at one end with any downward light pressure movement.

Mini Beamer Transmitter

AbleNet, Inc.

Price: \$145.00

Device: switch

Disability: cognitive, learning, physical

The new Mini Beamer Transmitter comes with a modern look, small form factor, rechargeable battery, proximity sensor activation surface, and external switch jack. Proximity sensor will activate when an individual is within 10-millimeters of the activation surface.

Mini Com

Enabling Devices

Price: \$97.95

Device: dedicated communicator, speech output, speech trainer

Disability: hearing, learning, speech

Use these communicators individually or join them for building communication skills. Each device has 20 seconds of recording time. Record and rerecord at the touch of a button.

Mini Cup Switch

AbleNet, Inc.

Price: \$75.00

Device: switch

Disability: cognitive, learning, physical

The mini Cup switch is one of our most durable switches. The IP67 rating of the new Mini Cup switch means that it is resistant to dust and dirt, and can be submerged in water with a depth up to 1-meter for up to 30-minutes.

Mini Fiber Optic Switch

Adaptive Switch Laboratories, Inc.

Price: \$732.00

Device: switch

Disability: physical

The ASL 203 is a single function switch with a round target area the size of a pencil lead in diameter. It has an adjustable activation range from touch to 1.5- inches and can be built with a mono port and be either 12 or 24 volt.

Mini-SwitchPort

RJ Cooper and Associates

Price: \$69.00

Device: switch interface

Disability: cognitive, physical, speech

A small switch interface with two switch inputs and a retractable cable. Accompa-

nying software lets you set up the switches as just about anything that an application is looking for.

MiniTalk

Lingraphica

Price: \$7600.00

Device: alternative keyboard, mouse emulator, speech output

Disability: speech

The Lingraphica MiniTalk is our most portable and lightweight communication device designed for individuals with speech and language disorders. It is ultra-portable, extremely lightweight, and comes with a protective carrying case so you can easily communicate while on the go.

Mobile Phone Holder with USB Charger for Mobility Scooters and Power Chairs

Cheelcare

Price: \$49.98

Never again get stuck without power!

Universal Mobile Holder with USB charger. Charge your smartphone while on the go. NOTE - You can drive your power chair or mobility scooter while charging your smartphone. Mono Extension Cable Adaptive Switch Laboratories, Inc.

Price: \$30.00

Device: environmental control

Disability: physical

The ASL 807 Mono Extension Cable has a female mono to male mono configuration to be used as an extension cable for reset switches.

Mono To Mono Patch Cable

Adaptive Switch Laboratories, Inc.

Price: \$30.00

Device: environmental control

Disability: physical

The ASL 806 is 6 feet long and has a male mono jack on each end. It serves as a patch cord from one device to another, for example, from the auxiliary output port on the ASL 101 Single Switch Scanner to the mono port on a communication device.

Monty 3D Wheel Chair Mounts

Rehadapt North America

Price: \$1200

Disability: physical

Our standard wheelchair mounts are composed of three aluminum alloy tubes. They provide you with multiple options to fit your needs, your AAC device, and wheelchair.

Mountbatten

HumanWare

Price: \$2750.00 - \$4595.00

Device: braille input, braille output

Disability: vision

The Mountbatten Writer and Mountbatten Learning System have been designed to introduce students to Braille literacy in a fun and inclusive manner. The Mountbatten Whisperer Writer and Learning System is not available as well

Mouse Emulator

Adaptive Switch Laboratories, Inc.

Price: \$846.00

Device: mouse emulator

Disability: physical

The ASL 553 is available in a three switch or five switch configuration and can be used with Mac or PC computers. It has six mono ports, which include left and right click, up/down/left/right mouse movement, that switches can be plugged into for computer access through a USB port.

Mouse4all Box

Mouse4All

Price: \$199

Device: switch interface

Disability: physical

Mouse4all Box is an assistive product that allows everyone to use an Android tablet or smartphone entirely, without touching the screen. It enables access to the Internet, social networks, games or any other app. Mouse4all is composed of an Android app and a connection box. It is very easy to install. You can use it with one or two switches that are connected to the Android device through our connection box. It is suited for persons with a physical disability having difficulty using a touchscreen: cerebral palsy, spinal cord injury, multiple sclerosis, ALS, Parkinson, neuromuscular disease.

Multi-user Sip/Puff Switch

Origin Instruments Corp.

Price: \$399.00

Device: switch

Disability: physical

A multi-user version of the popular Sip/Puff switch designed for multiple users incorporates a special, disposable mouth-piece eliminating concerns over sanitation. Perfect for assessment centers, healthcare facilities and hospitals. Comes in a plastic case for secure storage and convenient transport.

MyGaze Eye Tracker

Inclusive TLC

Price: \$1495.00

Device: mouse emulator

Disability: cognitive, physical

The myGaze Eye Tracker will follow your eye movements so that you can move the cursor around the screen, select or 'click' on images by looking at them a little longer and drag the cursor around the screen. This means you can use lots of your favorite software programs.

NeuroNode Trilogy

Control Bionics Inc.

Price: \$0 - \$13500

Device: switch, dedicated communicator, environmental control, speech output

Disability: cognitive, hearing, learning, physical, speech, vision

NeuroNode Trilogy is a 3-in-1 solution for those living with paralysis and loss

of speech. Combining touch control, eye control, and NeuroNode 3.0 control, the NeuroNode Trilogy is finally the solution that fits to the user's needs as they change. Combining control methods allows the user to significantly increase communication speed and output up to 133%.

Ni-Yon

Compusult Limited

Price: \$299.00

Device: switch interface, environmental control

Disability: physical

Ni-Yon allows a physical disabled person to independently and simultaneously control a computer one or two external devices via dual switch input and output ports. It has a timed control system for switching between device and a smart battery backup system for controlling external devices if the computer shuts down.

No Touch Talker

Attainment Company, Inc.

Price: \$49.00

Device: speech output

Disability: cognitive, learning, physical, speech, vision

No Touch Talker is a single message device that is activated by motion. It has 10 seconds of record time and a sensitive motion detector. Examples of uses: announcing safety issues (e.g. wet floor, need help, stairs ahead). Three AAA batteries included.

Non Adjustable Proximity Switch

Adaptive Switch Laboratories, Inc.

Price: \$660.00

Device: switch

Disability: physical

The ASL 204 is a single function switch with an activation range of touch to 1/4 inch. Activation occurs when it senses a hand or another part of the body in the activation area. It can be built with a mono port and be either 12 or 24 volt.

nous: wearable blink switch

Thought-Wired

Price: \$1500

Device: alternative keyboard, switch, switch interface, dedicated communicator, environmental control, speech output

Disability: cognitive, hearing, learning, physical, speech

For people who have physical disabilities which affect all their limbs it can be difficult to control a computer. nous lets people control assistive software by blinking. It only uses your intentional blinks, so you can still blink comfortably. A wearable headset detects intentional blinks, while our software uses them to 'click' on a computer.

NovaChat 10

PRC-Saltito

Price: \$3895.00 - \$5395.00

BACK TO
CONTENTS

Device: speech output

Disability: speech

NovaChat 10 has the largest display of any NovaChat communication device. It offers the Chat Software on an Android platform. Like all NovaChats, NovaChat 10 offers a durable yet sleek portable design, with features that include switch scanning, Social Chat and many other features.

NovaChat 5

PRC-Salttillo

Price: \$2995.00 - \$4495.00

Device: speech output

Disability: speech

NovaChat 5 is the smallest of the NovaChat with a 5.0 inch display and weighing in at only 0.95 pounds. NovaChat 5 offers a durable yet sleek design, with features that include switch scanning, Social Chat, IVONA speech synthesizer and many other Chat features.

NovaChat 8

PRC-Salttillo

Price: \$3495.00 - \$4995.00

Device: dedicated communicator, speech output

Disability: speech

NovaChat 8 is a communication system that offers the well-known Chat software on an Android platform. Like all "Chats," NovaChat 8 offers a durable yet sleek portable design, with features that include an 8" display, switch scanning, IVONA speech synthesizer, and many other Chat features.

NuEyes e2

NuEyes Technologies

Price: \$2795.00

Device: optical character recognition, speech output

Disability: vision

Headworn Electronic Magnifier for Low Vision that is Evenly Balanced and Comfortable to Wear
Unlike other products that are simply a VR headset smartphone holder, the e2 was designed from the ground up to be evenly balanced on your face for maximum comfort. Because the e2 is a self-contained device, it eliminates the added weight and heat of a smartphone that is simply inside a VR holder. We are the only all-in-one device designed to help the visually impaired with maximum comfort allowing it to be worn for extended periods of time.

Orby Switch

Origin Instruments Corp.

Price: \$39.95

Device: switch

Disability: physical

Orby is a colorful adaptive switch featuring a smooth, and contoured 2.5-inch diameter design that is less than 1-inch tall. Orby has a smooth and consistent actuation across the entire switch surface with clear tactile and audible feedback. Two

year warranty and available in red, green, blue and yellow.

Original Receiver

AbleNet, Inc.

Price: \$105.00

Device: switch

Disability: cognitive, physical

Our Original Receiver functions just like a traditional switch - plug in the receiver, and go! Choose the Original Receiver if you plan to control a computer switch interface or single device.

Outspoken Communicator Mobile Bundle

Compusult Limited

Price: \$1099.00 - \$1399.00

Device: alternative keyboard, dedicated communicator

Disability: cognitive, speech

Compusult's Outspoken Communicator Mobile Bundle is a high-quality portable Augmentative and Alternative Communication (AAC) solution. It includes your choice of AAC apps, pre-installed on an Apple or Android tablet, plus accessories such as external speaker, protective case, and documentation. AAC options include AssistiveWare's Proloquo2Go, Therapy Box's Predictable and several others.

Pal Pad

Adaptation, Inc.

Price: \$39.00 - \$49.00

Device: switch

Disability: cognitive, learning, physical, speech, vision

The Pal Pad is a very thin membrane switch activated by a light touch. It has no "click" when activated. It comes in six colors: red, blue, yellow, black, green and purple. Pal Pads come in three sizes and use a standard 1/8-inch jack.

Perkins Brailier

Perkins School for the Blind

Price: \$775

Device: braille input, braille output

Disability: vision

The Perkins Brailier is a durable braille writing machine used for reading, writing and math from early learning through adulthood.

Perkins SMART Brailier

Perkins School for the Blind

Price: \$2195

Device: braille input, braille output, large print, speech output

Disability: vision

The SMART Brailier® is an early learning tool designed to promote an interactive educational experience between students, teachers and parents by displaying, vocalizing, and brailleing what a student types.

Personal Pager

Adaptation, Inc.

Price: \$109.00

Device: environmental control

Disability: physical

The Personal Pager provides wireless call button capability at home, school or outdoors. Both transmitter and chime receiver are battery operated. Works with any adaptive switch.

Photo Electric Switch

Adaptive Switch Laboratories, Inc.

Price: \$660.00

Device: switch

Disability: physical

The ASL 209 projects a cone shaped, invisible beam of light to an adjustable maximum distance of 21 inches. Switch activation occurs when any object passes through or is detected in the target area.

Plate Switch

AbleNet, Inc.

Price: \$90.00

Device: switch

Disability: cognitive, physical

The new Plate accessibility switch has an activation surface 350% larger than the previous version. The low profile makes it perfect for users who are unable to lift their hand or finger to activate a traditional accessibility switch. To use, slide the hand or foot over the activation surface and apply a few ounces of pressure to activate.

Pneumatic Switch Kit

Adaptation, Inc.

Price: \$59.00

Device: switch

Disability: cognitive, physical

Use this switch to activate with only a puff of air. It can be used with all kinds of squeeze toys, bottles and balls. It allows you to create your own object-based switch.

PowerLink 4 Control Unit

AbleNet, Inc.

Price: \$275.00

Device: switch, environmental control

Disability: cognitive, learning, physical, speech

The PowerLink 4 allows switch users to control up to 2 electrical appliances with single switches. Features 6 unique modes of control that allows you to define exactly how, and for how long, appliances will be turned on.

PRiO-mini

PRC-Salttillo

Price: \$3995.00

Device: alternative keyboard, keyboard emulator, switch, speech output, speech trainer

Disability: cognitive, learning, physical, speech

The PRiO®-mini is an iPad-based communication tool featuring the iPad mini and the popular LAMP Words for Life® Vocabulary. The PRiO-mini is configured as a dedicated device to meet the functional specifica-

tions of the Medicare/Medicaid funding requirements.

Privacy microphone

Talk Technologies

Price: \$85.00 - \$329.00

Device: voice recognition, speech output

Disability: cognitive, hearing, learning, physical, speech, vision

Talk Technologies specialized handsets eliminate background noise and make the sound of your voice inaudible to those around you while simultaneously providing a crystal-clear voice signal, allowing you to talk, listen and document privately without interference. Compatible with iOS and Android smartphones, tablets, computers or any microphone enabled device.

Pro-Bot

Terrapin Software

Price: \$129.95

Device: dedicated communicator

Disability: learning, physical

Pro-Bot offers an enticing, engaging and hands-on experience with Logo technology and robotic controls. Program Pro-Bot's route with the on-board arrow and number keys, then press go and watch Pro-Bot zip along following your instructions. Insert a pen and watch Pro-Bot draw as it moves. Sound, light, and touch sensors are built in, providing additional coding options.

Prodigi Desktop

HumanWare

Price: \$1595.00 - \$1795.00

Device: optical character recognition, large print, speech output

Disability: vision

Prodigi Desktop is an affordable electronic magnifier that incorporates both the Diamond Edge Text as well as speech access to people with low vision.

Product Number:58750 Photo #1 - Pillow Switch

AbleNet, Inc.

Price: \$125.00

Device: switch

Disability: cognitive, physical

A smooth and soft foam surface makes this switch suitable for head or cheek activation. Easily fastens to a pillow or wheelchair cushion with safety pin and Velcro.

ProxPAD

LoganTech

Price: \$1249.00

Device: dedicated communicator, speech output

Disability: cognitive, learning, physical, speech, vision

The ProxPAD is a large single location communication and learning aid that uses a RFID sound tag card. It is an excellent choice for persons with physical, visual or cognitive impairments who require tan-

gible objects or other sight cue to initiate communication.

ProxPAD - AAC Device

Westminster Technologies

Price: \$1395 - \$2649

Device: speech output

Disability: cognitive, learning, speech

The ProxPAD is a communication learning aid for people with physical, visual, or cognitive impairments. The ProxPAD uses tangible objects or images to initiate communication. It uses RFID (radio frequency identification) technology allowing each sound tag to have a different pre-recorded message. The ProxPAD offers two different activation modes. Touch mode requires the sound tag to make contact with the blue surface of the ProxPAD.

ProxTalker

LoganTech

Price: \$2995.00

Device: speech output

Disability: cognitive, learning, speech

The Logan ProxTalker is an augmentative communication device that offers the first moveable picture communication with a voice output. Encoded picture sound tags produce voice output when placed on any of the five device buttons and pressed. Tags can be customized with any image and sound.

ProxTalker - Portable AAC Device

Westminster Technologies

Price: \$3149

Device: speech output

Disability: cognitive, learning, speech

The ProxTalker is a robust, water resistant, easy-to-use AAC device which uses RFID (radio frequency identification) technology to enable independent verbal picture communication for non-verbal people of all ages. Place any photo, symbol, or object on a sound tag card and have a voice! To trigger voice output, place your sound tag card on any one of the 5 buttons and push.

Puff Switch - G-Switch Series

GlassOuse Assistive Device

Price: \$129

Device: switch

Disability: cognitive, learning, physical

Puff Switch is designed for GlassOuse V1.2, yet you can connect it to any kind of adapted device offering a mono 3.5mm jack plug in for external switch controls. Other than regular sip and puff systems, Puff Switch uses an electronic microphone, which allows you to do clicking actions via simple puffs.

Put-Em-Arounds

Enabling Devices

Price: \$99.95

Device: dedicated communicator, speech output, speech trainer

Disability: cognitive, hearing, learning,

physical, speech

These talking wall switches allow nonverbal children to initiate communication throughout their day. Record your message and have the children actively participate with their peers, family, teachers, etc. Put-Em-Arounds allow recording time for up to 20 seconds. Recording and rerecording requires only the push of a button.

Quad Button Digital Switch with D9 Connector

Adaptive Switch Laboratories, Inc.

Price: \$450.00

Device: switch interface

Disability: physical

The ASL 523 with D9 Connector is usually used in conjunction with a multi function tilt interface for direct access to tilt, recline, elevate and power legs.

Quha Zono

Grasp Assistive Technologies

Price: \$999

Device: mouse emulator

Disability: physical

Quha Zono is the only wireless gynecoscopic mouse designed for special needs. The Quha Zono makes it possible to use a computer in a flexible way, when you cannot use an ordinary mouse. Your movements control the cursor on the screen, allowing you to select, click and drag items on your desktop. It is extremely light weight and since it is completely wireless there are endless ways to wear it. Quha Zono works straight out of the box allowing full access to your computer.

QuickTalker 12

AbleNet, Inc.

Price: \$215.00

Device: dedicated communicator, speech output

Disability: cognitive, learning, physical, speech

Easy-to-use, go-anywhere communicator. With QuickTalker 12, your students will be ready to start communicating in minutes. The variety of message locations and 12 minutes of total recording time, five available levels provide the flexibility you need to customize the learning outcomes for each student.

QuickTalker 23

AbleNet, Inc.

Price: \$235.00

Device: dedicated communicator, speech output

Disability: cognitive, learning, physical, speech

Easy-to-use, go-anywhere communicator. With QuickTalker 23, your students will be ready to start communicating in minutes. The variety of message locations and 12 minutes of total recording time, five available levels provide the flexibility you need to customize the learning outcomes for each student.

QuickTalker 7 FT

AbleNet, Inc.

Price: \$195.00

Device: dedicated communicator, large print, speech output

Disability: cognitive, learning, physical, speech

Easy-to-use, go-anywhere communicator. With QuickTalker 7, your students will be ready to start communicating in minutes. The variety of message locations and six minutes of total recording time, five available levels provide the flexibility you need to customize the learning outcomes for each student.

Randomizer Gamer

Adaptation, Inc.

Price: \$169.00

Device: switch, speech output

Disability: cognitive, learning, physical, speech

The Randomizer records multiple messages and plays them back in random order. It has two independent levels for easy recording with 90 seconds per level. Modes of operation include single message, jumble (messages occur in random order, or eliminator (messages occur in random order but do not repeat once played).

Remote Emergency Stop Switch

Adaptive Switch Laboratories, Inc.

Price: \$735.00 - \$1185.00

Device: switch

Disability: physical

The ASL 504 allows a power wheelchair to be stopped remotely within a range of 20 feet. It will stop the wheelchair with the activation of one switch and will allow it to move again when it is turned off. This switch is helpful when intervention is needed during training.

Reveal 16

HumanWare

Price: \$2995.00 - \$3895.00

Device: large print

Disability: vision

Reveal 16 is an intuitive, easy to use and foldable digital magnifier that offers an unmatched crisp, and crystal-clear image quality thanks to its 10x optical zoom camera. Designed for seniors and elementary students, it enables to read documents, textbooks and newspapers as well as to write down notes. Reveal 16 also allows you to view distant objects like an artwork, your own backyard or even the whiteboard.

Reveal 16i

HumanWare

Price: \$3995.00 - \$4895.00

Device: optical character recognition, large print, speech output

Disability: vision

Reveal 16i is a smart all-in-one device that allows you to video chat with friends, check your emails, watch videos on YouTube, download applications from Play Store and have all the printed material read to you thanks to its integrated Optical character recognition (OCR) and Text-to-speech (TTS) capabilities. You can also open your books and take digital notes before sharing them with others thanks to Reveal 16i. It has an integrated touchscreen allowing you to customize your experience. You can choose to use the touchscreen like you would with a tablet or use the buttons.

Revibe Connect

Revibe Technologies

Price: \$119.95

Disability: cognitive, learning

Revibe reminds students to get back to work. Instead of an embarrassing tap on the shoulder from their teacher, they feel a gentle, automated vibration from Revibe on their wrist. This type of redirection empowers students to complete their work independently, improving their self-confidence.

RoboDesk - Robotic Mobile Device Mount

Prehensile Technologies

Price: \$2000 - \$3000

Device: switch interface, environmental control

Disability: physical

RoboDesk is a robotic wheelchair mount for mobile devices. It allows a user to independently deploy, position, and store mobile devices using accessible switches from a power wheelchair. RoboDesk mounts on the side rail of your wheelchair and can be powered from the chair or with an external battery.

RoboTable - Robotic Overbed Table

Prehensile Technologies

Price: \$2500 - \$3500

Sip/Puff Breeze

Origin Instruments Corp.

Price: \$160.00

Device: switch, switch interface

Disability: physical

Connects directly to USB ports on computers, tablets and phones, speech generating devices and provides hardware emulation of mouse, keyboard, and joystick buttons; works with iPad using Apple adapter. The integrated pneumatic port connects directly to a range of available user interface options.

Sip/Puff Breeze with Gooseneck

Origin Instruments Corp.

Price: \$295.00

Device: switch, switch interface

Disability: physical

Connects directly to standard USB port on computers, tablets, phones, speech

generating devices and provides hardware emulation of: mouse, keyboard, joystick buttons; works with iPad using Apple adapter. Breeze has a range of available user interface options, including Gooseneck. Flexible steel gooseneck and the ball-and-socket mount enable easy and secure mouthpiece positioning.

Sip/Puff Breeze with Headset

Origin Instruments Corp.

Price: \$295.00

Device: switch, switch interface

Disability: physical

Connects directly to standard USB port on computers, tablets, phones, speech generating devices and provides hardware emulation of: mouse, keyboard, joystick buttons; works with iPad using Apple adapter. Breeze connects directly to a range of available user interface options, including the Sip/Puff Headset.

Sip/Puff Gooseneck

Origin Instruments Corp.

Price: \$150.00

Device: switch

Disability: physical

The Sip/Puff Gooseneck features a universal clamp that attaches to table tops, beds and wheelchairs. The flexible steel gooseneck and the ball-and-socket mount enable easy and secure mouthpiece positioning. The filtered mouthpiece is replaceable and a thin, pliable connecting tube interfaces to Sip/Puff Switch or Breeze.

Sip/Puff Headset

Origin Instruments Corp.

Price: \$150.00

Device: switch

Disability: physical

This head referenced design maximizes compatibility with other assistive technologies, like HeadMouse that employ head movement. A replaceable mouth tube is held in position with an integral stainless steel forming wire. A thin, pliable connecting tube interfaces to Sip/Puff Switch or Breeze.

Sip/Puff Switch

Origin Instruments Corp.

Price: \$160.00

Device: switch

Disability: physical

The Sip/Puff Switch translates sips and puffs into independent switch closures. Batteries or external power are not required. Test buttons are integrated to assist in application testing. A twist-on pneumatic interface provides for direct connection to a range of available user interface options, including Headset and Gooseneck.

Sip/Puff Switch with Gooseneck

Origin Instruments Corp.

Price: \$295.00

Device: switch

Disability: physical

The Sip/Puff Switch translates sips and puffs into independent switch closures. Batteries or external power are not required. Test buttons are integrated to assist in application testing. A twist-on pneumatic interface provides for direct connection to a range of available user interface options, including the Gooseneck.

Sip/Puff Switch with Headset

Origin Instruments Corp.

Price: \$295.00

Device: switch

Disability: physical

The Sip/Puff Switch is a pneumatic switch. It can be used in any switch application. The headset mounts comfortably over the top of both ears and behind the head, making it less visible than typical headsets. It includes replacement mouth tubes, a switch box and 1/8-inch (3.5mm) connection cables.

Skoog for PC

Westminster Technologies

Price: \$179

Disability: cognitive, learning, physical

Skoog is an accessible, tactile cube that allows children with differing abilities to join an orchestra or band and take part in a range of music-making activities. Skoog's adjustable sensitivity and easy integration with GarageBand make it perfect for any inclusive music activity. Used together, Skoog and iPad expand the potential of music therapy for young children with cerebral palsy, autism, Down's Syndrome and other developmental delays by offering hands-on opportunities to create and control sound expressively. Skoog's sensory-friendly tactile nature helps greatly in developing new skills and promoting physical interaction with technology.

Small Joystick

RJ Cooper and Associates

Price: \$99 - \$239

Device: mouse emulator

Disability: physical

A joystick very similar to that of a power wheelchair that can 'be' the mouse on a computer or tablet. Available either in an 8x4x3 box with 0-4 large buttons on it, or a standalone version, 3x3, with 0-4 switch inputs. This is a switch type joystick so there is no proportionality but you can use the host's Acceleration parameter to emulate that.

Smart Reader HD

Enhanced Vision

Price: \$1895.00

A Full Page OCR system that is deal for reading magazines, books, newspapers, recipes and any other printed material. Simply position your document and press

a button, in a few seconds Smart Reader begins to read aloud. Attach headphones for privacy.

Smart Reader with Console

Enhanced Vision

Price: \$2095.00

A lightweight, portable reader/scanner with large built-in user friendly tactile control buttons, and Full Page OCR system that is ideal for reading magazines, books, newspapers, recipes and any other printed material. Read along and listen as Smart Reader reads your printed documents aloud. A user friendly Control Console offers easy-to-use tactile buttons. Attach headphones for privacy.

Specs Switch

AbleNet, Inc.

Price: \$65.00

Disability: physical

Here's a quick and easy left click mouse interface that allows the user to simulate left click selection using their switch (sold separately) with standard 1/8" (3.5mm) jack. Works with single switch scanning software that utilizes a left mouse click for activation or for traditional software where the adult or peer can manipulate the mouse on the screen and the user can activate their switch to select an item. Also useful for individuals who are able to move the mouse on the screen, but can't click the mouse button themselves. They can move the mouse over the target on the screen, then activate their switch to left click. Need right click instead? Contact us and we'll gladly help you with that special request.

Wireless IR Mouse Emulator

Adaptive Switch Laboratories, Inc.

Price: \$1560.00 - \$1680.00

Device: mouse emulator

Disability: physical

ASL 550 and/or 551 a desktop wireless, infrared transmitter/receiver mouse emulator with three switch configuration. Full mouse emulation is achieved with only three switches. The five switch version allows the wheelchair joystick to become a joystick operated mouse. Computer access from the wheelchair is achieved through a wireless infrared connection.

Wireless Switch Transmitter and Receiver

Adaptive Switch Laboratories, Inc.

Price: \$800.00

Device: switch, switch interface

Disability: physical

The ASL 503 allows you to transmit up to five switches to a remote location. This is achieved with a 12 volt transmitter/receiver that has five mono ports as inputs on the transmitter and five mono outputs on the receiver. Switches not included.

Wobble Switch

AbleNet, Inc.

Price: \$150.00

Device: switch

Disability: cognitive, physical

The Wobble Switch is activated by moving the 4-in / 10.16-cm black flexible arm in any direction or pushing the arm down into the base of the switch. Dual lock is included for mounting to a flat surface, or the Wobble Switch Mounting Plate can be purchased separately.

Wobble Switch

Adaptive Switch Laboratories, Inc.

Price: \$180.00

Device: switch

Disability: physical

The ASL 304A is a single function switch that has a light action spring and can be activated by contact from any direction.

Woodpecker

Jabbla

Price: \$105.00

Device: switch interface

Disability: learning, physical, speech

 Switch/joystick interface. One to five switches. Mouse control, action/reaction, input for Mind Express and KeyVit.

Xbox One/S/X and PS4/5

Game Controllers

RJ Cooper and Associates

Price: \$99 - \$239

Device: mouse emulator

Disability: physical

A variety of alternative game controllers used in conjunction with your XBox Adaptive Controller (XAC) for all modern game platforms. Small Joystick (Boxed), Small Joystick (standalone), Full Button Pad, Button Pad, Large Joystick. All available with switch input(s) and/or large buttons that plug into the rear of the XAC.

SOFTWARE

[illegible]

101 Animations

RJ Cooper and Associates

Price: \$0

Special Skill: cognitive redevelopment, early childhood, adapted keyboard/switch access

Disability: cognitive, physical

Skill Level: infant/toddler, preschool, elementary

Operating System: Windows, Mac

Each activation of the switch causes one of 101 large, loud animations to be played. All Windows and Mac OS's supported.

2 + 2

RJ Cooper and Associates

Price: \$59.00

Special Skill: early childhood

Academic Skill: math

Disability: learning, physical, vision

Skill Level: elementary, secondary

Operating System: Windows, Mac

This is a talking math facts program. You can edit the facts list and use addition, subtraction, multiplication and division with numbers up to 999, even decimals. An easy-to-follow scan system is built in for single switch operation, if desired. 2+2 has drill mode, test mode and help function.

AAC Evaluation Genie

Tip Top Apps

Price: \$12.99

Special Skill: communication, , diagnostic

Disability: cognitive, physical, speech

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Operating System: iOS (Apple)

AAC Evaluation Genie is an informal diagnostic tool that is intended to assist speech-language pathologists and others with identifying skill areas that relate specifically to the language representation methods commonly found on augmentative communication systems. There are 13 subtests that can be administered with screening options available for each subtest. English and Spanish language options are available. Direct touch, single and two switch scanning access methods options are available.

ABC Maestro

E-Glas d.o.o.

Price: \$69.95 - \$129.95

Special Skill: language development

Academic Skill: math, reading, spelling, writing

Skill Level: preschool, elementary

Operating System: Windows

ABC Maestro is unique educational rehabilitation software for learning how to write, type, and read. It is primarily intended for students with special educational needs. ABC Maestro offers children faster learning through play. It has 14 fun activities divided into 3 categories - letters, words and numbers.

AbleLink JobQuest

AbleLink Smart Living Technologies

Price: \$2500.00

Special Skill: basic living skills, cognitive redevelopment, vocational, , diagnostic, instructional management

Disability: cognitive

Skill Level: secondary, adult

Operating System: Other

AbleLink JobQuest is a web-based service that gives people with cognitive disabilities a voice in their own career path. Employing AbleLink's ATLAS survey engine and Data Reports system, JobQuest presents multiple job categories and gathers data in real time regarding the preferences of the individual. Students and adults with intellectual and developmental disabilities often have difficulty understanding the nature of various types of work. Pictures and words are limited in conveying tasks, the work environment, tools that might be used, or other elements that could affect job preference.

AbleLink VantagePoint

AbleLink Smart Living Technologies

Price: \$2500.00

Special Skill: basic living skills, , diagnostic, IEP/IPP

Disability: cognitive, learning

Skill Level: secondary, adult

Operating System: Windows, iOS (Apple), Android

VantagePoint software includes four satisfaction surveys addressing key service areas: My Views About...My Home, My Work, Accessing My Community, and My Day Program. The VantagePoint service includes web-based surveys, data reporting, and unlimited usage.

AbleLink WayFinder

AbleLink Smart Living Technologies

Price: \$149.99

Special Skill: basic living skills, cognitive redevelopment, vocational, , authoring system, instructional management

Academic Skill: geography

Disability: cognitive, learning

Skill Level: secondary, adult

Operating System: iOS (Apple), Android
WayFinder uses GPS-based personalized audio and visual cues to support independent travel via bus systems and on foot. Specific travel routes can be created and activated from the GPS location. Users then receive customized audio and visual instructions, prompting them through route navigation. Available for the iPhone and Android phones.

Access Algebra

Attainment Company, Inc.

Price: \$129.00 - \$399

Academic Skill: math

Skill Level: secondary

Access Algebra is a research-based math curriculum for high school students who have moderate-to-severe developmental disabilities, including those with an intellectual disability or autism. The curriculum

gives students access to content their high school peers are learning, but with the adaptations and support they may need to succeed. The curriculum accommodates students who have unique needs, including those who are nonverbal and those whose math skills are at an emergent numeracy level.

Access Language Arts iPad app

Attainment Company, Inc.

Price: \$39.99

Special Skill: cognitive redevelopment, communication, language development, adapted keyboard/switch access, large print, scanning, single switch, multi switch, speech output

Academic Skill: prereading, reading

Disability: cognitive, learning, physical

Skill Level: elementary, secondary, adult
Adapted stories: Neighbors, Sadako and a

Thousand Paper Cranes, The Diary of Anne Frank, and We Beat the Streets. Five-step sequence: Preview, vocabulary instruction, read the adapted story, comprehension questions, sequencing activity. Research has shown to be highly effective in teaching language arts skills aligned to standards.

Access Language Arts software

Attainment Company, Inc.

Price: \$99.00

Special Skill: cognitive redevelopment, communication, language development, adapted keyboard/switch access, large print, scanning, single switch, multi switch, speech output

Academic Skill: prereading, reading

Disability: cognitive, learning, physical

Skill Level: elementary, secondary, adult

Operating System: Windows, Mac
Adapted stories: Neighbors, Sadako and a Thousand Paper Cranes, The Diary of Anne Frank, and We Beat the Streets. Five-step sequence: Preview, vocabulary instruction, read the adapted story, comprehension questions, sequencing activity. Research has shown to be highly effective in teaching language arts skills aligned to standards.

Access Language Arts: WRITE Software

Attainment Company, Inc.

Price: \$99.00 - \$990.00

Special Skill: language development

Disability: learning, physical

Skill Level: secondary

A researched and standards-based approach for secondary students practicing reading and writing skills. Prompts students to write grade-aligned opinion paragraphs for nonfiction and fiction and improves reading comprehension and vocabulary development. Can be used as a complement to Teaching to Standards:

English Language Arts or a stand-alone curriculum.

Accessible Literacy Learning (ALL) Reading Program Software

Tobii Dynavox

Price: \$79.99

Dino-DOT

Academic Software, Inc.

Price: \$20.00

Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, adapted keyboard/switch access, scanning, single switch

Academic Skill: prereading, problem solving

Disability: cognitive, learning, physical

Skill Level: infant/toddler, preschool, elementary

Operating System: Windows

Connect the dots and colorful animated dinosaurs appear before your eyes. Number concepts, counting, sequencing skills and special perception are involved in play. Games can be selected using patterns of three, six, nine or 12 dots. Mode of play, difficulty level, auditory feedback and scan speed can be controlled manually.

Dino-FIND

Academic Software, Inc.

Price: \$20.00

Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, adapted keyboard/switch access, scanning, single switch

Academic Skill: prereading, problem solving

Disability: cognitive, learning, physical

Skill Level: infant/toddler, preschool, elementary

Operating System: Windows

Dino-Find is a game of concentration stimulating memory and pattern recognition and providing scanning practice. Dinosaurs are selected randomly. One to six matching pairs can be displayed. Switch users make selections using row/column or linear scanning. Mode of play, difficulty level, auditory feedback and scan rate can be controlled manually.

Dino-GAMES

Academic Software, Inc.

Price: \$60.00

Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, adapted keyboard/switch access, scanning, single switch

Academic Skill: prereading, problem solving

Disability: cognitive, physical

Skill Level: infant/toddler, preschool, elementary

Operating System: Windows

All 4 early-childhood educational games: DinoDOT (spatial-perception, counting and sequencing skills); DinoFIND and DinoLIKE (memory and pattern-recognition); and DinoMAZE (cause and effect and directionality learning). Adjust difficulty level and other settings for each game independently. DinoGAMES work with keyboard, mouse, or external single-switch and provide early scanning practice opportunities.

Dino-LIKE

Academic Software, Inc.

Price: \$20.00

Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, adapted keyboard/switch access, scanning, single switch

Academic Skill: prereading, problem solving

Disability: cognitive, learning, physical

Skill Level: infant/toddler, preschool, elementary

Operating System: Windows

Single switch users select dinosaurs identical to a target dinosaur. The discrimination level can be set manually, choosing a match and two distracters, a match and one distracter, or the match alone. Color, shape and orientation of dinosaurs are used to enhance pattern matching skills. Can be controlled manually.

Dino-MAZE

Academic Software, Inc.

Price: \$20.00

Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, adapted keyboard/switch access, scanning, single switch

Academic Skill: prereading, problem solving

Disability: cognitive, learning, physical

Skill Level: infant/toddler, preschool, elementary

Operating System: Windows

Colorful, motivating exercises where dinosaur characters move through mazes to reach goals with reinforcement through music and animation. Single switch users choose between cause and effect activities or games involving decisions about which directions the animated characters should go to get from start to finish. Can be controlled manually.

Hoonuit's Data Analytics Solution

Hoonuit

Price: \$800 - \$

Academic Skill: database

Skill Level: elementary, secondary, adult

Operating System: Windows, Mac, iOS (Apple), Android, Chrome, Other

With the Every Student Succeeds Act (ESSA) implementation upon us, clear and accessible reporting is evolving. The additional transparency is important, but the new reporting requirements are putting added strain on already scarce time and resources. Hoonuit supports your accountability reporting efforts without sacrificing the access to data you need to make decisions. To learn more, visit our [website](https://www.hoonuit.com/home)

I Can Match Capitals

OT-Care

Price: \$6.00 - \$6.00

Special Skill: communication, eye-hand coordination, language development, adapted keyboard/switch access, large print, single switch

Academic Skill: prereading, reading

Disability: cognitive, hearing, learning, physical, speech, vision

Skill Level: infant/toddler, preschool, elementary

Operating System: Windows, Mac

One capital letter is shown, with a choice of two small letters. The correct answer is randomly placed to the left or right of the screen. When the student touches the correct letter, they are rewarded with sight and sound. The whole screen is used, providing a large target area.

I Can Spell

OT-Care

Price: \$6.00 - \$6.00

Special Skill: early childhood, eye-hand coordination, language development, adapted keyboard/switch access, large print, single switch

Academic Skill: prereading, spelling

Disability: cognitive, hearing, learning, physical, speech, vision

Skill Level: infant/toddler, preschool, elementary

Operating System: Windows, Mac

Use a touch screen to teach spelling to children with coordination difficulties. The student clicks on their name to begin spelling, each letter is shown in turn, tak-

ing up half the screen. When the student touches the letter they are rewarded with sight and sound.

I Hate Peas

Marblesoft

Price: \$50.00

Special Skill: cognitive redevelopment, early childhood, scanning, single switch, multi switch

Academic Skill: music, prereading

Disability: cognitive, learning, physical

Skill Level: infant/toddler, preschool, elementary

Operating System: Windows

I Hate Peas features another terrific sing-a-long story and a couple of new switch modes for training and play. Three cute kids will eat anything you put on their plate - except peas.

ICanEmail

RJ Cooper and Associates

Price: \$0

Special Skill: communication, telecommunications

Disability: cognitive, learning, physical, speech, vision

Skill Level: elementary, secondary, adult

Operating System: Windows, Mac, iOS (Apple)

A talking email app/website that also has voicemail capabilities. The user is presented with one aspect of email at a time, in a very obvious format. Non/early readers can speak their message and partner hears their voice from any mail program. Most email functions are in the program.

MachineGenesis
Price: \$0
Special Skill: , telecommunications
Disability: hearing
Operating System: iOS (Apple), Android
 <h5 class="text-white">An easy-to-use captioned call app to help people with hearing loss use the phone.</h5>

One Minute Reader

Read Naturally
Price: \$19.99 - \$199.00

Special Skill: language development, speech output
Academic Skill: reading
Disability: learning, speech
Skill Level: elementary, secondary
Operating System: iOS (Apple)
 The award-winning One Minute Reader home reading program is now available as an app for the Apple iPad! One Minute Reader uses the same research-based strategies as Read Naturally's classroom programs. Use One Minute Reader to extend learning with parent involvement at home or to turbo charge independent, differentiated reading time in the classroom.

OneWay

Applied Human Factors, Inc.
Price: \$75.00 - \$149.00
Special Skill: eye-hand coordination, adapted keyboard/switch access, scanning, single switch, multi switch
Disability: physical
Skill Level: preschool, elementary, secondary, adult
Operating System: Windows
 Sometimes people who use switch scanning are capable of more, they just cannot use a standard pointer. Pointers require simultaneous control in two dimensions, which is very difficult. OneWay allows the user to work on one dimension at a time concentrating on the movements they do best.

OnScreen with CrossScanner

Innovation Management Group, Inc.
Price: \$299.95 - \$5000.00
Special Skill: basic living skills, eye-hand coordination, vocational, adapted keyboard/switch access, scanning, single switch, multi switch, speech output
Disability: learning, physical, vision
Skill Level: preschool, elementary, secondary, adult
Operating System: Windows
 Complete switch / scanning capabilities for controlling all Windows functions and Windows applications includes OnScreen and WordComplete. If a user cannot work with traditional pointing devices like a mouse, a head mouse or joystick, switch scanning may be the best alternative. Supports Windows 2000 thru Windows 10 (32/64 bit)

OnScreen with WordComplete

Innovation Management Group, Inc.
Price: \$119.95 - \$5000.00
Special Skill: basic living skills, communication, eye-hand coordination, vocational, adapted keyboard/switch access, scanning, single switch, speech output
Disability: learning, physical, vision
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Operating System: Windows
 Infinitely sizable keyboards; Network Logon; Magnify or Highlight keys; Text-to-Speech; Dwell; Hide and See turns off specific keys; Smart Window repositions key-

boards off applications; TurnAway pauses headmouse devices when user looks away; Scanner provides switch scanning within OnScreen; WordComplete provides word prediction. Supports Windows 2000 thru Windows 10 (32/64 bit)

Outloud Christmas Scene

Outloud
Price: \$0.99 - \$0.99
Special Skill: communication, early childhood, language development
Disability: speech
Skill Level: infant/toddler, preschool
Operating System: iOS (Apple)
 Make your little students beg for, "just one more level," and bring holiday spirit into speech therapy and special education sessions! In this app, your voice is used as a trigger to decorate the theChristmastree. Thus, children practice interactively the concepts of colours locations and naming items.

Present Pal: Communication tool

Price: \$99 - \$299

Special Skill: cognitive redevelopment, communication, language development, vocational

Disability: cognitive, learning, speech, vision

Skill Level: elementary, secondary, adult

Operating System: iOS (Apple), Android

<https://www.presentpal.co.uk> Present Pal is a communication tool created as a solution to a real life challenge.

The software works like a set of interactive flashcards that support you by providing you with a new, improved and accessible way to create notes for

communication tasks such as presentations, group discussions, or interviews.

Proloquo2Go

AssistiveWare

Price: \$249.99

Special Skill: communication, scanning, single switch, multi switch, speech output, authoring system

Disability: cognitive, hearing, learning, physical, speech, vision

Skill Level: preschool, elementary, secondary, adult

Operating System: Mac, iOS (Apple)

Proloquo2Go is an award-winning symbol-based communication app that gives a voice to those who cannot speak. Over 175,000 people already use this AAC app as a powerful tool for expressing themselves and increasing their communication skills and language development. Its innovative features let users, parents, teachers and therapists quickly personalize the app. Proloquo2Go is now available on iPad, iPhone, Apple Watch and also as an app for Mac.

Proloquo4Text

AssistiveWare

Price: \$119.99

Special Skill: communication, language development, scanning, speech output

Disability: speech

Skill Level: elementary, secondary, adult

Operating System: Mac, iOS (Apple)

Proloquo4Text is a text-based communication app that gives a voice to literate children, teens and adults who cannot speak. The app is designed to enable easy conversation and full participation in society. It achieves this through a customizable single screen layout with quick access to personal phrases, word and sentence prediction and other effort-saving features. Free voices in 18 languages are included to enable natural-sounding communication. Proloquo4Text is available on the iOS App store and also on the Mac OS App store.

ProPack

Accessibyte

Price: \$150

Special Skill: basic living skills, cognitive redevelopment, communication, language development, vocational, large print, scanning, speech output

Academic Skill: geography, graphic arts, health, math, prereading, problem solving, reading, science, social studies, spelling, writing

Disability: cognitive, hearing, learning, physical, speech, vision

Skill Level: elementary, secondary, adult

Operating System: Windows, Mac, iOS (Apple), Android, Chrome, Other

Students can use ProPack to look up info, create documents, manage tasks, crunch numbers, and more! ProPack is self-voicing and highly visual. With or without vision, students achieve their full potential

without the need for outside accessibility software. Apps include Encyclopedia, Dictionary, Calculator, Notepad, Reader, To-Do List and Activity tracker.

Quick Cards

Accessibyte

Price: \$150

Special Skill: basic living skills, cognitive redevelopment, communication, language development, vocational, adapted keyboard/switch access, large print, speech output

Academic Skill: geography, health, math, music, prereading, reading, science, social studies, spelling

Disability: cognitive, hearing, learning, physical, vision

Skill Level: preschool, elementary, secondary, adult

Operating System: Windows, Mac, iOS (Apple), Android, Chrome, Other

Quick Cards is a flashcard and test take built for students with visual, audible, reading or attention disabilities. Easily convert your classroom material into an accessible format your students can access from school or home. Offered as part of Accessibyte Online All Access (includes Typio, Quick Cards, Accessibyte Arcade and ProPack).

RadSounds

RJ Cooper and Associates

Price: \$1.99 - \$59

Special Skill: cognitive redevelopment, scanning, single switch, multi switch

Disability: cognitive, physical

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Operating System: Windows, Mac, iOS (Apple), Android

This is a very hip, simple cause and effect music program. The music is very upbeat and age appropriate for adolescents, as well as any age group. Good amplified speakers are recommended for full enjoyment. The graphics show different dancers enjoying the tunes. Supervisor can record music directly into program.

Rea Speech

Tiger DRS, Inc.

Price: \$795 - \$895.00

Special Skill: language development, speech output, diagnostic

Academic Skill: health, music, science

Disability: hearing, speech

Skill Level: preschool, elementary, secondary, adult

Operating System: Windows

Real Speech provides real-time displays of continuously varying speech and voice waveforms. Fundamental frequency, intensity, spectrum or EGG waveform displays. This software provides dynamic interactive displays (instantaneous visual feedback of the acoustical performances of speakers or singer) during sound production. Model Matching function can match models of your own recording.

REACH Interface Author

Applied Human Factors, Inc.

Price: \$329.00 - \$829.00

Special Skill: communication, eye-hand coordination, vocational, adapted keyboard/switch access, large print, scanning, single switch, multi switch, speech output, authoring system, diagnostic

Academic Skill: math, music, prereading, spelling, writing

Disability: cognitive, learning, physical, speech, vision

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Operating System: Windows

This on-screen keyboard system comes with word prediction, speech augmentation, windows management, dwell switch, scanning, and an assessment battery. You can modify any of its 400 plus keyboards or create your own keyboards.

REACH Smart Speech

Applied Human Factors, Inc.

Price: \$329.00 - \$829.00

Special Skill: communication, language development, vocational, adapted keyboard/switch access, scanning, single switch, speech output, telecommunications

Academic Skill: spelling, writing

Disability: cognitive, learning, physical, speech

Skill Level: elementary, secondary, adult

Operating System: Windows

This augmentative communication and writing product provides quick access to thousands of words while guiding you through sentence construction. Conversational sentences will cost you only about two clicks per word.

REACH Sound-It-Out Phonetic Keyboard

Applied Human Factors, Inc.

Price: \$329.00 - \$829.00

Special Skill: communication, language development, adapted keyboard/switch access, scanning, single switch, multi switch, speech output, authoring system

Academic Skill: spelling, typing tutor, writing

Disability: cognitive, learning, physical

Skill Level: preschool, elementary, secondary, adult

Operating System: Windows

Use a keyboard to find the correct spelling for a word or type phonetically. Select sounds for a word and then pick it from a list. Help with homophones is provided.

Read Aloud

OT-Care

Price: \$45.00

Special Skill: language development, large print, scanning, single switch, multi switch

Academic Skill: prereading

Disability: cognitive, learning, physical, speech, vision

Skill Level: infant/toddler, preschool, elementary

Operating System: Windows, Mac

Next button displayed once the page has been completely read aloud. All text visuals and target areas are large. Scan in your own books or create your own, then record your voice reading the book.

Read Live

Read Naturally

Price: \$19.00 - \$159.00

Special Skill: language development, speech output

Academic Skill: reading

Disability: learning, speech

Skill Level: elementary, secondary, adult

Operating System: Windows, Mac, iOS (Apple), Android, Chrome

This web-based platform hosts two highly effective interventions; Read Naturally Live and Word Warm-Ups Live. Both programs efficiently applies the research-based Read Naturally Strategy to accelerate reading achievement. Visual and auditory prompts guide students through the motivating steps to develop fluency and phonics, support comprehension, and improve vocabulary.

Read to Learn app

Attainment Company, Inc.

Price: \$39.99

Special Skill: basic living skills, cognitive redevelopment, vocational, adapted keyboard/switch access, scanning, single switch, multi switch

Academic Skill: health, reading

Disability: cognitive, learning

Skill Level: preschool, elementary, secondary, adult

Three life skill programs rolled into one app. Focus on Feelings, Life Skill Readers, and Safety Skills Reader stories are highlighted as they're read aloud. Click on individual words to hear them. Comprehension questions are at the end of each of the 85 stories.

Read To Learn Software Bundle

Attainment Company, Inc.

Price: \$399.00

Special Skill: basic living skills, cognitive redevelopment, vocational, adapted keyboard/switch access, large print, scanning, single switch, multi switch, speech output

Academic Skill: health, prereading, problem solving

Disability: cognitive, learning, physical

Skill Level: elementary, secondary, adult

Operating System: Windows, Mac

Eight books transition-age students can enjoy reading with as much assistance from the software as they need. Comprehension questions end each Life Skill themed story. Click on individual words to hear them; stories can be read aloud. Log-in system tracks students activities and responses. Scanning built-in.

ReadandWrite

Texthelp

Price: \$145.00

Special Skill: communication, language development, optical character recognition, scanning, speech output, voice recognition

Academic Skill: prereading, reading, spelling, writing

Disability: cognitive, learning, physical, speech, vision

Skill Level: elementary, secondary, adult

Operating System: Windows, Mac, iOS (Apple), Android, Chrome

ReadandWrite is a software toolbar that makes the web, documents and files more accessible - any time, any place, and on any platform/device. It's great for people with dyslexia and other learning difficulties, English Language Learners, or anyone who needs a little extra help with their studies. The easy-to-use, intuitive toolbar is available on PCs, Macs, tablets and Chromebooks.

Academic Skill: prereading, reading, writing

Disability: cognitive, learning, speech, vision

Skill Level: elementary, secondary, adult

Operating System: Windows, Mac, iOS (Apple), Android, Chrome, Other

ReadSpeaker assistive technology helps students improve comprehension, motivation, and stay at peer levels. Our seamless solutions bring audio to the entire learning landscape and allow schools to quickly and easily integrate audio across all platforms and content.

Readtopia

Don Johnston, Inc.

Price: \$625.00 - \$

Special Skill: communication, language development

Academic Skill: geography, prereading, problem solving, reading, science, social studies, spelling

Disability: cognitive, learning

Skill Level: elementary, secondary, adult

Operating System: Windows, Mac, Chrome

Readtopia is a comprehensive reading curriculum for middle and high school students with autism and other complex needs. It brings first-hand experiential learning into the classroom, teaching students standards-aligned social studies, ELA, and science content.

Responder2

Compusult Limited

Price: \$5995.00 - \$9995.00

Special Skill: large print, speech output

Disability: cognitive, learning, physical, vision

Skill Level: secondary, adult

Operating System: Windows

Responder2 is a speech-enabled machine vision system that assists blind employees.

For example, Responder2 acts as a dedicated alarm monitoring system in medical centers employing blind switchboard operators. Responder2 detects whenever alarms occur, identifying them via speech output, thus allowing blind employees to swiftly and accurately respond to critical situations.

Revenge of Cause and Effect Sights and Sounds

Marblesoft

Price: \$4.99 - \$30.00

Special Skill: cognitive redevelopment, early childhood, single switch, multi switch

Disability: cognitive, physical

Skill Level: infant/toddler, preschool

Operating System: Windows

This fourth entry into the popular Sights and Sounds Series includes all new animated activities and musical themes.

It trains three different switch modes and, like its sister programs, is great for all ages.

Right-Hear

RightHear

Price: \$0

Special Skill: basic living skills

Disability: vision

Skill Level: elementary, secondary, adult

Operating System: iOS (Apple), Android

RightHear is an advanced accessibility solution that allows its users to hear where they are, what's there, and what's around them simply by pointing their smartphone in different directions.

RoutineFactory

RoutineFactory

Price: \$11.95 - \$99.95

Special Skill: basic living skills, vocational, large print, speech output

Academic Skill: problem solving

Disability: cognitive, hearing, learning, physical, speech

Skill Level: elementary, secondary, adult

Operating System: Windows, Mac, iOS (Apple), Android, Chrome

RoutineFactory increases confidence and independence by stimulating self-reliance and self-direction in the person served.

RoutineFactory is composed of two assistive technologies that work together as one. The Information Board is an innovative visual schedule and the app works as a robust ADL prompting tool.

Routines

Cognitopia

Price: \$29 - \$290

Special Skill: basic living skills, cognitive redevelopment, communication, vocational, speech output, voice recognition, IEP/IPP, instructional management

Disability: cognitive, learning

Skill Level: elementary, secondary, adult

Operating System: Windows, Mac, iOS (Apple), Android, Chrome

The Cognitopia Routines tool integrates with the Cognitopia platform to give people a starting point for support. Routines also features a library of routines that includes a community section. Browse the community library to find a routine that has been task analyzed to ensure that each step is clear. You can easily favorite routines from the community, share routines with others, or build your own routines from the ground up to create a personal library that is easy to navigate as well as integrate into MyLife or convert into a Goal Guide goal.

Ruff's Bone - interactive storybook

The attention games teach matching, same-to-same and figure-ground discrimination. Adults with stroke/ traumatic brain injury can use the CD to recover language and memory skills.

Tunefork app

Tunefork
Price: \$0
Special Skill: communication, language development, telecommunications, diagnostic
Academic Skill: health, music
Disability: hearing
Skill Level: preschool, elementary, secondary, adult
Operating System: Android
 Tunefork is audio personalization software that delivers the optimal hearing experience, improving quality of life for people with hearing loss and elders. Hearing is an individual experience. Each of us has unique hearing "Earprint". This is why no one sound system is perfect for everyone. When you listen to unbalanced audio, you will always miss something. In some cases, you may even cause damage to your hearing. The Tunefork app allows you to take a hearing test when and where is most convenient to you. You could take the test in your living room, without going anywhere, and discover your unique "Earprint". The test is simple yet accurate, following the same protocols as a clinical hearing test that would usually only be done in special booths in hearing centers.

Turn Taking

Judy Lynn Software, Inc.
Price: \$49.00
Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, single switch, multi switch
Academic Skill: problem solving
Disability: cognitive, learning, physical
Skill Level: infant/toddler, preschool, elementary
Operating System: Windows
 The program is designed to teach the concept of waiting your turn. When a student's prompt appears, the student presses their switch, keyboard key, or touch window to reveal a section of a picture. Once the entire picture is displayed, a video clip reward related to the picture is played.

Turn-Talking

RJ Cooper and Associates
Price: \$1.99 - \$59.00
Special Skill: communication, language development
Academic Skill: prereading
Disability: cognitive, physical, speech
Skill Level: preschool, elementary, secondary
Operating System: Windows, Mac, iOS

(Apple)

This software takes the user on a guided tour of taking turns in a conversation. A supervisor writes a script and has a person, close in age to the user, record the user's phrases. Turn-Talking then conducts that conversation.

Vehicle Jigsaw - Assemble 6 pieces of a picture. Age 2.5+.

STEP BY STEP

Price: \$0

Special Skill: early childhood, adapted keyboard/switch access, single switch, multi switch, speech output
Skill Level: infant/toddler, preschool
Operating System: iOS (Apple)
 Welcome to, "Vehicle Jigsaw,". This educational app is designed for children aged 2.5 and above. Here children can learn to piece together a well known picture of a vehicle. It is fun, and it helps them develop spatial cognition skills and visual perception skills. STEP BY STEP is a professional EdTech studio that focuses on developing educational apps for children aged 1 to 5 years old. During these critical years, children enter a new learning stage every few months. Our apps support and strengthen the development of crucial skills for each learning stage. This way we guide your children, step by step, throughout this entire age range.

View2do

Do2Learn

Price: \$99.00

Special Skill: basic living skills, communication, early childhood, language development, , authoring system
Academic Skill: math, prereading, problem solving, reading
Disability: cognitive, learning
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Operating System: Windows, Mac, Android, Chrome
 View2Do is an online yearly subscription program that lets teachers and parents create customized teaching aids for visual learners. View2Do gives schools and families a powerful tool to create, share, network and teach, all in an engaging visual medium ideal for students with learning and communication differences.

Virtual Motor Skills

Judy Lynn Software, Inc.

Price: \$49.00

Special Skill: cognitive redevelopment, early childhood, adapted keyboard/switch access, scanning, single switch, multi switch
Academic Skill: problem solving
Disability: cognitive, physical
Skill Level: infant/toddler, preschool
Operating System: Windows
 Gives the user with limited motor skills the virtual experience of maneuvering objects around using switches, a mouse click, or keyboard. In many of the activities, the user controls a life like hand to complete tasks such as picking up colored pegs and placing them in their matching colored slots.

Visual Attention Therapy

Tactus Therapy Solutions

Price: \$9.99

Special Skill: cognitive redevelopment, communication, early childhood, eye-hand coordination, language development
Academic Skill: reading
Disability: cognitive, learning, speech, vision
Skill Level: preschool, elementary, secondary, adult
Operating System: iOS (Apple), Android
 Retrain the brain with interactive cancellation exercises that help you assess and treat left neglect.

Visuals2Go

Bo Innovations Pty Ltd

Price: \$0

Special Skill: communication, language development
Academic Skill: prereading
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Operating System: iOS (Apple)
 Visuals2Go is an ALL-IN-ONE app created to support people with communication and learning difficulties. It serves as a tool to build language, for choice-making, to create social stories, for visual prompts, to use as a visual schedule, to learn to read, to print visuals on different templates and many more!

Vital

Vital

Price: \$399

Special Skill: , optical character recognition, speech output
Academic Skill: geography, health, math, science, social studies
Disability: learning, vision
Skill Level: preschool, elementary, secondary
Operating System: Windows, Mac, Android
 From tables to graphs to maps, create digital, accessible learning content with Vital that can be explored by students with visual impairments on tablets. At Vital, we believe that all students should be provided truly accessible learning content. Whether created for a student with a visual

impairment, ADHD, autism or dyslexia, students can explore and learn through sensory channels that best fit their learning style. Students with visual impairments can explore the tablet through their sense of touch by feeling vibrations, much like exploring tactile graphics, and listen for audio cues and text-to-speech.

Vocabulary Fitness

Merit Software

Price: \$79.00

Special Skill: cognitive redevelopment, communication, language development
Disability: cognitive, learning
Skill Level: elementary, secondary, adult
Operating System: Windows
 Vocabulary Fitness provides students with interactive vocabulary lessons to help them master commonly confused and misused words. After an assessment, students work at their own pace and receive help and contextual feedback throughout. Scores are kept in a record management system that allows teachers to view and print results.

Vocabulary Stretch

Merit Software

Price: \$79.00

Special Skill: cognitive redevelopment, language development
Disability: cognitive, learning
Skill Level: elementary, secondary, adult
Operating System: Windows, Mac
 Helps students recognize words in different contexts and understand the derivation of many English words. Students advance as they demonstrate readiness. A convenient record management system tracks scores and allows teachers to view detailed reports. Designed for students in grades 4 through 10 and can be used by older students.

Vocal Assessment

Tiger DRS, Inc.

Price: \$695 - \$895

Special Skill: language development, speech output, diagnostic
Academic Skill: health, science
Disability: speech
Skill Level: secondary, adult
Operating System: Windows
 Vocal Assessment provides you with the ability to analyze and display both acoustic and EGG features of a sustained vowel. A wide range of parameters (jitter, shimmer, NNE, etc.) and graphic displays (spectrogram, F0, intensity, etc.) are offered. Used to guide diagnostic assessments for voice disorders by measuring hoarse, harsh, and breathy voice.

Special Skill: basic living skills, diagnostic, IEP/IPP, instructional management

Academic Skill: math

Disability: learning

Skill Level: elementary, secondary, adult

Operating System: Windows, Mac, iOS (Apple), Android, Chrome, Other

Woot Math helps teachers bring mathematics to life through research-backed tools for adaptive learning and formative assessment.

Word Practice

LocuTour Multimedia

Price: \$4.99

Special Skill: early childhood, language development

Disability: learning, speech

Skill Level: preschool, elementary

Operating System: iOS (Apple)

A beginning level app for early language learners. Colorful drawings or photos are presented in three categories: Common Verbs, Contrast Words like over/under and Animals. Listen and learn the vocabulary word, or imitate the speech model. The app provides a model for step-by-step transition to full sentences.

WordComplete (Innovation Management Group, Inc.)

Innovation Management Group, Inc.

Price: \$99.95 - \$3500.00

Special Skill: language development, vocational, adapted keyboard/switch access

Academic Skill: writing

Disability: learning, physical

Skill Level: elementary, secondary, adult

Operating System: Windows

WordComplete adaptively predicts the word you are entering and gives you choices from its dictionary. Dictionary comes with a basic list, then adds new words as you type them. You can import

or create multiple dictionaries to suit your needs. Sorts alphabetical and often used. Windows 2000 thru Windows 10

WordComplete (RJ Cooper and Associates)

RJ Cooper and Associates

Price: \$59.00

Special Skill: communication

Academic Skill: writing

Disability: learning, physical, speech

Skill Level: elementary, secondary, adult

Operating System: Windows

Utility that provides candidates for completing words within any software. Choices can be spoken for preview and are presented inline with the insertion point. Customizable word list. Great for slow typists, emerging literacy, LD and Down Syndrome.

WordQ

Quillsoft Ltd.

Price: \$139.30 - \$199

Special Skill: basic living skills, communication, language development, speech output, voice recognition

Academic Skill: prereading, reading, spelling, writing

Disability: cognitive, hearing, learning, physical, speech, vision

Skill Level: elementary, secondary, adult

Operating System: Windows, Mac

WordQ is a writing skill improvement and compensation tool that works on top of any Windows or MacOS application where students write. WordQ helps students create better quality written work with greater independence and ease with less stress. Intelligent word prediction suggests words appropriate for elementary and secondary school levels. Students write faster and produce more, and get help with spelling and grammar with as little as one or two keystrokes.

WordQ 5

Quillsoft Ltd.

Price: \$75.00 - \$199.99

Special Skill: communication, language development, speech output

Academic Skill: reading, spelling, typing tutor, writing

Disability: hearing, learning, physical, speech

Skill Level: elementary, secondary, adult

Operating System: Windows, Mac, iOS (Apple), Chrome

WordQ 5 supports users of all ages by offering state-of-the-art word prediction, speech feedback, proofreading, enhanced topical web searches to help with researching for projects and papers, and more. WordQ can be used virtually anywhere you type on a computer, online or off, helping users realize their full potential and gain confidence in their ability to express their thoughts and ideas.

WordQ 5 Pro

Quillsoft Ltd.

Price: \$99.00 - \$279.00

Special Skill: communication, language development, speech output

Academic Skill: reading, spelling, typing tutor, writing

Disability: learning, physical, speech

Skill Level: secondary, adult

Operating System: Windows, Mac, iOS (Apple), Chrome

WordQ 5 Pro is a writing skill improvement and compensation tool that works on top of any Windows or MacOS application where you write, both online and offline. Both post-secondary students and professionals can benefit from using WordQ 5 Pro, including English Language Learners (ELL), Second Language Learners, and struggling writers. WordQ Pro helps you to create better quality written work with greater independence and ease with less stress. Intelligent word prediction suggests words appropriate for colleges, universities, and workplaces from a multidisciplinary 110,000-word vocabulary. Speed up writing and get help with spelling and grammar with as little as one or two keystrokes.

WordQ for Chrome

10 Foot TriFold Portable Wheelchair Ramp

Express Ramps

Price:\$519.95

Product Type: seating/positioning/ mobility

Skill Level: elementary, secondary, adult

Disability: physical

The Advantage Tri-Fold Ramp from EZ-Access offers the length required for wheelchairs and scooters to access mini and full-size vans, go up a number of steps, or raised landings. Advantage Tri-Fold Ramps split into 2 pieces, have anti-slip coatings, and feature bottom transition plates that make loading a breeze.

2-Point Padded Hip Belt

Bodypoint Inc.

Price:\$60.00 - \$129.00

Product Type: seating/positioning/ mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Highest quality materials and advanced design details make Bodypoint belts the top choice of therapists and wheelchair users around the world. Our padded hip belt with two points of attachment is built for maximum functionality, durability, and all-day user comfort. Three pull styles and five buckle styles accommodate individual needs. Machine wash and dry.

4 Switch Proximity Tray Array

Adaptive Switch Laboratories, Inc.

Price:\$4480.00 - \$5316.00

Product Type: seating/positioning/ mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

The ASL 106 offers four proximity sensors that allow the driver to operate a power wheelchair. These sensors can be positioned inside a tray or at any available switch site. It was designed for those who have problems maintaining a switch that requires pressure or contact.

4-Point Padded Hip Belt

Bodypoint Inc.

Price:\$82.00 - \$167.00

Product Type: seating/positioning/ mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Four points of attachment on this belt ensure the pelvis stays in an aligned, stable position, secure against the wheelchair seat and back supports. Primary straps position the belt while secondary straps anchor it into position. Bodypoint's high quality materials and design details ensure maximum functionality, durability, and all-day comfort. Three pull styles and five

buckle styles accommodate individual needs. Machine wash and dry.

5 Foot TriFold Portable Wheelchair Ramp

Express Ramps

Price:\$219.95 - \$219.95

Product Type: seating/positioning/ mobility

Skill Level: elementary, secondary, adult

Disability: physical

The Advantage Tri-Fold Ramp from EZ-Access offers the length required for wheelchairs and scooters to access mini and full-size vans, go up a number of steps, or raised landings. Advantage Tri-Fold Ramps split into 2 pieces, have anti-slip coatings, and feature bottom transition plates that make loading a breeze.

5 Little Men in a Flying Saucer with BSL Signs Kindle

Co-Sign Communications (inc DeafBooks.co.uk)

Price:\$3.24

Product Type: adapted play/ manipulative, instructional material, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary

Disability: cognitive, hearing, learning, speech

Available from amazon.com Thirty-five pages in fixed page landscape format to keep the relevant text with the signs. Part of a series to promote essential early learning skills. Well-loved counting Nursery Rhyme with signs to enjoy with your child. Double-tap the sign graphics for pop-up text describing the movements.

6 Foot TriFold Portable Wheelchair Ramp

Express Ramps

Price:\$249.95

Product Type: seating/positioning/ mobility

Skill Level: elementary, secondary, adult

Disability: physical

The Advantage Tri-Fold Ramp from EZ-Access offers the length required for wheelchairs and scooters to access mini and full-size vans, go up a number of steps, or raised landings. Advantage Tri-Fold Ramps split into 2 pieces, have anti-slip coatings, and feature bottom transition plates that make loading a breeze.

6610 CHEST SUPPORT

Danmar Products, Inc.

Price:\$150.00

Product Type: seating/positioning/ mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, physical

A core of moldable material surrounded in soft foam provides a comfortable chest support that can form to follow body contours. There are strap attachments on

the Yokes for wheelchairs, travel chairs and strollers, and the lap belt has pivot mounts for optimal adjustability.

6611 CLEAR CHEST SUPPORT

Danmar Products, Inc.

Price:\$130.00

Product Type: seating/positioning/ mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, physical

Flexible yet durable, this easy-to-use design has no bulky hardware and is hardly noticeable! It offers positioning for individuals who benefit from having their upper body stabilized and hips held at a proper angle. It can be used with most standard, high back or custom wheelchairs and strollers.

6615 SPLIT CLEAR CHEST SUPPORT

Danmar Products, Inc.

Price:\$130.00

Product Type: seating/positioning/ mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, physical

This flexible yet durable anterior support provides a firm fit, and is designed to be easy on and off. It can be adjusted for seasonal clothing changes and growth. Made of heavy duty 1/8" thick clear PVC vinyl, it will last much longer than harnesses made of fabric.

6620 MODULAR CHEST SUPPORT

Danmar Products, Inc.

Price:\$195.00

Product Type: seating/positioning/ mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, physical

We have surrounded a core of moldable material with soft foam to create a chest support that is comfortable and can be formed to follow body contours. The yoke arms and lap belt pivot, allowing for tailored adjustments for ultimate comfort.

6626 TRUNK SUPPORT SYSTEM

Danmar Products, Inc.

Price:\$150.00

Product Type: seating/positioning/ mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, physical

Designed for use in a wheelchair or custom seating system, this system provides firm support by using an inner core of molded nylon, with a vinyl-coated soft form cover for comfort and ease of cleaning, and can be permanently mounted to the back of a chair.

6760 UTENSIL HANDLES

Danmar Products, Inc.

Price:\$23.00

Product Type: adapted play/ manipulative, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical

Versatile and comfortable, these handles will hold eating utensils, personal hygiene items, activity brushes and crayons. Specially contoured sections fit into the hand and have a slide-buckle strap that can be easily adjusted for fit. Available in Blue, Orange or Red and sizes Small or Large.

6762 THERAPY HANDLES

Danmar Products, Inc.

Price:\$26.00

Product Type: adapted play/ manipulative, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical

Versatile and comfortable, these handles will hold eating utensils, personal hygiene items, activity brushes and crayons. They come with a 1" foam extension to position the thumb and help with grip. Utensils can be placed in the end of the handle or in the thumb extension.

6763 HANDY HELPERS

Danmar Products, Inc.

Price:\$9.95

Product Type: adapted play/ manipulative, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical

This simple, snap-on device allows a person to self-feed. It's easy to use, soft and comfortable, and comes with a spoon as shown. The vinyl-coated foam is easy to clean with warm soapy water.

6764 KNOB HOLDER

Danmar Products, Inc.

Price:\$13.00

Product Type: adapted play/ manipulative, instructional material, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical

This attachment fits into the end of the Utensil or Therapy Handle, and is used to positioning a writing instrument. Using this holder makes a pen or pencil's angle adjustable, which makes writing easier. and, no matter what position the hand is in, the user can see what is being drawn or written.

6766 TOY HOLDER

Danmar Products, Inc.

Price:\$17.00

Product Type: adapted play/

manipulative, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical
This simple, snap on device allows an individual to interact with a small toy placed in his/her hands. Velcro bands are used to hold a toy in place, while webbing attaches around the palm or wrist. It can be adjusted to fit any size. Sold as a pair.

6767-A COMBO UTENSIL HANDLE & KNOB HOLDER

Danmar Products, Inc.

Price:\$39.00

Product Type: adapted play/manipulative, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical
This all-in-one tool combines the Utensil Handle (#6760) and the Knob Holder (#6764) with Anchor Strap.

6767-B COMBO THERAPY HANDLE AND KNOB HOLDER

Danmar Products, Inc.

Price:\$42.00

Product Type: adapted play/manipulative, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical
This all-in-one tool combines the Therapy Handle (#6762) and the Knob Holder (#6764) and Anchor Strap.

6770 MIBOWL HOLDER

Danmar Products, Inc.

Price:\$45.00

Product Type: instructional material, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical
This new design makes self-feeding easier than ever! Suction cups hold our foam bowl holder in place, preventing movement around the table. Use with our Handy Helpers (6763) for even more eating independence. The bowl is included and our vinyl-coated foam is easily cleaned with warm soapy water.

6771 MIPLATE HOLDER

Danmar Products, Inc.

Price:\$45.00

Product Type: adapted play/manipulative, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical
This new design uses suction cups to hold the plate in place, preventing movement around the table, making self-feeding easier than ever! Use with our Handy Helpers (6763) for even more eating inde-

pendence. Our vinyl-coated foam is easily cleaned with warm soapy water.

6775 MITABLE TOPPER

Danmar Products, Inc.

Price:\$55.00

Product Type: adapted play/manipulative, seating/positioning/mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical
This soft foam table topper makes hard surfaces safer than ever, protecting heads and hands from making contact while also protecting table surfaces during art activities. The foam is vinyl-coated and easy to clean with warm soapy water.

6780 MITABLE TOPPER KIT

Danmar Products, Inc.

Price:\$99.00

Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical
Comes complete with Table Topper Pad, Bowl or Plate Holder, and Handy Helper with spoon. The suction cups on the Bowl or Plate Holder sticks right to the Table Topper Pad and will not move. All components are vinyl-coated and easy to clean with warm soapy water.

6785 MIMITTS

Danmar Products, Inc.

Price:\$105.00

Product Type: adapted play/manipulative, seating/positioning/mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, physical
Our all-foam mitts are specially designed to help absorb and deflect the impact when an individual strikes out. They can be applied and secured quickly with Velcro straps, protecting both the wearer from injuring themselves as well as possibly injuring person(s) nearby; clean with warm soapy water.

6809 HENSINGER WITH HIGH BACK

Danmar Products, Inc.

Price:\$130.00

Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical, speech, vision
Revolutionary in the world of cervical collars, this soft but supportive foam collar braces the head by supporting the occiput and jawline, and is 1" taller in the back. Helping to maintain mid-line head positioning results in improved breathing,

swallowing and simplified feeding and aids with social interaction and awareness.

6810 HENSINGER HEAD SUPPORT

Danmar Products, Inc.

Price:\$125.00

Product Type: seating/positioning/mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical, speech, vision

Revolutionary in the world of cervical collars, the soft yet supportive foam is designed to brace the head by the jawline. It can be used with a chest support or mounted to a permanent seating system.

6815 HENSINGER HEAD SUPPORT WITH MOUNT BAR

Danmar Products, Inc.

Price:\$152.00

Product Type: seating/positioning/mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical, speech, vision

Social interactions and learning skills may be achieved more easily if the head is comfortably positioned while using feeder seats. The preformed bar has a Hensinger Head Support (6810 or 6809) attached. Specify size of feeder seat and Hensinger when ordering.

6826 ANTERIOR HEAD SUPPORT

Danmar Products, Inc.

Price:\$126.00

Product Type: learning aid, seating/positioning/mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical, speech, vision

Help to combat chin drop with this head support which provides firm yet gentle lifting of the chin, and lateral support of the head. There is a padded roll around the rear strap for a comfortable finish.

6828 SIDE-OPENING HEAD SUPPORT

Danmar Products, Inc.

Price:\$145.00

Product Type: seating/positioning/mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, physical, speech, vision

Secure, soft and very supportive, this head support opens on the side for easy on/off. It provides firm yet gently lifting of the chin, as well as lateral and occipital support of the head. The vinyl coating is easily cleaned with warm soapy water.

6833 SWIRL COLLAR

Danmar Products, Inc.

Price:\$69.00

Product Type: learning aid, seating/positioning/mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical, speech, vision

This swirl of soft foam wraps around the neck and has an adjustable Velcro closure in the rear, which makes fitting a breeze and encourages easy movement from side-to-side. Used for minor to moderate support, the Swirl can be used with any seating system and by individuals who are ambulatory.

6855 SOFT DEFLECTOR

Danmar Products, Inc.

Price:\$100.00

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult

Disability: learning, physical, vision
This small, lightweight and discreet toileting aid can attach to any toilet seat; snap on the front or clamp to the rim. The vinyl-coated foam is easy to clean with warm soapy water, and fits onto our Toilet Seat Cover with Reducer Ring (#6850).

6856 PERSONAL DEFLECTOR

Danmar Products, Inc.

Price:\$108.00

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult

Disability: physical
For standard deflectors that are too bulky and make toileting difficult, our personal deflector with a flexible preformed waistband, holds our soft deflector in place. Can be adjusted up and down, as well as side-to-side, and is easily cleaned with warm soapy water.

6858 PRIVACY APRON

Danmar Products, Inc.

Price:\$120.00

Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, learning, physical
Made to fit both open front and round styles of standard toilet seats (and our #6850 Toilet Seat Cover with Reducer Ring), this toileting aid can be mounted using a bracket or clamped onto the rim. Our germ resistant, vinyl-coated foam is easy to clean with warm soapy water.

6860 CHANGING STATION KIT

Danmar Products, Inc.

Price:\$164.95

Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation

Skill Level: elementary, secondary, adult

Disability: cognitive, hearing, learning,

physical
Our germ resistant, vinyl-covered foam is soft and easy to clean using warm soapy water. Soft and cushiony, the pad and forehead/chin rest add comfort while the J-Clips hold everything in place. Contains Changing Pad, Chin/Forehead Rest and J-Clips.

7 Foot TriFold Portable Wheelchair Ramp

Express Ramps

Price:\$299.95

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult

Disability: physical

The Advantage Tri-Fold Ramp from EZ-Access offers the length required for wheelchairs and scooters to access mini and full-size vans, go up a number of steps, or raised landings. Advantage Tri-Fold Ramps split into 2 pieces, have anti-slip coatings, and feature bottom transition plates that make loading a breeze.

8 Foot TriFold Portable Wheelchair Ramp

Express Ramps

Price:\$379.95

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult

Disability: physical

The Advantage Tri-Fold Ramp from EZ-Access offers the length required for wheelchairs and scooters to access mini and full-size vans, go up a number of steps, or raised landings. Advantage Tri-Fold Ramps split into 2 pieces, have anti-slip coatings, and feature bottom transition plates that make loading a breeze.

8720 DELTA SWIM SYSTEM

Danmar Products, Inc.

Price:\$120.00

Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation
Skill Level: elementary, secondary, adult
Disability: cognitive, hearing, learning, physical

This component system is designed to aid in progressive swimming development, perfect for ambulatory individuals with postural balance and arm control. As swimming skills improve, pads can be removed to help achieve independence.

8721 PAD PLUS

Danmar Products, Inc.

Price:\$45.00

Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation
Skill Level: elementary, secondary, adult
Disability: cognitive, hearing, learning, physical

Offered to modify the Delta Swim System (#8720) and the Tri-Swim (#8728), the Pad Plus may be attached to the front section

to add buoyancy and raise the body position in the water.

8723 SECTIONAL RAFT

Danmar Products, Inc.

Price:\$240.00

Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical

For individuals who are insecure in the water or non-ambulatory, the Sectional Raft supports and cradles the body, while allowing water to flow around the body, enabling interaction with the environment and helping to reduce anxiety.

8724 SWIM RINGS

Danmar Products, Inc.

Price:\$87.00

Product Type: adapted play/manipulative, instructional material, learning aid, seating/positioning/mobility, sensory stimulation
Skill Level: elementary, secondary, adult

Disability: cognitive, hearing, learning, physical

Create your own personal flotation device with these versatile rings! Sets may be snapped together for neck, chest, torso, or body support, and the individual rings can be added or removed to adjust for comfort, and to increase or decrease flotation.

8725 HEAD FLOAT

Danmar Products, Inc.

Price:\$105.00

Product Type: adapted play/manipulative, instructional material, learning aid, seating/positioning/mobility, sensory stimulation
Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical

Independence for everyone- there is no need to support the head manually, and hands are free! Superb cushioning allows the head to rest without pressure on the spinal column, which encourages neutral positioning.

8727 DOLPHIN FLOAT SYSTEM

Danmar Products, Inc.

Price:\$172.00

Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation
Skill Level: elementary, secondary, adult

Disability: cognitive, hearing, learning, physical

Designed for physically involved individuals who have head/neck control, but may need to compensate for uneven weight. Using the side pads helps minimize a user's tendency toward lateral rotation, and the front chest pad provides additional lift and is removeable.

8729 STABILIZER BAR

Danmar Products, Inc.

Price:\$120.00

Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation
Skill Level: elementary, secondary, adult

Disability: cognitive, hearing, learning, physical

Helps maintain balance and equilibrium during walking/gaiting pool exercises. It is also great for resting on or extending out in front for kicking drills, as well as workouts for individuals with mild arthritis. The amount of flotation can be adjusted by adding or removing rings.

8730 COMFORT MAT

Danmar Products, Inc.

Price:\$160.00

Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation
Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, learning, physical

Designed for use in the many situations where foam padding would be welcome. Place at the pool's edge to ease entry/exit. In the locker room, they insulate against the cold tile floors, and provide changing comfort. They make a great flotation raft too.

8735 HEAD FLOAT & STABILIZER BAR

Danmar Products, Inc.

Price:\$200.00

Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation
Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical

This combination helps keep the face out of the water, and works well not only for swimmers with Athoid CP but also for those who roll sideways and backwards. Now they can stretch and turn their heads when interacting with others without tipping or rolling.

9708 SOFT COMFY CAP

Danmar Products, Inc.

Price:\$96.00

Product Type: adapted play/manipulative, instructional material, learning aid, seating/positioning/mobility, sensory stimulation, telecommunications
Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

Our lightest, coolest helmet yet! This stylish, head-hugging design made of compression-molded foam offers a uniquely comfortable fit, weighing only 3 ounces. It provides maximum ventilation and retains limited body heat, and is easy to clean with warm, soapy water.

9709 Hard Top Comfy Cap

Danmar Products, Inc.

Price:\$131

Product Type: adapted play/manipulative, instructional material, learning aid, seating/positioning/mobility, sensory stimulation, telecommunications
Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

Our lightest, coolest Hard Shell Helmet yet! This 11.5 ounce helmet is made of a compression-molded inner foam liner attached to a hard plastic exterior. The stylish design is extremely well-ventilated and retains limited body heat. It's easy to clean, using warm soapy water.

9817 HALO HELMET

Danmar Products, Inc.

Price:\$174

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

Ideal for individuals who do not need full head coverage. A band of 5-8" soft, vinyl-coated foam surrounds the head at the forehead level, and extends down to cover the temporal and occipital areas. It's easy to clean with warm soapy water. Average weight is 10 ounces.

9820 SOFT SHELL HELMET

Danmar Products, Inc.

Price:\$123

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

This lightweight helmet is constructed out of 1/2" thick shock-absorbing foam and is fully ventilated without compromising head coverage. It's vinyl-coated with our Fabricat which does not allow for bacteria growth, and is easy to clean with warm soapy water. Average weight is 8 ounces.

9821 HARD SHELL HELMET

Danmar Products, Inc.

Price:\$160

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

This headgear is both comfortable and effective in reducing the risk of injury. A strong polyethylene shell covers a shock-absorbing foam liner which is vinyl-coated and easy to clean with warm soapy water. It allows for ventilation without compromising head coverage. Average weight is 17 ounces.

9822 HARD SHELL HELMET WITH FACE GUARD

Danmar Products, Inc.

Price:\$260

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

This protective helmet features a shock-absorbent foam liner which is riveted to a strong polyethylene outer shell. A clear polycarbonate face guard is attached to the outer hard shell. There is an eye opening for an unobstructed view and a mouth opening for maximum ventilation. Weight averages 25 ounces.

9823 CHIN GUARD

Danmar Products, Inc.

Price:\$50

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

This 1/2" thick foam guard fits comfortably over the chin area and can be worn with every helmet except for the 9822 Hard Shell Helmet with Face Guard. It is soft yet shock-absorbent and easily cleaned with warm soapy water. Weight averages 1.5 ounces.

9824 HARD SHELL HELMET WITH FACE BAR

Danmar Products, Inc.

Price:\$208

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

A clear 2" wide polycarbonate bar is securely attached to our 9821 Hard Shell Helmet so that it can't move, to reduce the risk of injury to the facial area. The shock absorbent foam liner is vinyl-coated and the entire helmet is easy to clean with warm soapy water. Weight averages 21 ounces.

9825 DELUXE HARD SHELL HELMET

Danmar Products, Inc.

Price:\$171

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

This sporty version of our 9821 Hard Shell Helmet adds a decorative visor and rubber chin cup, adding style and flair. Our shock-absorbent foam is riveted to a strong, polyethylene outer hard shell, allowing ventilation without compromis-

ing head coverage. Easily cleaned with warm soapy water. Weight averages 18 ounces.

9829 FULL COVERAGE HELMET

Danmar Products, Inc.

Price:\$152

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

This lightweight helmet is constructed out of 5-8" vinyl-coated foam and covers more of the temporal and cheek areas, as well as the area around the ears and nape of the neck. It's easy to clean with warm soapy water. Average weight is 10 ounces.

9830 CLEAR HELMET

Danmar Products, Inc.

Price:\$220.00

Product Type: adapted play/manipulative, instructional material, learning aid, seating/positioning/mobility, sensory stimulation, telecommunications

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

This clear polycarbonate helmet is well-ventilated and edged with soft foam. We include 8 moveable pads that can be used to adjust the sizing and elevate specific areas of the helmet away from wound sites. It is easily cleaned with warm soapy water.

9836 NEWBORN CAP

Danmar Products, Inc.

Price:\$83

Product Type: seating/positioning/mobility

Skill Level: infant/toddler

Disability: cognitive, hearing, learning, physical, speech, vision

This ultra-lightweight helmet is made from soft, 3/8" shock-absorbent foam and is fully ventilated. It's coated in vinyl so it's easy to clean with warm soapy water. A soft chinstrap holds the cap in place, and the ribbon on the front allows for moderate growth.

9910 SOFT COMFY CAP WITH DESIGN

Danmar Products, Inc.

Price:\$142.00

Product Type: adapted play/manipulative, instructional material, learning aid, seating/positioning/mobility, sensory stimulation, telecommunications

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

Our lightest, coolest helmet yet! This stylish head-hugging design of compression-molded foam offers a uniquely comfortable fit, and weighs just 3 ounces. It provides maximum ventilation and retains limited body heat, and is easy to clean with

warm soapy water. Choose from Butterfly or Camouflage design.

Aeromesh® Calf Panel

Bodypoint Inc.

Price:\$96.00 - \$108.00

Product Type: seating/positioning/ mobility

Skill Level: elementary, secondary, adult

Disability: physical

Bodypoint® Calf Panels keep feet safely and comfortably on wheelchair foot plates. Wide strap distributes pressure across a broad calf region, especially useful for those in tilt or reclined position. Smooth, porous Aeromesh® fabric provides air circulation and comfort while a stiffener layer maintains panel shape, eliminating folding and buckling.

Aeromesh® Calf Strap

Bodypoint Inc.

Price:\$73.00 - \$85.00

Product Type: seating/positioning/ mobility

Skill Level: elementary, secondary, adult

Disability: physical

Bodypoint® Calf Straps keep feet safely and comfortably on wheelchair foot plates. A two-layer design blends comfort and function, and keeps feet from falling without bruising skin. Smooth, porous Aeromesh® fabric against the legs provides air circulation and comfort while a stiffener layer maintains its shape, eliminating folding and buckling.

Aeromesh® Rapid-Dry Bath Belts

Bodypoint Inc.

Price:\$89.00 - \$107.00

Product Type: seating/positioning/ mobility

Skill Level: elementary, secondary, adult

Disability: physical

Bodypoint Bath Belts can be worn across the chest, abdomen, hips or legs to stabilize position while bathing or in the pool. Unique Aeromesh® fabric allows water, soap, dirt and air to pass through freely while protecting skin and promoting hygiene. Three length-adjustable styles are compatible with most major shower chair brands.

Aeromesh® Shower Chair Calf Support

Bodypoint Inc.

Price:\$70.00

Product Type: seating/positioning/ mobility

Skill Level: elementary, secondary, adult

Disability: physical

A calf strap designed specifically for shower chairs! Silky, porous Aeromesh® material is soft on skin while allowing soapy water, dirt and air to pass through. Attaches to all major models using sewn-in clips; no hardware required. The 4, height supports legs but does not interfere with chair operation.

Aira

Aira

Price:\$89.00 - \$199.00

Product Type: seating/positioning/ mobility

Skill Level: adult

Disability: vision

Aira develops assistive technology that connects the blind with certified agents via smart glasses and a dashboard that allows agents to see what the blind person sees real time. Agents help users accomplish a range of tasks from navigating streets, recognizing faces, and traveling the world. Prices are per month.

Building with Stories

Attainment Company, Inc.

Price:\$495.00

Product Type: adapted play/manipulative, instructional material, learning aid, sensory stimulation

Skill Level: elementary

Disability: learning, physical

Building with Stories curriculum is based on the Early Literacy Skills Builder research from the University of North Carolina at Charlotte. It contains ten award winning storybooks commonly read in elementary classrooms, a kit to adapt them for easy student access, and story related manipulatives to encourage student participation.

Caregiver Cue Cards

Giving Greetings Publishing

Price:\$35

Product Type: learning aid

Skill Level: adult

Disability: cognitive, hearing, learning, physical, speech

Caregiver Cue Cards provide essential visual cues that improve communication, promote independence and reduce anxiety for adults with memory and cognitive challenges who live at home or in care settings. This handy, compact set of double sided cards includes simple black and white illustrations that prompt individuals with dementia and cognitive challenges to understand and participate more independently in self-care and social activities. This deck of 76 picture cards is ring-bound so it opens easily to the desired color-coded section. Cards are laminated so they can be wiped clean. Blank cards are provided so you can add other specific center or activity cues. Available from SayitwithSymbols.com.

CB100 - Compound Bow Mount

Be Adaptive Equipment, Inc.

Price:\$609 - \$609

Product Type: adapted play/manipulative
Skill Level: elementary, secondary, adult
Disability: physical

Model CB100 is designed for individuals with limited hand and arm movement and strength. This piece of equipment works on most all models of compound bows

and can be used with right hand or left hand bows. It allows the limited mobility user to pivot the bow left and right and up and down while the mount holds the entire weight of the bow. The CB100 mount requires the use of a Draw-Loc or similar product (which is not included) to hold the bow at full draw for the user.

Chest Belt

Bodypoint Inc.

Price:\$71.00 - \$101.00

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult

Disability: physical

A comfortable, low-profile trunk support option for users with limited hand function or those who prefer chest support without a buckle. Flexible molded end-tab is easy to grab, and high-grade hook-and-loop material holds securely but is smooth to the touch. Optional slip-on pads sold separately.

CJT Suction Cup Table Stand

CJT Mounting

Price:\$335.00 - \$450.00

Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical, speech, vision

The heavy duty suction base keeps your device in place for hours. The CJT suction cup table stand is perfect for tablets and small devices.

CJT/LOCLINE SWITCH MOUNT

CJT Mounting

Price:\$225.00 - \$525.00

Product Type: adapted play/manipulative, seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

The CJT and Locline universal mount combines the flexibility of Locline with the strength and stability of the CJT Griptight Base Connector. The CJT Griptight base is fast and easy to attach and remove from your wheelchair, bed frame, walker, activity chair, or ET Roller.

Clamp On Drink Holder

Adaptive Tech Solutions

Price:\$10.09

Product Type: adapted play/manipulative
Skill Level: elementary, secondary, adult
Disability: physical

This clamp on drink holder easily attaches to a bed rail, wheelchair, walker or bike to allow for easy access of a drink. Clamp mounts onto a surface with a diameter as small as 3/4" and as large as 1 3/4", and the arms can accommodate containers up to about 2 3/4" in diameter. This is a helpful

way to improve fluid intake and promote independence.

Classroom Audio Technology

Lightspeed Technologies, Inc.

Price:\$895.00 - \$3500.00

Product Type: learning aid, sensory stimulation, telecommunications

Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, speech

In today's dynamic classroom, it's no longer enough to have the best speech intelligibility possible. Lightspeed's access systems provide clear communication during whole group instruction plus two way audio to each small group. This allows teachers to monitor small groups, redirect off-task behavior, and encourage collaboration. Our classroom audio distribution systems help every student and assist those who need it most.

Clear Panel Face Mask with Adjustable Straps

Abram's Nation

Price:\$18

Product Type: learning aid, sensory stimulation

Skill Level: elementary, secondary, adult

Disability: cognitive, hearing, learning, speech, vision

Our Clear Panel Face Mask with Adjustable Straps benefits the deaf, hard of hearing, and special needs communities by increasing awareness of the limitations of traditional masks. Perfect for special needs teachers, therapists, translators, and anyone interested in creating an accessible environment for their special needs or hard-of-hearing friends and family. Proudly made by hand in the USA.

ClearMask

ClearMask

Price:\$67

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: hearing, learning, speech

The ClearMask is the first fully transparent, FDA-cleared mask optimized for maximum clarity and comfort: making connections more human and providing clearer communication for all. Single use only. Latex-free. Anti-Fog. Protection complies with applicable ASTM level 3 standards for fluid resistance and flammability. Available in two different strap styles: EZ-Adjuster or classic tie-on.

Cloud Kitty Switch Adapted Toy

Adaptive Tech Solutions

Price:\$41.15

Product Type: adapted play/manipulative
Skill Level: preschool, elementary,

secondary, adult

Disability: physical

Press your switch and watch this cute kitty named Cloud meow, walk and move it's tail. Adapted to accept a standard switch (switch sold separately). On when you press your switch, off when the switch is released. Measures approximately 4 x 5 x 6 inches.

Compact Activity Center

Enabling Devices

Price:\$149.95

Product Type: adapted play/manipulative, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary

Disability: cognitive, learning, physical

This small-scaled activity center is designed to provide sensory stimulation and cognitive activity for the infant or child whose physical mobility may be limited due to positioning needs. Features five different exciting activities that light up, vibrate or play music.

DeCoste Writing Protocol

Don Johnston, Inc.

Price:\$25.00 - \$529.00

Product Type: instructional material

Skill Level: elementary, secondary, adult

Disability: cognitive, learning

In this age of accountability and assessment, your district needs a process to evaluate writing issues for students with disabilities. Unfortunately, many districts don't have a systematic way to do this. The DeCoste Writing Protocol is a formative assessment tool that helps educators identify factors affecting an individual student's ability to produce writing. The Writing Protocol compares a child's individual performance across handwriting and keyboarding tasks. It examines spelling performance and writing skills so educators make more informed decisions about instructional strategies and the appropriate use of technology to meet classroom demands.

Described and Captioned Media Program

Described and Captioned Media Program

Price:\$0

Product Type: instructional material

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: hearing, learning, vision

DCMP's is a federally funded project administered through the National Association of the Deaf. Two 2-inch buttons in one box, that can be connected to any device that accepts such buttons. Devices include, but are not limited to: switch interfaces, switch-adapted digital camera, switch-adapted MP3 player/drive, switch-adapted toys, etc.

Dynamic Footrests

Seating Dynamics

Price:\$0s

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

Dynamic Footrests provide up to three types of movement: a telescoping downward movement, knee extension, and plantar/dorsi flexion. Forces are absorbed, protecting both the client and equipment from harm, and reducing overall tone and posturing. This movement can increase sitting tolerance, decrease agitation, increase alertness, and increase lower extremity strength.

Dynamic Headrest

Seating Dynamics

Price:\$0

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

The Dynamic Head Support Hardware allows neck extension, diffusing and absorbing force to protect the client, protect the hardware, and reduce overall extensor tone. The Dynamic Head Support can be used on its own or in combination with the Dynamic Rocker Back and Dynamic Footrests. Single and Multi-Axis versions.

Dynamic Rocker Back

Seating Dynamics

Price:\$0

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

The Dynamic Rocker Back provides movement to absorb forces and assist the client back to upright. This movement can protect the client from injury and equipment from breakage, reduce extension, reduce agitation, increase alertness, provide sensory input, facilitate functional activities, and increase trunk and head control.

Early Literacy Skills Builder for Older Students

Attainment Company, Inc.

Price:\$495.00

Product Type: instructional material

Skill Level: secondary

Disability: learning, physical

An age-appropriate, early literacy curriculum targeting National Reading Panel components. Provides a solution for older students to learn prereading skills. It blends software and app instruction with print activities and offers seven progressive levels of instruction for students. Integrates research-proven and systematic instruction strategies.

Early Literacy Skills Builder-print

Attainment Company, Inc.

Price:\$695.00

Product Type: instructional material, learning aid

Skill Level: preschool, elementary, secondary

Disability: cognitive, learning, speech

Scientific research-based language-rich literacy program for children with moderate to severe developmental disabilities, including autism. Scripted lessons ELSB incorporates systematic instruction to teach both print and phonemic awareness. ELSB is a multiyear curriculum with ongoing assessments so students progress at their own pace. Case endorsed.

Early Reading Skills Builder

Attainment Company, Inc.

Price:\$595.00

Product Type: instructional material

Skill Level: elementary, secondary

Disability: learning

ERSB takes students who have mastered early literacy skills to a 2nd grade reading level. It incorporates systematic instruction and ongoing assessments to teach students to read independently. It has been proven effective for students with moderate-to-severe intellectual disability and/or autism, including those with complex communication needs.

Early Science

Attainment Company, Inc.

Price:\$499.00

Product Type: adapted play/manipulative, instructional material, sensory stimulation

Skill Level: elementary

Disability: learning, physical

Early Science Curriculum uses the research-based inquiry process to teach basic science content to elementary students with significant developmental disabilities, including autism. The 28 lessons follow a standard sequence. Students engage by discussing Wonder Stories; investigate through hands-on experiments; describe and explain concept statements using vocabulary cards, posters, and games.

Easy Mover with Quick Connect or Tilt Plate

BlueSky Designs

Price:\$360.00 - \$960.00

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Effortless Art Crayons

Westminster Technologies

Price: \$41 - \$99

Product Type: learning aid

Skill Level: infant/toddler, preschool

Disability: cognitive, hearing, learning, physical

When children first hold a crayon, their fine motor control is still developing. Not all children will develop skills at the same rate or same time. Some children may exhibit a delay or a disability. To address this need, Effortless Art Crayons have a unique shape and design features to support a child's grip and grasp that helps them pick up a crayon and color successfully. Effortless Crayons takes into account the smaller muscles in the hands of children that help them pinch, grasp, and grab are not as strong. Because of this, they have trouble holding a round, skinny crayon correctly.

Embossables

American Thermoform Corporation

Price: \$37.99 - \$339.99

Product Type: instructional material, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: vision

Embossables are continuous form labeling material developed for Braille embossers. Simply emboss onto the labels, peel off and adhere them to anything. Hands-On Math for Early Numeracy Skills

Attainment Company, Inc.

Price:\$299.00

Product Type: adapted play/manipulative, instructional material, learning aid

Skill Level: preschool, elementary

Disability: cognitive, learning, physical, speech

Hands-On Math (HOM) for Early Numeracy Skills is primarily for preschool students with an intellectual disability or autism. It is based on two premises: (a) students with a disability learn well when their hands are purposefully engaged, and (b) math manipulatives help students understand abstract concepts. The HOM for Early Numeracy Skills Curriculum is an introduction to concepts included within school math standards. It is a skills-based program focused on early numeracy concepts.

Harkla Compression Sensory Swing

Harkla

Price:\$99.99 - \$119.99

Product Type: sensory stimulation

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Hug-like calming effect Sensory input through compression and swinging \$25 worth of hardware included free for an easy setup. Holds up to 200 lbs - safe for your child

Harkla Compression Sheet

Harkla

Price:\$29.99 - \$39.99

Product Type: sensory stimulation

Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, learning, physical

Harkla Compression Sheet THE PERFECT ADDITION TO YOUR CHILD'S BEDROOM Bedtime IMPROVED! Have you struggled to help your child relax and get restful sleep? Start your journey to better sleep (and mood!) with a compression sheet. The compression sheet offers deep touch pressure (like a hug!) which helps regulate the nervous system. This releases melatonin helping relax your child. The melatonin turns into serotonin leading to deeper, more restful sleep. You'll love how

your child curls up under the compression sheet as they relax and drift to sleep.

Harkla Hug

Harkla

Price:\$69.99

Skill Level: preschool, elementary

Disability: cognitive, learning, physical

The Harkla Hug combines a sensory input tool with the fun of a toy! Inflate the pea pod chair and watch your child explore.

Now made with flock vinyl, this durable peapod sensory chair is a perfect addition to a sensory room. The inflatable peapod for autism applies much-needed pressure to sensitive areas of the body helping your child feel grounded and in control. This cozy canoe is perfect for autism. It stirs a sense of adventure while the compression provides a calming comfort where your child can feel secure. Use this sensory processing disorder tool to add comfort and joy in your child's life.

Harkla Pod Sensory Swing

Harkla

Price:\$59.99

Product Type: sensory stimulation

Skill Level: preschool, elementary

Disability: physical

If you are looking for sensory or therapy swings to help your child relax and get their bearings in, then you've come to the right spot. Our autistic swings are made of high-quality but comfortable canvas that your child will want to spend hours in. Our Pod Sensory Swings are used by occupational therapists for autism spectrum disorder and sensory processing disorder. The Pod Sensory Swing provides a hug-like effect for little ones by providing Deep Touch Pressure (DTP). The Pod Sensory Swing also provides vestibular input. From infancy through adulthood, vestibular information contributes to the development of muscle tone, balance, eye movements, and more.

Harkla Sensory Body Sock

Harkla

Price:\$29.99

Product Type: sensory stimulation

Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, learning, speech

Do you wish your child had an easier time relaxing? The Harkla body sock is designed with autism and sensory issues in mind. Your child will love to play, stretch, or relax in our sensory sock! HELP YOUR CHILD DEVELOP SPATIAL AWARENESS Not only do sensory socks for kids help to soothe and calm, but a body sock can also encourage your child to explore their movements by pressing and stretching the material. Start developing right away with the activity guide created by occupational therapists provided in each therapy socks

package. STAND UP TO THE TOUGHEST OF PLAYTIMES

Harkla Weighted Blanket for Kids & Adults

Harkla

Price:\$79.99 - \$129.99

Product Type: sensory stimulation

Skill Level: preschool, elementary, secondary, adult

Disability: physical

The perfect weighted blanket for a good night's sleep. Are you or your child struggling to relax or fall asleep? If so, then maybe it's time to invest in a weighted blanket. Our sensory weighted blankets are designed with your family in mind. Whether you are buying one for trouble sleeping or sensory processing disorder, you'll be happy you finally made the investment in a weighted blanket. And with a weighted blanket, you have a healthy way to relax and reduce anxiety by simply laying down with your blanket instead of taking pharmaceuticals and supplements.

Harkla Weighted Compression Vest

Harkla

Price:\$59.99

Product Type: learning aid, sensory stimulation

Skill Level: preschool, elementary, secondary

Disability: learning, physical

Are you looking for a tool to help your child feel secure, calm, and focused? Harkla's weighted compression vest for kids with sensory issues, autism, and ADHD combines the sensory input tool with a wearable by applying pressure to sensitive areas of the body. Simply place the vest over your child's clothing, and watch your little one return to feeling grounded and in control. A perfect addition to the classroom, pack the weighted compression vest with your child's school supplies for on-the-go sensory integration therapy.

Harkla Weighted Lap Animal

Harkla

Price:\$44.99 - \$44.99

Product Type: learning aid, sensory stimulation

Skill Level: preschool, elementary

Disability: cognitive, learning, physical

Does your child have a hard time staying calm at school or in the car? Are you always looking for toys that will effectively support your child's needs? The 5 lb weighted lap animal is the perfect companion for your sensory seeker! The science supporting weighted objects like our sensory weighted stuffed animal is called deep touch pressure (the same benefit as a weighted blanket.). Deep touch pressure helps to decrease nervous system activity which encourages a feeling of calm and relaxation. The weight takes

advantage of the calming effects of deep pressure therapy. The extremely soft fabric of the pound puppy stuffed animal gives a great soft sensory surface for them to explore while relaxing.

Harkla Weighted Lap Pad

Harkla

Price:\$44.99

Product Type: sensory stimulation

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Much like a weighted blanket, the weighted lap pad is a sensory tool that offers Deep Touch Pressure (DTP) to a person's legs as it rests on the lap when in a seated position. The weighted lap pad is often used in classrooms to provide some sensory input and help students stay seated. The weighted lap pad can also be used anywhere when adults or children need to stay sitting for an extended period.

Head Pointer and Stylus cap edition

ShapeDad

Price:\$129.00 - \$139.00

Product Type: adapted play/manipulative

Skill Level: elementary, secondary, adult

Disability: physical

Universal headset mount with stylus pointer for head controlled tablet and smartphone use. This offering contains a full functional head pointer solution, containing a cap with a mounting plate and stylus pointer. The cap is available in three colors and the stylus pointer is available in four options.

Head Pointer and Stylus headband edition

ShapeDad

Price:\$129.00 - \$139.00

Product Type: adapted play/manipulative

Skill Level: elementary, secondary, adult

Disability: physical

Universal headset mount with stylus pointer for head controlled tablet and smartphone use. This offering contains a full functional head pointer solution, containing a headband with a mounting plate and stylus pointer. The stylus pointer is available in four options that differ in length and bend-ability.

Headpod Dynamic Head Support

PACIFIC REHAB

Price:\$495

Product Type: adapted play/manipulative, seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, physical

A dynamic head support device which can be applied to almost anything with a headrest while the child is upright... wheelchair, walker, stroller, stander, bike

or activity chair. The child is able to move in full rotation, as well as chin tuck and extension, but not head drop. As the child acquires strength, the upper band is relaxed and they are able to move within their plane of strength. It is a completely different philosophy from head restraints and collars, which tends to atrophy musculature further due to lack of movement. The Headpod can only be used when the child is upright, to begin within their point of balance. A functional aide during power wheelchair use, Aug Comm and feeding. Any time that fatigue prevents function. It is not to be used for van or bus transport.

Health Care Communication Boards | Say it with Symbols

Giving Greetings Publishing

Price:\$9.95

Product Type: learning aid

Skill Level: secondary, adult

Disability: cognitive, hearing, learning, physical, speech

This low, tech-aminated healthcare communication board features 68 pictures that help patients communicate their health and hospital care-related needs when they are not able to speak. Studies show that being able to communicate with care providers significantly improves the patient's experience and recovery. Each double-sided sheet offers clear color pictures to indicate pain, wants, needs, ailments, comforts, questions, staff, emotions and more. Pain scale, alphabet and number tables are included. Non-verbal patients simply point to pictures to communicate their needs to care staff and family. Ideal for nurses, therapists, emergency care and health care workers, caregivers and parents who care for adults and children who are not able to express their needs verbally. Symbols are 1" square. Sheet size: 8.5" x 11", printed on heavy card stock to be used by individual patients. Laminated for increased durability, wipe to reuse. Sold in sets of two on SayitwithSymbols.com or Amazon @ www.amazon.com/shops/sayitwithsymbols.

Hold the Pencil

Draw Your World

Price:\$0.00 - \$4.50

Product Type: instructional material, learning aid

Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, learning, physical
Hold the Pencil is a pamphlet with simple instructions and tips to encourage a comfortable pencil grasp. A selection of pencil grippers are shown that help position the fingers into the tripod grasp. Much of the information is available free on the authors' site: <http://www.drawyourworld.com/writing>.

Home- and Community-Based Solution

Attainment Company, Inc.

Price:\$995.00

Product Type: adapted play/manipulative, instructional material, learning aid

Skill Level: secondary, adult

Disability: cognitive, learning, physical, speech

The Home and Community-based Solution (HCBS) provides training and activities to support the expected outcomes for the HCBS Medicaid-funded services for residential and non-residential programs. Develops the skills necessary for supported living, entry level employment, and community inclusion. Provides a solution that guides people to independence through home, community, health, social, and pre-vocational skills.

Hoonuit's Professional Development and Data Analytics

Hoonuit

Price:\$200

Product Type: instructional material, learning aid, sensory stimulation, telecommunications

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

Hoonuit provides continuous and in-depth resources to support ongoing learning to meet the PD requirements redefined by ESSA, but also to ensure teachers are prepared and empowered to reach every student effectively. With the Every Student Succeeds Act (ESSA) implementation upon us, clear and accessible reporting is evolving. The additional transparency is important, but the new reporting requirements are putting added strain on already scarce time and resources. Hoonuit supports your accountability reporting efforts without sacrificing the access to data you need to make decisions.

Hoonuit's Professional Development Solution

Hoonuit

Price:\$800.00

Product Type: instructional material, learning aid, sensory stimulation, telecommunications

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

The one-time workshop or professional development days are a thing of the past. For districts to ensure the learning opportunities they provide their teachers and staff are positively impacting student success, administrators are diving deeper to challenge the quality and delivery of PD. Hoonuit provides continuous and in-depth resources to support ongoing learning

to meet the PD requirements redefined by ESSA, but also to ensure teachers are prepared and empowered to reach every student effectively.!

Hoppy the Bunny Switch Adapted Toy

Adaptive Tech Solutions

Price:\$43.21

Product Type: adapted play/manipulative

Skill Level: preschool, elementary, secondary, adult

Hydration Backpack with Drink Tube Positioning

Mealtime Partners, Inc.

Price:\$158.95

Product Type: learning aid, seating/positioning/mobility, sensory stimulation

Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

The hydration backpack with drinking tube positioning facilitates access to water for those who have limited head movement and/or hand or arm movement, the drinking-tube is contained within a flex-tube which is clamped to a wheelchair. The flex-tube can be shaped to meet the needs of the user.

InnerVoice AI

iTherapy, LLC

Price:\$99.99

Product Type: learning aid

Skill Level: preschool, elementary, secondary

Disability: cognitive, learning, speech

InnerVoice can work like a typical communication device: letting your thoughts and feelings be heard and understood by others. Unlike traditional speech-generating apps, though, InnerVoice combines artificial intelligence technology with facial expressions, emotions, tone-of-voice, written words, and videos -- providing a complete multi-sensory learning experience. Visual Language is an exciting new feature that uses Microsoft's Azure artificial intelligence technology to teach language and literacy skills in a unique way. The camera displays what you're looking at. Take a picture and watch InnerVoice's AI system label your picture with text and describe it with speech -- allowing users to see the relationships shared among the environment, speech, language, and text. Visual language makes creating and

editing buttons easier than ever: just take a picture and InnerVoice's AI system labels the button and adds a description.

iPad Bluetooth Speaker

RJ Cooper and Associates

Price:\$79.00

Product Type: adapted play/manipulative

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: speech

Bluetooth, thin, cordless speaker for iPads/tablets. Doubles volume. Super-Velcro's to rear of tablet/case. Very light.

Visit our webpage: www.PhilipRoy.com

Job Skills Stories

Attainment Company, Inc.

Price:\$69.00 - \$399.00

Product Type: adapted play/manipulative, instructional material, learning aid

Skill Level: secondary, adult

Disability: cognitive, learning, physical, speech

Job Skills Stories emphasizes the five categories in Pre-ETS: Job and Career Exploration, Work-Based Learning, Post-Secondary Training, Workplace Readiness, and Self-Advocacy. One-hundred stories are presented in five Job Skills Stories Student Books. Each book is aligned to a Pre-ETS category. The stories cover key transition skills like identifying one's strengths, decision-making, and self-determination. The Job Skills Reader condenses and simplifies content by using captioned photos to convey each story's big idea. Both the Student Books and Reader cover lesson objectives, so you can teach with the version that best suits each student.

JokeMaster

RJ Cooper and Associates

Price:\$79.00

Product Type: adapted play/manipulative

Skill Level: preschool, elementary, secondary

Disability: cognitive, physical, speech, vision

Switch-adapted joke telling device (120 of them), very silly, highly motivating.

Includes jack to plug into PA system. Carry case/speaker option \$30.00.

Junior Automatic Nail Clipper by ClipDifferent

ClipDifferent

Price:\$149 - \$149

Product Type: adapted play/manipulative, seating/positioning/mobility, sensory stimulation

Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

The ClipDifferent Jr. is a revolutionary, first-of-its-kind, automatic fingernail clipper that safely trims children's (ages 5+) fingernails with the simple touch of a button. It's perfect for children and parents who have a hard time trimming their children's fingernails and dislike the messy, time-consuming process. A great motivator for kids who bite their nails. Also great for kids with sensory challenges (has a nice, soothing sound). Includes stickers to decorate and personalize.

Carrying strap included. Optional wedge and handle.

Lifton Duo Residential Elevator

Lifton Residential Elevators

Price:\$22000

Product Type: seating/positioning/
mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

The Lifton Residential Elevator is unlike any other home elevator on the market and has been designed to move the passenger quickly from floor to floor in the home. It is a luxury lifestyle product which offers homeowners with a fantastic way of 'future proofing' their home for use in later life.

Light Beeper Box

Adaptive Tech Solutions

Price:\$64.88

Product Type: learning aid

Skill Level: preschool, elementary, secondary, adult

Disability: physical

The Beeper Switch Box is an illuminated 3" button and a beeper all in one. Great for individuals that require several types of feedback to know they have pushed an external switch. Can also be activated by an external switch.

Limitless Stylus

Westminster Technologies

Price:\$73 - \$79

Product Type: adapted play/manipulative

Skill Level: preschool, elementary, secondary, adult

Disability: physical

The Limitless Stylus is optimized for users with limited hand mobility and is a simple design that wraps around the users wrist with two Velcro straps. The stylus is angled perfectly to fit the contours of the user's hand and has been designed for long term use and optimal comfort. It can be used on any touchscreen device to gain more control and precision with every click! The Limitless Stylus is extremely light weight and durable which makes it easy to use on a daily basis without even thinking about it. After using the Limitless Stylus you will be unable to live without it. Stylus, two straps and extra tips included.

LingoPen

Scanning Pens

Price:\$275.00

Product Type: learning aid

Skill Level: elementary, secondary, adult

Disability: learning

Lingo Pen is used primarily for EL/ ESL as it reads in English (as well as other languages) you can translate a word you don't know in the other language while hearing it pronounced in English. It's perfect for anyone working or studying in a language that is not their own to

improve language acquisition. Multiple languages and dictionaries. The voice recorder is great for recording instructions or fluency progress checks. The scan to cursor feature allows users to scan from worksheets/textbooks directly to Google/ Word Docs for simplified note taking or study guides. Saves money and time by reducing students' reliance on a human reader. Exam lock for exam integrity. Having it listed as, text to speech, in the students IEP or 504 plan is helpful. Does NOT require WIFI. Stand alone does not require another device.

LM100 - Limited Mobility

Be Adaptive Equipment, Inc.

Price:\$609

Product Type: adapted play/manipulative

Skill Level: elementary, secondary, adult

Disability: physical

Be Adaptive Equipment Model LM100 is a limited mobility unit designed for use by people with limited use or paraplegics that cannot hold a gun up. Designed for individuals with limited hand and arm movement and strength. The unique design of the equipment makes the weapon seem almost weightless to the person using it and allows them to have a full range of motion, up, down, and side to side. The simplicity of the LM100 allows it to hold all pistols, crossbows, rifles, and shotguns. The LM100 does not include a power trigger mechanism. If you lack hand movement and need assistance with this, you can purchase our TM100 (power trigger mechanism) and use it with this piece of equipment.

Look at Everyday Math Series

Attainment Company, Inc.

Price:\$69.00 - \$149.00

Product Type: adapted play/
manipulative, instructional material, learning aid

Skill Level: secondary

Maxess Switch Mounts

Inclusive TLC

Price:\$32.00 - \$42.00

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

Enables switches to be securely positioned/repositioned in the most efficient

way. These double-sided switch mounts give two alternative mounting surfaces (55 and 85 degrees). Used with the Maxess Switch Tray, the mounts offer a variety of positioning options. Velcro fixing pack included for one switch.

Maxess Switch Tray

Inclusive TLC

Price:\$59.00 - \$79.00

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

Cushioned for comfort, the Maxess Switch Tray holds switches or switch mounts firmly in place. Ideal for use with a student or in assessment situations, where a range of secure switch positions need to be tried.

Mealtime Partner Dining Device

Mealtime Partners, Inc.

Price:\$7995.00 - \$8570.00

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, learning, physical

The Mealtime Partner is a product that permits individuals, who otherwise cannot feed themselves, to do so independently, after they are provided with food. Persons with impairments due to spinal cord injury, CP, MS, Parkinson's disease, arthritis, ALS, stroke, MD, birth-defects, etc. can gain/regain mealtime independence using the Partner.

Medication Dispenser

SimplyHome

Price:\$189.95 - \$259.95

Skill Level: adult

Disability: cognitive, hearing, learning

With Simply Home's secure medication dispenser, individuals can access prescribed medicine without the concern of overmedicating or missing doses. The automated dispenser alerts the individual to take the allotted medication up to four times daily, with optional caregiver alerts if doses are delayed or missed. These alerts can be sent to the individual whose medication it is, to support independence, as well as to a family member or caregiver if necessary.

Micro Extremity Control (MEC)

Adaptive Switch Laboratories, Inc.

Price:\$3050.00 - \$4430.00

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

The ASL 130 is a fully proportional joystick with the unique feature of having a built in mode change function. The MEC only requires 18 grams of force to deflect the

joystick. It is designed for those who have very limited hand or chin movement.

Midline Joystick Mounting Kits

Bodypoint Inc.

Price:\$587.00 - \$615.00

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

The Tri-Lock Midline Mounting System lets you position the joystick or other electronic devices right where you want them, at midline or another preferred location for a more natural and functional position that can lead to improved posture, core strength and endurance. Position joysticks over lap trays, above or below armrests, or over the shoulder on chin-controlled systems. Easily change settings from independent to caregiver-assisted use, and choose between three different arm styles. Components available separately or as a kit.

Mini Dome

Enabling Devices

Price:\$117.95

Product Type: adapted play/manipulative, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary

Disability: cognitive, hearing, learning, physical, speech, vision

Children love Mini Dome's eye-catching colors and vibrations. Simply press anywhere on the dome or its plate and the bright confetti spin, music plays and the dome vibrates. Provides hours of visual, auditory and tactile stimulation. No switch is required.

Mini Mesmerizing Volcano Lamp

Adaptive Tech Solutions

Price:\$43.95

Product Type: adapted play/manipulative, sensory stimulation

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Our switch adapted Mini Mesmerizing Volcano Lamp has been adapted to accept a standard switch (sold separately) or it can be used without a switch. When you press your switch, the colored 'lava' balls flow from the volcano up into the red lighted water and back down again. Measures approximately 5.5" x 3" x 3" and requires 4 AAA batteries (not included).

Mini-Arm

RJ Cooper and Associates

Price:\$129.00

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

An 11-inch telescoping, infinitely positionable arm for holding switches. The Super-Clamp attaches to just about anything. Especially useful for our 1-inch Compact Switch used by cheek.

Molecule Joystick

Adaptive Switch Laboratories, Inc.

Price:\$1000.00 - \$5000.00

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

The ASL 128 Molecule Joystick is the lightest touch joystick offered by ASL. It takes only 8 grams of force to displace from neutral and requires only 3 millimeters of movement to reach full throw. Designed for someone with weakness, this joystick can keep a patient driving proportionately instead of having to move to a digital system.

Monoflex

Bodypoint Inc.

Price:\$97.00 - \$121.00

Product Type: seating/positioning/

mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Dynamic positioning for wheelchair users who need strong but unobtrusive abdominal/chest support and free arm movement. High-strength elastic padding provides just the right amount of stretch for comfort while maintaining trunk control. Double-tapered shape and swivel buckles distribute pressure evenly. One-piece with underarm release or two-piece with center release. Can be mounted on almost any wheelchair, including those with low or flexible back systems where a four-point harness is difficult to mount. Machine wash and dry.

Mount'n Mover Mounting System

BlueSky Designs

Price:\$525.00 - \$1900.00

Product Type: learning aid, seating/positioning, mobility, telecommunications

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical, speech, vision

The Mount'n Mover movable mounting systems offer unique features specifically designed to promote independence and access. Mount phones, trays, speech devices, laptops, and cameras on wheelchairs, tables and more. From simple mounting solutions to our motorized Pow!r mount for complex needs - do more with a mount that moves!

Product Type: adapted play/manipulative

Skill Level: elementary, secondary, adult

Disability: physical

Mouth stick stylus for tablet and smartphone with an ergonomic snap fit mouthpiece. It's available in two versions: a fixed 12-inch version and one that telescopes from 9-17 inches in length. As of 2018, all mouthstick styli will be bendable as well.

Multifunctional Smart Keyboard Key-X

KeyZenable Assistive Technology Inc.

Price:\$999.00 - \$2100.00

Product Type: learning aid

Skill Level: preschool, elementary, secondary, adult

Disability: learning, physical

The device that redefines the inclusion of people with disabilities. Key-X allows people with any motor impairment to use any computer, smartphone or tablet with just eleven touch-sensitive keys, which can be activated even by the blink of an eye. By itself, Key-X is an innovative resource, which gives autonomy to people with any motor limitation to control any computer. However, offering every function of key-

board and mouse with total accessibility is just a detail. With just eleven touch-sensitive keys, which can be triggered even by the blink of an eye, Key-X does much further. In conjunction with the SimpliX software and its accessories, Key-X makes up an amazing platform of school inclusion and rehabilitation, capable of developing the motor and cognitive skills of students and patients with physical and intellectual disabilities.

Mushroom Joystick

Adaptive Switch Laboratories, Inc.

Price:\$2975.00

Product Type: seating/positioning/ mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

The ASL 135 was designed to fit the contour of a hand, so no gripping or pincer grasp is needed. Deflection of the joystick uses minimal force and the flat plate made from a slick material surrounds the cap and provides a place for the hand and wrist to rest.

The ASL 109 combines simple sip and puff controls with head movements. This system is designed for those with lateral head movement and weak breath control volume. The driver control is typically used with individuals with high level spinal cord injury.

Skoog 2.0

Skoogmusic

Price:\$199.95

Product Type: adapted play/manipulative

Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical, vision
 Skoogmusic makes musical instruments we can all play. And we really do mean everyone! Play, jam and create music right out the box.

Skwitch

Skoogmusic
Price:\$49.95
Product Type: adapted play/manipulative, learning aid, sensory stimulation
Skill Level: preschool, secondary, adult
 Skwitch is the brand new musical instrument from Skoogmusic. But we think it's so much more. Think of it as Skoog's compact, nimble little brother. Or sister. And it clips straight on to your iPhone, so within minutes you have a piece of accessible tech that you can use to create music, learn coding and more. It's a bit like magic, but better.

Slip-on Pads

Bodypoint Inc.
Price:\$43.00 - \$51.00
Product Type: seating/positioning/mobility
Skill Level: preschool, elementary, secondary, adult
Disability: physical
 Slip-On Pads slide over webbing to add padded comfort to basic non-padded chest or hip belts, providing greater pressure distribution. Non-wrinkling, flexible fabric resists dirt and grime, and rounded edge binding avoids skin irritation. Three sizes to fit 1", 1.5" and 2" webbing.

Smart Choices for a Digital Age

Attainment Company, Inc.
Price:\$39.00 - \$289.00

 Smart Choices for a Digital Age is a secondary social skills curriculum emphasizing the appropriate use of various technologies, as well as pertinent topics, such as cell phones, the Internet, emails, text messages, social media sites, online research, cyberbullying, and more! This program provides the instruction and supports for students' use of technology at home and in school.

SmartKnitKIDS Seamless Sensory Garments

Knit-Rite, Inc.
Price:\$7.95 - \$19.99
Product Type: sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: physical
 Bumps, seams, ouchies, burglars, or nuggies. By whatever name they're called,

seams and lumps and bumps can be a nuisance. SmartKnitKIDS Seamless Products have taken the woes out of clothes and help to keep the morning routine in check. In 2003, SmartKnitKIDS, a brand of Knit-Rite, Inc., started receiving requests from parents for a completely seamless sock. It seemed that all the seamless socks available had a flat or handlinked seam across the toes. To a sensitive child, this was still a bother; there was still a toe seam. With over 90 years of medical textile expertise, Knit-Rite used parent feedback to create a patented 100% seamless sock with added comfort features for sensitive feet.

Social Skills at School: Elementary

Attainment Company, Inc.
Price:\$199.00
Product Type: adapted play/manipulative, instructional material, learning aid
Skill Level: elementary
Disability: cognitive, learning, physical, speech
 The updated Social Skills at School: Elementary is a perfect social skills program for elementary students with autism, intellectual, or behavioral disabilities. A skills-based curriculum for elementary students to develop an understanding of behavioral cues and expectations of a typical school day.

Socks

Spin Globe Switch Adapted

Adaptive Tech Solutions
Price:\$27.78
Product Type: adapted play/manipulative
Skill Level: preschool, elementary, secondary, adult
Disability: physical
 Watch the lights spin and dance inside the globe with just a press of a switch. Bright, vibrant colors and great for working on visual tracking, cause-effect and attending to task. Includes 3 batteries. Color may vary. Requires a single switch, not included. Use with caution for seizure-prone individuals.

Stages

Attainment Company, Inc.
Price:\$69.00 - \$199.00
Product Type: instructional material
Skill Level: preschool, elementary, secondary
Disability: learning, physical
 A seven-stage framework for cognitive and language development. Covers learner considerations, relevant issues, communication strategies, tips for evaluating software, and a skills checklist before moving on to the next stage. Includes references to research and published articles and provides recommendations for software, apps, and manipulatives materials.

Stayflex Chest Support

Bodypoint Inc.
Price:\$155.00 - \$177.00
Product Type: seating/positioning/mobility
Skill Level: preschool, elementary, secondary, adult
Disability: physical
 Provides wheelchair users firm trunk control with free shoulder movement. Patented, dual-stretch-zone construction eliminates upwards shift at the neckline when leaning forward, minimizing strangulation risk. Carefully selected materials optimally balance stretch and resistance, and quick-release swivel buckles allow easy removal. Available in two widths and with or without zipper. New MD (multi-directional) Pull Straps allow set up on the spot as a front-pull or a rear-pull. Machine wash and dry.

Steady Stylus

ShapeDad
Price:\$28.00 - \$48.00
Product Type: adapted play/manipulative

Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: physical
 T-shaped stylus for tablet and smartphone for assistive grip aids. It is available in two versions: regular and mini.

The Safety Sleeper

Abram's Nation

Price:\$3692 - \$6198.29

Product Type: adapted play/ manipulative, seating/positioning/ mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, physical

The Safety Sleeper is a medical enclosed safety bed designed with love and care for children and adults with special needs who can benefit from a secure sleeping space. The enclosed design prevents users from wandering at night and keeps them safe. Built with high quality, durable materials and made to be easily portable in a suitcase, The Safety Sleeper is completely customizable to fit the needs of each individual. Options include soft frame pads to protect users from the metal frame, pockets for item storage inside, various entry options, and access points for items such as monitor wires and feeding tubes. The entire enclosure is machine washable to keep you clean and cool.

The SimplyHome Firefly

SimplyHome

Price:\$699.95 - \$999.90

Skill Level: adult

Disability: cognitive, hearing, physical

Full of features that help you live independently and stay connected, the Simply Home System: Firefly utilizes custom components to address concerns about cooking safety, falls, medication compliance, sleep patterns, wandering and elopement, aging in place, and more. By communicating with multiple sensors to observe activities of daily living, the Simply

Home System: Firefly prompts the completion of daily routines and proactively alerts caregivers if assistance is needed.>

The Voice Keeper

The Voice Keeper

Price:\$75 - \$299

Skill Level: adult

Disability: speech

The Voice Keeper allows individuals to create a digital version of their voice for free from their iPhone or computer within a few minutes and only charges when the person wishes to download their new personalized voice onto a communication device. When individuals are ready to use their new voice, there is a one-time payment of \$299 (~£245) for a Windows SAPI version, compatible with all major communication software, or a significantly lower amount of \$75 to keep their new digital voice on The Voice Keeper app and use the app as a text-based communication aid. The Voice Keeper app does not require external microphones, setup calibrations or any other supporting software. Individuals can just download the app, sign up within seconds and start creating the first version of their new digital voice with as little as 30-100 sentences of recording material. However, the more material they record, the better the technology will be in capturing their personal tone, accent and the way they speak. The milestone-based system allows users to record as much or as little material as they want. For this process to be completed on a personal computer, it is recommended to use a USB headset microphone.

The Voice Keeper

The Voice Keeper

Price:\$0 - \$300

Product Type: telecommunications

Skill Level: preschool, elementary, secondary, adult

Disability: speech

The Voice Keeper is a Text To Speech engine that has a variety of accents and also allows you to create a personal, unique voice (Voice Banking). The Voice Keeper works for all Windows and Android platforms, and on selected iOS devices.

Therapy Shoppe Desktop Writing Slant Boards

Therapy Shoppe® Incorporated

Price:\$39.99

Product Type: instructional material, learning aid

Skill Level: elementary, secondary, adult

Disability: cognitive, learning, physical, vision

Premium lightweight slantboards provide a smooth 15" x 13-1/2" writing surface and functional 20-degree writing angle for optimal wrist positioning. These durable slantboards naturally facilitate functional finger grasps, help with directionality chal-

lenges, and reduce eye/head-movement demands. Feature polished edges, non-slip feet, stainless clip, and a free writing tool holder. Six color choices.

Therapy Shoppe Jumbo Crayon Stylus

Therapy Shoppe® Incorporated

Price:\$5.99

Product Type: adapted play/ manipulative, instructional material, learning aid

Skill Level: preschool, elementary

Disability: cognitive, learning, physical, vision

Jumbo Crayon Stylus naturally facilitates a good grasp while helping to prevent finger fatigue. Great for individuals who have fine motor, grasping, and/or eye-hand coordination challenges. These 3-1/2" chunky crayon-shaped handwriting tools work great with smartphones, ipads, and other popular touch screen devices. For children, teens and adults, 3-up.

Time Timer MOD®

Time Timer LLC

Price:\$36.95

Product Type: adapted play/ manipulative, learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, vision

The Time Timer MOD® is a 60-minute visual timer that has style and durability in a size that's portable and easy to use anywhere in the home, classroom, or therapist office to ease transitions between activities. The MOD features a removable, silicone case that offers an extra layer of protection from the bumps and falls that are part of everyday life. An on/off switch for the audible alert, for any time you need to hear the beep or prefer silence. No loud ticking Removable covers allow you to change the color of your MOD

Time Timer MOD® - Home Edition

Time Timer LLC

Price:\$24.95

Product Type: adapted play/ manipulative, learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, vision

The Time Timer MOD - Home Edition is a collection of visual timers that can bring comfort, confidence, and focus to productivity. Colors can impact mood, therefore creating a calming environment for those with color sensitivities. Those with ADHD may also benefit from color coding tasks with specific visual timers. Available Colors: Lake Day Blue, Dreamsicle Orange, Cotton Ball White, Pale Shale. Two Case Value Packs available for additional purchase.

Time Timer Original 3"

Time Timer LLC

Price:\$29.95

Product Type: adapted play/manipulative, learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, vision

The Time Timer Original 3, is an ideal 60-minute countdown timer for individuals. Included is a Dry Erase Activity Card you can use to create visual schedules by drawing, writing, or applying a picto card. With time-to-task management you can ease transitions no matter age or ability. Encourages confidence, independence and natural talents like visual thinking. Time Timer Original timers are available in 3-inch, 8-inch, and 12-inch models. Large Patented Red Disk, Big, easy-to-read numbers, No loud ticking, optional alert. Included Dry Erase Activity Card

Time Timer PLUS® 120 Minute

Time Timer LLC

Price:\$38.95

Product Type: adapted play/manipulative, learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, vision

The Time Timer PLUS 120 Minute offers a greater visual impact for longer duration needs. Time management is not a one-size-fits-all undertaking. Sometimes one hour is just not enough time. The Time Timer PLUS 120 Minute is ideal for independent learning stations at home, time blocking for large projects, nap times, and long-duration activities. Volume control dial for those times you need a louder tone and those when you prefer silence.<

Time Timer PLUS® 20 Minute

Time Timer LLC

Price:\$38.95

Product Type: adapted play/manipulative, learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, vision

The Time Timer PLUS 20 Minute makes it easy to visualize how quickly 20 minutes will pass, especially beneficial for shorter task durations. Use the Time Timer PLUS 20 Minute to help ease transitions between activities and reduce anxiety. Also great for Pomodoro techniques for ADHD. The Time Timer PLUS family offers visual timers in 5-minute, 20-minute, 60-minute and 120-minute durations.

Time Timer PLUS® 5 Minute

Time Timer LLC

Price:\$38.95

Product Type: adapted play/manipulative, learning aid

Skill Level: infant/toddler, preschool,

elementary, secondary, adult

Disability: cognitive, hearing, learning, vision

The Time Timer PLUS 5 Minute offers greater visual impact for shorter duration activities such as brushing teeth, breathing exercises, transitioning to new activities, and managing daily schedules. For those with severe cognitive or physical disabilities, being able to see how much longer can create better success for task completion and focus. The Time Timer PLUS family offers visual timers in 5-minute, 20-minute, 60-minute and 120-minute durations.

Time Timer PLUS® 60 Minute

Time Timer LLC

Price:\$38.95

Product Type: adapted play/manipulative, learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, vision

The Time Timer PLUS 60 Minute features a rugged case and durable clear lens to protect its patented red disk. The on-the-go handle helps encourage independent living and working in all ages and abilities. The Time Timer PLUS 60 Minute shows visually how much time has elapsed and eases anxiety between transitions. The Time Timer PLUS family offers visual timers in 5-minute, 20-minute, 60-minute and 120-minute durations.

Time Timer TWIST®

Time Timer LLC

Price:\$19.95

Product Type: adapted play/manipulative, learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, vision

The 90-minute TWIST is an easy-to-use time management tool. To use, simply turn the outer ring until you get to your desired time, then push the play button. A digital display shows at a glance how much time remains. A magnetic back makes the TWIST a snap to display. Twist the Red, outer ring to quickly set the time required. Play / Pause button for quick starts and easy pause functionality. Digital tick marks appear when timer is actively running. Duration of timer appears in the center

Time Timer® MAX

Time Timer LLC

Price:\$149.95

Product Type: adapted play/manipulative, learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, vision

The Time Timer MAX is 17 inches by 17 inches so it can be seen in larger spaces such as gymnasiums, cafeterias and auditoriums. The big red disk makes it easy

to see for anyone with low vision. It's also eight timers in one with customizable durations and changeable timer faces, the MAX can countdown as low as 5 minutes, or as high as 24 hours. Ease transitions between activities no matter how long the activity is. Included with the MAX are 3 two-sided timer faces, 5/15 minutes, 30/60 minutes, 120 minutes/Dry Erase Board timer face allowing for maximum flexibility and customization. Divide the time with colored set time dividers that are conveniently stored on the back of the timer.

Time Timer® Desktop App

Time Timer LLC

Price:\$19.95

Product Type: adapted play/manipulative, learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, vision

Time Timer® Desktop App (available for Mac or Windows) is perfect for classroom use, virtual learning, and is interactive whiteboard compatible. Create saved timers for routine lesson plans and activities to ease transitions. The 'Always-on-Top,' feature keeps Time Timer visible while doing other activities or presentations. S

Time Timer® MOD + Dry Erase Board

Time Timer LLC

Price:\$49.95

Product Type: adapted play/manipulative, learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, vision

The Time Timer MOD + Dry Erase Board includes both a Time Timer MOD in Charcoal and the Time Timer Dry Erase Board. The Time Timer MOD is a 60-minute visual timer that's portable and easy to use anywhere and the Time Timer Dry Erase Board is perfect for visual schedules. It is perfect to ease transitions, set expectations, and keep schedules on time for those with ADHD, Autism, and other cognitive differences that require assistance with focus and anticipation. Includes Time Timer MOD and Dry Erase Board

Time Timer® Original 12"

Time Timer LLC

Price:\$39.95

Product Type: adapted play/manipulative, learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, vision

The largest of the Original family, the Time Timer® Original 12, is the heart of any classroom or home. Students learn more when they are able to spend more time focusing, rather than asking how

much time is left. This can help students understand that an undesired task will not last forever. The Time Timer Original 12" eases stressful transitions by showing, how much longer, and can be seen from a distance. Time Timer Original timers are available in 3-inch, 8-inch, and 12-inch models. Large patented red disk that disappears as time elapses, No loud ticking, no distractions, Optional audible signal when time is up. Free-standing and wall-mounted options

Time Timer® Original 8"

Time Timer LLC

Price:\$34.95

Product Type: adapted play/manipulative, learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, vision

The Time Timer Original 8, is an ideal 60-minute visual timer for small to medium groups. It can stand alone or hang on the wall and is perfect for the home, classrooms, and student testing. The perfect size to encourage focus and time management for an entire room or in a small 1-to-1 session - for all ages and cognitive abilities. Time Timer Original timers are available in 3-inch, 8-inch, and 12-inch models

Time Timer® WASH

Time Timer LLC

Price:\$26.95 - \$26.95

Product Type: adapted play/manipulative, learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, vision

The Time Timer WASH keeps everyone safe with a touchless, water-resistant visual timer for handwashing. Its familiar disappearing disk, paired with the CDC recommended duration for clean hands, gives people of all ages and abilities an easy-to-understand resource for ensuring germ-free hands. It eases this essential task for anyone with OCD, Autism, or ADHD. The Time Timer WASH times for a total of 30 seconds and breaks hand washing into three simple steps, Soap (5 seconds) Scrub (20 seconds) Rinse (5 seconds)

Titan ADA Wheelchair Ramps

Express Ramps

Price:\$200.00 - \$10000.00

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult

Disability: physical

The Titan Series ADA Modular Wheelchair Ramps are completely code compliant with ADA, OSHA and IBC2006 guidelines. These wheelchair ramps are a modular design to provide maximum flexibility to meet virtually any handicapped access need and are easy to install for complete

ADA Compliance. See more at www.adawheelchairramps.com

TM100 - Trigger Mechanism

Be Adaptive Equipment, Inc.

Price:\$334

Product Type: adapted play/manipulative

Skill Level: preschool, elementary, secondary, adult

Disability:

Be Adaptive Equipment Model TM100 is a vacuum actuated trigger system that attaches to your trigger guard. Is simple to install on any weapon with a standard trigger guard. The unique design of the mechanism allows it to fire most weapons if placed anywhere inside of the trigger guard. The simplicity of the set up allows the trigger mechanism to be moved from one weapon to another easily and quickly. The TM100 fires the weapon by a very slight suction on the blue tube in the picture which is attached to the control box. The control box is attached to the stock of the weapon with a Velcro cinch strap. The mechanism operates on 12 volt DC power and comes with a pigtail that can be attached to one of the batteries in your power chair or attached to an auxiliary battery.

Toe Straps

Bodypoint Inc.

Price:\$26.00

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Add our durable, hook-and-loop toe straps to slotted wheelchair footplates to limit aggressive foot rotation and dorsiflexion. Length is fully adjustable and can be trimmed shorter as needed. For enhanced foot positioning needs, consider our Ankle Huggers Support Straps instead. Use them alone or in conjunction with toe straps.

Topcat Access

Lightspeed Technologies, Inc.

Price:\$1562.00 - \$4270.00

Product Type: learning aid, sensory stimulation, telecommunications

Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, speech

Teachers love Topcat because it delivers both multimedia audio and their instruction to every corner of the room without shouting at the top of their lungs. The IT team likes the easy, wireless ceiling installation and lack of interference with all the other technology in the building.

Tower Volcano Lamp

Adaptive Tech Solutions

Price:\$48.24

Product Type: adapted play/manipulative, sensory stimulation

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Our switch adapted Volcano Lamp has been adapted to accept a standard switch (sold separately) or it can be used without a switch. When you press your switch, the colored 'lava' balls flow from the volcano up into the water and back down again. Measures approximately 8" x 3" x 3" and requires 3 AA batteries (not included).

Trimline Shoulder Harness

Bodypoint Inc.

Price:\$107.00 - \$119.00

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult

Disability: physical

Focused shoulder retraction for wheelchair users with two separate, adjustable padded straps that comfortably accommodate asymmetry. Each shoulder can be independently controlled while keeping the chest clear for maximum freedom of movement. New MD (multi-directional) Pull Straps allow it to be set up on the spot as a front-pull or a rear-pull harness. Machine wash and dry.

Twirling Bead Chain

Enabling Devices

Price:\$239.95

Product Type: adapted play/manipulative, learning aid, sensory stimulation

Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

Feel the cool beads! Activate the built-in red gumball switch and the carousel begins to turn causing the colorful cool beads to gently touch your hand as they spin by. In addition, upbeat music plays and red and blue lights sparkle. Great sensory experience that also teaches cause and effect.

U-shaped Joystick Handle

Bodypoint Inc.

Price:\$79.00

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Our U-Shaped Joystick Handle provides maximum wheelchair driving control for those with limited hand function. The curved, goalpost, design with waterfall edge is form-fitting and ergonomic, comfortably cradling hands while keeping them from sliding off. Available in two widths to fit different hand sizes, and can be custom-molded with hot water.

Uncle Goose Braille Blocks

Uncle Goose

Price:\$45.00

Product Type: adapted play/manipulative, instructional material, learning aid

Skill Level: infant/toddler, preschool, elementary

Disability: vision

An educational toy for those who use Braille to communicate. Touch each embossed Braille letter on two sides of every block in this 28 piece set. Use your fingertips to trace the clean, European-style font that accompanies every Braille letter. Feel the attention to detail in every hand crafted cube.

Uncle Goose Braille Math Blocks

Uncle Goose

Price:\$26.00

Product Type: adapted play/manipulative, instructional material, learning aid

Skill Level: infant/toddler, preschool, elementary

Disability: vision

We debossed each colorful block in this 16 piece set with either a number or a math symbol. Then, we used the Nemeth Braille Code for Mathematics to emboss the Braille translation next to each number or symbol.

Uncle Goose Classic ABC Blocks

Uncle Goose

Price:\$40.00

Product Type: adapted play/manipulative

Skill Level: infant/toddler, preschool, elementary

Disability: cognitive, learning

Love these blocks. Teach children to spell, sequence, and stack; sort, build, and match. Four full alphabets, colorful numbers, math symbols, plus a menagerie of hand-crafted animals. Detailed embossing on two sides of each block.

Uncle Goose Classic Lowercase ABC Blocks

Uncle Goose

Price:\$40.00

Product Type: adapted play/manipulative, instructional material

Skill Level: infant/toddler, preschool, elementary

Disability: cognitive, learning

The ideal complement to our Classic ABC blocks. Four full lowercase alphabets, with two embossed letters on opposing sides. Add numbers, math symbols, and a small petting zoo of hand-crafted baby animals.

Uncle Goose Nursery Rhyme Favorite Blocks

Uncle Goose

Price:\$17.00

Product Type: adapted play/manipulative

Skill Level: infant/toddler, preschool, elementary

Disability: cognitive, learning

Teach children classic storytelling skills with this 9 block set. We embossed each block with two iconic images from classic Mother Goose stories. Read the playful text for each rhyme on the four other sides in our original, artful font.

Uncle Goose Sign Language Blocks

Uncle Goose

Price:\$45.00

Product Type: adapted play/manipulative

Skill Level: infant/toddler, preschool, elementary

Disability: hearing

An educational toy for those who use American Sign Language to communicate. Touch the two embossed sides on every block of this 28 block set. Use your fingertips to trace the clean, European-style font that accompanies every letter. Feel the attention to detail in every hand crafted cube.

Uncle Goose To Tonet ABC Blocks

Uncle Goose

Price:\$23.00

Product Type: adapted play/manipulative, instructional material

Skill Level: infant/toddler, preschool, elementary

Disability: cognitive, learning

Behold 14 bold black and white blocks. Sans serif letters on black and white backgrounds. See and feel two embossed sides per block. Enjoy the geometric and floral patterns.

Uncle Goose To Tonet Number Blocks

Uncle Goose

Price:\$23.00

Product Type: adapted play/manipulative, instructional material

Skill Level: infant/toddler, preschool, elementary

Disability: cognitive, learning

Behold 14 bold black and white blocks. Sans serif numbers on black and white backgrounds. See and feel two embossed sides per block. Enjoy shapes and symbols. Use the plus, minus, and equals signs to create equations.

Universal Elastic Strap

Bodypoint Inc.

Price:\$86.00 - \$100.00

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

A stable solution for temporary, anytime positioning. Wraps around your chest, abdomen, lap or legs. At home, in clinic, for sports, or whenever short-term postural support is needed. Soft to the touch with strong, durable hook-and-loop closure and

easy-grasp thumb hole. Three sizes available. Cut to length without fraying.

Universal Shoulder Strap

AbleNet, Inc.

Price:\$40.00

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Compatible with BIGmack, all BIG Step-by-Step devices, and Super Talker.

UNO Single Switch Scanner

Adaptive Switch Laboratories, Inc.

Price:\$1000.00 - \$5000.00

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult

Disability: physical

The UNO Single Switch Scanner with Bluetooth is designed so that a person that has only one consistent switch site available can control multiple things with one switch; this includes power wheelchair movement, seat functions, phones, tablets and communication devices.

UPGRADE

Attainment Company, Inc.

Price:\$69.00 - \$299.00

Product Type: adapted play/manipulative, instructional material, learning aid

Skill Level: secondary, adult

Disability: cognitive, learning, physical, speech

UPGRADE is a research-based curriculum focusing on student employment goals in high school, a post-secondary program, or on the job. UPGRADE provides students with strategies for self-evaluation, like self-monitoring and goal setting. There are six units of instruction emphasizing soft skills necessary for school, work, and community success. These units are Attitude and Cooperation, Reliability, Productivity and On Task, Teamwork and Communication, and Quality of Work. After instruction, 10 UPGRADE lessons teach both the professional and the student to evaluate performance in each soft skill category.

Using Assistive Technology to Meet Math Standards

Attainment Company, Inc.

Price:\$29.00

Product Type: instructional material

Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

This guide for IEP teams provides an extensive list of goals based on math standards with potential AT solutions. Standards range from number sense to calculus (K-12). Also describes software, hardware, and manipulative tools with sample IEP goals.

Authors Sherry Purcell Ph.D and Debbie Grant M.A. 290 pages.

Vibes Hi-Fidelity Earplugs

Westminster Technologies

Price:\$23.99 - \$26.99

Skill Level: elementary, secondary, adult

Disability: hearing, learning

Vibes Hi-Fidelity Earplugs are reusable earplugs designed for sound quality that are used by individuals with sensitivity to sound, such as those with Autism Spectrum Disorder, Sensory Processing Disorder, Traumatic Brain Injuries, ADHD, etc. Unlike traditional earmuffs and foam earplugs that muffle sounds and isolate users from their environment, Vibes use acoustic filtering to lower the volume of the user's environment to a more comfortable level, while still allowing them to hear everything around them clearly and interact socially. Vibes' clear design makes them virtually invisible, allowing users to avoid the attention and stigma that is associated with bulky, bright colored hearing protection. Each pair of Vibes includes: Three sizes of soft, interchangeable eartips to ensure a comfortable fit for different sized ears.

Vibrating Light with Music

Enabling Devices

Price:\$123.95

Product Type: adapted play/manipulative, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, vision

The Vibrating Light with Music encourages even the most challenged child to reach out. The textured plate lights up and vibrates when pressed. It can be placed on a lap board or mounted on a wall. Hardware for wall mounting included.

Vibrating Pillow- 2 Speed-Switch Adapted

Adaptive Tech Solutions

Price:\$43.81

Product Type: adapted play/manipulative, sensory stimulation

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Our switch adapted vibrating pillows have 2 speeds, low and high vibration, and are covered with either a smooth or a corduroy material that people love to touch. These pillows can be activated by applying pressure to the pillow or by pressing a switch (sold separately) that has been plugged into the pillow. Powered by 2 "D" batteries (not included). Measures 12" x 12"

Vidatak EZ Medical Picture Communication Board | Say it with Symbols

Giving Greetings Publishing

Price:\$18

Skill Level: secondary, adult

Disability: cognitive, hearing, learning, speech

This research-based picture communication board helps non-verbal children and adults communicate their healthcare needs and improves their care. Ideal for patients with aphasia, intellectually disabilities, intubated or do not speak English. The Vidatak EZ Medical Picture Communication board is lightweight and durable. The patient simply points to the appropriate symbol (with words in English) or uses the non-toxic marker included to mark it. Each board is printed on large 17" x 11" dry erase board with pictures on both sides. Comes individually shrink-wrapped with a dry-erase marker. Symbols are large, 1.5" square. Available in pictures, symbols, English words and spiritual symbols. Available from SayitwithSymbols.com. Other languages also available by special order.

Vision Buddy

Vision Buddy

Price:\$2750 - \$3450

Skill Level: preschool, elementary, secondary, adult

Disability: vision

Vision Buddy is the worlds first TV watching system for the visually impaired. It streams HD quality video directly from you existing TV setup into your goggles. It also has a powerful magnifier that you can use to look around and magnify objects. Other feature include Reading mode and OCR.

Weight Mate

Abram's Nation

Price:\$89.29

Product Type: seating/positioning/

mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, physical

The Weight Mate</> is a weighted lap pad that provides calming weighted pressure on the nervous system for ADHD, ASD, SPD, mood disorder, depression, anxiety, dementia, and PTSD. It is discreet and portable for outings, school, and workplace. The Weight Mate is designed to be worn across the lap, shoulders, back or stomach. It is not a full sized blanket. The Weight Mate can be used alone or as a companion to the Fidget Folder. The 2 lb. Weight Mate is a stand alone product and the 3, 5 or 7 lb. pad can be snapped to it to increase weight.

Wheely Cape

Abram's Nation

Price:\$219.29

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary

Disability: physical

The Abram's Nation Wheely Cape is uniquely designed to address the issues special needs customers have with ordinary rain and winter coats. Ideal for motorized scooter and wheelchair users

Wiggle Waggles Switch Adapted Pup

Adaptive Tech Solutions

Price:\$42.98

Product Type: adapted play/manipulative, sensory stimulation

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Wiggle Waggles is a wiggly pup that walks and barks, and his rubber-string "fur" jiggles when he moves! He has been adapted to accept a standard 3.5 mm switch (not included). Press and release your switch to get this guy jiggling and moving. Works by pressing the switch made into his head or by plugging in an external switch. Measures 6" x 5.75" x 3.5". Uses 2 AA batteries, not included.

Wireless Attendant Call Button Vibrating Alert AC

Adaptive Tech Solutions

Price:\$56.41 - \$76.41

Product Type: adapted play/manipulative, telecommunications

Skill Level: elementary, secondary, adult

Disability: hearing, physical, speech

Our wireless attendant call button system can be used as-is or with a 1/8" (3.5mm) switch plugged into the transmitter. Includes an A/C plug in receiver chime for indoor use, a battery operated portable receiver chime, and a switch adapted transmitter. This alert signal travels up to 500 feet, and the receiver has 52 ringtones, vibration, a silent mode, and 4 volume

levels (from a soft 25 dB up to 110 dB). Requires 2 "AAA" batteries (not included) and 1 12-volt battery (included).

Wireless Suction Speaker

Adaptive Tech Solutions

Price:\$46.33

Product Type: adapted play/manipulative

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Our wireless Bluetooth speaker has been adapted to accept up to two standard 3.5mm switches. The switch interfaces wirelessly when paired with a Bluetooth 3.0 enabled device and allows a person with limited hand function the ability to pause/play music or video and skip forward/increase volume.

Wobble Switch Mounting Plate

AbleNet, Inc.

Price:\$40.00

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Wobble Switch Mounting Plate, Æi Connect your Wobble Switch to any of our mounting arms.

Wrist Wrap Communicator | Say it with Symbols

Giving Greetings Publishing

Price:\$20.00

Product Type: instructional material, learning aid

Skill Level: elementary, secondary, adult

Disability: cognitive, learning, speech

This comfortable, low tech communication aid can be worn on the wrist of students, adults, instructors and caregivers who use visual reminders and picture symbols at home, school or recreational settings. The stretchy, terry cloth wristband is approx. 6" long and has three clear plastic pockets that hold up to three different communication boards at a time. One size fits most adults. Slide pre-made picture boards provided inside for communicating on the go. Each sleeve holds one pre-made board with eight 1" symbols. Boards available include pictures for socializing, commenting, places, friends, feelings and more. School purchase orders accepted. Create an account at SayitwithSymbols.com.

Zot Artz

Zot Artz

Price:\$100.00 - \$750.00

Product Type: adapted play/manipulative, sensory stimulation

Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, learning, physical
