Activities for Reading Comprehension (ARC): An early Reading Comprehension Intervention for Preschool Children on the autism spectrum with Hyperlexia

Summary:

This article will focus on children on the autism spectrum who present with a strength in early word reading known as hyperlexia. The definition of hyperlexia as a reading comprehension disorder will be discussed. Two theories underlying reading comprehension intervention for this young population will be addressed. The article will then outline a parent-supported, strength-based intervention that targets early reading comprehension skills for these children. Instructions on accessing this free, web-based application will be provided.

STRENGTHS OF CHILDREN ON THE AUTISM SPECTRUM

For preschool children on the autism spectrum, early word reading can be both a special interest and a strength. Preschoolers on the autism spectrum can be passionate about reading and some children on the autism spectrum can accurately read words as early as 2 or 3 years of age (Grigorenko et al., 2002; Needleman, 1982; Newman et al., 2007; O'Connor & Hermelin, 1994). Despite this strength in early word reading, there is a lack of associated reading comprehension that would typically accompany such a strong level of reading. That is, although some children on the autism spectrum can read words accurately at a very young age, they don't understand what they are reading. This ability to read words before the age of 5 years in the presence of poor reading comprehension and poor language comprehension is referred to as hyperlexia (Needleman, 1982). Hyperlexia is commonly associated with autism spectrum disorder with a prevalence of 6-20% in children on the autism spectrum (Ostrolenk et al., 2017).

Hyperlexia is a definite asset and it's encouraging and impressive to see that a child on the autism spectrum with hyperlexia has such early and strong word reading skills. It's a sign that they have developed early academic proficiencies that many other children have yet to acquire. It also means that they have learned one of the most important skills taught in school – word decoding. These observations of hyperlexia are worth celebrating. However, it is essential that we remember that the goal of reading is reading comprehension. Without reading comprehension, a child is missing one of the key elements that will expand and enrich all areas of their learning, especially at school. As such, it is critical that children on the autism spectrum with hyperlexia move beyond word decoding to develop reading comprehension skills as early as possible.

THE GAP: READING COMPREHENSION

Although reading comprehension is included in early reading instruction, reading comprehension impairments are not fully addressed usually until grade 3 or beyond. This is likely because the standard pattern is children learn to read during

DR. DIANNE MACDONALD is a PhD graduate of the Human Development program in the Department of Educational and Counselling Psychology at McGill University. Her research focuses on strength-based interventions that target a child's strength to support areas that are challenging. Currently, Dianne is a Postdoctoral Fellow at the University of Toronto's Ontario Institute for Studies in Education (OISE). Her intervention research on bilingual children with reading impairment is funded by the Social Sciences and Humanities Research Council (SSHRC) and the Fonds de recherche du Québec – Société et Culture (FRQSC). Dianne is also a practicing Speech-Language Pathologist. Her private practice, Communication Works, focuses on children, adolescents and adults with reading impairment.

grades 1 and 2 and reading comprehension deficits might only become apparent when children begin reading to learn by grade 3. It also makes sense that reading comprehension challenges aren't addressed with 2- to 5-year-olds as this is also not a typical profile. However, it's critical that we begin to understand how to focus on reading comprehension for these young children, not only to support reading comprehension, but to develop their language comprehension, vocabulary development and academic skills in parallel with word reading. It is equally important to leverage these formative preschool years by targeting skills that the child with autism and hyperlexia requires (reading comprehension and language comprehension) not that they have already acquired (word reading). Studies have found that the word reading advantage of children on the autism spectrum with hyperlexia declines with age and is on par with their peers by age 10 (Grigorenko et al., 2002; Newman, et al., 2007). It has been proposed that the reason for this decline in word reading may be the result of a lack of appropriate support. That is, without appropriate support for reading comprehension, the child may lose interest in simply reading words. From this perspective, it is essential to practice reading comprehension skills early and often to sustain their love of reading and to promote the richness of understanding written text.

SUPPORTING READING COMPREHENSION

The question is, how can we support a child's reading comprehension at the first signs of early word reading, maybe even as young as 2 or 3 years of age? As a Speech-Language Pathologist, I saw older children (ages 7 years and beyond) on the autism spectrum with hyperlexia. These children had already been reading for some time, often as long as 5 years or more. Yet their reading comprehension and their language skills remained a weakness, despite their strength in early word reading. Clearly, for children on the autism spectrum with hyperlexia, reading comprehension and language skills don't just develop on their own from reading lots of words. As such, children on the autism spectrum with hyperlexia need support to develop their reading comprehension and their associated language skills.

Strength-based approaches to intervention focus on a child's strength to improve their areas of challenge. Using this type of approach, we can use their strength in word reading to support their reading comprehension and language comprehension. In addition, by targeting the child's strength in word reading, we make their special interest the focus of intervention. The child is then more engaged, making it easier to work on their challenges, like reading comprehension and language skills.

THEORETICAL BASIS FOR READING COMPREHENSION INTERVENTION

This strength-based, language comprehension and reading comprehension program I created, in collaboration with Brand-Jaws Web Application Development (www.brandjaws.com), is a web-supported application built upon two separate theories: The Simple View of Reading (Hoover & Gough, 1990) and the Dual Coding Theory (Sadoski, 2005).

THE SIMPLE VIEW OF READING

The Simple View of Reading explains reading comprehension as an equation. The product of word decoding and language comprehension equals reading comprehension. That is, word decoding X (times) language comprehension = reading comprehension (see Fig.1). Word decoding is defined as the ability to read words by either sounding out and blending the sounds together (phonics-based approach to reading) or reading the word as a whole chunk (sight word approach to reading). Language comprehension or listening comprehension is the ability to understand spoken language.

If we apply this equation to the profile of a child on the autism spectrum with hyperlexia we can see that their word decoding is a strength (we can give this a 1). However, their language comprehension is a challenge (we can give this a 0). This leads to the product of 0 or poor reading comprehension (e.g., $1 \times 0 = 0$, see Fig. 1)

Simple View of Reading as applied to Hyperlexia

Figure 1: The Simple View of Reading applied to Hyperlexia.

The Simple View of Reading has also been used to explain reading comprehension in those with dyslexia. That is, the profile of a reader with dyslexia is typically weak word decoding (we can give this a 0) in the presence of strong language comprehension (we can give this a 1) which leads to the same outcome of poor reading comprehension, or 0 for reading comprehension (e.g., $0 \times 1 = 0$; see Fig. 2).

Simple View of Reading as applied to Dyslexia

Figure 2: The Simple View of Reading applied to Dyslexia

Taken together, the Simple View of Reading theory suggests that to improve reading comprehension for children on the autism spectrum with hyperlexia, we must improve their language comprehension (change the 0 to a 1). How can we do this for very young children and use their love of reading at the same time?

DUAL CODING THEORY

We can start by targeting reading comprehension and language comprehension at the single word/vocabulary level. To do so, we refer to the Dual Coding Theory (Sadoski, 2005). The Dual Coding Theory provides a framework for improving receptive vocabulary (listening vocabulary) while incorporating written language (orthography). In brief, the Dual Coding Theory states that concrete words like "rock" or "cat", that can be associated with an image, are learned more easily in the presence of a dual code – an image + the written word (see Fig. 3).

We know that using images with children on the autism spectrum has been successful in teaching various language skills via programs like the Picture Exchange Communication System (PECS; Bondy & Frost, 1995) and the Visualizing and Verbalizing program (Bell, 1991). Additionally, studies have shown that matching a picture to a written word was effective in teaching early vocabulary to 3- to 8-year-olds on the autism spectrum (Bejnö et al., 2018). See Figure 3.

Orthography

Receptive Vocabulary Learning

Figure 3: Pairing an Image Plus the Written Word Increases Receptive Vocabulary Learning

PUTTING THE TWO THEORIES TOGETHER: ACTIVITIES FOR READING COMPREHENSION (ARC)

To review, this reading comprehension intervention program, ARC, is grounded in both the Simple View of Reading and the Dual Coding theories. The program was designed to target language comprehension (starting with receptive vocabulary) and reading comprehension at the most basic level, single word-to-picture matching. To illustrate, if you saw the following three words, would you know what they meant (see Fig. 4)?

Figure 4: Understanding Words without Associated Images

Now if you saw these same three words paired with their corresponding image, is it easier to understand what they mean? Does it help you to understand that brabeum is a prize, umbel is a type of plant and snood is a hairnet? Do you think you might remember if you ever heard these words again. If you practiced matching the word to the picture would this help you remember? (see Fig. 5)?

Figure 5: Support for Learning Vocabulary by Adding Images and Words

WORD-TO-PICTURE MATCHING

The ARC web-based app program incorporates a forced-choice, two option, text-to-picture matching activity to facilitate the process for parents, educators, and clinicians. However, this is not the only way to practice word-to-picture matching. Actual picture cards and written words (spoken and read) can also be used in place of this web-based, tablet program. The advantage of the web-based program is that it facilitates selecting and modifying words and images to use for a specific child. For example, you can tailor words and images for the child by using pictures of their dog or cat, or their favourite toys taken with your iPad or phone.

The vocabulary is based on the *MacArthur-Bates Communicative Development Inventories Wordbank* (Frank et al., 2017) and follows an early developmental sequence. That is, the words chosen are those that a child would first use when they are beginning to use spoken language. Children begin by matching early concrete nouns and progress to verbs then adjectives. Similarly, children progress from single words to 2-word phrases and on to short sentences. This sequence mimics the same way children develop oral language skills and facilitates language comprehension. There are two phases to the app: the Assessment phase and the Intervention phase.

THE ASSESSMENT PHASE

The program begins with the Assessment phase to determine the correct starting point for the child. This also sets a baseline for clinicians or teachers who may be interested in charting progress. The assessment can always be repeated at another time to assess progress. The Assessment phase displays four pictures for a single target word and the child is first asked to choose the correct picture that corresponds to the oral/spoken word in the initial Listening Comprehension Assessment and then the written word in the subsequent Reading Comprehension Assessment.

THE INTERVENTION PHASE

After the child completes the initial Assessments of Listening and Reading Comprehension, the program proceeds to the Intervention phase. Like the Assessment, ARC first targets Listening Comprehension. That is, the child matches the spoken word (that is supported by the written word) to the image (see Fig. 6). A small “ear” icon shows that the child is practicing Listening Comprehension. Once the child has acquired the word at the Listening Comprehension level, they proceed to match the written word (no spoken word) to the image to practice Reading Comprehension (see Fig. 7). A small “book” icon shows that the child is practicing Reading Comprehension. For both Listening and Reading Comprehension the child must first touch the written word before touching the correct image to draw their attention to the orthography.

Figure 6: The Image Paired with the Written Word and the Spoken Word to Practice Listening Comprehension

Figure 7: The Image Paired with the Written Word (No Spoken Word) to Practice Reading Comprehension

It is important to note that only two images (the correct image and the incorrect or distractor image) are used during the intervention phase (as opposed to four images during the assessment phase). Using fewer images during intervention reduces distractions and facilitates choosing the correct option, as the intervention phase is meant to teach not test. Additional images can be added for the same word, for both target words and incorrect words. For example, different images of a cat can be included to support generalization and the program will randomly cycle through them.

Here's a brief demonstration of the Listening Comprehension and Reading Comprehension levels of ARC Intervention:

YouTube Video: Activities for Reading Comprehension (ARC) Short demo <https://youtu.be/1HLFD1waPAs>

As a reminder, this sequence of first practicing Listening Comprehension then Reading Comprehension is in keeping with the Simple View of Reading which states that acquiring listening comprehension is the key to acquiring reading comprehension (for children on the autism spectrum with hyperlexia who are already strong decoders). Pairing the written word to the image to facilitate vocabulary comprehension agrees with the Dual Coding Theory.

POSITIVE REINFORCEMENT, PRACTICE, AND DATA COLLECTION

The ARC program always ends each turn by providing positive reinforcement for selecting the correct word. That is, if the child selects the incorrect word twice, the incorrect word is greyed out and only the correct word is available for selection. As such, the child always ends each turn with positive reinforcement.

The app is meant to be used for 15 minutes per day. This is in keeping with a distributed model of learning schedule (i.e., practicing small amounts over consecutive days) that has been shown to be a superior model of learning to mass practice, (i.e., practicing all in one day; Haq et al., 2015).

The program privately collects data on how the child has done in each session and displays the words they have learned for more specific tracking of progress and to support generalization, (i.e., parents/educators and clinicians can practice these same words outside the session).

TABLET OR PHONE USE

The program is accessed from a web browser (like Chrome or Safari) and is intended to be used with a touch-screen device, such as a tablet (iPad or Android) or a phone. The program is not meant to be accessed via a laptop and a mouse (although a laptop with a touch screen would work). The reason for using a touch-screen device, like tablets and phones, is that the action of touching an image on a screen is meant to replicate the real-life gesture of touching pictures when reading a book. There is research to suggest that when the real-world response is used, (e.g., a natural response of finger pointing) greater generalization can occur (McEwan & Dubé, 2017). Using a mouse does not imitate a real-life pointing response. Along similar lines, the program is also meant to be used like a book, with parents commenting on the pictures, providing feedback and positive reinforcement.

FULLY CUSTOMIZABLE

The app is fully customizable. Although the existing images are in English, you can privately upload your own images and label them with words in any language. While you cannot delete existing images, as these are shared with everyone using the web-based app, you can customize images for a participant by blocking any existing images you don't want and selecting only those you choose/upload for a participant. Though the images you upload are private, you can decide to share them with other participants that you've created. Finally, the program also accepts short and long paragraphs that can be uploaded with specific images.

CARRYOVER/GENERALIZATION

After each session, a list of the words the child learned in that session will be displayed. You can take a screen shot of these words so that they can be practiced during other activities with the child/student/client.

HOW TO ACCESS THE FREE APP

The links and instructions for the free app are available online at www.readingcomprehension.ca. Select the tab "ARC APP ACCESS" to see setup instructions. The first step is for a parent, educator, or clinician to create an account. Once your account has been set up, you can begin adding participants (e.g., your child, student, or client).

First: Set up an Account for Yourself as a Parent, Educator, or Clinician. To set up your account, click on ARC Instructions (Parents, Educators or Clinicians) <https://www.readingcomprehension.ca/arc-instructions-parents-educators-or-clinicians.html> This section outlines how to use the Administrative portion of the app. It also explains the various sections of the administrative portion of the app including the Dashboard; how to set up Groups (for parents with more than one child, or teachers and clinicians; how to add multiple students/clients); how to add different children/students or Participant, and finally, how to add or change the Content, e.g., words, phrases, sentences, paragraphs and their corresponding images. The app can also support short and long paragraphs that can be uploaded by the user.

Next: Log on for the Child/Student/Client. Once the app has been set up for a Participant (your child/student/client), you or your child/student/client can log into the app on your web browser (on your tablet) using <https://arc.readingcomprehension.ca/>. This address is where you will always access the app going forward. You or your child will click on “Welcome! Please log in” and enter the User Number and password that you created for the child/student/client in the Administrative section when you set the child up as a participant. Click on the ARC Instructions (child user) <https://www.readingcomprehension.ca/arc-instructions-child-user.html> for more information.

SETTINGS

There are some settings worth mentioning. The default setting for audio instructions is set to OFF. Instructions are automatically spoken once at the beginning to teach the child, but most children quickly understand what they must do. Therefore, it is recommended to keep audio instructions set to OFF to discourage echolalia by listening to the instructions repeated constantly. Adults can easily re-instruct the child to touch the word first to avoid the repetitive instructions, if necessary.

As mentioned, the app always begins with an assessment to set the level which is appropriate for your child to begin. The Intervention cannot be accessed until the Assessment has been completed. Re-assessment can be controlled by the parent/educator/clinician to measure progress. To do so, select Participants and then the Edit button beside the child’s name. Scroll down to change Assessment from “Disable” to “Enable”.

BENEFITS OF EARLY INTERVENTION FOR HYPERLEXIA

We are all aware of the benefits of early intervention for children on the autism spectrum (see Landa, 2018 for a summary). However, the benefits of early reading comprehension for children on the autism spectrum with hyperlexia is still in its infancy. The results of our study (Macdonald et al., 2022) suggests that reading comprehension and listening comprehension can be increased by using the strengths in, and the passion for, early

word reading of preschoolers as young as 3 years old on the autism spectrum with hyperlexia. Our study proposes that there is no reason to wait until the later grades to work on reading comprehension. Although reading comprehension is typically not targeted until the later primary grades, the results from our study imply that reading comprehension, beginning at the single word level, can be practiced by very young children on the autism spectrum with hyperlexia.

THE LINK BETWEEN READING, VOCABULARY, LANGUAGE, AND SOCIAL LANGUAGE DEVELOPMENT

We also know that there is a strong link between vocabulary development and reading success (Perfetti et al., 2008; Stanovich, 1986), and between vocabulary development and linguistic ability (Sparks, et al., 2014). In addition, receptive language and social development are linked to social language skills like joint attention (both initiating and following a point; Delinicholas & Young, 2007) Therefore, using the strength in early word decoding to facilitate early vocabulary acquisition may also simultaneously support oral, written, and social language skill development for young children on the autism spectrum.

EFFICACY OF AN APP FORMAT

The app format of ARC makes it easy for parents, educators, and clinicians to implement the program in their own homes, classrooms, or clinics. This means that treatment can begin while awaiting services or in between sessions (for parents) or used during classroom (for teachers) or language-based lessons (for clinicians). Clinicians can use the app both in and between sessions (i.e., parents can use the app as carryover). For parents, there can be long wait times for early intervention services, therefore, this app provides an interim, cost-effective option for early service provision. In addition, it provides teachers an alternative to phonological awareness instruction for children on the autism spectrum with hyperlexia.

FOCUS ON THE READING COMPREHENSION LEVEL, NOT THE WORD DECODING LEVEL

While many parents and educators encourage the child on the autism spectrum to read, and support their reading skills, reading more simply isn’t enough. The ARC app allows parents, educators, and clinicians to target the specific underlying challenges these children are experiencing, while encouraging their special interest. So, while a preschooler on the autism spectrum with hyperlexia may be able to read books at a 3rd grade level, their reading comprehension is likely well below that of a kindergarten child. Therefore, the key is really targeting their reading comprehension level, not their word decoding level. The Oral and Written Language Scales (OWLS-II; Carrow-Woolfolk, 2011) Reading Comprehension (a word-picture matching test) is a good test for clinicians to use to determine where the

child's reading comprehension skills lie, as compared to their word decoding skills.

THE LITERACY NEEDS OF CHILDREN ON THE AUTISM SPECTRUM WITH HYPERLEXIA IN THE EARLY GRADES

It is important to keep in mind that children on the autism spectrum with hyperlexia may not need the same early reading intervention as their peers. Findings from our earlier study (Macdonald, 2021) suggest that preschoolers on the autism spectrum do not learn to read like their peers by using phonological awareness strategies. As such, this type of instruction in the early years, when their peers are learning to decode words, may not serve the needs of children on the autism spectrum with hyperlexia.

Children on the autism spectrum with hyperlexia already know how to decode words. Children on the autism spectrum with hyperlexia may benefit more from targeted reading comprehension intervention rather than phonological awareness support like their typically developing peers. Therefore, focusing on language and reading comprehension should be prioritized. Our recent study (Macdonald, 2022) suggests that developing vocabulary, using the written word as support, and targeting reading comprehension at a basic vocabulary level, is an effective model to use to develop oral and written language comprehension. Beginning at the word level is the most basic level to start for reading comprehension intervention, just like learning single words is the most basic level to start for oral language development.

LONG-TERM GOALS AND TAKE-HOME MESSAGE

Reading comprehension is the ultimate goal of learning to read. While word decoding is a critical skill in the reading process, gaining meaning from the written word is the real purpose of reading. To this end, whether you use this app, or physical picture cards and words, the take-home message is that we don't have to wait until the later primary grades to work on reading comprehension for preschoolers on the autism spectrum with hyperlexia. These young children have an incredible strength in word reading that can be leveraged to assist with both language comprehension and reading comprehension. By practicing reading comprehension early, using their strength in word decoding, we hope to encourage a life-long love of reading, and support their special interest, while enriching their oral and written language and academic skills simultaneously.

DISCLOSURE, LIMITATIONS AND DISCLAIMER

ARC app was supported by grants from the Organization for Autism Research (OAR) and the Fonds de recherche du Québec – Société et Culture (FRQSC). Intellectual property for the ARC app is shared by McGill University and Dr. Dianne Macdonald.

While the studies, upon which these results are based, are the largest sample size of a group of preschoolers on the autism spectrum with hyperlexia to date, it is still a relatively small sample statistically. As such, more studies are needed on this wonderful group of children on the autism spectrum with hyperlexia to better understand their learning needs. Furthermore, based on these limited studies, Dianne Macdonald and co-authors, Communication Works, and McGill University cannot guarantee the efficacy or success of this intervention for your child/student/client.

Accessible Educational Math Games for Students with Physical and Cognitive Disabilities

AI ÷ Learners

Millions of students in the United States struggle to learn mathematics. Foundations such as the Gates Foundation, National Science Foundation, and Institute of Educational Science are spending billions of dollars funding researchers to explore methods of improving student learning. Many educational companies have also been created to help students improve their math skills. Applying recent advancements in technology and artificial intelligence, researchers and developers demonstrate the high potential of new educational technology (EdTech). Artificial intelligence helps us personalize learning to each individual student by providing students with optimal

math levels, question designs, and feedback. However, few EdTech companies develop platforms suitable for children with disabilities and limited research focuses on special needs students. Thus, students with disabilities are left behind as the EdTech industry and research field advance to support the general student population.

Inspired by her younger sister Lara who has a severe neurological disorder, Adele Smolansky founded AI-Learners in June 2020. AI-Learners (www.ai-learners.com) is the first educational technology company with digital math games for children with physical, cognitive, and behavioral disabilities. AI-Learners has

ADELE SMOLANSKY is the founder and CEO of AI-Learners. She is an undergraduate senior studying Computer Science at Cornell University. Adele has also worked at Google as a Software Engineering Intern for two summers. She worked on the Google Drive team during the summer of 2021 and on the Android Accessibility team during the summer of 2022. At Cornell, Adele is conducting research at the Enhancing Ability Lab and the Future of Learning Lab to investigate how AI-driven educational technology can help elementary school students learn math and how to design and evaluate games for people with physical disabilities. Upon Adele's graduation in May 2023, she will pursue a PhD in accessible Educational Technology. Ultimately, her goal is to help all students have equal access to educational resources and maximize learning for each student with technology.

Adele was inspired to create AI-Learners by her younger sister Lara who has a severe neurological disorder called Rett Syndrome. Lara cannot talk or walk and uses an Eye Gaze assistive device to communicate. During the COVID pandemic, Adele saw a clear need to improve educational technology for her sister and many other children with disabilities. In June 2020, Adele founded AI-Learners, an educational technology company, to help children with disabilities learn math. Since then, Adele has worked with over 50 Cornell students and faculty, assistive technology specialists, special needs educators, and business advisors to develop AI-Learners. She is proud that her sister Lara and hundreds of other students are learning math on the AI-Learners platform. You can reach Adele at adele@ai-learners.com or 917-744-2164. She is happy to answer questions and discuss more ways to support learners.

🔊 How MANY apples do you see? ⚙️

Example of an AI-Learners Addition Game: Add Fruit

over seventy math games across six core math areas for students learning math at the PreK-2nd grade level. All games meet the highest level of accessibility standards and are compatible with assistive technology such as screen readers, magnifiers, switch devices, eye gaze, and more. The games are engaging and personalized to meet students' complex needs, and AI-Learners provides comprehensive analytics to help parents and teachers support their students.

AI-Learners is free for all students, and parents and educators can create individual accounts for their students. Hundreds of parents have already created accounts for their children, and schools will begin free trials during the 2023-2024 school year.

You can check out the website at www.ai-learners.com and create a free account for your children to practice their math skills now! Please reach out to Adele with questions or feedback. You can reach her at adele@ai-learners.com

PROBLEM WITH EXISTING EDTECH WEBSITES

After speaking with hundreds of parents and educators, Adele learned that Lara is just one of many students with disabilities who cannot effectively learn from current Educational Technology (EdTech) websites. These websites are designed for the general student population and thus do not meet the complex needs of students with cognitive, behavioral, and physical disabilities. Existing EdTech games are inaccessible due to poor color contrast, small buttons, stressful features, or incompatibility with assistive technology. Games are not personalized to a student's abilities and thus give students math questions that are too easy or too hard. Moreover, engagement features are overwhelming for students with cognitive disabilities like dyslexia or ADHD who struggle to concentrate. Parents and educators also voiced that they want to see more analytics about how their students learn to understand their student's abilities

Adele's younger sister Lara

better. Overall, EdTech companies are not effectively supporting the learning of students with disabilities, and parents and educators are seeking a new tool that helps their students learn math.

EQUITY IN EDTECH DEVELOPMENT

EdTech is becoming an increasingly popular method of supporting students' learning. Recent advances in artificial intelligence and machine learning help us apply data analysis and scientific methods to optimize game designs, integrate adaptive algorithms, and create comprehensive analytics. Students with disabilities can greatly benefit from this style of learning as individualized instruction is necessary to meet students' complex needs. However, academic research and commercial products focus on helping the general student population, leaving out students with disabilities. Little scientific evidence is available to demonstrate how students with disabilities learn, and few companies and researchers are collecting and analyzing data on the learning patterns of students with disabilities.

In the 2020–2021 school year, the number of students ages 3–21 who received special education services under the Individuals with Disabilities Education Act (IDEA) was 7.2 million, or

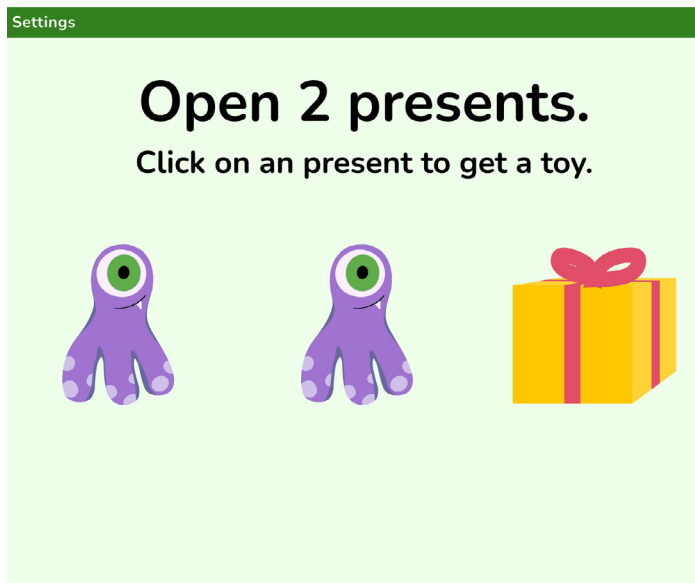

15 percent of all public school students. According to the IDEA, all of these students are legally entitled to equal education and access to resources. So if a school activity involves playing educational math games and students cannot play them because they are incompatible with assistive technology, then students are not receiving fair education. Thus, we must ensure that students with disabilities are included within the EdTech industry and research field.

AI-LEARNERS HELPS STUDENTS WITH DISABILITIES

AI-Learners is designed to meet every child's complex needs by adapting to a student's physical, cognitive, and behavioral abilities. As more students play math games, AI-Learners will gain novel insights into how special needs students learn and share findings with other researchers and developers to help improve education for more students. Adele is confident that AI-Learners can help a wide range of students, and she is determined to develop technology for students with disabilities, so no one is left behind.

AI-LEARNERS PRODUCT OFFERING

AI-Learners (www.ai-learners.com) is an educational technology website for students learning math at the PreK-2nd grade level. The platform features 70+ math games across six core foundational math areas. The games are accessible and engaging for students with physical, cognitive, and behavioral disabilities. Students receive a personalized learning experience based on their disability, math level, and progress. On a student's individual account, all games are set to a student's math level, and the games feature dynamic difficulty levels and instructional support. Students can also create their own avatar, which they see throughout the games. Lastly, AI-Learners provides comprehensive analytics to help parents and teachers better understand their student's mathematical abilities.

AI-Learners is free for all parents to create individual accounts for their children to practice math at their own pace. School accounts will be available for the 2023-2024 school year. Once a student has an account, they can practice counting, addition, subtraction, comparison, shapes, and logic. Students can play games at home with parents or therapists, at school with teachers, or independently from anywhere. Additionally, the website works on any computer, tablet, or mobile device.

To ensure AI-Learners meets the complex needs of all learners, AI-Learners provides value in four areas: (1) AI-Learners is **accessible** for all students; (2) AI-Learners actively **engages** students and motivates them to learn mathematics; (3) AI-Learners personalizes the learning experience to each individual student; (4) and AI-Learners provides comprehensive **analytics** to help parents and educators better understand their students math abilities.

ACCESSIBILITY

AI-Learners is accessible for students with physical, cognitive, and behavioral disabilities. The website meets the highest level of accessibility standards from the W3C Web Accessibility Initiative, and the games are compatible with a wide range of assistive technology. Most importantly, the AI-Learners games are clear and easy to understand. In line with the Web Content Accessibility Guidelines (WCAG), games have no flashing content or time limits, sufficient color contrast, and the text is large and easy to read. Additionally, the games provide a multisensory experience with visual and audio cues at every step of the games.

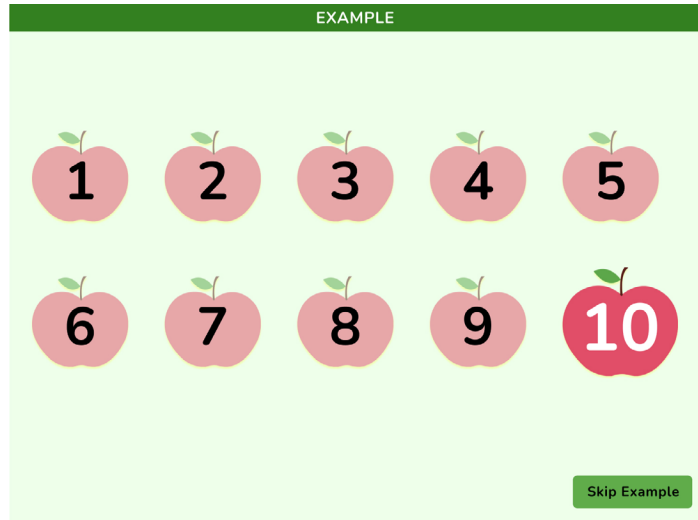

Adele has worked with many special education teachers, occupational therapists, and assistive technology specialists to ensure the AI-Learners games met the complex needs of students with physical disabilities. First, Adele ensured that the AI-Learners games were compatible for students who use an

eye gaze assistive device to help her sister Lara practice math. Next, Adele researched how to make games compatible with other alternative input devices such as joystick, switch device, and trackpads to help students with motor impairments. Lastly, Adele explored compatibility with screen readers, text-to-speech, and magnification to ensure the games were accessible to students with vision impairments. For example, buttons are large enough for students to click on, the games are available on all screen sizes and support magnification up to 400%, and all visuals have clear alternate text labels.

students with rewards and breaks for their hard work. Every few questions, students see animations with fireworks or balloons or can sign along to a good job song. Caretakers can adjust the frequency and length of breaks for further customization.

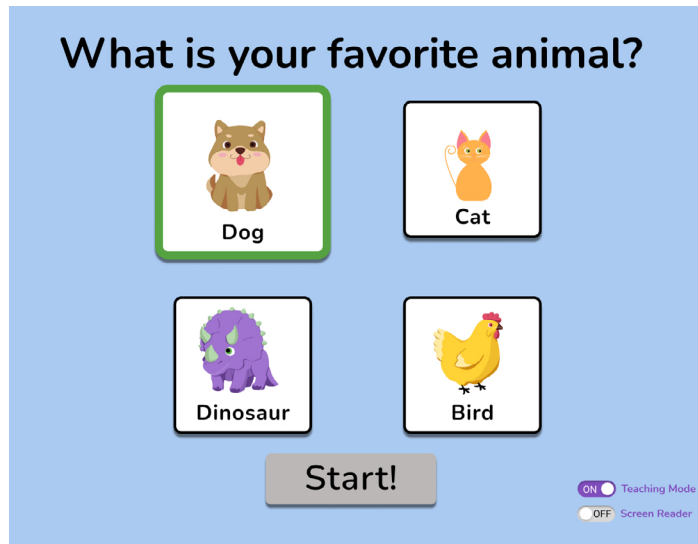

In addition to sufficient feedback in the games, AI-Learners helps students improve their understanding of underlying math concepts through instructional support. Not only are students practicing math questions through drill-and-practice, but students also see question explanations and examples to understand the math concepts better. Every game begins with an example. For instance, when a student plays a counting game, the game starts with an example of a counting sequence, showing how to count 10 apples (audio plays for each number and the apple enlarges as the audio plays). During the game, students can click a hint button and see another example of how to count.

ENGAGEMENT

AI-Learners activity engages students using applied behavior analysis principles to provide students with an optimal learning experience. Research shows that one of the most important aspects of engagement is feedback. When a student clicks on an answer, whether right or wrong, they should receive feedback to understand whether they answered a question right or wrong. Applying this principle, the AI-Learners games provide students with immediate feedback through visual and auditory cues. For example, after selecting an answer choice, the answer box turns red or green, and students hear “good job” or “try again”. The games also reinforce correct answers by offering

To further engage students, AI-Learners provides students with a plethora of visuals to choose from. Students can play

games with food, animals, toys, school objects, and more. At the start of a game, students choose their favorite character or color, which they see throughout the game. Lastly, students create their own avatar on the AI-Learners website, which they see during the game. Students can choose their own skin color, hair color, shirt, and accessories. As students play more games, they receive stars which they can use to unlock new avatar features to further customization.

PERSONALIZATION

AI-Learners provides students with personalized learning experience to improve the effectiveness of the math games. Following the common saying, “if you’ve met one person with autism, then you’ve met one person with autism,” AI-Learners utilizes the powers of technology to create individualized learning experiences for each student and meet their complex needs.

After a student has their own account, all games on the AI-Learners website are set to the student’s math level and game difficulty dynamically changes overtime. When a parent or educator creates an account, they enter initial information about a student, such as a student’s disability and approximate

math abilities. As students play more games, the difficulty level adapts to a student’s strengths, weaknesses, and current performance. Some days, students have a bad day and may need to play easier questions. Some days, students perform really well and can try harder questions. Thus, during each game, the AI-Learners algorithms adjust to a student’s game play and provide students with appropriate difficulty levels to ensure students are most effectively learning math. Additionally, since all games on a student’s account are already set to a student’s math level, parents and teachers do not need to select a math level for a student at the start of a game. Not only does this ensure that students are playing games at their math level, but now students can independently play games.

Lastly, AI-Learners recommends games for students to play based on their disability and past performance. Games are clearly organized in sections: “picked for you,” “more games,” and “challenge yourself.” For example, if a student has played many addition word problems, but is struggling with mental math, then a game to help students practice addition mental math will appear in the “picked for you” section. The games in these sections change every few days to further personalize the learning experience for each student.

ANALYTICS

AI-Learners provides parents and educators with clear analytics to help them gain a deep understanding of their student’s progress, strengths, and weaknesses. The analytics section is split into four sections: highlights, current progress, game play history, and topic guide. Each section features clear and interactive graphics to provide caretakers with a plethora of information on their student’s mathematical abilities.

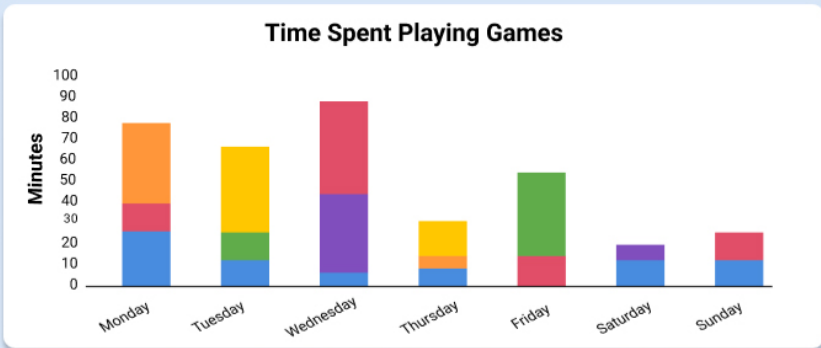

The highlights section provides an overview of a student’s game play in the past week. Highlights include the number of questions a student has played, the amount of time a student played, a student’s overall accuracy in a math skill, and the variety of games a student practiced. Additionally, all math skills (e.g., counting, addition, etc.) are color-coded to clarify what skills a student has been practicing. Parents expressed that this page was their favorite due to the conciseness and clarity of graphics.

For more information on a student’s progress, parents and educators can view the Current Progress tab. This page provides interactive graphics displaying how a student’s math abilities have changed over time. A line chart shows the total questions, math level, and time spent playing over time. Filters for math skill, topics, and time duration are available for further customization. The page also provides details on a student’s strengths and weaknesses. Educators expressed that the Current Progress page was their favorite, as they could better understand what additional support a student would need.

Lara's Highlights: 7/3 - 7/10

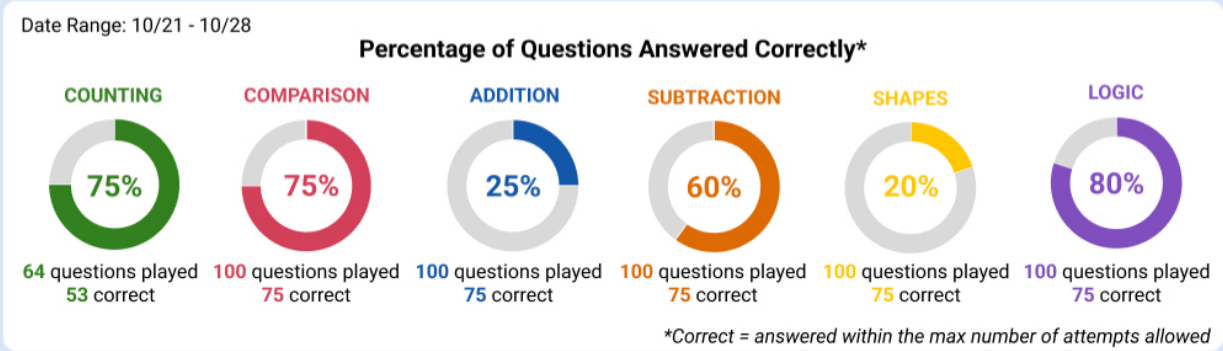

COUNTING COMPARISON ADDITION SUBTRACTION SHAPES LOGIC

Next, the Gameplay History page provides information on all the games a student has played over time. The calendar view shows how many games a student has played each day in the past month. A back button offers data retrieval of information on games played in previous months. Additionally, when clicking on a game box, more information is displayed with details on a specific game session. For example, teachers can see how many questions a student answered correctly on a particular day or how much time a student spent playing.

Lastly, the Topic Guide page helps parents and educators understand all the math topics that a student is expected to master according to state common core expectations. The guide provides details explaining what each topic means. When hovering over a topic name, an example of an AI-Learners game

Adele's Gameplay History

Total Questions Answered: 18
Questions Correct: 17 (94%)

that helps students practice the topic is shown. The page also states how a student is performing in each topic. For example, the counting page may say, "Lara can count to 10," helping a caretaker understand exactly what Lara's counting ability is.

Not only does the AI-Learners analytics section help parents and educators gain a deep understanding of their child's math abilities, but caretakers can also export data to use for IEP or other educational protocols. Parents seeking evidence of students' strong math performance for an IEP evaluation can use the AI-Learners analytics data to present how their students are performing mathematically. For teachers, the analytics section provides a "one stop" place to see all of a student's mathematical abilities, which can simplify teaching a large classroom of children. Keeping track of multiple students is challenging, but with the AI-Learners analytics section, teachers can easily see all their students' math progress and better support a large group of students.

USABILITY TESTING

AI-Learners has conducted usability tests with over 100 students and teachers since the summer of 2021. These studies have been extremely valuable in providing AI-Learners designers and developers with feedback on the games to understand how to improve the games and further support learning for students.

During the summer of 2022, a few AI-Learners team members visited schools in New York City to play math games with students and receive valuable feedback from teachers. Students were excited to play games, and usability studies showed that 95% of students were engaged, and 60% of students said the breaks between questions were their favorite feature. At the end of every school visit, students voiced wanting to play more games.

CONFERENCES

Adele has been presenting her unique work for AI-Learners to thousands of people around the world at multiple events and conferences. During October 2022, Adele attended the [Closing the Gap](#) conference along with dozens of other AT companies, EdTech companies, and industry leaders in accessibility, such as Microsoft. Adele was one of 50 exhibitors and 100 small business presentations, spreading the word about AI-Learners and her research on assistive technologies in the EdTech space. At the conference, AI-Learners made strides towards improving the accessibility of the platform and helping kids learn math.

Adele will also be attending the [Assistive Technology Industry Association](#) conference in January 2023 and the [CSUN Assistive Technology](#) conference in March 2023. Adele will have an exhibitor booth during both of these conferences and hold a one-hour presentation to share more information about AI-Learners. Adele is looking forward to learning from keynote speakers about assistive technology and accessibility.

In addition to these premier accessibility conferences, Adele has presented AI-Learners at smaller assistive technology and educational conferences. For example, Adele presented to the Minnesota Assistive Technology Advisory Team and the Wy-

ming Institute for Disabilities AT Professionals. Please reach out to Adele (adele@ai-learners.com) for presentation inquiries.

RESEARCH

To further improve the AI-Learners website and help students learn math, Adele is working with two research labs at Cornell University. Adele committed to providing students with research-backed math games to optimize student learning outcomes. Upon her graduation from Cornell University, Adele will continue academic research to improve AI-Learners as she pursues a PhD in accessible educational technology.

At the [Future of Learning Lab](#) with professor [Rene Kizilcec](#), Adele is working on two research projects to understand better how the AI-Learners games can support children with cognitive disabilities. Her first project involves a review of AI-based adaptive math games. She analyzes how children with cognitive disabilities are considered in the design and adaptivity of existing math tools by applying cognitive and neuroscience principles and pedagogy. She is also analyzing the type of research studies and the validity of studies conducted with the math tools to understand the effectiveness of math games for students with disabilities. Motivated by limited research on the design of EdTech games for elementary school children with cognitive disabilities, Adele is also conducting a three-part study with local Ithaca schools. She developed a novel method of teaching early math to children. Interviews with teachers and observations of kids playing games will help her translate the model to AI-Learners game designs. Lastly, a controlled experiment will evaluate the efficacy of the games with respect to student accuracy, enjoyment, and attention.

Adele is also conducting research at the Enhancing Ability Lab at Cornell with guidance from Professor [Shiri Azenkot](#) to explore the accessibility of games for students with physical disabilities. First, Adele is developing an accessibility evaluation method to clearly define game accessibility for students with physical disabilities. To develop the evaluation method,

she analyzes accessibility guidelines with various techniques and interviews EdTech creators and users to refine the evaluation method. She will then use the final evaluation method to conduct an observational study with commercial EdTech games and clearly demonstrate the issues with existing EdTech games. Through this process, Adele hopes to gain more insights into game accessibility and understand what further research is necessary to support students with motor, vision, speech, and hearing impairments. Adele already identified that supporting students with physical disabilities as they learn to use assistive technology (AT) is non-trivial. To investigate this process, Adele is interviewing parents, teachers, assistive technology specialists, and other professionals to understand the players and activities involved in helping children use technology. For example, how do parents select and acquire AT? How do parents learn to use AT, and who works with children daily to help them use AT? Through these studies, Adele hopes to understand better the inefficiencies and challenges present in the AT industry and then propose solutions to help improve the industry.

NEXT STEPS

Hundreds of students are already using AI-Learning and improving their math skills. You can now sign up for a free account at www.ai-learners.com if you know a child who could also benefit from fun math games.

Please reach out to Adele with any questions, advice, or inquiries at adele@ai-learners.com ■

Solving the Reading and Writing Problems caused by Dyslexia

Summary:

In this eye-opening article, Mike Matvy describes his 18-year struggle to learn to read and write. He shares how he solved his problems with sounding out and spelling words and teaches students with dyslexia to do the same. This article sheds light on the misinformation and institutional rigidity that keep students from taking advantage of life-changing technologies and talks about the digital wave that makes our classrooms and world more inclusive.

DYSLEXIA AND THE FUTURE OF READING AND WRITING

In the near future, students' problems with reading and writing will melt away, not because the nature of their dyslexia has changed, but because the environment will have changed. These changes are happening before our eyes. When we pop out our phone and dictate a text message instead of typing it, we're writing by speaking. When we listen to an email or read an audible book instead of reading the print version, we're reading by listening. Although students can learn to use this technology in a few hours, the traditional classroom environment clings to the idea that students with dyslexia can become fluent readers,

and expects everyone to use print the same way, the old fashioned way.

These changes are going to revolutionize the way students with dyslexia read and write. In time, reading by listening and writing by speaking will gain widespread acceptance for anyone in the classroom who wants to use it. Then, we won't even notice that some of our students use it almost all the time and are not disadvantaged by situations that require them to slowly sound out and spell words. They will not need special instruction for reading, writing, learning because they will read, write, and learn like everyone else. They will become part of a changed classroom, a classroom that will have removed

MIKE MATVY is a former School Psychologist, who helps parents, teachers, and schools empower students with dyslexia to excel academically. After 18 years of trying to learn to read like his peers and flunking out of college, Mike created an innovative strategy for reading and writing using technology. He quickly started reading at 300+ words per minute, went from making F's in classes that require reading to making A's, and became a School Psychologist. With over 25 years of experience, he is a recognized expert on reading by listening and writing by speaking. Mike has written for "Closing The Gap," "Inland Empire Branch of the International Dyslexia Association," and "Exceptional Parent Magazine." He was written about in "ADVANCE for Speech-Language Pathologists and Audiologists," Mike is a frequent presenter at conferences such as California State University, Northridge, Closing The Gap, International Dyslexia Association, Learning Disability Association, Tennessee Association for Assistive Technology, etc. Mike has sat on many professional boards and currently serves on the board of the International Dyslexia Association Tennessee Branch and the Knox County Dyslexia Advisory Council. He also became an app developer and created a one-of-a-kind app for read-aloud testing called Audio Exam, used by thousands of teachers and students. Mike can be reached by email at MikeMatvy@gmail.com or through his website, DyslexiaTech.com.

the barriers to reading, writing, and learning, a classroom that supports them in staying caught up minute by minute with lessons. We will have solved their problem with sounding out and spelling words.

What about today? Are students with dyslexia staying caught-up minute by minute in the classroom?

In this article, I will share what I've learned, discuss where we are with the technology, and where we go from here.

THE LONG DARK PATH THAT OPENED FOR ME

I spent 18 years trying to learn to read, and went to the reading clinic every summer after the first grade. I was the student that every teacher asks for: the student that doesn't give up. In college, my reading specialist set up full-time reading instruction for me every day for one semester. I had a math major completed, but had flunked out of college because I couldn't pass the classes that required reading. I thought surely, after a semester of full-time reading instruction, I would become a reader. This was not the case; my logic was based on faulty information.

At the end of that semester, the reading specialist who had worked with me for years told me the truth: that I would never learn to read like my peers. I was adrift and didn't know what to do. It turned out that telling me the truth was the best thing that ever happened to me. It let me come up with reading by listening and writing by speaking, and I went from making F's in classes that required reading to making A's, finished my degree, and then finished two advanced degrees also making A's.

THE WORD WOULD GET OUT

Once I recognized that something amazing had happened, I believed that the news would spread like wildfire and others with dyslexia would also experience an amazing transformation from failing to succeeding in the classroom. However, after about 15 years, while working as a school psychologist, it became clear to me that the word had not gotten out. Our school system got a parent request for technology for a student with a print disability and they didn't know what to do. I was called in to help. And I found that things had not yet changed for students with dyslexia. Students were continuing to fail because they couldn't sound out and spell words like others. Furthermore, they were not even aware that they could be using reading by listening and writing by speaking technology to solve that problem.

More students were referred to me and I became an assistive technology specialist. Every student referred to me over the years (except for one) could quickly begin reading by listening at 250 to 350+ words per minute, many who initially read visually at 45 to 95 words per minute. My research showed that after the initial training, of 4 1/2 hours and daily practice over 30 days, students would pass goals for: (1) reading

independently by using the reading by listening technology on their own, (2) reading accuracy by reciting a 7 to 10 word sentence verbatim after reading it at their highest speed, and (3) reading comprehension by reading a paragraph and giving the main idea and supporting details. Many of these students excelled academically and went on to college and later careers that would not have been possible without fluid reading.

I shared the results we were having in presentations at conferences and in the articles I wrote, and expected that others would adopt these life-changing accommodations, but this didn't happen. I suspected what kept students from using these accommodations came down to wishful thinking and ignoring the facts about reading outcomes for students with dyslexia.

For years, I attended IEP meetings where parents were told that their student with dyslexia "will learn how to read," and I recognized that parents were not being told that these students would never become fluent readers. I never heard a discussion that gave parents information about when their child would be reading like everyone else.

My presentations in conferences primarily focused on the opportunities that were made available by reading by listening and writing by speaking technology. I couldn't speak about the elephant in the room — that dyslexia is a lifelong condition. While this fact was obvious to me, I came to realize that the obstacle to students being successful with reading and writing was a false belief — that students with dyslexia will learn to read like others.

This false belief seemed to be held by everyone involved: teachers, administrators, parents, etc. Once, I recommended audiobooks for a student, and a reading supervisor vehemently opposed my recommendation, because she said this would keep the student from learning how to read. It seemed like heresy to speak out in an environment where the prevailing opinion was that all students can learn how to read by practicing reading during their classroom lessons throughout the day. I continued to advocate for using accommodations and continued working to help those students, parents, and teachers who were referred to me when they realized that they were on the wrong path.

As I spoke to experts about what dyslexia is and what it is not, read the research on dyslexia, and analyzed my own experiences with dyslexia, I came to realize that there are false beliefs dominating decision-making about students with dyslexia. These beliefs result in unrealistic expectations and create a classroom environment that forces students to attempt to do what they can't do, and keeps them from doing what they can do. This false narrative and the classroom environment it creates sends students with dyslexia down the dark path (the same path I had gone down for 18 years), prevents them from

Change this picture starting in the first grade.

Change this picture starting in the first grade. [Read The New Narrative: a new vision of the first grader with dyslexia.](#)

using their talents for reading and writing, and keeps them from learning.

My first new insight was to understand that while there are a number of characteristics of dyslexia, the key characteristics that keep students from success are only two – difficulty sounding out and spelling words.

I learned that reading and writing problems are a secondary consequence of dyslexia. Difficulty sounding out and spelling words are effects of dyslexia. Reading, writing, and learning problems are not. Rather, they are downstream consequences of not fixing the problems with sounding out and spelling words.

Secondly, I came to realize that offering an alternative solution would never work so long as people believe that it wasn't necessary because their children were going to learn to read like everyone else. Even I would prefer that. But was it an option? This led me to look at the research data on the effectiveness of reading instruction for students with dyslexia. I began asking myself questions. Can students with dyslexia learn to read like everyone else? When a student with dyslexia starts a program of reading instruction, what is the outlook for that student's classroom reading fluency in one year, in two years, in five years?

Regarding the first question, I went back to read some articles I had written 20 years ago and found that the first question had been answered back then. I wrote:

"Traditional educational practices used in this country with bright students with dyslexia have devastating effects on their language development, work habits, learning, and literacy. Dyslexia is persistent; it does not go away... Even though many dyslexics learn to read accurately, they continue to read slowly

and not automatically" (Shaywitz 1996). While the literature is clear that persons with dyslexia have a permanent condition, parents and our educational culture, however, ignore this data and follow the belief that given enough remedial training, persons with dyslexia will, someday, have "something click" enabling them to read like their peers. This unrealistic belief leads to unrealistic expectations and school programing that focuses all the students efforts on learning to decode print visually at the expense of developing higher level language, problem solving, and cognitive skills.

If we had a choice, we would have bright students with dyslexia be able to decode words automatically like all good visual readers do. However, we don't have that choice. "Longitudinal studies show that of the children who are diagnosed as reading disabled in third grade, 74% remain disabled in ninth grade (Fletcher, et al., 1994; Shaywitz, Escobar, Shaywitz, Fletcher, & Makuch, 1992; Stanovich, 1986; Stanovich & Siegel, 1994). Bright reading disabled students need to make progress in visual reading and get as good as possible at decoding and "sounding out words". These reading skills will be invaluable in their academic and personal lives, but, at best, reading will be accurate, but slow. They will never get to the level of rapid, automatic decoding and without "...automaticity... reading remains effortful, even for the brightest people with childhood histories of dyslexia."(Shaywitz 1996) These students are, inadvertently, trapped in a world without access to print, sometimes, in the misguided hope that this will force them to become adequate visual readers out of necessity."

The answer to the question came into clear focus when a top researcher on dyslexia, Sally Shaywitz, said, "educators have learned how to help children and young adults to read more accurately... However, no one has figured out how to overcome the lack of fluency. As a consequence, for dyslexic children and adults, instead of its being rapid and automatic, reading remains slow and effortful."

Regarding the second question - when a student with dyslexia starts a program of reading instruction, what is the outlook for that student's classroom reading fluency in one year, in two years, in five years - neither I nor the Tennessee Center for the Study and Treatment of Dyslexia could find studies which provided this data. The only thing I could find to form a reading outlook were those general descriptions of how students with dyslexia read, including this one: "in a dyslexic student, so-called average scores on reading tests cannot measure the extraordinary effort that went into reading each word, to laboriously pronouncing it syllable by syllable, to rereading it over and over again until it began to sound right and make sense" (Overcoming Dyslexia (2020 Edition): Second Edition, p177).

The evidence supporting the idea that it's unrealistic to expect students with dyslexia to become fluent readers is

Slow labored reading is a bigger barrier to learning to write than poor spelling is. [Watch the YouTube video showing dictation with typing echo in action.](#)

Reading by Listening & Writing by Speaking. [Watch this YouTube video showing texting with reading by listening and writing by speaking.](#)

overwhelming. But that's the path most students with dyslexia are taking.

THE HALF TRUTH AND THE FALSE NARRATIVE

Students with dyslexia end up on the wrong path. When parents are told their child will “learn to read,” they hear “will learn to read like everyone else.” Now, the research shows us that students with dyslexia can learn to sound out words, but cannot learn to do it automatically. So, now we know that “reading remains effortful for the brightest people with childhood histories of dyslexia” (Shaywitz). Yet, we’re still operating under the false narrative. With all the convincing research data, how do people come to believe something that is not true? It starts with a half truth that leaves important questions unanswered.

Here’s how it works. When a student is diagnosed with dyslexia, the reading specialist tells the parents that there are great reading programs that will help their child. Then they tell them that their child will learn to read. The parent assumes that that means that their child will learn to read like everyone else. The devil is in the details. There are two parts to sounding out words, accuracy or being able to pronounce the words correctly and fluency or the ability to pronounce the words rapidly and automatically. But, when the specialists only says “can learn to read,” they mean reading accuracy, ability to sound out words. That’s the half truth. When parents are not told directly that students with dyslexia do not learn to read fluently they are left to fill in the blanks about fluency to get a complete picture. So, the half truth becomes the false narrative: a false belief that students will be taught to read like everyone else.

The other important omission is information about how this child will be functioning in the classroom in the future. We have data that indicates that their problems with reading will persist,

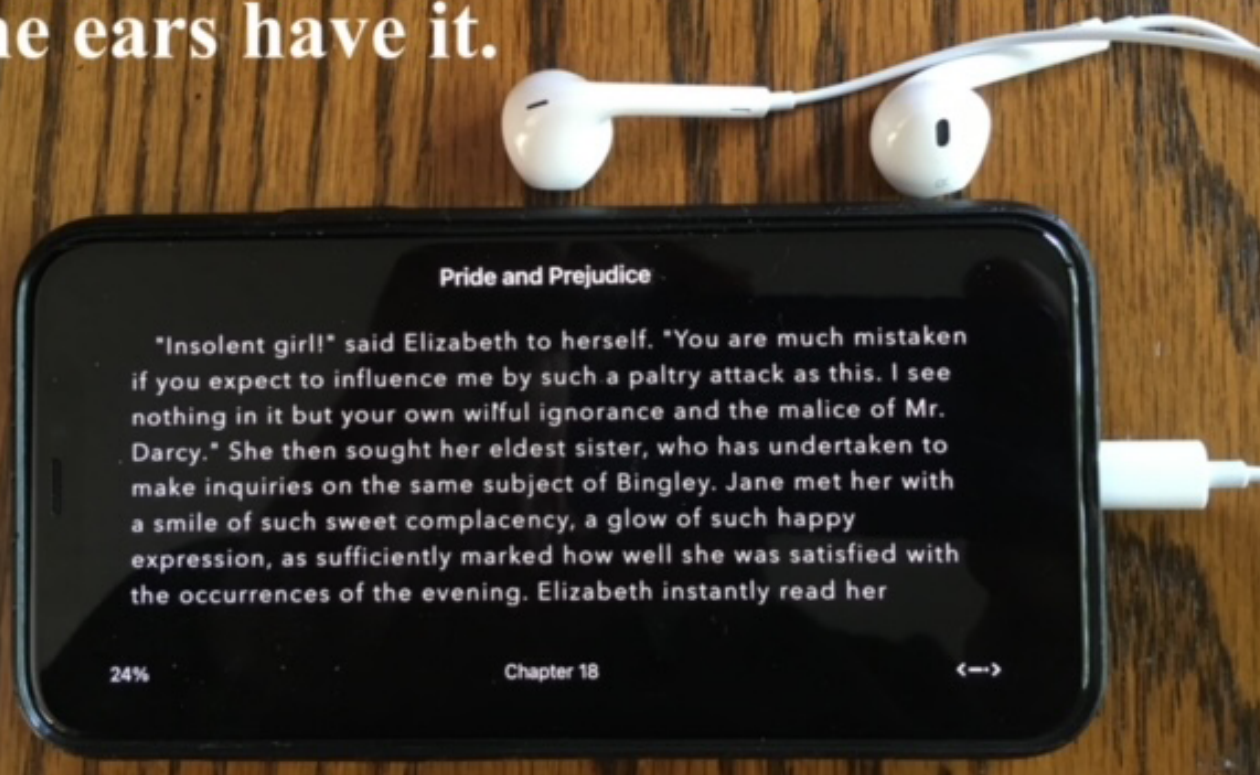

that they will not be able to read like everyone else, and they will miss out on important learning opportunities because they will be spending unnecessary time sounding out and spelling words instead of paying attention to the class lessons. But without sharing this information and having a frank discussion, at the outset, parents are unaware of how their child will be functioning in future classrooms. When there is no alternative presented, parents feel they have no choice but to go along with the plan and hope for the best. There’s optimism and hope in the first few months and years as they start a journey down that dark path.

THE TRUE NATURE OF DYSLEXIA

To help me understand how we’re going down the wrong path I have been guided by the words of Sally Shaywitz, who said that “the greatest stumbling block preventing a dyslexic child from realizing her potential is widespread ignorance about the true nature of dyslexia” (Shaywitz, *Overcoming Dyslexia*, p 86).

This prompted me to study my own dyslexia, how my dyslexia makes me different from others, and how understanding the true nature of dyslexia can help us do a better job for students with dyslexia (for more information, go to <http://dyslexiatech.com/mike-s-blog>). Focusing on the true nature of dyslexia helped me understand that the print world is designed for the majority of people who can easily sound out and spell words. What we need to do is adjust that world so students with dyslexia can fit in. It became clear to me that classroom environments are changeable, the neurological design of our students with dyslexia is not. The change must come from our classroom environment.

When eyes are “deaf”
and ears are not,
the ears have it.

When eyes are “deaf” and ears are not, the ears have it. [Read more about living with dyslexia when the print words don’t talk and the spoken words do.](#)

LIVING WITH DYSLEXIA IN TODAY’S CHANGING WORLD

The problems of slow and labored reading and spelling are solvable. Classrooms designed to include reading by listening and writing by speaking can solve those two problems and eliminate the downstream problems that caused so much pain and loss.

GOALS FOR CLASSROOM SUCCESS

Is it possible that someday we will have a world where one could use their language for communicating, writing, and working without producing print? Perhaps. But for now, we must adapt today’s environments to include the way students with dyslexia learn in the classroom, and that means that they need to quickly and effortlessly read and write print. Reading by listening and writing by speaking lets that happen for students with dyslexia, but it will only happen if we set goals for students to complete reading and writing activities in the same length

of time as their peers and stay caught up minute by minute in the classroom. Every Individual Education Plan (IEP) asks the question, “Has assistive technology been considered?” Instead, how would it be if every IEP and 504 plan* for a student with dyslexia, had a question, that said, have you considered the following goal: Given reading by listening and writing by speaking technologies, training, and support, “this student” will complete reading and writing activities in the same length of time as their peers and stay caught up, minute by minute in the classroom?

* Section 504 of the U.S. Rehabilitation Act of 1973

FLIP A SWITCH ON DIFFERENT

Students don’t want to appear to be different. By second or third grade, their identity and how they see themselves can be formed based on what they can’t do. So, let’s flip a switch on different. The solution is that we start early, focus on classroom learning, and get them hooked on success in the classroom using new tools in the first grade. If they’re learning all the same skills as their classmates and making good grades, it

Freeing students with dyslexia by unleashing their innate talent for reading

Freeing your students with dyslexia by unleashing their innate talent for reading. [Read about how a person with third-grade visual reading skills can read and write voraciously.](#)

won't matter much that they are poor visual readers and poor spellers, e.g., if they were getting A's in social studies, and science, if they were the smartest kid in the room and showing it with written work, their poor visual reading and poor spelling would become insignificant. We would not have to tell them that they're smart. They would know it. Their different way of reading, would rank down there with eye-color, and whether or not they wear glasses.

THE TECHNOLOGIES WE HAVE TODAY

The current reading by listening and writing by speaking technology gives students with dyslexia full access to print during class lessons, and since most of the technology is on their phone and tablet, their access to print for reading and writing is with them 24/7. A full list of my favorite reading by listening and writing by speaking tools can be found [here](http://dyslexiatech.com/gadgets/tool-kit) (<http://dyslexiatech.com/gadgets/tool-kit>).

Here are a few stories that illustrate how far we've come and how any print can be read by listening, in or out of the classroom.

— At the end of a Zoom meeting where someone had read a quote that I liked from a book, *Big Magic*, by Elizabeth Gilbert, before getting out of my chair, I went to [BookShare.org](#) on my phone, downloaded the book to [Voice Dream Reader](#), did a quick search of the book and found the quote in mere minutes. This is like a superpower that students could be using from their desks.

Dyslexia & Extra Time

There's no such thing as extra time ... only best use of time.

Dyslexia & Extra Time, There's no such thing as extra time... only best use of time. [Read about dyslexia and extra time.](#)

— Reading on the fly had always been an obstacle - consent forms at the doctor's office, placards and articles beside photographs in a museum, instructions on a medicine, bottle, etc. But now, if we can see print, we can point our phone at that print and hear it read aloud. For example, I recently visited the LBJ Museum in Austin, Texas, and read articles and placard's under photographs. In the past, all this print material was not accessible unless in an audiobook, on a webpage, etc., but now, when I'm perusing through the LBJ library, I have two or three tools on my phone, which will voice any text that I can see. I settle on using [SeeingAI](#), point my phone at an old news article, held it to my ear like I'm talking with a friend, and hear the article read from start to finish. I go from one photograph description to another, sometimes going back and reading a second time. It's unobtrusive, it's fast, it's flexible, it's free, it's astonishing! This is just one of the tools students can use in the classroom.

— Writing has changed for me because of "[dictation with typing echo](#)," a feature, free on my Mac. I'm using it right now. With the screen reader, [VoiceOver](#), running at the same time, I dictate a sentence, see my sentence typed, and immediately hear my sentence read back to me. I hit an up arrow and quickly hear my previous sentence read back to me, or go up and read an entire passage from the beginning, or read worded a time. This lets me and students do proofreading, editing, and good composition like our non-dyslexic peers do, quickly and effortlessly.

THE WAVE

12 years ago, the technology was not where it is today. We didn't have voice recognition for writing by speaking. However, now we are in the first wave of a revolution in how students sound out and spell words. Eventually, the reading by listening

and writing by speaking option will become ubiquitous. Today, we have all done writing by speaking when we pop out our phones and dictate a text message instead of typing it. We've done reading by listening when we read an audible book instead of reading the print book, or listen to an email instead of reading it visually. Yet students in the classroom are struggling to keep their heads above water sounding out and spelling words instead of using this technology. Must we wait for the wave to sweep past us before we recognize that our students with dyslexia could be on top of that wave instead of under it? Using this technology shouldn't be viewed as a good idea it should be viewed as imperative.

WHERE WE GO FROM HERE

We can't save our students from dyslexia, but we can save them from letting it limit who they are and who they can become. We can do this by telling them the truth, showing them what dyslexia is and what dyslexia is not, and showing them how it primarily only affects two of their abilities: pronouncing words and spelling words. Like glasses fix the reading and writing problems for students with farsightedness, when those two effects of dyslexia are immediately accommodated for by using reading by listening and writing by speaking, our students with dyslexia will not experience the typical secondary consequences of dyslexia: writing problems, reading problems, lost learning opportunities, and squandered potential. They will not need extra time because they will complete reading and writing activities in the same length of time as their peers and stay caught up minute by minute with class lessons. They will develop their inherent talents for reading and writing along with their classmates and have the life-changing opportunity to achieve academic excellence. ■

Closing The CONFERENCE

OCT. 11-13 MINNAPOLIS
Pre Conference Workshops

41ST ANNUAL CONFERENCE OCTOBER 11-13, 2023

Pre Conference Workshops: Tuesday, October 10, 2023
HILTON MINNEAPOLIS HOTEL

See why Closing The Gap has earned a reputation for exceptional learning and plan now to join us for Closing The Gap 2023!

The Closing The Gap Conference is an annual assistive technology conference that presents an opportunity to deepen your assistive technology (AT) knowledge and strengthen your implementation strategies. The conference week is designed to dig deeper into critical areas that have the power, when implemented strategically, to transform your classroom, your school, your district, your practice. When you start thinking differently about how to reach ALL students, how to infuse technology into learning, how to leverage AT strategies in all areas – then we begin to transform these areas and ultimately increase achievement and independence.

The Gap ²⁰₂₃ CONFERENCE

MINNEAPOLIS, MN

Workshops: Oct. 10

PRE CONFERENCE WORKSHOPS TUESDAY, OCTOBER 10, 2023

IN-DEPTH LEARNING Pre conference workshops focus on assistive technology implementation and best practices. Each workshop is conducted by a nationally recognized leader in the field, providing in-depth professional skills necessary to successfully implement assistive technology in the lives of persons with disabilities. Workshops range from introductory to advanced and cover many different topics.

Workshops will be announced the first week of April.

3-DAY CONFERENCE WEDNESDAY, THURSDAY AND FRIDAY OCTOBER 11-13, 2023

COME, NETWORK, LEARN – Discover rich resources and tools that support students in accessing instruction and enhance learning opportunities.

Attend sessions filled with practical and applicable strategies and best practices. Visit the exhibitors, meet with representatives, learn first-hand about the latest technologies making a difference today.

Presentations will be announced June 30.

Interested in presenting? The Call for Proposals deadline is May 1. Learn more.

z^{zz}Pods **zPods**
Dream • Play • Sleep

and the Search the Ideal Environment for Children With Sensory Processing Disorder

Summary:

Sensory processing disorders affect a disproportionate number of special needs children, both during the day and night, particularly in the autism community. Co-founded by the father of an autistic son with severe sensory challenges, zPods® is a startup on a mission to provide these children with a safe space where they can get better sleep to maximize their daytime behavior and happiness. The lessons that zPods® is learning have technological application in the broader community.

BECOMING AWARE OF MY SON'S WORLD

During the early years of our marriage, my wife Christina and I had the good fortune to live in Germany. We moved there just six weeks after Christina gave birth to our oldest son Joseph. Both the birth and the willingness to pick up and go to a foreign country with so little recovery time and virtually no knowledge of the German language were acts of self-sacrifice

and heroism on the part of my spouse, as far as I'm concerned. My poor baby was not even capable of holding his head up for the passport photo, and you can see my fingers supporting his chin so that we could get a shot that would satisfy U.S. regulations pertaining to identification.

In that formative stage of Joseph's life, he gave us small clues that he was different from other boys his age. He stared at the

GEORGE BAILEY is the "President Sleep Talker" of zPods®, a Saint Louis startup and recipient of an Arch Grants award that is developing sensory-friendly beds for high-energy children, including those with autism. He also sits on the board of directors for Autism Speaks St. Louis and the On The Spectrum Foundation and is engaged in his community and church. A former award-winning university instructor, George obtained his JD from Washington University in St. Louis School of Law and his MA in TESOL (Teaching English to Speakers of Other Languages) and BA in Chinese from Brigham Young University. He is fluent in Mandarin Chinese, German, and Danish. George and his wife have five children, three of which are blessed with autism.

Joseph Bailey Passport

lights. He resisted human touch. Rather than roll toy cars along the ground, he held them in front of him, mesmerized by the spinning of their wheels. He never slept very well at night, preferring to bounce around his room. His sensitivity to his surroundings became most evident to me when a German chorus concluded a festive Christmas number and the audience thundered its approval with loud applause. Joseph clapped along with our German friends, but tears ran down his screaming, tortured face.

Christina and I came to be certain that Joseph was autistic, but as long as we were living in Germany, we had no way of getting a decisive diagnosis or meaningful early intervention. At that time, the youngest we could expect to get a diagnosis was age 11. We managed to obtain some services for our growing boy to help him with his sensory processing challenges, but we knew that if we wanted to meet his needs more effectively, we would have to move back to the United States, which we did after three years of time living in Germany.

Since moving back, we've obtained a diagnosis and received assistance from many outstanding professionals who have helped our son better process the world around him. He continues to present higher levels of sensitivity to his surroundings

Joseph Bailey

than his peers, but we are proud of the progress he has made in engaging settings that might otherwise be challenging for him.

SENSORY PROCESSING DISORDER (SPD)

According to the [Child Mind Institute](#), "Sensory Processing Disorder is a set of behaviors related to trouble processing information from the senses, like sight and sound. SPD is not recognized as an official diagnosis by psychiatrists." It may not be something that your child's psychiatrist will diagnose, but it's sure real to your child. And the likelihood that your child has SPD increases if he or she has another disability.

Let's take autistic children, up to 90% of whom also have an SPD. The presence of SPD in autism is so strong that many of the people I talk with believe that SPD is isolated to the autism community. But SPD affects up to 40% of children Attention-Deficit Hyperactive Disorder, 49% of children with Down Syndrome, 53% of children with Disruptive Mood Dysregulation Disorder, and a sizeable percentage of children with Post-Traumatic Stress Disorder, Fetal Alcohol Spectrum Disorder, Schizophrenia, Obsessive Compulsive Disorder, and any number of other disorders.

Lest we stop there, according to [JAMA Pediatrics](#), "One in 6 children have sensory processing difficulties." In other words, it's pretty important that we do what we can to better understand SPD and then find ways to create a more accommodating environment for our loved ones who experience the world around us differently.

WHY SPD MATTERS AT DAYTIME

Having an SPD can be very challenging for children during the day. As the [Child Mind Institute](#) puts it, "Kids with sensory processing issues behave in ways that look confusing. They might react strongly to loud noises or bright lights, or complain that their clothes are uncomfortable. They may be clumsy or have trouble with fine motor skills like fastening buttons. Some kids show extreme behaviors like screaming when their face gets wet, or melting down at an unexpected change."

But just because a child with an SPD may experience some of these challenges doesn't mean that he or she doesn't want to enjoy life's many adventures the same as any other child. These kids love to go to sports matches, museums, restaurants, or just on errands with mom or dad. Each of these venues presents at least a small obstacle for kids with SPDs because their ambiance is tailored to the average population with its average sensitivity to their surroundings.

Fortunately, there's a growing awareness that these children can flourish in a more sensory-friendly environment. For example, [KultureCity](#) has been leading the charge for "sensory accessibility and acceptance for those with invisible disabilities." Go to a zoo or aquarium or baseball game with

Christopher, one of the first children to enjoy a Generation 2 zPods® bed, sits peacefully at the edge of his bed. Christopher’s mother used to have to wait outside the bedroom at night in case her son eloped, but now she has a hard time getting him out of the bed.

your sensory-challenged child, and there’s a strong chance that someone there will hand you a “sensory bag” with headphones, marble fidgets, noodle fidgets, tangle fidgets, and an official KultureCity VIP ID card. This kind of treatment may very well be for your child the same as someone offering you personally a full-body massage to get you nice and relaxed so you can enjoy a movie at the theater.

Certainly, there’s more for us to understand about creating a more welcome space for all our loved ones who don’t take to the whole touch, taste, smell, hear, and see thing the way the rest of us do. But the growing awareness of SPD and the increasing options for accommodating it are encouraging.

WHY SPD MATTERS AT NIGHTTIME

If ever there’s a setting in which you’d like not to feel like you’re constantly having an out-of-body experience, it’s in the room where you sleep in at night. However, SPD doesn’t nec-

essarily let up just because your child and you are exhausted, which is why sleep issues are quite common among SPD-affected populations.

There’s a lot of good advice out there for helping your child sleep better. Make sure that you and your child have a consistent bedtime routine with bedtime itself being the same every night. Turn off all screens in the leadup to bedtime. Keep your child’s room clean and distraction-free (or have him or her do it—good luck!). See that the room is dark at night (though a nightlight may be essential for certain children). Maintain the right temperature (different from child to child but critical) in your child’s room. Eliminate noise to the extent possible, including using noise-canceling headphones if your child will permit it. Make space between dinner and bedtime so that the body has time to digest food properly. (Incidentally, the name of the sense that detects digestion, hunger, and other inner-body sensations is called “interoception”—an oft-neglected

sibling, alongside proprioception and vestibular, to the world's five favorite senses.)

As good as all that advice may be, the past few years have taught me that there's a dimension to accommodating a child's SPD that has been almost entirely missing in the discussion. And my team and I are working diligently to make that dimension a greater topic of discussion.

DISCOVERING THE SOOTHING IMPACT OF ENCLOSURE

My business partner Gary Kellmann was helping a friend of his develop a Star Wars-themed living space in Orlando when his friend told him that he needed beds that looked like they would make sense on the Millennium Falcon. Gary, an expert in supply chain and logistics who had recently stayed in a capsule bed in China, knew exactly what to do and shipped his friend several of the coolest enclosed sleep spaces he could find. Gary

took the leftovers of that shipment container and assembled them in a "showroom" in our Saint Louis workspace and then invited friends to check these pods out and pitch ideas on how these beds should be used, which marked the beginning of our company, zPods®.

One idea that was consistently but not too frequently mentioned was using the beds to provide safe spaces for autistic children. Each time the idea was voiced, I brushed it aside saying I wasn't even sure how a spaceship bed would help. As the father of an autistic child with sensory challenges, I had already been approached about buying too many products and services to count that all claimed to be exactly what my boy needed. However, the idea kept coming back, and three experiences turned me around entirely.

First, having watched the movie Temple Grandin a few years before, I couldn't shake the imagery of Claire Daines, playing

Ethan, son of zPods® co-founder Gary Kellmann, used to co-sleep with his parents for fear of being alone in his bedroom but now falls asleep with ease in a space in which he feels safe.

Natalie used to feel insecure in her bed, opting to sleep in her narrow closet an average of four hours a night. For the past three years, Natalie has been sleeping roughly ten hours a night since finding security in her zPods® bed.

Temple, in a self-constructed “squeeze machine” that gave her comforting hugs on her own terms. When people destroyed the machine a short time after its introduction in the film, the actress’ painful screams conveyed the degree to which she cherished an enclosed feeling of security.

Second, it only made sense to me that I should at least invite my son over to the showroom to check out the beds to see how he would respond to them. I didn’t prepare Joseph in any manner, not even telling him what he would be seeing at my workplace. The minute he set eyes on the capsule bed with its inviting lights and control panel, he jumped in and closed the sliding door behind him. I waited outside the bed for a few minutes and heard nothing—strange for a boy who is constantly on the move and who expresses his excitement by waving long implements up in the air in his periphery while reciting any number of Marvel or Disney stories word for word. When I finally opened the door, there was Joseph on his back with hands cushioning his head, smiling, and more relaxed than I had ever seen him in the first nearly 12 years of his life.

What really sealed the deal of my commitment to the idea of using enclosure as a kind of therapeutic was finding the right case study a few months later. We put one of the units on public display for the first time at an indoor and outdoor solutions conference near our office. A young mother approached one of my colleagues and told him, “I need that bed.” Her autistic 13-year-old daughter Natalie had spent the past eight years sleeping in a narrow closet strewn with Christmas lights, despite having a comfy queen-sized bed in a fairly spacious bedroom. On average, Natalie was sleeping only four hours a night. Whenever she needed comfort—which she did frequently—Natalie insisted her mother snuggle with her in these tight confines. The closet was muggy, and the floor was hard. All this culminated in eleven days straight at the hospital being treated for severe sleep deprivation.

I hesitated to advance the idea with this mother. I didn’t want to prey on her pain and anxiety of her daughter’s situation, but she was determined. I was adamant that we not make any medical claims to her or anyone. We helped her secure the funding to purchase the bed and then assembled it in her daughter’s bedroom. Privately, my colleagues and I crossed our fingers and speculated hopefully that maybe this girl could sleep six hours a night instead of four. Mother and daughter cuddled up in a much wider space for the first night of sleep, and Natalie was out within minutes. She slept roughly 10 hours that first night and has maintained an average of 10 hours of sleep a night for over the past three years. Moreover, due to increased sleep, she has seen improvement in school and overall quality of life.

When I heard the first report, I wasn’t a little surprised; I was thunderstruck. I never could have imagined that enclosure would have such a big impact on this girl. Since that time, the team at zPods® has had the pleasure of working with well over 100 families, including my son Joseph, and is growing fast. I’ve insisted that we continue to be careful about whether or not the beds are a good fit for any family. We are explicit in our conversation with parents that every child is different. None of this conservative salesmanship prevents us from making at least one consistent claim: our beds are awesome!

zPods® improved on the first generation of its beds, which were originally made in China, by designing a Made in USA pod that can be much more easily assembled and even be stacked to form a space age-looking bunkbed.

zPods Is Creating The Coolest Bed For Restless Children And Exhausted Parents!
YouTube Video -<https://www.youtube.com/watch?v=YWTP6sjGRQs>

STUDIES ON THE HORIZON

Just because we have kept ourselves from making medical claims does not mean that we're not determined to explore the question of enclosure as a therapeutic on a scientific level. I've always wanted to see if we could break down the idea to something we can measure and repeat against a given user profile. To that effect, we've already started gathering data by surveying parents from our first wave of sales and received help from a local university in interpreting that data.

In our first sample, 13 parents of children with a diagnosis of ASD used zPods® beds for their child's sleep for at least an average of 57 weeks and filled out a questionnaire regarding the ease of use and impact on sleep. One-hundred percent of respondents indicated that their zPod was "mostly" or "very" (~85%) easy to use. Eleven out of 13 participants reported that they were "mostly" or "very" satisfied with the use of the bed. All parents indicated that their children had multiple issues with sleep including difficulty initiating sleep (n=9), difficulty maintaining sleep (n=12), waking up earlier than desired (n=11),

waking up more than 3 times a night (n=7), nonrestorative sleep or poor sleep quality (n=8), sleep difficulties occurring more than 3 times per week (n=8) and lasting over 3 months (n=11). Parents also indicated the children displayed mood irritability (n=9) and reduced energy, motivation, and initiative (n=7). With use of the zPods® bed, 12 out of 13 parents indicated that their child's sleep was improved (slightly: n=2, significant improvement: n=10) and increases in sleep duration ranged from about 2 hours to 8 hours (post-treatment mean change in sleep duration = 4.1 hours ± 2.5 hours; post-treatment mean total sleep duration = 8.1 hours ± 1.7 hours). Additionally, 12 parents reported having at least one sleep related problem prior to their child's use of their zPod, of which 11 reported improvements in their sleep following their child's use of the zPod.

The conclusion of our survey was that preliminary results indicate that zPods® may have the potential to improve sleep in children with ASD and, therefore, warrant further examination through pilot clinical trials. We're still very careful not to over-

promise and fully recognize that a survey like this is self-selecting and biased. But it sets the stage for clinical trials, which we hope will happen very soon as we raise the funding to be able to do so.

HOW SENSORY PROCESSING DISORDERS WILL DEFINE THE FUTURE

Based on the feedback from parents we've worked with, we've made changes to the second generation of our zPods® sleeping capsules. For example, many of the parts of the original bed broke easily during shipment, so we designed far more durable parts. The first bed took hours of difficult assembly time, so we made the bed easy to build, requiring only 20 to 30 minutes. Accessing the first bed to clean it and make the bed was very difficult because of how the front panel was designed. We simplified the design and created doors that could be easily removed for full access to the inside as needed. The new bed has speakers, and soon we'll be able to control the bed environment from outside of it using a smart device app.

Enclosure is an exciting aspect to focus on when developing the ideal sleep environment because within each enclosure we can add other features that affect the temperature, sound, lighting, and even smell of one's sleep space. In the years to come, we'll be adding sensors to our beds to detect sleep performance and then using those sensors to affect the environment in a manner that enhances that performance. The big dream is that your bed will one day be able to respond to you as an individual, simulating your personal ideal with precision, even while you sleep so that you don't need to think about it. Given all that is happening in artificial intelligence, we're convinced that now is the time to start this project.

One of the powerful lessons I've been learning while working on zPods® is that any time you seek to empower a minority community that is often excluded from the mainstream, you end up finding solutions that have implications for a much broader audience than the one you set out to serve initially. In our mission to build the ideal sleep environment for people with SPDs who vary in their needs and preferences, we've had to be flexible, adaptive, and creative. We figure now that if we can help all these picky sleepers to get the best shuteye ever, we'll certainly be able to help those of us whose sleep environment needs are more basic.

We're still some distance off from realizing these dreams, but I'm excited about what we've accomplished so far. I'm excited whenever I see my son chilling in his bed and listening to his favorite tunes. And I'm grateful that he's sleeping better at night so that my wife and I can sleep a little better, too. ■

UPCOMING LIVE WEBINARS

PROFFESIONAL DEVELOPMENT

What Does the Research Say About the Use of Virtual Reality (VR) by Students With Disabilities?

By Dave Edyburn

Thursday February 9, 2023

3:30 pm – 4:30 pm (Central Standard Time)

Interest in Augmented Reality (AR), Virtual Reality (VR) and Extended Reality (XR) has been increasing as a result of many new technical developments in the marketplace. However, what does the research tell us about the use of AR/VR/XR by students with disabilities?

The purpose of this webinar is to provide an accessible introduction to the research concerning AR/VR/XR and students with disabilities. It is expected that participants will be able to use the information for their own professional development and advocacy for the adoption of emerging technologies, as appropriate, for the students they work with. Emphasis will be placed on the practical application of research evidence (rather than the statistical analysis and interpretation).

Predictable Chart Writing, Canva & More...SoR, CLfA and Agency

Thursday, February 23, 2023

4:30 pm – 6:00 pm (Central Standard Time)

The complex task of writing for our students with significant disabilities and complex communication needs can be daunting. Too often, our

students with CNN do not have the opportunities to write, much less have opportunities to be active participants in modeling writing activities. Erickson, Koppenhaver, & Cunningham, 2017.

In this session, vocabulary and schema-building activities continue to play a part while we explore practical strategies to actively engage our learners with complex communication needs in written expression activities.

During this session, we will learn about the developmental writing stages and how our students with CCN can be engaged throughout those stages. Students will become the center of their writing by removing the background in video clips and pictures. We will also explore how to encourage spelling and typing along with a balanced approach to using an AAC users' icons to support their writing. The following tools and strategies will be highlighted; The Expanding Expression Tool, Descriptive Teaching Techniques, Canva, Alternative Pencil, Readtopia, Reading Avenue: Boardmaker (however, any Literacy curriculum can be used), and Youtube.

Ready, Set, Grow Preschool AAC

By Mary Katherine Dally

Thursday, March 16, 2023

3:30 pm – 5:00 pm (Central Daylight Time)

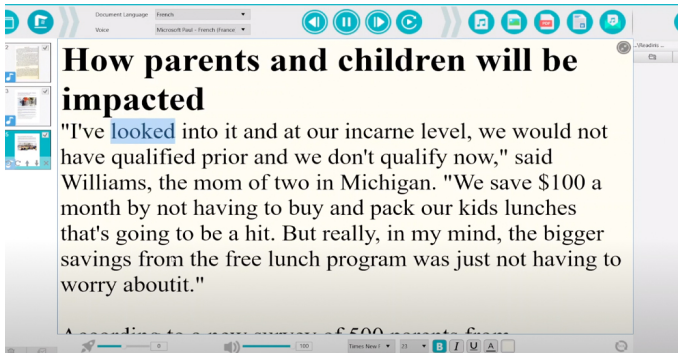

Preschool is one of the first school experiences for some of our young Augmentative and Alternative Communication (AAC) learners. Knowing how to best support and serve our early learners with complex communication needs can be an overwhelming task in the classroom – especially when starting from scratch! Whether you are new to AAC, the preschool population or are seeking novel, innovative ideas, this course will cover all of the above. Create a plan to begin AAC implementation in the classroom using a child-led approach. We will review basic myths and research for early AAC learners, discuss language approaches, assessment and goal writing ideas and vocabulary systems to increase your AAC knowledge.

This webinar will allow you to brainstorm and experience innovative, original ways to implement AAC throughout the preschool day utilizing natural, autonomous communication- even during fire drills! The best part? Free resources and materials will be provided to share with your team and implement with students tomorrow!

IRIScan Desk 6 Pro Dyslexic – A Unique and Precious Tool for People with Dyslexia

People with dyslexia face several challenges, from their school days, in society, and at work. This condition affects one's ability to read, talk, spell and remember phrases. These problems can also affect their self-esteem and confidence. For 35 years, IRIS has been an industry leader in developing innovative technologies to empower people and organizations. We are happy to announce our new software, Readiris Dyslexic, which makes life easier for children and adults with dyslexia..

Described and Captioned Media Program

About the Described and Captioned Media Program

The DCMP provides services designed to support and improve the academic achievement of students with disabilities. We partner with top educational and television content creators and distributors to make media accessible and available to these students.

Thousands of accessible educational videos

Families and educators who have at least one student with a disability can access thousands of educational videos with high-quality audio description and captions, and many with American Sign Language, including videos for educators and interpreters in training.

explorē 8 – Handheld video magnifier.

A portable digital magnifier with touch screen to see the bigger picture

The explorē 8 is the first 8-inch touchscreen digital handheld magnifier available for desktop or distance viewing. Magnifying up to 30X with stunning image quality, you can enjoy all the benefits of a large screen in a very compact package.

Lightweight and powerful, the explorē 8 is ideal for active people looking for a large screen and optimal portability to maintain their lifestyle. This magnifier features two 21-megapixel cameras: one for document reading at 15 cm (or less), and a second to see clearly at distances for things like street and store signs. You can also save your favorite images and view them on a large TV screen.

Ability Drive™ – Drive your wheelchair with your eyes.

Ability Drive™ is a control interface that enables you to drive and adjust seating on a powered wheelchair with your eyes. Using virtual buttons and eye gaze technology, people who are not able to use a joystick can regain movement independence. eye gaze technology, people who are not able to use a joystick can regain movement independence.

The Ability Drive™ app runs on an approved eye gaze device. The app senses your gaze on virtual buttons which sends directional movement commands to the Ability Drive™ hardware interface. These buttons are overlaid on the forward camera view. Looking at the stop button, looking away from the computer, or closing your eyes stops wheelchair movement. Here is a link to the currently approved eye gaze devices..

HID Joystick by mo-Vis

Enables people with very limited muscular force and/or movements to operate devices such as computers, smart-phones and game controllers.

The HID Joystick is a low force joystick for electric wheel-chairs, which can be connected via USB to another device.

This way, you can work in mouse, joystick or keyboard mode on your PC (Windows/OSX), Android device, iOS device, XBOX or XAC.

- Low force joystick: available in Micro (8.5 gr of force) and Multi (50 gr of force) version
- Enables people with (very) limited muscular force and/or movements to operate devices such as computers and game controllers
- Can be operated by hand, fingers, chin...
- Is recommended for people with tetraplegia, (neuro) muscular diseases and other advanced diseases such as amyotrophic lateral sclerosis (ALS) or multiple sclerosis (MS)

Origin Instruments – Sip and Puff Switch Solutions, Single and Multi-User Offerings

A gentle sip or puff on a tube may be easier and more suitable for some than a more traditional adaptive switch. Like a traditional switch, our sip puff switches can be used to access all manner of switch activated devices – speech generating devices, computers, tablets, mobile phones, environmental control systems, and other devices designed for switch scanning.

If you can use a drinking straw you can use their Sip/Puff Switch.

There are several things to consider for a sip and puff switch solution. First is the user interface. They provide two standard options for positioning the mouthpiece, a headset and a flexible shaft with universal clamp. However, you may wish to attach the mouth tube to some other apparatus already positioned next to the user. In that case they have extra tubing available for a custom interface. Their multi-user headset features a disposable mouthpiece and filter assembly that is easily replaced. This sanitary solution is perfect for evaluation centers and situations where multiple people will be using the same Sip/Puff Switch. Their flexible shaft interface also features twist-on and disposable, filtered mouthpieces.

12 volt NI-MH High Capacity Battery and Charger

Adaptive Switch Laboratories, Inc.

Price: \$295.00

Device: switch interface

Disability: physical

The ASL 515 is a 12 volt power source with charger that is used with 12 volt DC sensors without a power wheelchair. This high capacity battery will last up to two days before charging.

12/24 Volt AC Power Source Wall Plug

Adaptive Switch Laboratories, Inc.

Price: \$60.00

Device: switch interface

Disability: physical

The ASL 505 is for accessories or 12 or 24 volt sensors to plug into the wall for use with computers and ACC devices.

2 ECU Interface Cable with 2 Mono Plugs

Adaptive Switch Laboratories, Inc.

Price: \$180.00-\$210.00

Device: environmental control

Disability: physical

ASL 802-2, 802-3 and 802-4 converts directional commands from the ECU port into separate mono plugs. It has two, three, or four output jacks from the left and right signal on the driver control that can be used for tilt, recline, computer/communication access or any device that requires a mono.

2-Switch

Compusult Limited

Price: \$129.00-\$159.00

Device: keyboard emulator, mouse emulator, switch interface

Disability: cognitive, learning, physical

The 2-Switch is a USB-based device that can be preprogrammed with two keyboard inputs, two mouse actions or one keyboard input and one mouse action. The 2-Switch DIP is a user-configurable version of this product.

4 Choice Sequential Scanner for the Visually Impaired

Enabling Devices

Price: \$429.95

Device: dedicated communicator, speech output

Disability: cognitive, physical, speech

Our communicator provides illumination of your icons. It is also extremely flexible, four scan modes, choice of the number of fields to use and two mounting systems.

4-Level Communication Builder

Enabling Devices

Price: \$357.95

Device: dedicated communicator, speech output

Disability: cognitive, physical, speech

Communication Builder now with four levels. Comes with four easy to change frames (one, two, four, eight and 16 window options). Retains all your recordings on all four levels when switching between frames. Total record time is 300 seconds.

Bluetooth Small Switch

RJ Cooper and Associates

Price: \$99-\$99

Device: switch, switch interface

Disability: physical

A 3" round, green, Bluetooth switch for iPad, Android, Mac, or Windows. Capable of controlling switch-friendly apps, Switch Control compatible apps, the Music app, Camera, and other standard apps.

Bluetooth Super-Switch

RJ Cooper and Associates

Price: \$184-\$184

Device: switch, switch interface

Disability: physical

Large (5"), round switch with built-in interface. Works with all switch-friendly apps, and Switch Control compatible ones. Also compatible with Android.

Bluetooth Tiny switch

RJ Cooper and Associates

Price: \$49-\$49

Device: keyboard emulator, mouse emulator, switch

Disability: physical

A small, 1" round Bluetooth button that can "send" a variety of keystrokes, clicks, or A/V events to a Bluetooth host (i.e. iPad, iPhone, Android tablet, Chromebook, PC, Mac). It works with switch-friendly apps as well as iOS's Switch Control and Android's Switch Accessibility. It comes with a hand strap that holds it securely in a person's fist/hand as well as our super-Velcro for placement on a flat surface (vertical or horizontal).

Braille Label Maker Kit

Westminster Technologies

Price: \$775-\$895

Device: braille output

Disability: vision

The Braille Label Maker is portable and easy to use anywhere. It comes with both a built-in Braille keyboard and a QWERTY keyboard. This enables a non-Braillist to create Braille labels too. The powered embossing makes for high quality Braille labels that are easy to read. An automatic cutter provides effortlessly clean label cuts without the need for scissors. This kit includes: Braille Label Maker, Power Adapter, 10 Rolls of DYMO Embossing tape.

Braille Sense Polaris

HIMS inc.

Price: \$5795

Device: braille input, braille output, printer, speech output

Disability: hearing, speech, vision

The BrailleSense 6 offers the most power and performance in a braille notetaker. With 32 braille cells, a Perkins keyboard, Android 10 OS, and the most current and powerful computing hardware, the all-new

BrailleSense 6 competes with mainstream technology while providing the accessibility and productivity that HIMS braille devices are known for.

BrailleCoach - Braille Teaching Device

Westminster Technologies

Price: \$1425-\$1425

Device: speech output

Disability: vision

The BrailleCoach is a unique way to learn Braille - enabling the student to work independently between lessons. The device has three modes of Braille learning. Mode 1 is letters and dots, mode 2 is letters only and mode 3 is letters and words. Additional blank and pre-programmed sounds tags are available to extend learning. The BrailleCoach comes with 26 Braille alphabet tags, a set of programming tags and a carrying bag.

BrailleSense 6 mini

HIMS inc.

Price: \$4595

Device: braille input, braille output, printer, speech output

Disability: vision

The BrailleSense 6 mini has all the power at a fraction of the size. Running Android 10, the 6 mini has the most advanced operating system of any notetaker. Weighing in at less than one pound, and slimmer in size than any other mini notetaker, the 6 mini is perfect on the go or at home. Make the BrailleSense 6 mini yours today.

Braillo 300 S2

American Thermoform Corporation

Price: \$2300

Device: braille output, printer, speech output

Disability: vision

Braillo 300 Braille embosser is a reliable and dependable embosser for true Braille production. At 300 CPS using continuous Braille paper, it offers exceptional Braille quality and consistency. Its combination of speed, durability, reliability are the reasons why it is used by most of the largest Braille production facilities.

Braillo 450 S2

American Thermoform Corporation

Price: \$3500

Device: braille output, printer

Disability: vision

The Braillo 450 S2 is an ideal embosser for those that need increased Braille output over the 300 S2, but not the speed and scalability of the 600 S2. It shares the same chassis as the 300 S2, but internal components are upgraded to ensure superior dot quality and consistency at these higher embossing speeds. Using continuous/fanfold Braille paper and embossing at 450 CPS (1,350 pages per hour), it will be a trusted, high speed asset to your business

Braillo 600 S2

American Thermoform Corporation

Price: \$450.00**Device:** braille output, large print, printer, speech output**Disability:** vision

The Braillo 600 S2 Braille embosser is the faster, more robust counterpart to the Braillo 450 S2. Embossing at 600 CPS (1,800 pages per hour), it is the fastest continuous/fanfold embosser available, and it offers remarkable dot quality and dependability. Its combination of speed, reliability and quietness are the reasons why its predecessor, the Braillo 600, is used across the world by most of the largest Braille production facilities. Unique to the 600 S2 is that it is built upon a chassis that can be upgraded to a Braillo 600 SR as your Braille production needs expand.

Braillo 600 SR

American Thermoform Corporation

Price: \$795.00**Device:** braille output, large print, printer, speech output**Disability:** vision

The Braillo 600 SR braille embosser meant for large volume Braille production. This Braille embosser is unique, as it uses paper rolls instead of continuous tractor feed paper. Using paper rolls helps to save money on paper expenses and also eliminates the need for a burster and its operator.

Braillo 650 SF

American Thermoform Corporation

Price: \$1280.00**Device:** braille output, printer, speech output**Disability:** vision

The Braillo 650 SF is the world's only fully automated Braille book production system. Send a file and pick up a finished, folded, covered and stapled book. The Braillo 650 SF makes on-demand Braille publishing possible.

Braillo 650 SW

American Thermoform Corporation

Price: \$880.00**Device:** braille output, printer, speech output**Disability:** vision

Braille 650 SW Braille Embosser is an advanced Braille embosser that employs a paper cutter for two or four page-per-sheet format, and a stacking unit engineered to handle large format production. This machine is ideal for creating both magazines and textbooks.

BrainPort Vision Pro

Wicab, Inc.

Price: \$10,000.00**Device:** dedicated communicator**Disability:** vision

The BrainPort Vision Pro is an oral electronic vision aid that provides electro-tactile stimulation to aid profoundly blind

patients in orientation, mobility, and object recognition as an adjunctive device to other assistive methods such as the white cane or a guide dog. The device is a non-surgical solution for profoundly blind individuals.

Braze Blind Spot Sensors

Braze Mobility Inc.

Price: \$1850-\$5800**Device:****Disability:** cognitive, hearing, learning, physical, vision

The world's first patented Blind Spot Sensors can be added to any powered or manual wheelchair, transforming it into a "smart" wheelchair. Our system provides feedback to the user regarding location and proximity to obstacles through intuitive lights, sounds, and vibrations.

Bright Box

Adaptation, Inc.

Price: \$149.00-\$149.00**Device:** switch**Disability:** cognitive, learning, physical, vision

The Bright Box has a visual display that is activated when the user presses the top of the surface. The Bright Box can be used as a visual cue to aid in locating the device for persons with low vision or for any nighttime user.

Bright Box Tactile

Adaptation, Inc.

Price: \$169.00-\$169.00**Device:** switch**Disability:** cognitive, learning, physical, vision

The Bright Box Tactile has visual and tactile feedback. The visual feedback and tactile feedback can be employed independently of each other. The Bright Box Tactile can be used to activate any battery-operated device with a standard 1/8-inch jack.

Buddy Button

AbleNet, Inc.

Price: \$65.00**Device:** switch**Disability:** cognitive, learning, physical

The Buddy Button provides tactile and auditory feedback, is 2.5-inches in diameter and requires a force of 7 ounces in the center and 5.3 ounces at periphery. Unsurpassed durability that now comes in seven great colors and designs.

Button Switch

Adaptive Switch Laboratories, Inc.

Price: \$180.00**Device:** switch**Disability:** physical

The ASL 305 is a momentary switch that has an activation button the size of a dime and requires medium force for activation.

Calculator with keyguard

Turning Point Therapy and Technology, Inc.

Price: \$75.00**Device:** keyguard**Disability:** physical

Casio large display/large button basic function calculator with keyguard.

Cheap Talk 8 - 6 Level Communicator

Enabling Devices

Price: \$319.95**Device:** dedicated communicator, speech output, speech trainer**Disability:** cognitive, learning, physical, speech

Our 6-Level Communicator is ideal for teaching language skills. Record 48 six-second messages on six levels. Messages can be recorded and rerecorded as often as you wish. Available in three colors.

Chester Mouse

AbleNet, Inc.

Price: \$22.00**Device:** mouse emulator**Disability:** cognitive, learning, physical

Young children can be confused about whether to use the right or left button on a mouse and using drag-and-drop and click-and-move can be frustrating. Welcome Chester Mouse, a tiny single-button mouse with no scroll wheel, that's easy to control and made of rugged plastic for strength and durability.

Choice

AbleNet, Inc.

Price: \$195.00-\$195.00**Device:** switch, dedicated communicator, speech output**Disability:** cognitive, learning, physical, speech

The Choice provides an exciting option for easy-tech, quick-ready communication. Allowing you to skip a message without it playing in its entirety. Press the activation surface repeatedly, and skip multiple messages to get to your desired message. Three levels for increased flexibility. When you find it, release the activation surface to play the message.

Chromebooks

Google

Price: \$119-\$1299**Device:** alternative keyboard, braille input, keyboard emulator, switch, voice recognition, braille output, large print, printer, speech output**Disability:** cognitive, hearing, learning, physical, speech, vision

Chromebooks are a range of simple yet powerful devices with built-in accessibility, productivity and security features to help enhance teaching and learning, wherever it takes place.

Closed Caption Display Units

CompuSult Limited

Price: \$1395.00-\$8995.00**Device:** large print**Disability:** hearing

CompuSult's Caption Display units provide large format LED output of closed captions from analog video sources, captioning/transcription software and CompuSult's Caption Display software. The Caption Displays provide four lines of 32 characters, with character heights ranging from 0.7- to 4-inches. For more details, please visit .

Clover 6 HD by Sightcare

Irie-AT, Inc.

Price: \$795-\$795**Device:** large print**Disability:** learning, vision

1080p Full HD image resolution for reading and distance. Anti-glare, matte touchscreen. Magnification of 1.5x to 35x. Close view and distance viewing. Photo mode and 16 high contrast modes. Continuous use up to 3 hours - user rechargeable battery. Fold-out, integrated stand provides a proper angle for reading and writing

Cognixion ONE

Cognixion

Price: \$11

Disability: speech

The World's First Brain Computer Interface with Augmented Reality Wearable Speech™ Generating Device.

Communication Builder

Enabling Devices

Price: \$269.95

Device: dedicated communicator, speech output, speech trainer

Disability: cognitive, learning, physical, speech

The Communication Builder is equipped with five easy to change frames, which allows you to refine communication choices as the person develops new skills. Record your messages with the simplest push of a button. Light, durable and easy to carry with a built-in handle. Total record time is 300 seconds.

Compact Switch

RJ Cooper and Associates

Price: \$49.00

Device: switch

Disability: cognitive, physical, speech
Round 1-inch compact switch that makes a nice click sound when activated.

Companion - Power Assist/Add-On for Manual Wheelchairs

Cheelcare

Price: \$2199.99-\$4349.99

Device:

Disability: physical

Companion is an ultra-portable power add-on for manual wheelchairs. It fits both rigid and folding frames for adult and pediatric users. Easily connect and disconnect Companion in seconds for up to 15mph* in high-torque power. Companion has a range of up to 18 miles* per charge and can easily be loaded in and out of a vehicle without assistance. The unit weighs about 20 lbs and can be customized in appearance and function to suit your unique identity and needs. The compact, travel-friendly design can be transported on a plane and follow you on any journey, whether by air, land or sea. *Varies based on the model, configuration, user weight, and environment.

Connect 12 - Smart portable magnifier

HumanWare

Price: \$3995

Device: alternative keyboard, optical character recognition, large print, speech output

Disability: vision

Connect 12 is a high-performance 12-inch digital magnifier combined with the functionality, connectivity and versatility of an Android tablet. It offers up to 24X live HD magnification with intelligent LED illumination. Including a lightweight and sturdy stand, the Connect 12 is easily foldable and extremely portable. Staying engaged and connected in the classroom has never been this satisfying.

Control Bionics Trilogy System - NeuroNode Duo iOS

Control Bionics Inc.

Price: \$13500

Device: switch, voice recognition, dedicated communicator, environmental control, speech output

Disability: cognitive, hearing, learning, physical, speech, vision

CONTROL BIONICS TRILOGY SYSTEM The NeuroNode Duo is a speech generating device with powerful access methods that make the user more effective in communicating. Combining the flexible NeuroNode sensor, and an Apple iPad, this device lets you operate your speech generating software using iOS. With EMG (electromyography) and Spatial control options, the NeuroNode Duo gives the user communication possibilities they've never had before. The wireless sensor moves with the user, allowing flexible placement for users of all abilities and range of motion - even the most minimal movement can trigger the sensor, giving the user control and independence.

CooperCar II

RJ Cooper and Associates

Price: \$999-\$1399

Device:

Disability: cognitive, physical

The original CooperCar, 1991-1999, was placed 848 times around the world. Some are even still in use! The CooperCar II is a resurrection of this successful toy/tool/vehicle for severely physically (and possibly cognitively) challenged young children (up to 50 lbs). It can be controlled by 1-4 switches, or an optional joystick. It turns electrically on its large 2 wheels (no steering wheel). An optional Wireless Remote Override is available. The firmware on the controller is similar to switch parameters on a computer: Time (so that a short activation of a switch/joystick movement can result in longer movements of the vehicle), Acceleration (for those that startle easily), and Speed. The CooperCar II is a viable alternative for youngsters to a VERY expensive power wheelchair! Or, for those severely cognitively impaired, the world's greatest cause/effect device.

Cordless Switch Interface

RJ Cooper and Associates

Price: \$99.00

Device: switch interface

Disability: physical

Provides two switch inputs for plugging switches into a computer. Once plugged in, the switch(es) become standard mouse clicks. With installation of the accompanying SwitchHopper software you can configure each button to be any mouse-button event or keystroke that you would like.

Cosmos Connect

Control Bionics Inc.

Price: \$550

Device: switch, environmental control

Disability: physical

Play video games, activate switch toys, dine independently, check text messages, and more, all using a single NeuroNode and the Cosmos Connect. The Cosmos Connect is a small portable control device that can be used with a Windows display device. When paired with the NeuroNode sensor, the Cosmos Connect leverages our exclusive application to intuitively interact with a variety of personal control devices giving the user more independence with a single movement. The Cosmos Connect is a small, portable device that turns a single NeuroNode sensor into multiple outputs. The device allows up to 8 wired outputs and one Bluetooth output. The Cosmos Connect app, installed on your Windows device, is designed to match not only the device but also the context of a specific activity. Intuitive menus present choices right for the current context, giving independence and control to the user.

Crick USB Switch Box

Crick Software, Inc.

Price: \$159.00

Device: switch interface

Disability: physical

Plugs into your computer and connects your switches. It will work instantly with Clicker and DocsPlus, with no setup required. For other switch accessible software, we have included USB Keys software, a small application that converts switch presses from the USB switch box into key presses or mouse clicks.

Cushion Grip Switch

Enabling Devices

Price: \$45.95-\$47.95

Device: switch

Disability: cognitive, hearing, learning, physical, speech, vision

A fantastic sensitive switch that fits most hands. Just slip it over your hand and you can use a palmer grasp or roll it on a tray or tabletop to activate any device or toy. Now comes in two sizes - Medium and Small.

DaVinci Pro HD/OCR

Enhanced Vision

Price: \$4405.00-\$4405.00

Device: optical character recognition, large print

Disability: vision

DaVinci Pro is a high-performance desktop video magnifier, featuring a 3-in-1 camera (see near, intermediate, and far), Full HD & selective text-to-speech OCR. Experience the joy of reading with high definition color and contrast, crystal clear images, and vibrant colors. DaVinci Pro will read any printed text aloud with the push of a button

Dipsy

Adaptivation, Inc.

Price: \$39

Device: switch

Disability: cognitive, learning, physical

This tilt-sensitive switch can be attached to the head, arm, finger or any appropriate object and can be used for posture training. The Dipsy is activated by a 30-degree tilt which makes it less prone to false activation. Includes a headband and two finger mounts. Price Reduced.

Dot Box Switch

Adaptive Tech Solutions

Price: \$33.94

Device: switch

Disability: physical

Our Dot Box Switch has a 1" raised circular activation surface that requires moderate pressure (average fingertip pressure). Has a generous 6' cord with standard 1/8" (3.5mm) jack and rubber feet on the bottom. A nice general switch that can also be used to encourage finger isolation.

Drink-Partner Insulated Tumbler

Mealtime Partners, Inc.

Price: \$74.95-\$74.95

Device:

Disability: cognitive, physical

The Drink-Partner Drinking System can accommodate an Insulated Tumbler in the cup holder, as an alternate drink container to the bottle that is provided with the Drink-Partner Drinking System. The Insulated Tumbler is an assistive drinking aid that provides hands free drinking for individuals with disabilities. The Drink-Partner Insulated Tumbler will fit in any of the Mealtime Partners Front Mounted Drinking Systems Cup Holders as well as the Drink-Partner Cup Holder.

Dual Button Mechanical Switch with Stereo Plug

Adaptive Switch Laboratories, Inc.

Price: \$360.00

Device: switch interface

Disability: physical

The ASL 524 with Stereo Plug will allow you to use both mechanical switches with one switch port. For instance right and left mouse click or recline and tilt.

Dual Switch Input Adaptor

Adaptive Switch Laboratories, Inc.

Price: \$20.00

Device: switch interface

Disability: physical

The ASL 817 allows two mono port switches to have the same mono output or can allow for two output switch functions from one single switch port.

Dual Switch Latch & Timer

AbleNet, Inc.

Price: \$215.00

Device: switch

Disability: cognitive, learning, physical
Choose our Switch Latch and Timer whenever you need to add modes of control to any switch accessible toy or appliance. Use with any pre-adapted device, or use our battery device adapter to create your own adapted toy or appliance. This unit allows two people to activate their own devices simultaneously.

Duo

AbleNet, Inc.

Price: \$50.00

Device: mouse emulator

Disability: cognitive, learning, physical

Duo is a wireless mouse for everyone. With Duo, a user can easily control the mouse cursor with fine motor or gross motor movements. Left- and right-clicks are controlled with accessibility switches or the standard left- and right-click buttons on Duo. Duo can also be used as a stand-alone switch interface and works with switch scanning software that utilizes left- or right-clicks.

eeZee Mouse CURSOR

LaZee Tek

Price: \$599.00

Device: mouse emulator

Disability: physical

Alternative computer access designed to work with the person's abilities; empowering them to access a computer, tablet or smartphone. A tiny body sensor provides proportional cursor control, worn anywhere from head to toe. This cost effective cursor control is compatible with all hardware and software; including all clicking software.

eeZee Mouse PRO

LaZee Tek

Price: \$899.00

Device: mouse emulator

Disability: physical

Alternative computer access designed to work with the person's abilities; empowering them to access a computer, tablet or smartphone. A tiny body sensor provides proportional cursor control, worn anywhere from head to toe. Clicking performed via microphone using sound detection. Compatible with all hardware and software. No software required.

eeZee Mouse SWITCH

LaZee Tek

Price: \$749.00

Device: mouse emulator

Disability: physical

Alternative computer access designed to work with the person's abilities; empowering them to access a computer tablet or smartphone. A tiny body sensor provides proportional cursor control, worn anywhere from head to toe. Utilizes most any type of external switches for clicking. Compatible with all hardware and software.

eSight Eyewear

eSight Eyewear

Price: \$6950

Disability: vision

Breakthrough assistive technology for the visually impaired. Named "Best New Invention" by Time Magazine in 2017, eSight is the most advanced and versatile medical device that enhances sight for people living with central vision loss. eSight users most commonly live with macular degeneration, Stargardt disease, diabetic retinopathy, optic atrophy, optic nerve hypoplasia to name a few examples. Many eSight users enjoy 20/20 functional vision for activities of daily living and independent mobility.

ET Roller rolling floor stand

CJT Mounting

Price: \$1525.00

Device: dedicated communicator, environmental control, speech output

Disability: cognitive, learning, physical, speech, vision

The only rolling floor mount with a 20 inch base that can hold both small and large devices without issues. The ET Roller's adjustable arm extends from 17 to 24 inches and can position your device from 6 inches

off the ground up to 5ft plus. Attach a second CJT arm and hold multiple devices at the same time. No tools required to adjust the height and position of the device.

Everest-D V5 braille embosser

HumanWare

Price: \$6499

Device: braille input, braille output, printer

Disability: learning, physical, vision

Everest-D V5 is the most versatile braille embosser on the market. Embossing up to 140 characters per second, it prints braille in any format on cut sheets of paper, supports automatic booklet printing and produces high-resolution tactile graphics. The Everest-D caters to a wide range of needs.

exploré 12 - Portable video magnifier

HumanWare

Price: \$1795.00-\$1795.00

Device: large print

Disability: vision

exploré 12 is an easy-to-use, portable electronic magnifier that offers HD image quality for improved near and distance viewing. As the largest portable magnifier in our exploré series, its 12-inch touchscreen is perfect for anyone desiring a larger interface, plus it has the added benefit of a foldable stand enabling easy use for reading, writing, and other manual tasks.

exploré 5 - Pocket-size video magnifier

HumanWare

Price: \$875

Device: alternative keyboard, large print

Disability: learning, vision

The exploré 5 is the smallest and lightest 5-inch video magnifier of its kind. It is ideal for spot reading and features a high-definition image with precise autofocus for up to 22X magnification, plus over 18 enhancement contrast modes to meet your visual needs.

exploré 8 - Handheld video magnifier

HumanWare

Price: \$1525

Device: keyboard emulator, large print

Disability: vision

The exploré 8 is the first 8-inch touchscreen digital handheld magnifier available for desktop or distance viewing. Magnifying up to 30X with stunning image quality, you can enjoy all the benefits of a large screen in a very compact package.

Eye Gaze Education

Inclusive TLC

Price: \$2179.00-\$2179.00

Device: mouse emulator

Disability: cognitive, learning, physical

The Inclusive EyeGaze Education package includes a full set of Inclusive EyeGaze titles, Attention and Looking, Exploring and Playing, Choosing and Learning and myGaze Eye Tracker. The package includes everything you need to introduce eye gaze into the classroom for students with all levels of ability.

Eye Gaze Foundations

Inclusive TLC

Price: \$1695.00-\$1695.00

Device: mouse emulator

Disability: cognitive, learning, physical

Introducing a new affordable Eye Gaze solution for the classroom. All you need to get started with eye gaze access in one package - the Inclusive EyeGaze Foundations.

Eyegaze Edge

Eyegaze Inc.

Device: dedicated communicator

Disability: speech

We are the eye tracking experts! The Eyegaze Edge is a low-fatigue, high-accuracy eye tracking communication device that provides software accommodations that allow individuals with complex eye issues to have access to communication and computer functions via their eye movements. It not only comes with our legacy Eyegaze communication pages, but Eyeworld and other symbol-based and evaluation page sets. Available in touch tablet, with head mouse, or our award-winning Prime or Encore Camera!

Eyegaze Edge

LC Technologies/Eyegaze Systems

Price: \$8700.00-\$11150.00

Device: alternative keyboard, keyboard emulator, mouse emulator, dedicated communicator, environmental control, speech output

Disability: physical, speech

Eyegaze Edge: Direct-selection with the eyes for voice output, communication screens, environmental controls, YouTube, Kindle, Skype, Facebook, keyboard and mouse interface to any PC or MAC, SMS. Programs for children. Run it in any position, only uses one eye, works with droopy eyelids & large pupils. Tablet or desktop versions.

EyeOn Air Speech Generating Device

EyeTech Digital Systems

Device: mouse emulator, switch, switch interface, dedicated communicator, environmental control, speech output

Disability: cognitive, physical, speech

EyeTech's lightweight option that's compatible with multiple access methods, like eye gaze or switch, the EyeOn Air is the perfect compact option that still offers all the functionality you need. Contact us for a quote at info@eyetechds.com.

EyeOn Go Speech Generating Device

Two settings: Standard (press and play) and Express (press multiple buttons then play all as one message). Two year warranty.

GoTalk Fit

Attainment Company, Inc.

Price: \$99.00**Device:** speech output**Disability:** cognitive, learning, speech

An easy-to-use 4 or 9 message voice output device. Activate the easy on/off switch and begin to record messages on each of 3 levels for a total of 12 or 27 messages in this small handheld device. A powerful communication device that's hand-held for quick access. This is an amazing tool for students to use in school, in the classroom to communicate wants/needs or for students to show the teacher what they know in specific classes throughout the day.

GoTalk Go

Attainment Company, Inc.

Price: \$199.00-\$229.00**Device:** speech output**Disability:** cognitive, learning, speech

The rechargeable GoTalk Go offers three-programmable message buttons. Try the newer easier-to-use capacitive touch buttons to activate a message. Program 1, 2, or 3 messages on each of three levels for a total capacity of nine messages! It looks similar to a watch with the plastic wristband, providing a convenient, wearable AAC device for on-the-go! The robust volume of this device will amaze you. Great to use for conversations in the cafeteria, at recess, on community outings, and many more places.

GoTalk Select

Attainment Company, Inc.

Price: \$199.00**Device:** speech output**Disability:** cognitive, learning, speech

Small, light, and rechargeable via USB, the GoTalk Select offers four programmable message buttons on each of three levels for a total of 12 wearable quick messages! Keep this wearable, augmentative and alternative communication (AAC) device with you using the clip or lanyard (both included) or just take it along in your pocket. Program with 1, 2, 3, or 4 messages at a time, with each message button measuring at 2.75 cm x 2.75 cm. Powerful, high-quality speaker allows for remarkable volume from a small device. Also provides adjustable volume and a 2-year warranty!

Adaptive Switch Laboratories, Inc.

Price: \$846.00**Device:** mouse emulator**Disability:** physical

The ASL 553 is available in a three switch or five switch configuration and can be used with Mac or PC computers. It has six mono ports, which include left and right click, up/down/left/right mouse movement, that switches can be plugged into for computer access through a USB port.

Mouse4all Box

Mouse4All

Price: \$199-199**Device:** switch interface**Disability:** physical

Mouse4all Box is an assistive product that allows everyone to use an Android tablet or smartphone entirely, without touching the screen. It enables access to the Internet, social networks, games or any other app. Mouse4all is composed of an Android app and a connection box. It is very easy to install. You can use it with one or two switches that are connected to the Android device through our connection box. It is suited for persons with a physical disability having difficulty using a touchscreen: cerebral palsy, spinal cord injury, multiple sclerosis, ALS, Parkinson, neuromuscular disease.

Multi-user Sip/Puff Switch

Origin Instruments Corp.

Price: \$439.00**Device:** switch**Disability:** physical

A multi-user version of the popular Sip/Puff switch designed for multiple users incorporates a special, disposable mouth-piece eliminating concerns over sanitation. Perfect for assessment centers, healthcare facilities and hospitals. Comes in a plastic case for secure storage and convenient transport.

MyGaze Eye Tracker

Inclusive TLC

Price: \$1495.00/1495.00**Device:** mouse emulator**Disability:** cognitive, physical

The myGaze Eye Tracker will follow your eye movements so that you can move the cursor around the screen, select or

'click' on images by looking at them a little longer and drag the cursor around the screen. This means you can use lots of your favorite software programs.

NeuroNode Trilogy

Control Bionics Inc.

Price: \$16500

Device: switch, dedicated communicator, environmental control, speech output
Disability: cognitive, hearing, learning, physical, speech, vision

The NeuroNode Trilogy combines touch, eye control, and EMG/Spatial control for a faster and less fatiguing dedicated speech generating device. The NeuroNode Trilogy has three access methods to provide a flexible communication solution for those with complex speech and physical needs. Multimodal access makes the user more efficient in communicating, up to 47% faster than traditional eye gaze.

Non Adjustable Proximity Switch

Adaptive Switch Laboratories, Inc.

Price: \$660.00

Device: switch

Disability: physical

The ASL 204 is a single function switch with an activation range of touch to 1/4 inch. Activation occurs when it senses a hand or another part of the body in the activation area. It can be built with a mono port and be either 12 or 24 volt.

nous: wearable blink switch

Thought-Wired

Price: \$1500--\$1500

Device: alternative keyboard, switch, switch interface, dedicated communicator, environmental control, speech output
Disability: cognitive, hearing, learning, physical, speech

For people who have physical disabilities which affect all their limbs it can be difficult to control a computer. nous lets people control assistive software by blinking. It only uses your intentional blinks, so you can still blink comfortably. A wearable headset detects intentional blinks, while our software uses them to 'click' on a computer.

NovaChat 10

PRC-Salttillo

Price: \$3895.00-\$5395.00

Device: speech output

Disability: speech

NovaChat 10 has the largest display of any NovaChat communication device. It offers the Chat Software on an Android platform. Like all NovaChats, NovaChat 10 offers a durable yet sleek portable design, with features that include switch scanning, Social Chat and many other features.

NovaChat 5

PRC-Salttillo

Price: \$2995.00-\$4495.00

Device: speech output

Disability: speech

NovaChat 5 is the smallest of the NovaChat with a 5.0 inch display and weighing in at only 0.95 pounds. NovaChat 5 offers a durable yet sleek design, with features that include switch scanning, Social Chat, IVONA speech synthesizer and many other Chat features.

NovaChat 8

PRC-Salttillo

Price: \$3495.00-\$4995.00

Device: dedicated communicator, speech output

Disability: speech

NovaChat 8 is a communication system that offers the well-known Chat software on an Android platform. Like all "Chats," NovaChat 8 offers a durable yet sleek portable design, with features that include an 8" display, switch scanning, IVONA speech synthesizer, and many other Chat features.

NuEyes e2+

NuEyes Technologies

Price: \$2795.00-\$2795.00

Device: optical character recognition, large print, speech output

Disability: vision

Headworn Electronic Magnifier for Low Vision that is Evenly Balanced and Comfortable to Wear. Because of its 4K Ultra HD screens, you will immediately notice how clear the world becomes. The NuEyes e2+ is so simple to use that you control the device with just three buttons. Button One lets you select from a variable magnification depending on if you want to read, watch TV, or look at a loved one's face. Depending on your eye condition, you use the second button to choose from three different contrast settings. The third and final button is for OCR/text-to-speech. If your eyes get tired from reading or you experience eye strain, let the OCR or Optical Character Recognition read the text to you!

NuEyes Pro 3 LV

NuEyes Technologies

Price: \$3895.00-\$3895.00

Device: keyboard emulator, optical character recognition, voice recognition, printer, speech output

Disability: vision

Our removable visual prosthetic helps the visually impaired see again while keeping their hands free. Wearable technology is the future and NuEyes Smartglasses bring the future to you in a small compact, yet powerful head-worn device. This lightweight, 88g pair of glasses with a 4K display and 52-degree field of view finally makes it possible for those with visual impairments to connect with loved ones and others without having to use a big clunky machine. Our removable visual prosthetic

helps the visually impaired see again while keeping their hands free.

Orby Switch

Origin Instruments Corp.

Price: \$49.95

Device: switch

Disability: physical

Orby is a colorful adaptive switch featuring a smooth, and contoured 2.5-inch diameter design that is less than 1-inch tall. Orby has a smooth and consistent actuation across the entire switch surface with clear tactile and audible feedback. Two year warranty and available in red, green, blue and yellow.

Outspoken Communicator Mobile Bundle

Compusult Limited

Price: \$1099.00-\$1599.00

Device: alternative keyboard, dedicated communicator

Disability: cognitive, speech

Compusult's high-quality iPad -based portable communication solution includes your choice of quality AAC apps such as Proloquo2Go, Touch Chat HD, Predictable, etc. Systems include the latest generation of iPad or iPad mini with a two-year AppleCare warranty, our new and improved EVA3 protective case, screen protector, case strap, and stylus.

Pal Pad

Adaptation, Inc.

Price: \$47.00-\$59.00

Device: switch

Disability: cognitive, learning, physical, speech, vision

The Pal Pad is a very thin membrane switch activated by a light touch. It has no "click" when activated. It comes in six colors: red, blue, yellow, black, green and purple. Pal Pads come in three sizes and use a standard 1/8-inch jack.

Perkins Brailier

Perkins School for the Blind

Price: \$775

Device: braille input, braille output

Disability: vision

The Perkins Brailier is a durable braille writing machine used for reading, writing and math from early learning through adulthood. WHY THE PERKINS BRAILLER? Best in Class: The most widely used mechanical braille writer in the world since its invention in 1951.

Perkins SMART Brailier

Perkins School for the Blind

Price: \$2195

Device: braille input, braille output, large print, speech output

Disability: vision

The SMART Brailier® is an early learning tool designed to promote an interactive educational experience between students,

teachers and parents by displaying, vocalizing, and brailleing what a student types.

Personal Pager

Adaptation, Inc.

Price: \$39.00-\$79.00

Device: environmental control

Disability: physical

The Personal Pager provides wireless call button capability at home, school or outdoors. Both transmitter and chime receiver are battery operated. Works with any adaptive switch.

Photo Electric Switch

Adaptive Switch Laboratories, Inc.

Price: \$660.00

Device: switch

Disability: physical

The ASL 209 projects a cone shaped, invisible beam of light to an adjustable maximum distance of 21 inches. Switch activation occurs when any object passes through or is detected in the target area.

Pillow Switch

AbleNet, Inc.

Price: \$125.00

Device: switch

Disability: cognitive, physical

A smooth and soft foam surface makes this switch suitable for head or cheek activation. Easily fastens to a pillow or wheelchair cushion with safety pin and Velcro.

Plate Switch

AbleNet, Inc.

Price: \$90.00

Device: switch

Disability: cognitive, physical

The new Plate accessibility switch has an activation surface 350% larger than the previous version. The low profile makes it perfect for users who are unable to lift their hand or finger to activate a traditional accessibility switch. To use, slide the hand or foot over the activation surface and apply a few ounces of pressure to activate. Plate accessibility switch features: Ultra-low profile (2.5-mm thick). Sealed surface protects against moisture. Includes red, green, yellow, blue, and orange adhesive-backed overlays

Pneumatic Switch Kit

Adaptation, Inc.

Price: \$59.00-\$59.00

Device: switch

Disability: cognitive, physical

Use this switch to activate with only a puff of air. It can be used with all kinds of squeeze toys, bottles and balls. It allows you to create your own object-based switch.

PowerLink 4 Control Unit

AbleNet, Inc.

Price: \$275.00

Device: switch, environmental control

Disability: cognitive, learning, physical,

speech

The PowerLink 4 allows switch users to control up to 2 electrical appliances with single switches. Features 6 unique modes of control that allows you to define exactly how, and for how long, appliances will be turned on.

PRiO-mini

PRC-Saltillo

Price: \$3995.000

Device: alternative keyboard, keyboard emulator, switch, speech output, speech trainer

Disability: cognitive, learning, physical, speech

The PRiO®-mini is an iPad-based communication tool featuring the iPad mini and the popular LAMP Words for Life® Vocabulary. The PRiO-mini is configured as a dedicated device to meet the functional specifications of the Medicare/Medicaid funding requirements.

Privacy microphone

Talk Technologies

Price: \$85.00-\$329.00

Device: voice recognition, speech output

Disability: cognitive, hearing, learning, physical, speech, vision

Talk Technologies specialized handsets eliminate background noise and make the sound of your voice inaudible to those around you while simultaneously providing a crystal-clear voice signal - allowing you to talk, listen and document privately without interference. Compatible with IOS and Android smartphones, tablets, computers or any microphone enabled device.

Pro-Bot

Terrapin

Price: \$149.95-149.95

Device: dedicated communicator

Disability: learning, physical

Pro-Bot offers an enticing, engaging and hands-on experience with Logo technology and robotic controls. Program Pro-Bot's route with the on-board arrow and number keys, then press go and watch Pro-Bot zip along following your instructions. Insert a pen and watch Pro-Bot draw as it moves. Sound, light, and touch sensors are built in, providing additional coding options.

ProxPAD

LoganTech

Price: \$1395.00

Device: dedicated communicator, speech output

Disability: cognitive, learning, physical, speech, vision

The ProxPAD is a large single location communication and learning aid that uses a RFID sound tag card. It is an excellent choice for persons with physical, visual or cognitive impairments who require tangible objects or other sight cue to initiate communication.

ProxPAD - AAC Device

Westminster Technologies

Price: \$1395-\$2649

Device: speech output

Disability: cognitive, learning, speech

The ProxPAD is a communication learning aid for people with physical, visual, or cognitive impairments. The ProxPAD uses tangible objects or images to initiate communication. It uses RFID (radio frequency identification) technology allowing each sound tag to have a different pre-recorded message. The ProxPAD offers two different activation modes. Touch mode requires the sound tag to make contact with the blue surface of the ProxPAD. Proximity mode allows the user to hover or swipe the sound card above the surface. This makes the ProxPAD perfect for a person who has limited mobility or needs it mounted under a table or wheelchair tray.

ProxTalker

LoganTech

Price: \$3149.00

Device: speech output

Disability: cognitive, learning, speech

The Logan ProxTalker is an augmentative communication device that offers the first moveable picture communication with a voice output. Encoded picture sound tags produce voice output when placed on any of the five device buttons and pressed.

Tags can be customized with any image and sound.

ProxTalker - Portable AAC Device

Westminster Technologies

Price: \$3149-\$3149

Device: speech output

Disability: cognitive, learning, speech

The ProxTalker is a robust, water resistant, easy-to-use AAC device which uses RFID (radio frequency identification) technology to enable independent verbal picture communication for non-verbal people of all ages. Place any photo, symbol, or object on a sound tag card and have a voice! To trigger voice output, place your sound tag card on any one of the 5 buttons and push.*** Light Touch option is available for the buttons on the ProxTalker at no additional cost. Call 216-325-6960 for more information. The ProxTalker Standard package includes: 80 Pre-recorded sound tags, 100 blank small tags, Carry case with 4 page Velcro set, 2 sets of programming tags, 4 color pages with Velcro strips, Peel and stick labels and laminates, Tool kit, 3 year warranty

Puff Switch - G-Switch Series

GlassOuse Assistive Device

Price: \$129

Device: switch

Disability: cognitive, learning, physical

Puff Switch is designed for GlassOuse V1.2, yet you can connect it to any kind of

adapted device offering a mono 3.5mm jack plug in for external switch controls. Other than regular sip and puff systems, Puff Switch uses an electronic microphone, which allows you to do clicking actions via simple puffs.

Put-Em-Arounds

Enabling Devices

Price: \$99.95

Device: dedicated communicator, speech output, speech trainer

Disability: cognitive, hearing, learning, physical, speech

These talking wall switches allow nonverbal children to initiate communication throughout their day. Record your message and have the children actively participate with their peers, family, teachers, etc. Put-Em-Arounds allow recording time for up to 20 seconds. Recording and rerecording requires only the push of a button.

Quad Button Digital Switch with D9 Connector

Adaptive Switch Laboratories, Inc.

Price: \$450.00

Device: switch interface

Disability: physical

The ASL 523 with D9 Connector is usually used in conjunction with a multi function tilt interface for direct access to tilt, recline, elevate and power legs.

Quha Zono, Quha Zono 2, and Quha Zono x

Grasp Assistive Technologies

Price: \$999-\$1499

Device: mouse emulator

Disability: physical

We now have 3 options of wireless gyroscopic mouse designed for individuals with special needs. Giving you accurate and intuitive access to Windows, Mac, & Android devices. Zono, Zono 2 and Zono X Our Zonos are wireless gyroscopic mice designed for special needs. The Zono makes it possible to use a computer in a flexible way, when you cannot use an ordinary mouse. Your movements control the cursor on the screen, allowing you to select, click and drag items on your desktop. It is extremely light weight and since it is completely wireless there are endless ways to wear it. The Zono works straight out of the box allowing full access to your computer.

QuickTalker 12

AbleNet, Inc.

Price: \$215.00

Device: dedicated communicator, speech output

Disability: cognitive, learning, physical, speech

Easy-to-use, go-anywhere communicator.

With QuickTalker 12, your students will be ready to start communicating in minutes. The variety of message locations and 12 minutes of total recording time, five avail-

able levels provide the flexibility you need to customize the learning outcomes for each student.

QuickTalker 23

AbleNet, Inc.

Price: \$235.00

Device: dedicated communicator, speech output

Disability: cognitive, learning, physical, speech

Easy-to-use, go-anywhere communicator.

With QuickTalker 23, your students will be ready to start communicating in minutes. The variety of message locations and 12 minutes of total recording time, five available levels provide the flexibility you need to customize the learning outcomes for each student.

QuickTalker 7 FT

AbleNet, Inc.

Price: \$195.00

Device: dedicated communicator, large print, speech output

Disability: cognitive, learning, physical, speech

Easy-to-use, go-anywhere communicator.

With QuickTalker 7, your students will be ready to start communicating in minutes. The variety of message locations and six minutes of total recording time, five available levels provide the flexibility you need to customize the learning outcomes for each student.

Randomizer Gamer

Adaptivation, Inc.

Price: \$189.00-\$189.00

Device: switch, speech output

Disability: cognitive, learning, physical, speech

The Randomizer records multiple messages and plays them back in random order. It has two independent levels for easy recording with 90 seconds per level. Modes of operation include single message, jumble (messages occur in random order), or eliminator (messages occur in random order but do not repeat once played).

Remote Emergency Stop Switch

Adaptive Switch Laboratories, Inc.

Price: \$735.00-\$1185.00

Device: switch

Disability: physical

The ASL 504 allows a power wheelchair to be stopped remotely within a range of 20 feet. It will stop the wheelchair with the activation of one switch and will allow it to move again when it is turned off. This switch is helpful when intervention is needed during training.

Reveal 16 - Digital desktop magnifier

HumanWare

Price: \$4199

Device: keyboard emulator, mouse emulator, optical character recognition, braille output, large print, speech output
Disability: hearing, vision

The 18-cell and 32-cell revolutionary notetakers BrailleNote Touch Plus combine the simplicity of a note-taking tool with the power of a smart digital device. Supported by the Android Oreo platform, it takes your braille experience to new levels and keeps you engaged and connected with your world. This powerful note taker, equipped with an ultra-fast processor, makes it easy to write or create graphics without making noise. You can download and read books, watch YouTube videos, send emails and share content on Dropbox and Google Drive cloud services.

Reveal 16 - Digital desktop magnifier

HumanWare

Price: \$4199

Device: alternative keyboard, large print
Disability: learning, vision

Reveal 16 is the easiest-to-use desktop video magnifier or CCTV (Closed Circuit Television) that offers exceptionally crisp and crystal-clear image quality. With its 10x live optical zoom camera, up to 45x digital magnification, and many viewing contrast options, this foldable 16-inch digital magnifier is ergonomically designed to make reading and writing enjoyable for long periods of time

Reveal 16i - Smart desktop magnifier

HumanWare

Price: \$5399

Device: alternative keyboard, optical character recognition, large print, speech output
Disability: learning, vision

Reveal 16i is a unique, smart, all-in-one digital magnifier delivering superb image quality along with access to thousands of Google applications, online reading libraries and other resources to help you stay productive and connected. With up to 10x live optical zoom and up to 45x digital magnification, you can enjoy best-in-class image quality showcased on a large 16-inch touchscreen.

Revibe Connect

Revibe Technologies

Price: \$119.95/119.95

Disability: cognitive, learning

Revibe reminds students to get back to work. Instead of an embarrassing tap on the shoulder from their teacher, they feel a gentle, automated vibration from Revibe on their wrist. This type of redirection empowers students to complete their work independently, improving their self-confidence.

RoboDesk - Robotic Mobile Device Mount

Prehensile Technologies

Price: \$2000-\$3000

Device: switch interface, environmental control

Disability: physical

RoboDesk is a robotic wheelchair mount for mobile devices. It allows a user to independently deploy, position, and store mobile devices using accessible switches from a power wheelchair. RoboDesk mounts on the side rail of your wheelchair and can be powered from the chair or with an external battery.

RoboTable - Robotic Overbed Table

Prehensile Technologies

Price: \$2500-3500

BACK TO
CONTENTS

devices and provides hardware emulation of mouse, keyboard, and joystick buttons; works with iPad using Apple adapter. The integrated pneumatic port connects directly to a range of available user interface options.

Sip/Puff Breeze with Gooseneck

Origin Instruments Corp.

Price: \$324.50

Device: switch, switch interface

Disability: physical

Connects directly to standard USB port on computers, tablets, phones, speech generating devices and provides hardware emulation of: mouse, keyboard, joystick buttons; works with iPad using Apple adapter. Breeze has a range of available user interface options, including Gooseneck. Flexible steel gooseneck and the ball-and-socket mount enable easy and secure mouthpiece positioning.

Sip/Puff Breeze with Headset

Origin Instruments Corp.

Price: \$324.50

Device: switch, switch interface

Disability: physical

Connects directly to standard USB port on computers, tablets, phones, speech generating devices and provides hardware emulation of: mouse, keyboard, joystick buttons; works with iPad using Apple adapter. Breeze connects directly to a range of available user interface options, including the Sip/Puff Headset.

Sip/Puff Gooseneck

Origin Instruments Corp.

Price: \$165.00

Device: switch

Disability: physical

The Sip/Puff Gooseneck features a universal clamp that attaches to table tops, beds and wheelchairs. The flexible steel gooseneck and the ball-and-socket mount enable easy and secure mouthpiece positioning. The filtered mouthpiece is replaceable and a thin, pliable connecting tube interfaces to Sip/Puff Switch or Breeze.

Sip/Puff Headset

Origin Instruments Corp.

Price: \$165.00

Device: switch

Disability: physical

This head referenced design maximizes compatibility with other assistive technologies, like HeadMouse that employ head movement. A replaceable mouth tube is held in position with an integral stainless steel forming wire. A thin, pliable connecting tube interfaces to Sip/Puff Switch or Breeze.

Sip/Puff Switch

Origin Instruments Corp.

Price: \$176.00

Device: switch

Disability: physical

The Sip/Puff Switch translates sips and puffs into independent switch closures. Batteries or external power are not required. Test buttons are integrated to assist in application testing. A twist-on pneumatic interface provides for direct connection to a range of available user interface options, including Headset and Gooseneck.

Sip/Puff Switch with Gooseneck

Origin Instruments Corp.

Price: \$324.50

Device: switch

Disability: physical

The Sip/Puff Switch translates sips and puffs into independent switch closures. Batteries or external power are not required. Test buttons are integrated to assist in application testing. A twist-on pneumatic interface provides for direct connection to a range of available user interface options, including the Gooseneck.

Sip/Puff Switch with Headset

Origin Instruments Corp.

Price: \$324.50

Device: switch

Disability: physical

The Sip/Puff Switch is a pneumatic switch. It can be used in any switch application. The headset mounts comfortably over the top of both ears and behind the head, making it less visible than typical headsets. It includes replacement mouth tubes, a switch box and 1/8-inch (3.5mm) connection cables.

Skoog for PC

Westminster Technologies

Price: \$179-\$179

Device:

Disability: cognitive, learning, physical

Skoog is an accessible, tactile cube that allows children with differing abilities to join an orchestra or band and take part in a range of music-making activities. Skoog's adjustable sensitivity and easy integration with GarageBand make it perfect for any inclusive music activity. Used together, Skoog and iPad expand the potential of music therapy for young children with cerebral palsy, autism, Down's Syndrome and other developmental delays by offering hands-on opportunities to create and control sound expressively. Skoog's sensory-friendly tactile nature helps greatly in developing new skills and promoting physical interaction with technology.

Small Joystick

RJ Cooper and Associates

Price: \$99239

Device: mouse emulator

Disability: physical

A joystick very similar to that of a power wheelchair that can 'be' the mouse on a computer or tablet. Available either in an 8x4x3 box with 0-4 large buttons on it, or a standalone version, 3x3, with 0-4 switch inputs. This is a switch type joystick so there is no proportionality but you can use the host's Acceleration parameter to emulate that.

Smart Reader HD

Enhanced Vision

Price: \$2090.00-\$2090.00

Device: optical character recognition, large print, speech output

Disability: vision

A Full-Page OCR system that is deal for reading magazines, books, newspapers, recipes and any other printed material. Simply position your document and press a button, in a few seconds Smart Reader begins to read aloud. Attach headphones for privacy.

Smart Reader with Console

Enhanced Vision

Price: \$2310.00-\$2310.00

Device: optical character recognition, large print, speech output

Disability: vision

A lightweight, portable reader/scanner with large built-in user-friendly tactile control buttons, and Full-Page OCR system that is ideal for reading magazines, books, newspapers, recipes and any other printed material. Read along and listen as Smart Reader reads your printed documents aloud. A user-friendly Control Console offers easy-to-use tactile buttons. Attach headphones for privacy.

SpeechWatch

Gus Communication Devices Inc

Price: \$399.99

Device: dedicated communicator, speech output

Disability: cognitive, hearing, learning, speech

The SpeechWatch® is the world's first stand alone AAC/speech, device, that is worn on the wrist and is ideal for children and adults with autism, aphasia (stroke), Parkinson's, or any condition that affects their ability to communicate with friends and family. Each SpeechWatch is individually prepared and configured by one of our technicians prior to shipping. They install, modify and test the TalkTablet AAC Speech app so it is ready to use for communication the moment you take it out of its gift box. The SpeechWatch is a less cumbersome alternative to a tablet or cell phone, yet offers the same benefits including cell phone, internet access, texting, email, social media etc.

Sphero Edu

Sphero

Price: \$49.99-\$250.00

Sphero Edu uses app-enabled robots to foster creativity through discovery and play, all while laying the foundation for computer science. Our program goes beyond code with collaborative STEAM activities, nurturing students' imaginations in ways no other education program can. Cross-platform apps are approachable for all skill levels, allowing us to reach as many minds as possible. Think outside the box and inspire your future. This is Sphero Edu.

StepPAD

WeWALK is a revolutionary smart cane developed for the visually impaired. WeWALK attaches to the traditional white cane, transforming it into an innovative smart cane. This technology increases visually impaired people's independence and promotes full-participation in society via three of its features. Detects obstacles; Paired with phone; Evolves with Integrations.

Wheelchair Mounts, Floor stands, Table Mounts

Rehadapt North America

Price: \$200-\$2000

Ensuring independent communication for each stage of the day is our mission. Mounting AAC devices the right way is crucial to respond to customers needs.

Rehadapt offers out-of-the-box and yet flexible solutions for most cases. Learn more about our wheelchair, floor stands, and table mounts... There are many types of wheelchairs, some with significant differences between them. Regardless of the wheelchair, we will mount your communication device, switch or control so that it is secured and perfectly positioned for the beneficiary to use! .

Windows Compatible Keyboard and Keyguard Combination

Turning Point Therapy and Technology, Inc.

Price: \$150.00-\$200.00

Device: keyguard, large print

Disability: physical, vision

Keyboard and keyguard combination unit compatible with Windows. Also, available in large print.

Wireless Adapted Mouse Computer Left Click Interface

Adaptive Tech Solutions

Price: \$54.88-\$54.88

Device: mouse emulator

Disability: physical

Here's a quick and easy left click mouse interface that allows the user to simulate left click selection using their switch (sold separately) with standard 1/8" (3.5mm) jack. Works with single switch scanning software that utilizes a left mouse click for activation or for traditional software where the adult or peer can manipulate the mouse on the screen and the user can activate their switch to select an item. Also useful for individuals who are able to move the mouse on the screen, but can't click the mouse button themselves. They can move the mouse over the target on the screen, then activate their switch to left click. Need right click instead? .

Wireless IR Mouse Emulator

Adaptive Switch Laboratories, Inc.

Price: \$1560.00-\$1680.00

Device: mouse emulator

Disability: physical

ASL 550 and/or 551 a desktop wireless, infrared transmitter/receiver mouse emulator with three switch configuration. Full mouse emulation is achieved with only three switches. The five switch version allows the wheelchair joystick to become a joystick operated mouse. Computer access from the wheelchair is achieved through a wireless infrared connection.

Wireless Receiver

AbleNet, Inc.

Price: \$105.00

Device: switch

Disability: cognitive, physical

Our Original Receiver functions just like a traditional switch - plug in the receiver, and go! Choose the Original Receiver if

you plan to control a computer switch interface or single device.

Wireless Switch Transmitter and Receiver

Adaptive Switch Laboratories, Inc.

Price: \$800.00

Device: switch, switch interface

Disability: physical

The ASL 503 allows you to transmit up to five switches to a remote location. This is achieved with a 12 volt transmitter/receiver that has five mono ports as inputs on the transmitter and five mono outputs on the receiver. Switches not included.

Wobble Switch

Adaptive Switch Laboratories, Inc.

Price: \$180.00

Device: switch

Disability: physical

The ASL 304A is a single function switch that has a light action spring and can be activated by contact from any direction.

Woodpecker

Jabbla

Price: \$105.00

Device: switch interface

Disability: learning, physical, speech Switch/joystick interface. One to five switches. Mouse control, action/reaction, input for Mind Express and KeyVit.

Xbox One/S/X and PS4/5 Game Controllers

RJ Cooper and Associates

Price: \$99239

Device: mouse emulator

Disability: physical

A variety of alternative game controllers used in conjunction with your Xbox Adaptive Controller (XAC) for all modern game platforms. Small Joystick (Boxed), Small Joystick (standalone), Full Button Pad, Button Pad, Large Joystick. All available with switch input(s) and/or large buttons that plug into the rear of the XAC.

SOFTWARE

101 Animations

RJ Cooper and Associates

Price: \$0.00

Special Skill: cognitive redevelopment, early childhood, adapted keyboard/switch access

Disability: cognitive, physical

Skill Level: infant/toddler, preschool, elementary

Operating System: Windows, Mac

Each activation of the switch causes one of 101 large, loud animations to be played. All Windows and Mac OS's supported.

2 + 2

RJ Cooper and Associates

Price: \$59.00

Special Skill: early childhood,

Disability: learning, physical, vision

Skill Level: elementary, secondary

Operating System: Windows, Mac

This is a talking math facts program. You can edit the facts list and use addition, subtraction, multiplication and division with numbers up to 999, even decimals. An easy-to-follow scan system is built in for single switch operation, if desired. 2+2 has drill mode, test mode and help function.

AAC Evaluation Genie

Tip Top Apps

Price: \$12.99

Special Skill: communication, scanning, single switch, multi switch, diagnostic

Disability: cognitive, physical, speech

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Operating System: iOS (Apple)

AAC Evaluation Genie is an informal diagnostic tool that is intended to assist speech-language pathologists and others with identifying skill areas that relate specifically to the language representation methods commonly found on augmentative communication systems. There are 13 subtests that can be administered with screening options available for each subtest. English and Spanish language options are available. Direct touch, single and two switch scanning access methods options are available.

ABC Maestro

E-Glas d.o.o.

Price: \$69.95 - \$129.95

Special Skill: language development,

Skill Level: preschool, elementary

Operating System: Windows

ABC Maestro is unique educational rehabilitation software for learning how to write, type, and read. It is primarily intended for students with special educational needs. ABC Maestro offers children faster learning through play. It has 14 fun activities divided into 3 categories - letters, words and numbers.

AbleLink JobQuest

AbleLink Smart Living Technologies

Price: \$2500.00 - \$2500.00

Special Skill: basic living skills, cognitive

redevelopment, vocational, , diagnostic, instructional management

Disability: cognitive

Skill Level: secondary, adult

Operating System: Other

AbleLink JobQuest is a web-based service that gives people with cognitive disabilities a voice in their own career path. Employing AbleLink's ATLAS survey engine and Data Reports system, JobQuest presents multiple job categories and gathers data in real time regarding the preferences of the individual. Students and adults with intellectual and developmental disabilities often have difficulty understanding the nature of various types of work. Pictures and words are limited in conveying tasks, the work environment, tools that might be used, or other elements that could affect job preference.

AbleLink Smart Living Service

AbleLink Smart Living Technologies

Price: \$40

Special Skill: basic living skills, cognitive redevelopment, vocational, , authoring

system, instructional management

Disability: cognitive, learning

Skill Level: elementary, secondary, adult

Operating System: Windows, iOS (Apple), Android

The Smart Living Service provides access to the Endeavor and Visual Impact apps, as well as the Smart Living desktop. Monthly subscribers receive ongoing training and support from AbleLink staff. Through initial assessment, consultation, setup, customization, and long-term implementation support, AbleLink will be there to help people achieve their goals.

AbleLink Smart Travel Service

AbleLink Smart Living Technologies

Price: \$60 - \$60

Special Skill: basic living skills, cognitive redevelopment, vocational, , authoring

system, instructional management

Disability: cognitive, learning

Skill Level: secondary, adult

Operating System: iOS (Apple), Android

The Smart Travel Service provides access to the AbleLink WayFinder app for cognitively accessible travel in the community. Monthly subscribers also receive ongoing training and support from AbleLink staff. Through initial assessment, consultation, setup, customization, and long-term implementation support, AbleLink will be there to help people achieve their travel goals.

AbleLink VantagePoint

AbleLink Smart Living Technologies

Price: \$2500.00 - \$2500.00

Special Skill: basic living skills, , diagnostic, IEP/IPP

Disability: cognitive, learning

Skill Level: secondary, adult

Operating System: Windows, iOS (Apple), Android

VantagePoint software includes four satisfaction surveys addressing key service

Access Algebra

Attainment Company, Inc.

Price: \$129.00 - \$399

Skill Level: secondary

Access Algebra is a research-based math curriculum for high school students who have moderate-to-severe developmental disabilities, including those with an intellectual disability or autism. The curriculum gives students access to content their high school peers are learning, but with the adaptations and support they may need to succeed. The curriculum accommodates students who have unique needs, including those who are nonverbal and those whose math skills are at an emergent numeracy level.

Animated Step-by-Steps®

Animated Step-by-Steps®

Price: \$5 - \$6

Special Skill: communication, early childhood, language development, single switch, speech output

Disability: cognitive, hearing, learning, physical, speech, vision

Skill Level: infant/toddler, preschool, elementary

Operating System: Windows, Mac, iOS

(Apple), Android

Animated Step-by-Steps® are animated PowerPoints designed to address literacy, language, AAC and a host of academic goals. Each page includes a series of animations. Read the text up to the star ... click ... and see an animation of what you just read. There are three and sometimes four versions of each resource (Regular, PCS, SymbolStix, VI) sold through TpT. VI versions are also sold through TeachSimple. comSymbol-Supported versions support a 'literacy-first' agenda, i.e., the symbols only appear after the page has been read and all the page animations have been triggered. Symbols are then conveniently available to perform Aided Language Stimulation while the step is being completed. <https://teacherspayteachers.com/Store/Bloomhttps://teachsimple.com ns;P>

App MyEar

App MyEar

Price: \$9.99

Special Skill: speech output, voice recognition

Disability: hearing

Skill Level: elementary, secondary, adult

Operating System: iOS (Apple)

Are you deaf and tired of lipreading?

Even the best lipreaders follow ~22% of their conversations - imagine what you're missing out on. MyEar App was developed by Gerald Isobe, deaf hall-of-fame golfer and his son, Brandon. Gerald grew up lipreading but became frustrated with understanding only 30% of what was being said and tired of asking people around him "what are you talking about". This app was created from those frustrations and it's an app he and others are using to communicate with their hearing colleagues, friends, and family.

App MyGroup

App MyEar

Price: \$1

Disability: hearing

Skill Level: elementary, secondary, adult

Operating System: iOS (Apple)

As a deaf person, have you ever found yourself as the only deaf person at a family dinner with no way to understand what's going on? As a family member, friend, or co-worker of a deaf person and wanting to connect but have no idea where to hire an ASL interpreter, no idea if an ASL interpreter is good or bad, App MyGroup is here to help. This app helps hearing

people communicate clearly with deaf friends/family members. This app is not for medical/legal use and we use only Registry of Interpreters for the Deaf (RID) certified interpreters in our network -- aka the best. If you're tired of seeing your deaf family member/friend left out of group conversations, then try out this app!

APP2Speak® AAC app

APP2speak

Price: \$179.99 - \$179.99

Special Skill: communication, speech output

Disability: speech

Skill Level: secondary, adult

Operating System: iOS (Apple), Android

APP2Speak® is a fully functional photo-based augmentative and alternative communication (AAC) app for individuals who experience difficulty speaking and communicating. Simply touch a pre-loaded photo to talk, or easily customize the app by adding your own photos or by taking a photo within the app itself. APP2Speak uses a pre-recorded (or any voice that you personally record) to speak your message to family and friends. The app provides easy-to-read instructions and includes a built-in "Help" system, and it requires no special training to create the optional "voice" and "photo" customizations. Custom pages are endless, Create and save one or more phrases per photo for convenient conversation. Create your Text-to-Speech page, with the option to save text to speech history of common words and phrases. APP2Speak AAC app is available on iOS and Android platforms.

AT-node for Access

Koester Performance Research

Price: \$0

AT-node for Access is a public, searchable collection of research on the use of computer access interfaces by people with disabilities. AT-node serves as an evidence-based tool for AT service providers and end users to facilitate informed selection of text entry interfaces. The data can be explored from multiple standpoints to

create benchmarks for text entry based on the type of interface, individual diagnosis, and body site being considered for interface activation. The information can inform interface selection, goal setting, and optimizing training for selected interfaces. Researchers and students can use AT-node to identify relevant publications and data on computer access, saving significant time and effort. It provides an efficient way of learning what has already been done and what gaps remain in the field. Available for free at

ATLAS Travel Readiness

Assessments

AbleLink Smart Living Technologies

Price: \$2500.00 - \$2500.00

Special Skill: basic living skills, cognitive redevelopment, vocational, diagnostic, instructional management

The Viscardi Center's Digital Accessibility suite of services, Website Accessibility, Document Accessibility, and Closed Captioning and Audio Description ensures existing, or newly created, websites, electronic documents, and video files are fully accessible to people with visual and physical disabilities, and aging individuals, using assistive technologies and screen reading software.

Dino-DOT

Academic Software, Inc.

Price: \$20.00

Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, adapted keyboard/switch access, scanning, single switch

Disability: cognitive, learning, physical

Skill Level: infant/toddler, preschool, elementary

Operating System: Windows

Connect the dots and colorful animated dinosaurs appear before your eyes. Number concepts, counting, sequencing skills and special perception are involved in play. Games can be selected using patterns of three, six, nine or 12 dots. Mode of play, difficulty level, auditory feedback and scan speed can be controlled manually.

Dino-FIND

Academic Software, Inc.

Price: \$20.00

Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, adapted keyboard/switch access, scanning, single switch

Disability: cognitive, learning, physical

Skill Level: infant/toddler, preschool, elementary

Operating System: Windows

Dino-Find is a game of concentration stimulating memory and pattern recognition and providing scanning practice. Dinosaurs are selected randomly. One to six matching pairs can be displayed. Switch users make selections using row/column or linear scanning. Mode of play, difficulty level, auditory feedback and scan rate can be controlled manually.

Dino-GAMES

Academic Software, Inc.

Price: \$60.00

Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, adapted keyboard/switch access, scanning, single switch

Disability: cognitive, physical

Skill Level: infant/toddler, preschool, elementary

Operating System: Windows

All 4 early-childhood educational games: DinoDOT (spatial-perception, counting & sequencing skills); DinoFIND and DinoLIKE (memory and pattern-recognition); and DinoMAZE (cause & effect and directionality learning). Adjust difficulty level and other settings for each game independently. DinoGAMES work with keyboard, mouse, or external single-switch and provide early scanning practice opportunities.

Dino-LIKE

Academic Software, Inc.

Price: \$20.00

Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, adapted keyboard/switch access, scanning, single switch

Disability: cognitive, learning, physical

Skill Level: infant/toddler, preschool, elementary

Operating System: Windows

Single switch users select dinosaurs identical to a target dinosaur. The discrimination level can be set manually, choosing a match and two distracters, a match and one distracter, or the match alone. Color, shape and orientation of dinosaurs are

used to enhance pattern matching skills. Can be controlled manually.

Dino-MAZE

Academic Software, Inc.

Price: \$20.00

Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, adapted keyboard/switch access, scanning, single switch

Disability: cognitive, learning, physical

Skill Level: infant/toddler, preschool, elementary

Operating System: Windows

Colorful, motivating exercises where dinosaur characters move through mazes to reach goals with reinforcement through music and animation. Single switch users choose between cause and effect activities or games involving decisions about which directions the animated characters should go to get from start to finish. Can be controlled manually.

Discrete Trial Trainer - US Version

Accelerations Educational Software

Price: \$99.00 - \$499.00

Special Skill: basic living skills, communication, early childhood, eye-hand coordination, language development, vocational, single switch, multi switch

Disability: cognitive, learning

Skill Level: preschool, elementary

Operating System: Windows

The Discrete Trial Trainer is an automated teaching tool for independent learning by individuals developmentally 2 to 9 years old. The Discrete Trial Trainer is a robust and affordable virtual teaching assistant. The DT Trainer was created based on methods developed to educate our most difficult to educate individuals: children with moderate to severe autism. However, the DT Trainer's configurability also makes it beneficial for children with other learning disabilities, and even with typically developing young children. Behavioral methods have been proven to be effective for teaching a wide range of individuals including those with autism. The software motivates individuals to perform tasks which they may not want to learn or may find difficult to learn. There are hundreds of colorful, interesting, and fun reinforcers to pick from which engage even difficult to motivate individuals.

DocsPlus

Crick Software, Inc.

Price: \$660.00 - \$5940.00

Special Skill: basic living skills, communication, language development, vocational, adapted keyboard/switch access, optical character recognition, scanning, single switch, multi switch, speech output, authoring system

Disability: cognitive, hearing, learning, physical, speech, vision

Skill Level: secondary

Operating System: Windows, Mac

DocsPlus enables high school students of all abilities to write independently by providing speech feedback, word prediction and the unique Wordbars.Key features: Speech feedback - each time a sentence is completed, it is automatically read aloud in a clear, human-sounding voice. Word prediction - DocsPlus' intelligent word predictor suggests words based on the context of the student's writing, enabling them to give their full attention to what they want to write and encouraging them to use more adventurous vocabulary. Word Banks and writing frames - bring curriculum writing tasks within the reach of all learners by giving instant point-and-click access to specific vocabulary for their current writing task. Workspace - a built-in planning tool to help students prepare for writing. Students can manipulate and link words, pictures and sounds on their Workspace. DocReader - this will read aloud any PDF or Word document, providing equal access to worksheets, exam papers and more. Exam access - DocsPlus can also be used by many learners who require additional access arrangements for tests and exams.

Emotions Color Wheel and Social Programs

Virtual Reality Aids, Inc

Price: \$0

Special Skill: basic living skills, cognitive redevelopment, communication, language development, instructional management

Disability: cognitive, learning, speech

Skill Level: preschool, elementary, secondary, adult

Operating System: Windows, Mac, iOS (Apple), Android, Chrome

Emotions Color Wheel is an example of our online social programs. Emotions Color Wheel visually groups hundreds of emotions with feelings, showing faces on the wheel for each emotion. It discusses concepts for feelings such as how people often have a home emotion that colors how they understand situations. Printable activities and versions of the wheel are used in classrooms for discussions and generalizing for each child. Other material to support social learning include a Social Skills Toolbox for improving communication skills, Social Emotional Skills classroom activities and worksheets, and free printable Picture Cards for non-verbal communication. Programs are free at do2learn.com, which never displays ads or tracks users. Developed under NIH funding, site programs have been tested and used in schools for over 25 years.

Operating System: Windows, Mac, iOS (Apple), Android, Chrome, Other

Functional Skills System™; is a life skills assessment and curriculum system that utilizes video modeling to help learners achieve independence in their homes, schools, communities and workplaces. Using real videos makes for quicker generalization of the concepts being taught, and with a video library of over 5,500 videos to choose from, there's something for everyone. Whether the user needs help with basic signs & words, hygiene, grooming, dress, social skills, or even core vocabulary, our system uses real-life video (not cartoons, drawings, animations or symbols) to communicate the concept clearly and effectively..

Funfimics

Read Naturally

Price: \$185.00 - \$185.00

Olelo Captioned Calls

MachineGenius

Price: \$0

Special Skill: , telecommunications

Disability: hearing

Operating System: iOS (Apple), Android

An easy-to-use captioned call app to help people with hearing loss use the phone.

One Minute Reader

Read Naturally

Price: \$8

Special Skill: language development, speech output

Disability: learning, speech

Skill Level: elementary, secondary

Operating System: Windows, Mac, iOS (Apple), Android, Chrome

One Minute Reader uses the same research-based strategies as Read Naturally's classroom programs but can be used independently by students at home. Use One Minute Reader to build fluency, vocabulary, and comprehension using a fun and effective system.

OneWay

Applied Human Factors, Inc.

Price: \$75.00 - \$149.00

Special Skill: eye-hand coordination, adapted keyboard/switch access,

scanning, single switch, multi switch

Disability: physical

Skill Level: preschool, elementary, secondary, adult

Operating System: Windows

Sometimes people who use switch scanning are capable of more, they just cannot use a standard pointer. Pointers require simultaneous control in two dimensions, which is very difficult. OneWay allows the user to work on one dimension at a time concentrating on the movements they do best.

OnScreen with CrossScanner

Innovation Management Group, Inc.

Price: \$299.95 - \$5000.00

Special Skill: basic living skills, eye-hand coordination, vocational, adapted keyboard/switch access, scanning, single switch, multi switch, speech output

Disability: learning, physical, vision

Skill Level: preschool, elementary,

secondary, adult

Operating System: Windows

Complete switch / scanning capabilities for controlling all Windows functions and Windows applications includes OnScreen and WordComplete. If a user cannot work with traditional pointing devices like a mouse, a head mouse or joystick, switch scanning may be the best alternative. Supports Windows 2000 thru Windows 10 (32/64 bit)

OnScreen with WordComplete

Innovation Management Group, Inc.

Price: \$119.95 - \$5000.00

Special Skill: basic living skills, communication, eye-hand coordination, vocational, adapted keyboard/switch access, scanning, single switch, speech output

Disability: learning, physical, vision

Skill Level: infant/toddler, preschool,

elementary, secondary, adult

Operating System: Windows

Infinitely sizable keyboards; Network Logon; Magnify or Highlight keys; Text-to-Speech; Dwell; Hide and See turns off specific keys; Smart Window repositions keyboards off applications; TurnAway pauses headmouse devices when user looks away; Scanner provides switch scanning within OnScreen; WordComplete provides word prediction. Disability: cognitive, learning, speech, vision

Skill Level: elementary, secondary, adult

Operating System: Windows, Mac, iOS (Apple), Android, Chrome, Other

ReadSpeaker assistive technology helps students improve comprehension, motivation, and stay at peer levels. Our seamless solutions bring audio to the entire learning landscape and allow schools to quickly and easily integrate audio across all platforms and content.

Responder2

Compusult Limited

Price: \$5995.00 - \$9995.00

Special Skill: large print, speech output

Disability: cognitive, learning, physical, vision

Skill Level: secondary, adult

Operating System: Windows

Responder2 is a speech-enabled machine vision system that assists blind employees. For example, Responder2 acts as a dedicated alarm monitoring system in medical centers employing blind switchboard operators. Responder2 detects whenever alarms occur, identifying them via speech output, thus allowing blind employees to swiftly and accurately respond to critical situations.

Revenge of Cause & Effect Sights & Sounds

Marblesoft

Price: \$4.99 - \$30.00

Special Skill: cognitive redevelopment, early childhood, single switch, multi switch

Disability: cognitive, physical

Skill Level: infant/toddler, preschool

Operating System: Windows

This fourth entry into the popular Sights & Sounds Series includes all new animated activities and musical themes. It trains three different switch modes and, like its sister programs, is great for all ages.

Right-Hear

RightHear

Price: \$0

Special Skill: basic living skills,

Disability: vision

Skill Level: elementary, secondary, adult

Operating System: iOS (Apple), Android

RightHear is an advanced accessibility solution that allows its users to hear where they are, what's there, and what's around

them simply by pointing their smartphone in different directions.

RoutineFactory

RoutineFactory

Price: \$11.95 - \$99.95

Special Skill: basic living skills, vocational, large print, speech output

Disability: cognitive, hearing, learning, physical, speech

Skill Level: elementary, secondary, adult

Operating System: Windows, Mac, iOS (Apple), Android, Chrome

RoutineFactory increases confidence and independence by stimulating self-reliance and self-direction in the person served.

RoutineFactory is composed of two assistive technologies that work together as one. The Information Board is an innovative visual schedule and the app works as a robust ADL prompting tool.

Routines

Cognitopia

Price: \$299 - \$3999

Special Skill: basic living skills, cognitive redevelopment, communication, vocational, scanning, speech output, voice recognition, IEP/IPP, instructional management

Disability: cognitive, hearing, learning, physical, speech, vision

Skill Level: preschool, elementary, secondary, adult

Operating System: Windows, Mac, iOS (Apple), Android, Chrome, Other

Routines makes it easy to create multimedia task analyses. Every routine has a QR code that can be printed, placed in the environment, and scanned with a mobile device to display the routine, providing location-specific task-completion support. Routines are shareable with multiple users, reducing work for teachers and supporters.

Skill Level: elementary, secondary, adult

Operating System: Windows, Mac

uPAR helps your team make the right decisions on reading accommodations and helps students perform their best in inclusion classrooms and during high-stakes testing. uPAR is the smarter, faster, data-driven way to assess students for reading accommodations. uPAR is the only automated tool available that improves accommodation decisions!

VB-MAPP App

Data Makes the Difference, LLC

Price: \$0.00

Special Skill: basic living skills, cognitive redevelopment, communication, early childhood, language development, diagnostic, IEP/IPP, instructional management

Disability: cognitive, learning, speech

Skill Level: infant/toddler, preschool, elementary

Operating System: Windows, Mac, iOS (Apple), Android, Chrome

The VB-MAPP App is an app for the iPad that allows special educators, psychologists, and parents alike to conduct what is widely considered to be the go to assessment instrument for children and adolescents with developmental delays particularly in the speech and language area.

Vehicle Jigsaw - Assemble 6 pieces of a picture. Age 2.5+.

STEP BY STEP

Price: \$0

Special Skill: early childhood, adapted keyboard/switch access, single switch, multi switch, speech output

Skill Level: infant/toddler, preschool

Operating System: iOS (Apple)

Welcome to "Vehicle Jigsaw". This educational app is designed for children aged 2.5 and above. Here children can learn to piece together a well known picture of a vehicle. It is fun, and it helps them develop spatial cognition skills and visual perception skills. STEP BY STEP is a professional EdTech studio that focuses on developing educational apps for children aged 1 to 5 years old. During these critical years, children enter a new learning stage every few months. Our apps support and strengthen the development of crucial skills for each learning stage. This way we guide your children, step by step, throughout this entire age range.

Vehicle Maze - Find a route through the maze

STEP BY STEP

Price: \$0.00 - \$2.99

Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, adapted keyboard/switch access, single switch, multi switch, diagnostic

Disability: cognitive, learning, physical

Skill Level: infant/toddler, preschool

Children learn to navigate through a maze.

Vital

Vital

Price: \$399

Special Skill: optical character recognition, speech output

Disability: learning, vision

Skill Level: preschool, elementary, secondary

Operating System: Windows, Mac, Android

From tables to graphs to maps, create digital, accessible learning content with Vital that can be explored by students with visual impairments on tablets. At Vital, we believe that all students should be provided truly accessible learning content. Whether created for a student with a visual impairment, ADHD, autism or dyslexia, students can explore and learn through sensory channels that best fit their learning style. Students with visual impairments can explore the tablet through their sense of touch by feeling vibrations, much like exploring tactile graphics, and listen for audio cues and text-to-speech. Learn more at www.vital.education.

Vocabulary Fitness

Merit Software

Price: \$79.00

Special Skill: cognitive redevelopment, communication, language development,

Disability: cognitive, learning

Skill Level: elementary, secondary, adult

Operating System: Windows

Vocabulary Fitness provides students with interactive vocabulary lessons to help them master commonly confused and misused words. After an assessment, students work at their own pace and receive help and contextual feedback throughout. Scores are kept in a record management system that allows teachers to view and print results.

Vocabulary Stretch

Merit Software

Price: \$79.00

Special Skill: cognitive redevelopment, language development,

Disability: cognitive, learning

Skill Level: elementary, secondary, adult

Operating System: Windows, Mac

Helps students recognize words in different contexts and understand the derivation of many English words. Students

advance as they demonstrate readiness. A convenient record management system tracks scores and allows teachers to view detailed reports. Designed for students in grades 4 through 10 and can be used by older students.

Vocal Assessment

Tiger DRS, Inc.

Price: \$695 - \$895

Special Skill: language development, speech output, diagnostic

Disability: speech

OTHER AT

10 Foot TriFold Portable Wheelchair Ramp

Express Ramps

Price: \$754.99 - \$754.99

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult
Disability: physical

The Advantage Tri-Fold Folding Wheelchair Ramp from EZ-Access offers the length required for wheelchairs and scooters to access mini and full-size vans, go up a number of steps, or raised landings. Advantage Tri-Fold Ramps split into 2 pieces, have anti-slip coatings, and feature bottom transition plates that make loading a breeze.

2-Point Padded Hip Belt

Bodypoint Inc.

Price: \$60.00 - \$129.00

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Highest quality materials and advanced design details make Bodypoint belts the top choice of therapists and wheelchair users around the world. Our padded hip belt with two points of attachment is built for maximum functionality, durability, and all-day user comfort. Three pull styles and five buckle styles accommodate individual needs. Machine wash and dry.

4 Switch Proximity Tray Array

Adaptive Switch Laboratories, Inc.

Price: \$4480.00 - \$5316.00

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

The ASL 106 offers four proximity sensors that allow the driver to operate a power wheelchair. These sensors can be positioned inside a tray or at any available switch site. It was designed for those who have problems maintaining a switch that requires pressure or contact.

4-Point Padded Hip Belt

Bodypoint Inc.

Price: \$82.00 - \$167.00

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Four points of attachment on this belt ensure the pelvis stays in an aligned, stable position, secure against the wheelchair seat and back supports. Primary straps position the belt while secondary straps anchor it into position. Bodypoint's high quality materials and design details ensure maximum functionality, durability, and all-day comfort. Three pull styles and five

buckle styles accommodate individual needs. Machine wash and dry.

5 Foot TriFold Portable Wheelchair Ramp

Express Ramps

Price: \$324.99 - \$324.99

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult
Disability: physical

The Advantage Tri-Fold Folding Wheelchair Ramp from EZ-Access offers the length required for wheelchairs and scooters to access mini and full-size vans, go up a number of steps, or raised landings. Advantage Tri-Fold Ramps split into 2 pieces, have anti-slip coatings, and feature bottom transition plates that make loading a breeze.

5 Little Men in a Flying Saucer with BSL Signs Kindle

Co-Sign Communications (inc DeafBooks.co.uk)

Price: \$3.24 - \$3.24

Product Type: adapted play/manipulative, instructional material, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary

Disability: cognitive, hearing, learning, speech

Available from amazon.com Thirty-five pages in fixed page landscape format to keep the relevant text with the signs. Part of a series to promote essential early learning skills. Well-loved counting Nursery Rhyme with signs to enjoy with your child. Double-tap the sign graphics for pop-up text describing the movements.

6 Foot TriFold Portable Wheelchair Ramp

Express Ramps

Price: \$249.95 - \$249.95

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult
Disability: physical

The Advantage Tri-Fold Ramp from EZ-Access offers the length required for wheelchairs and scooters to access mini and full-size vans, go up a number of steps, or raised landings. Advantage Tri-Fold Ramps split into 2 pieces, have anti-slip coatings, and feature bottom transition plates that make loading a breeze.

6610 CHEST SUPPORT

Danmar Products, Inc.

Price: \$150.00

Product Type: seating/positioning/mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, physical

A core of moldable material surrounded in soft foam provides a comfortable chest support that can form to follow body

contours. There are strap attachments on the Yokes for wheelchairs, travel chairs and strollers, and the lap belt has pivot mounts for optimal adjustability.

6611 CLEAR CHEST SUPPORT

Danmar Products, Inc.

Price: \$130.00

Product Type: seating/positioning/mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, physical

Flexible yet durable, this easy-to-use design has no bulky hardware and is hardly noticeable! It offers positioning for individuals who benefit from having their upper body stabilized and hips held at a proper angle. It can be used with most standard, high back or custom wheelchairs and strollers.

6615 SPLIT CLEAR CHEST SUPPORT

Danmar Products, Inc.

Price: \$130.00

Product Type: seating/positioning/mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, physical

This flexible yet durable anterior support provides a firm fit, and is designed to be easy on and off. It can be adjusted for seasonal clothing changes and growth. Made of heavy duty 1/8" thick clear PVC vinyl, it will last much longer than harnesses made of fabric.

6620 MODULAR CHEST SUPPORT

Danmar Products, Inc.

Price: \$195.00

Product Type: seating/positioning/mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, physical

We have surrounded a core of moldable material with soft foam to create a chest support that is comfortable and can be formed to follow body contours. The yoke arms and lap belt pivot, allowing for tailored adjustments for ultimate comfort.

6626 TRUNK SUPPORT SYSTEM

Danmar Products, Inc.

Price: \$150.00

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, physical

Designed for use in a wheelchair or custom seating system, this system provides firm support by using an inner core of molded nylon, with a vinyl-coated soft form cover for comfort and ease of cleaning, and can

be permanently mounted to the back of a chair.

6760 UTENSIL HANDLES

Danmar Products, Inc.

Price: \$23.00

Product Type: adapted play/manipulative, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical
Versatile and comfortable, these handles will hold eating utensils, personal hygiene items, activity brushes and crayons. Specially contoured sections fit into the hand and have a slide-buckle strap that can be easily adjusted for fit. Available in Blue, Orange or Red and sizes Small or Large.

6762 THERAPY HANDLES

Danmar Products, Inc.

Price: \$26.00

Product Type: adapted play/manipulative, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical
Versatile and comfortable, these handles will hold eating utensils, personal hygiene items, activity brushes and crayons. They come with a 1" foam extension to position the thumb and help with grip. Utensils can be placed in the end of the handle or in the thumb extension.

6763 HANDY HELPERS

Danmar Products, Inc.

Price: \$9.95

Product Type: adapted play/manipulative, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical

This simple, snap-on device allows a person to self-feed. It's easy to use, soft and comfortable, and comes with a spoon as shown. The vinyl-coated foam is easy to clean with warm soapy water.

6764 KNOB HOLDER

Danmar Products, Inc.

Price: \$13.00

Product Type: adapted play/manipulative, instructional material, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical

This attachment fits into the end of the Utensil or Therapy Handle, and is used to positioning a writing instrument. Using this holder makes a pen or pencil's angle adjustable, which makes writing easier. and, no matter what position the hand is in, the user can see what is being drawn or written.

6766 TOY HOLDER

Danmar Products, Inc.

Price: \$17.00

Product Type: adapted play/manipulative, learning aid, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical
This simple, snap on device allows an individual to interact with a small toy placed in his/her hands. Velcro bands are used to hold a toy in place, while webbing attaches around the palm or wrist. It can be adjusted to fit any size. Sold as a pair.

6767-A COMBO UTENSIL HANDLE & KNOB HOLDER

Danmar Products, Inc.

Price: \$39.00

Product Type: adapted play/manipulative, learning aid, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical
This all-in-one tool combines the Utensil Handle (#6760) and the Knob Holder (#6764) with Anchor Strap.

6767-B COMBO THERAPY HANDLE AND KNOB HOLDER

Danmar Products, Inc.

Price: \$42.00

Product Type: adapted play/manipulative, learning aid, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical
This all-in-one tool combines the Therapy Handle (#6762) and the Knob Holder (#6764) and Anchor Strap.

6770 MIBOWL HOLDER

Danmar Products, Inc.

Price: \$45.00

Product Type: instructional material, learning aid, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical
This new design makes self-feeding easier than ever! Suction cups hold our foam bowl holder in place, preventing movement around the table. Use with our Handy Helpers (6763) for even more eating independence. The bowl is included and our vinyl-coated foam is easily cleaned with warm soapy water.

6771 MIPLATE HOLDER

Danmar Products, Inc.

Price: \$45.00

Product Type: adapted play/manipulative, learning aid, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical
This new design uses suction cups to hold the plate in place, preventing movement around the table, making self-feeding easier than ever! Use with our Handy Helpers (6763) for even more eating independence. Our vinyl-coated foam is easily cleaned with warm soapy water.

6775 MITABLE TOPPER

Danmar Products, Inc.

Price: \$55.00

Product Type: adapted play/manipulative, seating/positioning/mobility, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical
This soft foam table topper makes hard surfaces safer than ever, protecting heads and hands from making contact while also protecting table surfaces during art activities. The foam is vinyl-coated and easy to clean with warm soapy water.

6780 MITABLE TOPPER KIT

Danmar Products, Inc.

Price: \$99.00

Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical
Comes complete with Table Topper Pad, Bowl or Plate Holder, and Handy Helper with spoon. The suction cups on the Bowl or Plate Holder sticks right to the Table Topper Pad and will not move. All components are vinyl-coated and easy to clean with warm soapy water.

6785 MIMITTS

Danmar Products, Inc.

Price: \$105.00

Product Type: adapted play/manipulative, seating/positioning/mobility, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, physical
Our all-foam mitts are specially designed to help absorb and deflect the impact when an individual strikes out. They can be applied and secured quickly with Velcro straps, protecting both the wearer from injuring themselves as well as possibly injuring person(s) nearby; clean with warm soapy water.

6809 HENSINGER WITH HIGH BACK

Danmar Products, Inc.

Price: \$130.00

Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical, speech, vision
Revolutionary in the world of cervical collars, this soft but supportive foam collar braces the head by supporting the occiput and jawline, and is 1" taller in the back. Helping to maintain mid-line head positioning results in improved breathing, swallowing and simplified feeding and aids with social interaction and awareness.

6810 HENSINGER HEAD SUPPORT

Danmar Products, Inc.

Price: \$125.00

Product Type: seating/positioning/mobility, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical, speech, vision
Revolutionary in the world of cervical collars, the soft yet supportive foam is designed to brace the head by the jawline. It can be used with a chest support or mounted to a permanent seating system.

6815 HENSINGER HEAD SUPPORT WITH MOUNT BAR

Danmar Products, Inc.

Price: \$152.00

Product Type: seating/positioning/mobility, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical, speech, vision
Social interactions and learning skills may be achieved more easily if the head is comfortably positioned while using feeder seats. The preformed bar has a Hensinger Head Support (6810 or 6809) attached. Specify size of feeder seat and Hensinger when ordering.

6826 ANTERIOR HEAD SUPPORT

Danmar Products, Inc.

Price: \$126.00

Product Type: learning aid, seating/positioning/mobility, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical, speech, vision
Help to combat chin drop with this head support which provides firm yet gentle lifting of the chin, and lateral support of the head. There is a padded roll around the rear strap for a comfortable finish.

6828 SIDE-OPENING HEAD SUPPORT

Danmar Products, Inc.

Price: \$145.00

Product Type: seating/positioning/mobility, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, physical, speech, vision
Secure, soft and very supportive, this head support opens on the side for easy on/off. It provides firm yet gently lifting of the chin, as well as lateral and occipital support of the head. The vinyl coating is easily cleaned with warm soapy water.

6833 SWIRL COLLAR

Danmar Products, Inc.

Price: \$69.00

Product Type: learning aid, seating/

positioning/mobility, sensory stimulation
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical, speech, vision
This swirl of soft foam wraps around the neck and has an adjustable Velcro closure in the rear, which makes fitting a breeze and encourages easy movement from side-to-side. Used for minor to moderate support, the Swirl can be used with any seating system and by individuals who are ambulatory.

6855 SOFT DEFLECTOR

Danmar Products, Inc.

Price: \$100.00

Product Type: seating/positioning/mobility
Skill Level: elementary, secondary, adult
Disability: learning, physical, vision
This small, lightweight and discreet toileting aid can attach to any toilet seat; snap on the front or clamp to the rim. The vinyl-coated foam is easy to clean with warm soapy water, and fits onto our Toilet Seat Cover with Reducer Ring (#6850).

6856 PERSONAL DEFLECTOR

Danmar Products, Inc.

Price: \$108.00

Product Type: seating/positioning/mobility
Skill Level: elementary, secondary, adult
Disability: physical
For standard deflectors that are too bulky and make toileting difficult, our personal deflector with a flexible preformed waistband, holds our soft deflector in place. Can be adjusted up and down, as well as side-to-side, and is easily cleaned with warm soapy water.

6858 PRIVACY APRON

Danmar Products, Inc.

Price: \$120.00

Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility
Skill Level: preschool, elementary, secondary, adult
Disability: cognitive, learning, physical
Made to fit both open front and round styles of standard toilet seats (and our #6850 Toilet Seat Cover with Reducer Ring), this toileting aid can be mounted using a bracket or clamped onto the rim. Our germ resistant, vinyl-coated foam is easy to clean with warm soapy water.

6860 CHANGING STATION KIT

Danmar Products, Inc.

Price: \$164.95

Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation
Skill Level: elementary, secondary, adult
Disability: cognitive, hearing, learning, physical
Our germ resistant, vinyl-covered foam is soft and easy to clean using warm soapy water. Soft and cushiony, the pad and

forehead/chin rest add comfort while the J-Clips hold everything in place. Contains Changing Pad, Chin/Forehead Rest and J-Clips.

7 Foot TriFold Portable Wheelchair Ramp

Express Ramps
Price: \$433.99 - \$433.99

Product Type: seating/positioning/mobility
Skill Level: elementary, secondary, adult
Disability: physical

The Advantage Tri-Fold Portable Wheelchair Ramp from EZ-Access offers the length required for wheelchairs and scooters to access mini and full-size vans, go up a number of steps, or raised landings. Advantage Tri-Fold Ramps split into 2 pieces, have anti-slip coatings, and feature bottom transition plates that make loading a breeze.

8 Foot TriFold Portable Wheelchair Ramp

Express Ramps
Price: \$549.99 - \$549.99

Product Type: seating/positioning/mobility
Skill Level: elementary, secondary, adult
Disability: physical

The Advantage Tri-Fold Folding Wheelchair Ramps from EZ-Access offers the length required for wheelchairs and scooters to access mini and full-size vans, go up a number of steps, or raised landings. Advantage Tri-Fold Ramps split into 2 pieces, have anti-slip coatings, and feature bottom transition plates that make loading a breeze.

8720 DELTA SWIM SYSTEM

Danmar Products, Inc.
Price: \$120.00
Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation

Skill Level: elementary, secondary, adult
Disability: cognitive, hearing, learning, physical

This component system is designed to aid in progressive swimming development, perfect for ambulatory individuals with postural balance and arm control. As swimming skills improve, pads can be removed to help achieve independence.

8721 PAD PLUS

Danmar Products, Inc.
Price: \$45.00
Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation

Skill Level: elementary, secondary, adult
Disability: cognitive, hearing, learning, physical

Offered to modify the Delta Swim System (#8720) and the Tri-Swim (#8728), the Pad Plus may be attached to the front section to add buoyancy and raise the body position in the water.

8723 SECTIONAL RAFT

Danmar Products, Inc.
Price: \$240.00
Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical

For individuals who are insecure in the water or non-ambulatory, the Sectional Raft supports and cradles the body, while allowing water to flow around the body, enabling interaction with the environment and helping to reduce anxiety.

8724 SWIM RINGS

Danmar Products, Inc.
Price: \$87.00
Product Type: adapted play/manipulative, instructional material, learning aid, seating/positioning/mobility, sensory stimulation

Skill Level: elementary, secondary, adult
Disability: cognitive, hearing, learning, physical

Create your own personal flotation device with these versatile rings! Sets may be snapped together for neck, chest, torso, or body support, and the individual rings can be added or removed to adjust for comfort, and to increase or decrease flotation.

8725 HEAD FLOAT

Danmar Products, Inc.
Price: \$105.00
Product Type: adapted play/manipulative, instructional material, learning aid, seating/positioning/mobility, sensory stimulation

Skill Level: preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical

Independence for everyone- there is no need to support the head manually, and hands are free! Superb cushioning allows the head to rest without pressure on the spinal column, which encourages neutral positioning.

8727 DOLPHIN FLOAT SYSTEM

Danmar Products, Inc.
Price: \$172.00
Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation

Skill Level: elementary, secondary, adult
Disability: cognitive, hearing, learning, physical

Designed for physically involved individuals who have head/neck control, but may need to compensate for uneven weight. Using the side pads helps minimize a user's tendency toward lateral rotation, and the front chest pad provides additional lift and is removeable.

8729 STABILIZER BAR

Danmar Products, Inc.
Price: \$120.00

Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation

Skill Level: elementary, secondary, adult
Disability: cognitive, hearing, learning, physical

Helps maintain balance and equilibrium during walking/gaiting pool exercises. It is also great for resting on or extending out in front for kicking drills, as well as workouts for individuals with mild arthritis. The amount of flotation can be adjusted by adding or removing rings.

8730 COMFORT MAT

Danmar Products, Inc.
Price: \$160.00
Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation

Skill Level: preschool, elementary, secondary, adult
Disability: cognitive, learning, physical

Designed for use in the many situations where foam padding would be welcome. Place at the pool's edge to ease entry/exit. In the locker room, they insulate against the cold tile floors, and provide changing comfort. They make a great flotation raft too.

8735 HEAD FLOAT & STABILIZER BAR

Danmar Products, Inc.
Price: \$200.00
Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation

Skill Level: preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical

This combination helps keep the face out of the water, and works well not only for swimmers with Athoid CP but also for those who roll sideways and backwards. Now they can stretch and turn their heads when interacting with others without tipping or rolling.

9708 SOFT COMFY CAP

Danmar Products, Inc.
Price: \$96.00
Product Type: adapted play/manipulative, instructional material, learning aid, seating/positioning/mobility, sensory stimulation, telecommunications

Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, speech, vision

Our lightest, coolest helmet yet! This stylish, head-hugging design made of compression-molded foam offers a uniquely comfortable fit, weighing only 3 ounces. It provides maximum ventilation and retains limited body heat, and is easy to clean with warm, soapy water.

9709 Hard Top Comfy Cap

Danmar Products, Inc.
Price: \$131

Product Type: adapted play/manipulative, instructional material, learning aid, seating/positioning/mobility, sensory stimulation, telecommunications

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

Our lightest, coolest Hard Shell Helmet yet! This 11.5 ounce helmet is made of a compression-molded inner foam liner attached to a hard plastic exterior. The stylish design is extremely well-ventilated and retains limited body heat. It's easy to clean, using warm soapy water.

9817 HALO HELMET

Danmar Products, Inc.
Price: \$174
Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

Ideal for individuals who do not need full head coverage. A band of 5-8" soft, vinyl-coated foam surrounds the head at the forehead level, and extends down to cover the temporal and occipital areas. It's easy to clean with warm soapy water. Average weight is 10 ounces.

9820 SOFT SHELL HELMET

Danmar Products, Inc.
Price: \$123
Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

This lightweight helmet is constructed out of 1/2" thick shock-absorbing foam and is fully ventilated without compromising head coverage. It's vinyl-coated with our Fabricat which does not allow for bacteria growth, and is easy to clean with warm soapy water. Average weight is 8 ounces.

9821 HARD SHELL HELMET

Danmar Products, Inc.
Price: \$160
Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

This headgear is both comfortable and effective in reducing the risk of injury. A strong polyethylene shell covers a shock-absorbing foam liner which is vinyl-coated and easy to clean with warm soapy water. It allows for ventilation without compromising head coverage. Average weight is 17 ounces.

9822 HARD SHELL HELMET WITH FACE GUARD

Danmar Products, Inc.
Price: \$260

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

This protective helmet features a shock-absorbent foam liner which is riveted to a strong polyethylene outer shell. A clear polycarbonate face guard is attached to the outer hard shell. There is an eye opening for an unobstructed view and a mouth opening for maximum ventilation. Weight averages 25 ounces.

9823 CHIN GUARD

Danmar Products, Inc.

Price: \$50

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

This 1/2" thick foam guard fits comfortably over the chin area and can be worn with every helmet except for the 9822 Hard Shell Helmet with Face Guard. It is soft yet shock-absorbent and easily cleaned with warm soapy water. Weight averages 1.5 ounces.

9824 HARD SHELL HELMET WITH FACE BAR

Danmar Products, Inc.

Price: \$208

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

A clear 2" wide polycarbonate bar is securely attached to our 9821 Hard Shell Helmet so that it can't move, to reduce the risk of injury to the facial area. The shock absorbent foam liner is vinyl-coated and the entire helmet is easy to clean with warm soapy water. Weight averages 21 ounces.

9825 DELUXE HARD SHELL HELMET

Danmar Products, Inc.

Price: \$171

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

This sporty version of our 9821 Hard Shell Helmet adds a decorative visor and rubber chin cup, adding style and flair. Our shock-absorbent foam is riveted to a strong, polyethylene outer hard shell, allowing ventilation without compromising head coverage. Easily cleaned with warm soapy water. Weight averages 18 ounces.

9829 FULL COVERAGE HELMET

Danmar Products, Inc.

Price: \$152

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

This lightweight helmet is constructed out of 5-8" vinyl-coated foam and covers more of the temporal and cheek areas, as well as the area around the ears and nape of the neck. It's easy to clean with warm soapy water. Average weight is 10 ounces.

9830 CLEAR HELMET

Danmar Products, Inc.

Price: \$220.00

Product Type: adapted play/manipulative, instructional material, learning aid, seating/positioning/mobility, sensory stimulation, telecommunications

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

This clear polycarbonate helmet is well-ventilated and edged with soft foam. We include 8 moveable pads that can be used to adjust the sizing and elevate specific areas of the helmet away from wound sites. It is easily cleaned with warm soapy water.

9836 NEWBORN CAP

Danmar Products, Inc.

Price: \$83

Product Type: seating/positioning/mobility

Skill Level: infant/toddler

Disability: cognitive, hearing, learning, physical, speech, vision

This ultra-lightweight helmet is made from soft, 3/8" shock-absorbent foam and is fully ventilated. It's coated in vinyl so it's easy to clean with warm soapy water. A soft chinstrap holds the cap in place, and the ribbon on the front allows for moderate growth.

9910 SOFT COMFY CAP WITH DESIGN

Danmar Products, Inc.

Price: \$142.00

Product Type: adapted play/manipulative, instructional material, learning aid, seating/positioning/mobility, sensory stimulation, telecommunications

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

Our lightest, coolest helmet yet! This stylish head-hugging design of compression-molded foam offers a uniquely comfortable fit, and weighs just 3 ounces. It provides maximum ventilation and retains limited body heat, and is easy to clean with warm soapy water. Choose from Butterfly or Camouflage design.

Logically categorized by their parts of speech, TTMT Core + Fringe Communication Boards inspire confidence while building skills to engage in conversation and enhance literacy;

Access English I

Attainment Company, Inc.

Price: \$149.00

Product Type: instructional material

Skill Level: secondary

Disability: cognitive, learning

Access English addresses the needs of readers or nonreaders; verbal or nonverbal students with or without visual impairments; or abstract, concrete, or object learners. Covers 6 units of study, including fictional literature, informational text, poetry, and music. Aligns to high school ELA content using grade-appropriate literature; includes ideas for conversation, research, and transition activities.

Access Language Arts Grades 3-5

Attainment Company, Inc.

Price: \$495.00

Product Type: adapted play/manipulative, instructional material, learning aid

Skill Level: elementary

Disability: cognitive, learning, physical, speech

Access English Language Arts Grades 3, 4, 5 is a research-based curriculum for elementary students who have moderate-to-severe developmental disabilities, including those with an intellectual disability and autism. Access English Language Arts Grades 3, 4, 5 gives elementary students access to English Language Arts (ELA) concepts their peers are learning.

Access Language Arts: WRITE Curriculum

Attainment Company, Inc.

Price: \$349.00

Product Type: adapted play/manipulative, instructional material, learning aid

Skill Level: secondary

Disability: cognitive, learning, physical, speech

The Access Language Arts: WRITE Curriculum provides a blended approach to writing instruction delivered through traditional print components, software, and an iPad app. Students are supported step by step in constructing grade-aligned opinion paragraphs about eight adapted pieces of literature, including fiction and nonfiction literature from the Teaching to Standards: English Language Arts.

Access Language Arts: WRITE iPad App

Attainment Company, Inc.

Price: \$40.00

Product Type: instructional material

Skill Level: secondary

Disability: learning, physical

A researched and standards-based approach for secondary students practicing reading and writing skills. Prompts students to write grade-aligned opinion paragraphs for nonfiction and fiction and improves reading comprehension and vocabulary development. Can be used as a complement to Teaching to Standards: English Language Arts or a stand-alone curriculum.

Actuator Keypad (Pro)

mo-Vis

Price: \$370 - \$370

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Aeromesh® Calf Panel

Bodypoint Inc.

Price: \$96.00 - \$108.00

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult

Disability: physical

Bodypoint® Calf Panels keep feet safely and comfortably on wheelchair foot plates. Wide strap distributes pressure across a broad calf region, especially useful for those in tilt or reclined position. Smooth, porous Aeromesh® fabric provides air circulation and comfort while a stiffener layer maintains panel shape, eliminating folding and buckling.

Aeromesh® Calf Strap

Bodypoint Inc.

Price: \$73.00 - \$85.00

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult

Disability: physical

Bodypoint® Calf Straps keep feet safely and comfortably on wheelchair foot plates. A two-layer design blends comfort and function, and keeps feet from falling without bruising skin. Smooth, porous Aeromesh® fabric against the legs provides air circulation and comfort while a stiffener layer maintains its shape, eliminating folding and buckling.

Aeromesh® Rapid-Dry Bath Belts

Bodypoint Inc.

Price: \$89.00 - \$107.00

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult

Disability: physical

Bodypoint Bath Belts can be worn across the chest, abdomen, hips or legs to stabilize position while bathing or in the pool. Unique Aeromesh® fabric allows

water, soap, dirt and air to pass through freely while protecting skin and promoting hygiene. Three length-adjustable styles are compatible with most major shower chair brands.

Aeromesh® Shower Chair Calf Support

Bodypoint Inc.

Price: \$70.00 - \$70.00

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult

Disability: physical

A calf strap designed specifically for shower chairs! Silky, porous Aeromesh® material is soft on skin while allowing soapy water, dirt and air to pass through. Attaches to all major models using sewn-in clips; no hardware required. The 4" height supports legs but does not interfere with chair operation.

Aira

Aira

Price: \$89.00 - \$199.00

Product Type: seating/positioning/mobility

Skill Level: adult

Disability: vision

Aira develops assistive technology that connects the blind with certified agents via smart glasses and a dashboard that allows agents to see what the blind person sees real time. Agents help users accomplish a range of tasks from navigating streets, recognizing faces, and traveling the world. Prices are per month.

ALCOT: Autism and Low Incidence Classroom Observation Tool

Attainment Company, Inc.

Price: \$99.00 - \$249.00

Product Type: adapted play/manipulative, instructional material, learning aid

Skill Level: secondary, adult

Disability: cognitive, learning, physical, speech

ALCOT addresses six essential classroom traits with measurable outcomes. It's an easy-to-use, one page tool for teacher and administrator collaboration. The Assessment Plus iPad App complements the printed versions with digitizing capability.

All Access Method Adapted Game Bundle & More

Fine Motor Boot Camp

Price: \$5.00 - \$20.00

Product Type: adapted play/manipulative, instructional material

Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, learning, physical, speech

Look no further for simple ways to increase communication, access and participation for your students. Here you will learn ways to teach, adapt, and modify everyday

games/ activities to better meet your students' needs. We LOVE games! Why... because they are age appropriate, educational (math, matching, etc.), routine based, repetitive, social, rich in core vocabulary and most importantly...FUN! Here is a large bundle of 17 adapted games with related visual supports for those individuals with varying abilities. Instruction sheets include suggested adapted material ideas, core vocabulary targets, and access methods (direct select, eye gaze, 1-switch scanning, 2-switch scanning and active response mode).

All-round Joystick (Light)

mo-Vis

Price: \$1347 - \$1347

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

The compact version of a standard electronics wheelchair joystick module. Developed for all-round use, it is suitable for the major part of power wheelchair users. In case of the Light version, those users might have lost some muscular force or mobility.

All-Turn-It Spinner

AbleNet, Inc.

Price: \$130.00 - \$0.00

Product Type: adapted play/manipulative, learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical, speech

Freedom of movement, open to the front. The child or young adult is supported at the hips and trunk. While they step forward, the spring assembly allows the movement to mimic normal gait, while compressing and assisting with the lift to the next step. Four sizes in growth from infant to 78" in height. A wide variety of optional accessories are available to stabilize the upper trunk and maintain in line stepping.

Building with Stories

Attainment Company, Inc.

Price: \$495.00 - \$0.00

Product Type: adapted play/manipulative, instructional material, learning aid, sensory stimulation

Skill Level: elementary

Disability: learning, physical

Building with Stories curriculum is based on the Early Literacy Skills Builder research from the University of North Carolina at Charlotte. It contains ten award winning storybooks commonly read in elementary classrooms, a kit to adapt them for easy student access, and story related manipulatives to encourage student participation.

C-Pen Exam Reader 2

Scanning Pens

Price: \$295.00 - \$295.00

Product Type: learning aid

Skill Level: elementary, secondary, adult

Disability: cognitive, learning, speech, vision

Pen Exam Reader 2 is a text speech reading tool allowing students with reading differences to scan exam questions themselves, and have the text read aloud or via earbuds. It has no storage capabilities and doesn't require WiFi. It also supports reading in 10+ languages. Available for use if students' IEP says "text to speech" or "portable text to speech". Promote inclusion, independence and self confidence with the C Pen Exam Reader 2.

C-Pen Reader 2

Scanning Pens

Price: \$295.00 - \$295.00

Product Type: learning aid

Skill Level: elementary, secondary, adult

Disability: cognitive, learning, speech, vision

The C-Pen Reader 2 is the next generation of reading tools empowering students to improve their literacy skills and

independence. This lightweight and portable text-to-speech successor to the award-winning ReaderPen has new AI text recognition, contains an updated set of easily accessible dictionaries, and supports English, Spanish, and French. The Reader 2 stores scanned text in a Library for review at anytime. No Wi-Fi is required to operate, and it has customizable options such as font and reading speed choices — ensuring students can access even complex text. The exam lock function limits function to exam board approved features and is password activated, allowing students to utilize the C-Pen Reader 2 to read exam questions themselves. It is available for use if students' IEP says "text-to-speech" or "portable text-to-speech".

Capable Denim Pant

Capable Clothing

Price: \$89.00 - \$89.00

Product Type: seating/positioning/mobility

Skill Level: adult

Disability: physical

The Capable premium denim pant makes emptying the bladder while seated in the wheelchair easier. The false front gives easy access to straight catheterization, indwelling catheters, and adult incontinence underwear. The pant is lower in the front, and higher in the back for increased comfort while seated. The reinforced lift loops assist in lifting, turning, and repositioning, thus reducing caregiver back strain. The back pockets have been removed to prevent skin breakdown. Easy glide zipper and velcro closure gives a person lacking fine motor skills the ability to zip and unzip the pant unassisted. Extra length has been added to the bottom to ensure a custom fit. The most comfortable and fashionable adaptive jean that you will ever wear!

Caregiver Cue Cards | AT

Say it with Symbols AAC

Price: \$35

Product Type: learning aid

Skill Level: adult

Disability: cognitive, hearing, learning, physical, speech

Caregiver Cue Cards provide essential visual cues that improve communication, promote independence and reduce anxiety for adults with memory and cognitive challenges who live at home or in care settings. This handy, compact set of double sided cards includes simple black and white illustrations that prompt individuals with dementia and cognitive challenges to understand and participate more independently in self-care and social activities. This deck of 76 picture cards is ring-bound so it opens easily to the desired color-coded section. Cards are laminated so they can be wiped clean. Blank cards are provided so you can add other specific center or

activity cues. Available from SayitwithSymbols.com.

CB100 - Compound Bow Mount

Be Adaptive Equipment, Inc.

Price: \$609 - \$609

Product Type: adapted play/manipulative

Skill Level: elementary, secondary, adult

Disability: physical

Model CB100 is designed for individuals with limited hand and arm movement and strength. This piece of equipment works on most all models of compound bows and can be used with right hand or left hand bows. It allows the limited mobility user to pivot the bow left and right and up and down while the mount holds the entire weight of the bow. The CB100 mount requires the use of a Draw-Loc or similar product (which is not included) to hold the bow at full draw for the user.

Chest Belt

Bodyprint Inc.

Price: \$71.00 - \$101.00

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult

Disability: physical

A comfortable, low-profile trunk support option for users with limited hand function or those who prefer chest support without a buckle. Flexible molded end-tab is easy to grab, and high-grade hook-and-loop material holds securely but is smooth to the touch. Optional slip-on pads sold separately.

Chin Control Harness

mo-Vis

Price: \$1210 - \$1210

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

With the Chin Control Harness you can mount a joystick on the chest of the user. This is one of the mo-vis options for chin control of your electrical wheelchair.

CJT/LOCLINE SWITCH MOUNT

CJT Mounting

Price: \$225.00 - \$525.00

Product Type: adapted play/manipulative, seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

The CJT and Locline universal mount combines the flexibility of Locline with the strength and stability of the CJT Griptight Base Connector. The CJT Griptight base is fast and easy to attach and remove from your wheelchair, bed frame, walker, activity chair, or ET Roller.

Clamp On Drink Holder

Adaptive Tech Solutions

Price: \$10.09 - \$0.00

Product Type: adapted play/manipulative

Skill Level: elementary, secondary, adult

Disability: physical

This clamp on drink holder easily attaches to a bed rail, wheelchair, walker or bike to allow for easy access of a drink. Clamp mounts onto a surface with a diameter as small as 3/4" and as large as 1 3/4", and the arms can accommodate containers up to about 2 3/4" in diameter. This is a helpful way to improve fluid intake and promote independence.

Clear Panel Face Mask with Adjustable Straps

Abram's Nation

Price: \$18 - \$18

Product Type: learning aid, sensory stimulation

Skill Level: elementary, secondary, adult

Disability: cognitive, hearing, learning, speech, vision

Our Clear Panel Face Mask with Adjustable Straps benefits the deaf, hard of hearing, and special needs communities by increasing awareness of the limitations of traditional masks. Perfect for special needs teachers, therapists, translators, and anyone interested in creating an accessible environment for their special needs or hard-of-hearing friends and family. Proudly made by hand in the USA.

ClearMask

ClearMask

Price: \$67

Product Type:

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: hearing, learning, speech

The ClearMask™ is the first fully transparent, FDA-cleared mask optimized for maximum clarity and comfort: making connections more human and providing clearer communication for all. Single use only. Latex-free. Anti-Fog. Protection complies with applicable ASTM level 3 standards for fluid resistance and flammability. Available in two different strap styles: EZ-Adjuster or classic tie-on.

Cling

AbleNet, Inc.

Price: \$125.00

Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, learning, physical, speech, vision

Cling provides a quick, easy way to mount almost any AbleNet switch or small dedicated speech generating device (SGD) to a smooth surface like a table or desktop. Two easy lock and release suction cups secure it while the pivoting arm allows positioning of the switch device.

Cloud Kitty Switch Adapted Toy

Adaptive Tech Solutions

Price: \$41.15 - \$0.00

Product Type: adapted play/manipulative

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Press your switch and watch this cute kitty named Cloud meow, walk and move it's tail. Adapted to accept a standard switch (switch sold separately). On when you press your switch, off when the switch is released. Measures approximately 4 x 5 x 6 inches.

Compact Activity Center

Enabling Devices

Price: \$149.95 - \$0.00

Product Type: adapted play/manipulative, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary

Disability: cognitive, learning, physical

This small-scaled activity center is designed to provide sensory stimulation and cognitive activity for the infant or child whose physical mobility may be limited due to positioning needs. Features five different exciting activities that light up, vibrate or play music.

Compact Adult Communication Book Kit | AAC

Say it with Symbols AAC

Price: \$29.95 - \$29.95

Product Type: learning aid

Skill Level: secondary, adult

Disability: cognitive, hearing, learning, physical, speech

This pre-made, portable Adult Communication Book Kit from Say it with Symbols includes 30 pre-made communication boards, each with 12 - 1-inch adult-appropriate symbols related to expressing needs and wants at home, medical and community settings. Includes pages for yes/no, about me, WH questions, alphabet spelling boards, comments, basic needs, feelings, activities, personal care, ADLs, drinks, grocery shopping, visitors, places, meal choices. Words accompany each symbol. Blank pages to personalize are provided. Compact size fits into a purse, backpack or wheelchair bag. Album holder and instruction guide are included. Assembly is required. Also available as a downloadable, printable PDF.

Compact Joystick - Single/ Dual Switch

Adaptive Switch Laboratories, Inc.

Price: \$1280.00 - \$0.00

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

The ASL 133 and 134 are fully proportional with a unique shape and size which makes it easier to grab and manipulate. It has a textured end for a tactile feel making it easier to hold and a reset switch in the top of the joystick cap.

Connect Pen

Scanning Pens

Price: \$130.00 - \$130.00

Product Type: learning aid

Skill Level: secondary, adult

Disability: learning

Connect Pen is great for digitizing print from textbooks or manuals directly into your phone or computer via bluetooth. Requires device and WiFi. Compatible with Android, iOS (iPhone/iPad), Windows and Mac. System Requirements: iOS 11 / Android 5

Core + Fringe Communication Boards (Vinyl)

Talk To Me Technologies

Price: \$59 - \$228

DeCoste Writing Protocol

Texthelp Inc.

Price: \$25.00 - \$529.00

Product Type: instructional material

Skill Level: elementary, secondary, adult

Disability: cognitive, learning

In this age of accountability and assessment, your district needs a process to evaluate writing issues for students with disabilities. Unfortunately, many districts don't have a systematic way to do this. The DeCoste Writing Protocol is a formative assessment tool that helps educators identify factors affecting an individual student's ability to produce writing.

The Writing Protocol compares a child's individual performance across handwriting and keyboarding tasks. It examines spelling performance and writing skills so educators make more informed decisions about instructional strategies and the appropriate use of technology to meet classroom demands. The DeCoste Writing Protocol evolved from Dr DeCoste's original book, Assistive Technology Assessment: Developing a Written Productivity Profile, first published in 2004. Much has changed over the last decade-fueled by advances in technology and insights from new research.

Described and Captioned Media Program

Described and Captioned Media Program

Price: \$0 - \$0

Product Type: instructional material

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: hearing, learning, vision

Disability: cognitive, hearing, learning, physical, speech, vision

The front-mounted drinking system provides access to fluids to those who use wheelchairs but who have a very limited range of head and trunk movement, and who additionally have weak suction. The system consists of a heavy-duty Flex-Arm, a clamp on one end and a cup holder on the other.

FUSION Proportional and Digital Head Array

Adaptive Switch Laboratories, Inc.
Price: \$2000.00 - \$8000.00

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

The ASL 110 FUSION Proportional and Digital Head Array* is designed as a multi-use drive control. The functionality built in through programming will allow it to be used for a wide variety of patients with a wide range of diagnoses. The FUSION will allow a person to control the speed and direction fully proportionally. The adjustability options are designed to fit customizable needs and progressions of disabilities.

Gel Pad Activity Center

Enabling Devices
Price: \$379.95 - \$0.00

Product Type: adapted play/manipulative, sensory stimulation

Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

Three different gel pad switches provides terrific auditory, tactile and visual experi-

ences. Press the green switch and a fan blows while music plays. Press the red switch and a police light flashes while police sirens play. The yellow switch vibrates while colorful glitter whirls around a dome and music plays.

Giraff

Camanio Care Inc
Price: \$11.000 - \$16.000

Product Type: telecommunications
Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, learning, physical, speech, vision
Giraff is a telepresence robot that relatives, home care or healthcare staff can use to make remote visits to people that are still living at home, despite their regular care needs. With Giraff, you use a secure connection to make visits from a distance. You can move freely around the home and can interact with the resident by the use of an integrated video system. The individual you are visiting can easily accept or decline the visit and does not need any special prerequisites. The visitor only needs a computer with internet connection and basic computer skills. With Giraff, you are able to free up time from expensive oversight visits, reducing travel time for home care personnel and providing patients and their relatives with more comfort.

Giraffe Bottle

ModularHose.com
Price: \$35 - \$100

Product Type:
Skill Level: preschool, elementary, secondary, adult

Disability: physical

Giraffe Bottle Hands-Free Drinking Systems allow users with various abilities to stay hydrated. Our assistive hydration technology is designed to be flexible and easy to use, with accessories available to mount wherever needed.

GoNow Rugged case for iPad Air

Attainment Company, Inc.
Price: \$79.00 - \$0.00

Product Type: learning aid
Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, learning, physical, speech

Rubberized edging with sure-grip handle, hard plastic exterior, and foam padded interior protect your iPad from the bumps and drops of everyday life. The patent-pending design increases audio clarity and volume. You must indicate if it's for an iPad Air or iPad Air2.

GoNow Rugged case for iPad Mini

There is an instructor's guide that has 120 lessons with consistent 22-page format for Big Idea concepts, vocabulary, practice pages, story problems, quizzes, and challenge exercises along with an image library and PDFs for printing ad-

ditional materials are included on a USB flash drive.

Hands-On Math for Early Numeracy Skills

Attainment Company, Inc.

Price: \$299.00

Product Type: adapted play/manipulative, instructional material, learning aid

Skill Level: preschool, elementary

Disability: cognitive, learning, physical, speech

Hands-On Math (HOM) for Early Numeracy Skills is primarily for preschool students with an intellectual disability or autism. It is based on two premises: (a) students with a disability learn well when their hands are purposefully engaged, and (b) math manipulatives help students understand abstract concepts. The HOM for Early Numeracy Skills Curriculum is an introduction to concepts included within school math standards. It is a skills-based program focused on early numeracy concepts.

Harkla Compression Sensory Swing

Harkla

Price: \$99.99 - \$119.99

Product Type: sensory stimulation

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Hug-like calming effect Sensory input through compression and swinging \$25 worth of hardware included free for an easy setup Holds up to 200 lbs - safe for your child Looking for the perfect place for your child with sensory needs to feel relaxed and have fun?

Harkla Compression Sheet

Harkla

Price: \$29.99 - \$39.99

Product Type: sensory stimulation

Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, learning, physical

Soft, comfortable, and made with sensory needs in mind Machine washable Improve bedtime with compression Easy to set up and designed to last THE PERFECT ADDITION TO YOUR CHILD'S BEDROOM Bedtime IMPROVED! Have you struggled to help your child relax and get restful sleep? Start your journey to better sleep (and mood!) with a compression sheet. The compression sheet offers deep touch pressure (like a hug!) which helps regulate the nervous system. This releases melatonin helping relax your child. The melatonin turns into serotonin leading to deeper, more restful sleep. You'll love how your child curls up under the compression sheet as they relax and drift to sleep.

Harkla Hug

Harkla

Price: \$69.99 - \$69.99

Product Type:

Skill Level: preschool, elementary
Disability: cognitive, learning, physical
 The Harkla Hug combines a sensory input tool with the fun of a toy! Inflate the pea pod chair and watch your child explore. Now made with flock vinyl, this durable peapod sensory chair is a perfect addition to a sensory room. The inflatable peapod for autism applies much-needed pressure to sensitive areas of the body helping your child feel grounded and in control. This cozy canoe is perfect for autism. It stirs a sense of adventure while the compression provides a calming comfort where your child can feel secure. Use this sensory processing disorder tool to add comfort and joy in your child's life. The Harkla Hug provides Deep Touch Pressure (DTP) in the form of firm tactile sensory input or proprioceptive input to the whole body. When administered to the whole body, Deep Touch Pressure therapy (DTP) has a calming, organizing effect on children and adults alike..

Harkla Pod Sensory Swing

Harkla
Price: \$59.99 - \$59.99
Product Type: sensory stimulation
Skill Level: preschool, elementary
Disability: physical
 If you are looking for sensory or therapy swings to help your child relax and get their bearings in, then you've come to the right spot. Our autistic swings are made of high-quality but comfortable canvas that your child will want to spend hours in. Our Pod Sensory Swings are used by occupational therapists for autism spectrum disorder and sensory processing disorder. The Pod Sensory Swing provides a hug-like effect for little ones by providing Deep Touch Pressure (DTP). The Pod Sensory Swing also provides vestibular input. From infancy through adulthood, vestibular information contributes to the development of muscle tone, balance, eye movements, and more. Using slow, linear movements with Pod Sensory Swing (back and forth, side to side) gives much needed vestibular input and creates a feeling of calm in your child. However, many families purchase them simply because they are a fun place for your child to hang out in! Since our indoor therapy swing safely hangs from your ceiling, your child can receive the calming sense of wellbeing that swinging brings right in your home!

Harkla Sensory Body Sock

Harkla
Price: \$29.99 - \$29.99
Product Type: sensory stimulation
Skill Level: preschool, elementary, secondary, adult
Disability: cognitive, learning, speech
 STRETCH. PLAY. DEVELOP. UNWIND. Do you wish your child had an easier time relaxing? The Harkla body sock is designed

with autism and sensory issues in mind. Your child will love to play, stretch, or relax in our sensory sock! HELP YOUR CHILD DEVELOP SPATIAL AWARENESS Not only do sensory socks for kids help to soothe and calm, but a body sock can also encourage your child to explore their movements by pressing and stretching the material. Start developing right away with the activity guide created by occupational therapists provided in each therapy socks package. STAND UP TO THE TOUGHEST OF PLAYTIMES Designed with double-stitched seams & strong snaps instead of velcro

Harkla Weighted Blanket for Kids & Adults

Harkla
Price: \$79.99 - \$129.99
Product Type: sensory stimulation
Skill Level: preschool, elementary, secondary, adult
Disability: physical
 The perfect weighted blanket for a good night's sleep. Are you or your child struggling to relax or fall asleep? If so, then maybe it's time to invest in a weighted blanket. Our sensory weighted blankets are designed with your family in mind. Whether you are buying one for trouble sleeping or sensory processing disorder, you'll be happy you finally made the investment in a weighted blanket. And with a weighted blanket, you have a healthy way to relax and reduce anxiety by simply laying down with your blanket instead of taking pharmaceuticals and supplements. It's a completely natural sleep aid. Our goal at Harkla is to help you and your child live a happier, healthier life. We both know getting a good night's sleep is one of the highest priorities for reaching that goal. Join the thousands of people who have benefited from a Harkla weighted blanket, today!

Harkla Weighted Compression Vest

Harkla
Price: \$59.99 - \$59.99
Product Type: learning aid, sensory stimulation
Skill Level: preschool, elementary, secondary
Disability: learning, physical
 Are you looking for a tool to help your child feel secure, calm, and focused? Harkla's weighted compression vest for kids with sensory issues, autism, and ADHD combines the sensory input tool with a wearable by applying pressure to sensitive areas of the body. Simply place the vest over your child's clothing, and watch your little one return to feeling grounded and in control. A perfect addition to the classroom, pack the weighted compression vest with your child's school supplies for on-the-go sensory integration therapy. It works well on travel, too! Improve

both their and your car rides with a vest providing deep pressure sensory input. The weighted compression vest for kids is made out of soft neoprene and is built to last. Unlike other brands, Harkla has built-in ventilation using mesh to make sure your child stays cool while receiving the sensory integration therapy benefits.

Harkla Weighted Lap Animal

Harkla
Price: \$44.99 - \$44.99
Product Type: learning aid, sensory stimulation
Skill Level: preschool, elementary
Disability: cognitive, learning, physical
 Your child's new sensory buddy The perfect toy for helping your child stay calm in class Does your child have a hard time staying calm at school or in the car? Are you always looking for toys that will effectively support your child's needs? The 5 lb weighted lap animal is the perfect companion for your sensory seeker! The science supporting weighted objects like our sensory weighted stuffed animal is called deep touch pressure (the same benefit as a weighted blanket.). Deep touch pressure helps to decrease nervous system activity which encourages a feeling of calm and relaxation.!

Harkla Weighted Lap Pad

Harkla
Price: \$44.99 - \$44.99
Product Type: sensory stimulation
Skill Level: preschool, elementary, secondary, adult
Disability: physical
 Much like a weighted blanket, the weighted lap pad is a sensory tool that offers Deep Touch Pressure (DTP) to a person's legs as it rests on the lap when in a seated position. The weighted lap pad is often used in classrooms to provide some sensory input and help students stay seated. The weighted lap pad can also be used anywhere when adults or children need to stay sitting for an extended period. It's wonderful for activities like: Car rides Plane rides Mealtimes While doing homework Sitting in the grocery cart Our minky dot design makes this a perfect sensory blanket, as the soft minky fabric, combined with the dots and added weight makes a sensory input trifecta! This sensory combo gives your child an easy way to fulfill their fidget needs while calming them with the weight. Our goal at Harkla is to help your child live a happier, healthier life, and we both know getting them to relax and focus in class is one of the highest priorities.

Head Pointer and Stylus cap edition

ShapeDad
Price: \$129.00 - \$139.00
Product Type: adapted play/manipulative

Skill Level: elementary, secondary, adult
Disability: physical
 Universal headset mount with stylus pointer for head controlled tablet and smartphone use. This offering contains a full functional head pointer solution, containing a cap with a mounting plate and stylus pointer. The cap is available in three colors and the stylus pointer is available in four options.

Head Pointer and Stylus headband edition

ShapeDad
Price: \$129.00 - \$139.00
Product Type: adapted play/manipulative
Skill Level: elementary, secondary, adult
Disability: physical
 Universal headset mount with stylus pointer for head controlled tablet and smartphone use. This offering contains a full functional head pointer solution, containing a headband with a mounting plate and stylus pointer. The stylus pointer is available in four options that differ in length and bend-ability.

Headpod Dynamic Head Support

PACIFIC REHAB
Price: \$495 - \$495
Product Type: adapted play/manipulative, seating/positioning/mobility
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, physical
 A dynamic head support device which can be applied to almost anything with a headrest while the child is upright,.. wheelchair, walker, stroller, stander, bike or activity chair. The child is able to move in full rotation, as well as chin tuck and extension, but not head drop. As the child acquires strength, the upper band is relaxed and they are able to move within their plane of strength. It is a completely different philosophy from head restraints and collars, which tends to atrophy musculature further due to lack of movement. The Headpod can only be used when the child is upright, to begin within their point of balance. A functional aide during power wheelchair use, Aug Comm and feeding. Any time that fatigue prevents function. It is not to be used for van or bus transport.

Health Care Communication Boards | AAC

Say it with Symbols AAC
Price: \$9.95
Product Type: learning aid
Skill Level: secondary, adult
Disability: cognitive, hearing, learning, physical, speech
 These no tech, laminated healthcare communication boards feature 68 pictures that help patients communicate their health and hospital care-related needs when they are not able to speak. Studies

show that being able to communicate with care providers significantly improves the patient's experience and recovery in the ICU. Each double-sided sheet offers clear color pictures to indicate pain, wants, needs, ailments, comforts, questions, staff, emotions and more. Pain scale, alphabet and number tables are included. Non-verbal patients simply point to pictures to communicate their needs to care staff and family. Ideal for patients, nurses, therapists, emergency care and health care workers, caregivers and parents who care for adults and children who are not able to express their needs verbally. Symbols are 1" square. Sheet size: 8.5" x 11", printed on heavy card stock to be used by individual patients. Laminated for increased durability, wipe to reuse. Set includes 1 dry erase marker. Sold in sets of two on SayitwithSymbols.com. Contact us for quantity pricing.

Heavy Duty Joystick

mo-Vis
Price: \$2845 - \$2845
Product Type: seating/positioning/mobility
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Disability: physical

A large format, extremely durable proportional joystick for heavy duty use. It can serve as a hand or foot operated joystick and has been developed for users with excessive force.

HID Joystick

mo-Vis

In The Know: Health, Sexuality, & Relationships

Attainment Company, Inc.
Price: \$19.00
Product Type: instructional material
Skill Level: secondary, adult
Disability: cognitive, learning

In the Know: Health, Sexuality, & Relationships is a health and wellness curriculum designed to address sensitive topics like human growth and development, sexuality, pregnancy, mental health, and personal safety in an approachable way that will encourage students to participate in their learning.

InnerVoice AI

iTherapy, LLC
Price: \$99.99
Product Type: learning aid
Skill Level: preschool, elementary, secondary
Disability: cognitive, learning, speech
 InnerVoice can work like a typical communication device: letting your thoughts and feelings be heard and understood by others. Unlike traditional speech-generating apps, though, InnerVoice combines artificial intelligence technology with facial expressions, emotions, tone-of-voice, written words, and videos -- providing a complete multi-sensory learning experience. Visual Language is an exciting new feature that uses Microsoft's Azure artificial intelligence technology to teach language and literacy skills in a unique way. The camera displays what you're looking at. Take a picture and watch InnerVoice's AI system label your picture with text and describe it with speech -- allowing users to see the relationships shared among the environment, speech, language, and text. Visual language makes creating and editing buttons easier than ever: just take a picture and InnerVoice's AI system labels the button and adds a description.

iPad Bluetooth Speaker

RJ Cooper and Associates
Price: \$79.00 - \$79.00
Product Type: adapted play/manipulative
Skill Level: infant/toddler, preschool, elementary, secondary, adult

 This curriculum helps students learn skills needed for work. Subject areas include employability skills and social skills. The materials are provided in duplicatable (at purchasing site) PDF books and Online Access. A detailed teacher's guide, pre/post assessments and lesson plans are provided. Visit our webpage: www.PhillipRoy.com

Job Skills Stories

Attainment Company, Inc.
Price: \$69.00 - \$399.00
Product Type: adapted play/manipulative, instructional material, learning aid
Skill Level: secondary, adult
Disability: cognitive, learning, physical, speech
 Job Skills Stories emphasizes the five categories in Pre-ETS: Job and Career Exploration, Work-Based Learning, Post-Secondary Training, Workplace Readiness, and Self-Advocacy. One-hundred stories are presented in five Job Skills Stories Student Books. Each book is aligned to a Pre-ETS category. The stories cover key transi-

tion skills like identifying one's strengths, decision-making, and self-determination. The Job Skills Reader condenses and simplifies content by using captioned photos to convey each story's big idea. Both the Student Books and Reader cover lesson objectives, so you can teach with the version that best suits each student.

JokeMaster

RJ Cooper and Associates
Price: \$79.00 - \$0.00
Product Type: adapted play/manipulative
Skill Level: preschool, elementary, secondary
Disability: cognitive, physical, speech, vision
 Switch-adapted joke telling device (120 of them), very silly, highly motivating. Includes jack to plug into PA system. Carry case/speaker option \$30.00.

Junior Automatic Nail Clipper by ClipDifferent

ClipDifferent
Price: \$149 - \$149
Product Type: adapted play/manipulative, seating/positioning/mobility, sensory stimulation
Skill Level: preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, speech, vision
 The ClipDifferent Jr. is a revolutionary, first-of-its-kind, automatic fingernail clipper that safely trims children's (ages 5+) fingernails with the simple touch of a button. It's perfect for children and parents who have a hard time trimming their children's fingernails and dislike the messy, time-consuming process. You'll have to see it to believe it- kids actually have fun using it! A great motivator for kids who bite their nails. Also great for kids with sensory challenges (has a nice, soothing sound). Includes stickers to decorate and personalize.

Junior Earmuffs

Therapy Shoppe® Incorporated
Price: \$24.99 - \$24.99
Product Type: learning aid
Skill Level: preschool, elementary, secondary, adult
Disability: cognitive, hearing, physical
 Durable Junior Earmuffs designed especially to fit children! Feature an adjustable, padded headband and comfy, liquid-foam ear cushions. These quality sensory earphones reduce environmental noise up to 22 decibels; allowing the wearer to still hear conversations and commands. The perfect sensory diet tool for kids who have auditory defensiveness, autism, sensory processing disorder, central auditory processing disorder, high levels of stress, anxiety disorders, and/or noise sensitivity (kiddos who are hypersensitive to sound). Excellent for classrooms, travel, school lunchroom, parties and family gatherings,

concerts, and more. Use with adult supervision. In black.

KM-201 KUPOCARE Wheelchair Tablet Holder (S size Super Knuckle Arm)

KUPOCARE

Price: \$0 - \$0

Product Type: seating/positioning/
mobility

Skill Level: infant/toddler, preschool,
elementary, secondary, adult

Disability: physical

The tablet holder is ideal for 7 to 11 inch tablets and connects to the Wheelchair Tube Clamp base via ball head through the S size (3") Super Knuckle Arm. The ball head on either end of the arm allows users to freely adjust the tablet's angle and can be locked into position by tightening the central knob. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts a tablet within a flexible 3" (7.6 cm) radius of a wheelchair tube.

KM-202 KUPOCARE Wheelchair Phone Holder (S size Super Knuckle Arm)

KUPOCARE

Price: \$0 - \$0

Product Type: seating/positioning/
mobility

Skill Level: infant/toddler, preschool,
elementary, secondary, adult

Disability: physical

The phone holder is compatible with 2.3-3.3" (58 - 85 mm) wide phones and connects to the Wheelchair Tube Clamp base via ball head through the S size (3") Super Knuckle Arm. The ball head on either end of the arm allows users to freely adjust the phone's angle and can be locked into position by tightening the central knob. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4"

(32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts a phone within a flexible 3" (7.6 cm) radius of a wheelchair tube.

KM-203 KUPOCARE Wheelchair Camera Mount (S size Super Knuckle Arm)

KUPOCARE

Price: \$0 - \$0

Product Type: seating/positioning/
mobility

Skill Level: infant/toddler, preschool,
elementary, secondary, adult

Disability: physical

In this set, the S size (3") Super Knuckle Arm has a ball head with 1/4"-20 male thread on one end that is compatible with most cameras & camcorders. The two 1" aluminum ball head joints of the Super Knuckle Arm allows users to freely adjust the angle of cameras and lock the position by simply tightening the central knob. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts a camera or camcorder within a flexible 3" (7.6 cm) radius of a wheelchair tube.

KM-204 KUPOCARE Wheelchair AAC Switch Mount (S size Super Knuckle Arm)

KUPOCARE

Price: \$0 - \$0

Product Type: seating/positioning/
mobility

Skill Level: infant/toddler, preschool,
elementary, secondary, adult

Disability: physical

This S size (3") Super Knuckle Arm has a ball head with 1/4"-20 female thread on one end that matches the universal mounting system of AbleNet switches. The two 1" aluminum ball head joints of the Super Knuckle Arm allows users to freely adjust the angle of mounted AAC switches and lock the position by simply tightening the central knob. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides

a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts an AbleNet switch or any equipment with 1/4"-20 male thread within a flexible 3" (7.6 cm) radius of a wheelchair tube.

KM-205 KUPOCARE Wheelchair Tablet Mount (M size Super Knuckle Arm)

KUPOCARE

Price: \$0 - \$0

Product Type: seating/positioning/
mobility

Skill Level: infant/toddler, preschool,
elementary, secondary, adult

Disability: physical

The tablet holder is ideal for 7 to 11 inch tablets and connects to the Wheelchair Tube Clamp base via ball head through the S size (3") Super Knuckle Arm. The ball head on either end of the arm allows users to freely adjust the tablet's angle and can be locked into position by tightening the central knob. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts a tablet within a flexible 3" (7.6 cm) radius of a wheelchair tube.

KM-206 KUPOCARE Wheelchair Phone Holder (M Size Super Knuckle Arm)

KUPOCARE

Price: \$0 - \$0

Product Type: seating/positioning/
mobility

Skill Level: infant/toddler, preschool,
elementary, secondary, adult

Disability: physical

The phone holder is compatible with 2.3-3.3" (58 - 85 mm) wide phones and connects to the Wheelchair Tube Clamp base via ball head through the M size (6") Super Knuckle Arm. The ball head on either end of the arm allows users to freely adjust

the phone's angle and can be locked into position by tightening the central knob. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts a phone within a flexible 6" (15.2 cm) radius of a wheelchair tube.

KM-207 KUPOCARE Wheelchair Camera Mount (M Size Super Knuckle Arm)

KUPOCARE

Price: \$0 - \$0

Product Type: seating/positioning/
mobility

Skill Level: infant/toddler, preschool,
elementary, secondary, adult

Disability: physical

In this set, the M size (6") Super Knuckle Arm has a ball head with 1/4"-20 male thread on one end that is compatible with most cameras & camcorders. The two 1" aluminum ball head joints of the Super Knuckle Arm allows users to freely adjust the angle of mounted cameras and lock the position by simply tightening the central knob. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts a camera or camcorder within a flexible 6" (15.2 cm) radius of a wheelchair tube.

KM-208 Wheelchair AAC Switch Mount (M Size Super Knuckle Arm)

KUPOCARE

Price: \$0 - \$0

Product Type: seating/positioning/
mobility

Skill Level: infant/toddler, preschool,
elementary, secondary, adult

Disability: physical

This L size (9") Super Knuckle Arm has a ball head with 1/4"-20 female thread on one end that matches the universal mounting system of AbleNet switches. This arm is constructed by linking two S size arms with a 3" extension. The four ball heads of the arm allow users to adjust the mounted AAC switches to precise positions that suit their special needs. The extension arm has three 1/4"-20 and two 3/8"-16 female thread holes that allow for mounting devices using an additional Super Knuckle Arm. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts an AbleNet switch or any equipment with 1/4"-20 male thread within a flexible 9" (22.8 cm) radius of a wheelchair tube.

KM-209 KUPOCARE Wheelchair Tablet Holder (L size Super Knuckle Arm)

KUPOCARE

Price: \$0 - \$0

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

The tablet holder is ideal for 7 to 11 inch tablets and connects to the Wheelchair Tube Clamp base via ball head through the L Size (9") Dual Knuckle Arm. This arm is constructed by linking two S size arms with a 3" extension. The four ball heads of the arm allow users to adjust the mounted tablets to precise positions that suit their special needs. The extension arm has three 1/4"-20 and two 3/8"-16 female thread holes that allow for mounting devices using an additional Super Knuckle Arm. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted.

The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts a tablet within a flexible 9" (22.8 cm) radius of a wheelchair tube.

KM-210 Wheelchair Phone Holder (L Size Dual Knuckle Arm)

KUPOCARE

Price: \$0 - \$0

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

The phone holder is compatible with phones 2.3" to 3.34" (58 - 85 mm) wide and connects to the Wheelchair Tube Clamp base via ball head through the L Size (9") Dual Knuckle Arm. This arm is constructed by linking two S size arms with a 3" extension. The four ball heads of the arm allow users to adjust the mounted phones to precise positions that suit their special needs. Disability: physical

The tablet holder is compatible with 7 to 11 inch tablets and connects to the Super Convi Clamp base through the L Size (9") Dual Knuckle Arm. This arm is constructed by linking two S size arms with a 3" extension. The four ball heads of the arm allow users to adjust the mounted tablets to precise positions that suit their special needs. The extension arm has three 1/4"-20 and two 3/8"-16 female thread holes that allow for mounting devices using an additional Super Knuckle Arm. The other end of the arm has a ball head with a hex stud that connects to the Super Convi Clamp. The Clamp can be securely mounted onto most rails or tubes with external diameters from 0.2 to 2 inches (5-51 mm). The included plastic saddle can be attached to the Super Convi Clamp to securely hold onto tables between 0.2-1.2" (5-30 mm) thick. The user-friendly clamp is easily secured and removed efficiently. This set mounts a tablet within a flexible 9" (22.8 cm) radius.

KM-703 KUPOCARE Table Camera Mount (S size Super Knuckle Arm)

KUPOCARE

Price: \$0 - \$0

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

In this set, the S size (3") Super Knuckle Arm has a ball head with 1/4"-20 male thread on one end that is compatible with most cameras & camcorders. The two 1" aluminum ball head joints of the Super Knuckle Arm allows users to freely adjust the angle of mounted items and lock the position by simply tightening the central knob. The Super Knuckle Arm is equipped with a hex stud that can be inserted into the built-in female socket of the Super Convi Clamp. The Clamp can be securely mounted onto most rails or tubes with external diameters from 0.2 to 2 inches (5-51 mm). The included plastic saddle can be attached to the Super Convi Clamp to securely hold onto tables between 0.2-1.2" (5-30 mm) thick. The user-friendly Clamp is easily secured and removed efficiently. This set mounts a camera or camcorder anywhere within a flexible 3" (7.6 cm) radius.

KM-704 KUPOCARE Table AAC Switch Mount (S size Super Knuckle Arm)

KUPOCARE

Price: \$0 - \$0

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

This S size (3") Super Knuckle Arm has a ball head with 1/4"-20 female thread on one end that matches the universal mounting system of AbleNet switches. The other end of the arm has a ball head with a hex stud that connects to the Super Convi Clamp. The ball heads on either end of the arm allows users to freely adjust the angle of mounted AAC switches and can be locked into position by tightening the central knob. The clamp can be securely mounted onto most rails or tubes with external diameters from 0.2 to 2 inches (5-51 mm). The included plastic saddle can be attached to the Super Convi Clamp to securely hold onto tables between 0.2-1.2" (5-30 mm) thick. The user-friendly Clamp is easily secured and removed efficiently. This set mounts an AbleNet switch or any equipment with 1/4"-20 male thread within a flexible 3" (7.6 cm) radius.

KM-705 KUPOCARE Table Tablet Mount (M size Super Knuckle Arm)

KUPOCARE

Price: \$0 - \$0

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical, speech

The tablet holder is compatible with 7 to 11 inch tablets and connects to the Super Convi Clamp base through the M size (6") Super Knuckle Arm. The ball head on either end of the arm allows users to freely adjust the tablet's angle and can be locked into position by tightening the central knob. The Super Knuckle Arm is equipped with a hex stud that can be inserted into the built-in female socket of the Super Convi Clamp. The Clamp can be securely mounted onto most rails or tubes with external diameters from 0.2 to 2 inches (5-51 mm). The included plastic saddle can be attached to the Super Convi Clamp to securely hold onto tables between 0.2-1.2" (5-30 mm) thick. The user-friendly Clamp is easily secured and removed efficiently. This set mounts a tablet anywhere within a flexible 6" (15.2 cm) radius.

KM-706 KUPOCARE Table Phone Mount (M size Super Knuckle Arm)

KUPOCARE

Price: \$0 - \$0

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

The phone holder is compatible with 2.3-3.3" (58 - 85 mm) wide phones and connects to the Super Convi Clamp base through the M size (6") Super Knuckle Arm. The ball head on either end of the arm allows users to freely adjust the phone's angle and can be locked into position by tightening the central knob. The Super Knuckle Arm is equipped with a hex stud that can be inserted into the built-in female socket of the Super Convi Clamp. The Clamp can be securely mounted onto most rails or tubes with external diameters from 0.2 to 2 inches (5-51 mm). The included plastic saddle can be attached to the Super Convi Clamp to securely hold onto tables between 0.2-1.2" (5-30 mm) thick. The user-friendly Clamp is easily secured and removed efficiently. This set mounts a phone anywhere within a flexible 6" (15.2 cm) radius.

Language and Learning: A Framework for Inclusive Design

Attainment Company, Inc.

Price: \$69.00 - \$199.00

Product Type: instructional material

Skill Level: preschool, elementary, secondary

Disability: learning, physical

A seven-stage framework for cognitive and language development. Covers learner considerations, relevant issues, communication strategies, tips for evaluating software, and a skills checklist before moving on to the next stage. Includes references to research and published articles and provides recommendations for software, apps, and manipulatives materials.

Language Links to Literacy

Attainment Company, Inc.

Price: \$695.00 - \$0.00

Product Type: instructional material

Skill Level: preschool, elementary

Disability: learning, physical

LanguageLinks® to Literacy incorporates systematic instruction and ongoing assessments to teach 40 lessons covering concepts like Is/Are, He/She/They, Mine/Yours, How/Why/Where, and Above/Below. Is a blended curriculum, seamlessly integrating print components with software. This blended approach creates an engaging learning process and encompasses both independent and instructor-led instruction.

Latitude 360

AbleNet, Inc.

Price: \$399.00

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, physical

The Latitude 360 features 3 pivot points and quick-release levers for maximum adjustability to extend up to 20-in/51-cm and can hold up to 7-lb/3.2-kg. Use the Super Clamp to mount to any surface.

Leg Harnesses

Bodypoint Inc.

Price: \$88.00 - \$122.00

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult

Disability: physical

A unique, unobtrusive solution for wheelchair users who have problems with sliding, thrust or spasticity. Each leg is wrapped from the rear of the seat to the inner thigh at the front of the chair, helping the user sit back while maintaining a full range of motion for the pelvis and avoiding bladder pressure. Great for facilitating self-propulsion and sports safety.

Lifton Duo Residential Elevator

Lifton Residential Elevators

Price: \$22000

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

The Lifton Residential Elevator is unlike any other home elevator on the market and has been designed to move the passenger quickly from floor to floor in the home. It is a luxury lifestyle product which offers homeowners with a fantastic way of 'future proofing' their home for use in later life.

Light Beeper Box

Adaptive Tech Solutions

Price: \$64.88 - \$0.00

Product Type: learning aid

Skill Level: preschool, elementary, secondary, adult

Disability: physical

The Beeper Switch Box is an illuminated 3" button and a beeper all in one. Great for individuals that require several types of feedback to know they have pushed an external switch. Can also be activated by an external switch.

Limitless Stylus

Westminster Technologies

Price: \$73 - \$79

Product Type: adapted play/manipulative

Skill Level: preschool, elementary, secondary, adult

Disability: physical

The Limitless Stylus is optimized for users with limited hand mobility and is a simple design that wraps around the users wrist with two Velcro straps. The stylus is angled perfectly to fit the contours of the user's hand and has been designed for long term use and optimal comfort. It can be used on any touchscreen device to gain more control and precision with every click!The

Limitless Stylus is extremely light weight and durable which makes it easy to use on a daily basis without even thinking about it. After using the Limitless Stylus you will be unable to live without it. Stylus, two straps and extra tips included.

LingoPen

Scanning Pens

Price: \$285.00 - \$285.00

Product Type: learning aid

Skill Level: elementary, secondary, adult

Disability: learning

Lingo Pen is used primarily for EL/ESL as it reads in English (as well as other languages) you can translate a word you don't know in the other language while hearing it pronounced in English. It's perfect for anyone working or studying in a language that is not their own to improve language acquisition. Multiple languages and dictionaries. The voice recorder is great for recording instructions or fluency progress checks. The scan to cursor feature allows users to scan from worksheets/textbooks directly to Google/Word Docs for simplified note taking or study guides. Saves money and time by reducing students' reliance on a human reader. Exam lock for exam integrity. Having it listed as "text to speech" in the students IEP or 504 plan is helpful. Does NOT require WiFi. Stand alone does not require another device.

LM100 - Limited Mobility

Be Adaptive Equipment, Inc.

Price: \$609 - \$609

Product Type: adapted play/manipulative

Skill Level: elementary, secondary, adult

Disability: physical

Be Adaptive Equipment Model LM100 is a limited mobility unit designed for use by people with limited use or paraplegics that cannot hold a gun up. Designed for individuals with limited hand and arm movement and strength. The unique design of the equipment makes the weapon seem almost weightless to the person using it and allows them to have a full range of motion, up, down, and side to side. The simplicity of the LM100 allows it to hold all pistols, crossbows, rifles, and shotguns. The LM100 does not include a power trigger mechanism. If you lack hand movement and need assistance with this, you can purchase our TM100 (power trigger mechanism) and use it with this piece of equipment.

Look at Everyday Math Series

Attainment Company, Inc.

Price: \$69.00 - \$149.00

Product Type: adapted play/manipulative, instructional material, learning aid

Skill Level: secondary

Disability: cognitive, learning, physical, speech

Look at Everyday Math is a practical application of math for high school and

transition students. Each Remedia publication (there are 5) includes activities such as reading comprehension, filling out forms, using a glossary, and answering math word problems.

Look at Math

Attainment Company, Inc.

Price: \$34.00 - \$289.00

Product Type: instructional material

Skill Level: secondary

Disability: learning, physical

A standards-based, heavily-illustrated curriculum supporting secondary students with math concepts. Includes situational and number line illustrations to help with visualization of concepts. Organized into three units: Numbers, Measurements, and Fractions and provides 11 chapters with consistent format. Also, progresses in difficulty as students complete lessons.

Low Vision Aids

Magnifiers & More

Price: \$0.00 - \$0.00

Product Type: instructional material, learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

LusioMATE

Lusio Rehab

Price: \$1540 - \$1888

Product Type: adapted play/manipulative

Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, physical

LusioMATE is a physical therapy ecosystem app with wearable sensors. It connects to exergames that motivate individuals through tailor-made exercise programs. LusioMATE is designed to drive greater adherence to fine and gross motor physical therapy goals, both in clinic and as part of home programs. Price quoted in Australian Dollars

Magic Arm (Adaptation)

Adaptation, Inc.

Price: \$249 - \$249

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical, vision

Magic Arm is a multi-jointed mounting system for attaching an adaptive

switch, communication aid or other assistive device. Includes super clamp and round mounting plate. The Magic Arm supports up to 5 pounds. Price Reduced.

Magic Arm (RJ Cooper)

RJ Cooper and Associates

Price: \$259 - \$259

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

An infinitely positional arm for holding switches, joystick, notebook computer or augmentative communication device. The Magic Arm is stronger and adjusts with only one knob versus the Articulating Arm (see independent entry) with three knobs.

Magical Light Show

Enabling Devices

Price: \$173.95 - \$0.00

Product Type: adapted play/manipulative, sensory stimulation

Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, learning, physical, vision

Press the yellow switch and feel subtle vibrations under your hand while the Magical Light Show begins. Watch colored patterns against a black background and hear upbeat music.

Manual Swing 2G

mo-Vis

Price: \$1328 - \$1328

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

The Manual Swing 2G is a versatile arm to mount on an electrical wheelchair. With this arm, devices such as chin joysticks can be positioned to drive, and the arm can be moved upwards or sideways manually, whenever needed.

Math for Life

Attainment Company, Inc.

Price: \$89.00 - \$0.00

Product Type: instructional material

Skill Level: secondary

Disability: learning

Math for Life links life skill themes to six fundamental concepts, adding relevance and appeal to math instruction for middle and high school students.

Math Skills Builder

Attainment Company, Inc.

Price: \$595.00

Product Type: instructional material

Skill Level: elementary, secondary

Disability: learning, physical

A researched math problem-solving curriculum with real-world scenarios. A multiyear curriculum for students with mild-to-severe disabilities and ideal for

elementary and secondary students.

Includes eight units with easy-to-follow lesson plans and uses several forms of media to ensure student success. Reviews early numeracy skills and advances to addition and subtraction.

Maxess Switch Mounts

Inclusive TLC

Price: \$32.00 - \$42.00

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

Enables switches to be securely positioned/repositioned in the most efficient way. These double-sided switch mounts give two alternative mounting surfaces (55 and 85 degrees). Used with the Maxess Switch Tray, the mounts offer a variety of positioning options. Velcro fixing pack included for one switch.

Maxess Switch Tray

Inclusive TLC

Price: \$59.00 - \$79.00

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

Cushioned for comfort, the Maxess Switch Tray holds switches or switch mounts firmly in place. Ideal for use with a student or in assessment situations, where a range of secure switch positions need to be tried.

Mealtime Partner Dining Device

Mealtime Partners, Inc.

Price: \$7995.00 - \$8570.00

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, learning, physical

The Mealtime Partner is a product that permits individuals, who otherwise cannot feed themselves, to do so independently, after they are provided with food. Persons with impairments due to spinal cord injury, CP, MS, Parkinson's disease, arthritis, ALS, stroke, MD, birth-defects, etc. can gain/regain mealtime independence using the Partner.

Medication Dispenser

SimplyHome

Price: \$189.95 - \$259.95

Product Type: adult

Skill Level: adult

Disability: cognitive, hearing, learning

With Simply Home's secure medication dispenser, individuals can access prescribed medicine without the concern of overmedicating or missing doses. The automated dispenser alerts the individual to take the allotted medication up to four times daily, with optional caregiver alerts if doses are

delayed or missed. These alerts can be sent to the individual whose medication it is, to support independence, as well as to a family member or caregiver if necessary.

Meywalk Miniwalk Gait Trainer

PACIFIC REHAB

Price: \$4600

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, physical

The child or young adult is supported at the trunk and centered at the hips. While they step forward, the spring assembly allows the movement to mimic normal gait, while compressing and assisting with the lift to the next step. Four sizes in growth from infant to 78" in height. A wide variety of optional accessories are available to stabilize the upper trunk and maintain in line stepping.

Micro Extremity Control (MEC)

Adaptive Switch Laboratories, Inc.

Price: \$3050.00 - \$4430.00

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

The ASL 130 is a fully proportional joystick with the unique feature of having a built in mode change function. The MEC only requires 18 grams of force to deflect the joystick. It is designed for those who have very limited hand or chin movement.

Micro Joystick

mo-Vis

Price: \$2912.73

Product Type: seating/positioning/mobility

Skill Level: secondary, adult

Disability: physical

A very small proportional joystick for electric wheelchairs, designed for people with poor muscular power and/or limited movements.

Midline Joystick Mounting Kits

Bodypoint Inc.

Price: \$587.00 - \$615.00

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

The Tri-Lock Midline Mounting System lets you position the joystick or other electronic devices right where you want them - at midline or another preferred location - for a more natural and functional position that can lead to improved posture, core strength and endurance. Position joysticks over lap trays, above or below armrests, or over the shoulder on

chin-controlled systems. Easily change settings from independent to caregiver-assisted use, and choose between three different arm styles. Components available separately or as a kit.

Mini Dome

Enabling Devices

Price: \$117.95 - \$0.00

Product Type: adapted play/manipulative, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary

Disability: cognitive, hearing, learning, physical, speech, vision

Children love Mini Dome's eye-catching colors and vibrations. Simply press anywhere on the dome or its plate and the bright confetti spin, music plays and the dome vibrates. Provides hours of visual, auditory and tactile stimulation. No switch is required.

Mini Mesmerizing Volcano Lamp

Adaptive Tech Solutions

Price: \$43.95 - \$0.00

Product Type: adapted play/manipulative, sensory stimulation

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Our switch adapted Mini Mesmerizing Volcano Lamp has been adapted to accept a standard switch (sold separately) or it can be used without a switch. When you press your switch, the colored 'lava' balls flow from the volcano up into the red lighted water and back down again. Measures approximately 5.5" x 3" x 3" and requires 4 AAA batteries (not included).

Mini-Arm

RJ Cooper and Associates

Price: \$129.00 - \$0.00

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

An 11-inch telescoping, infinitely positionable arm for holding switches. The Super-Clamp attaches to just about anything. Especially useful for our 1-inch Compact Switch used by cheek.

Model HQ100 - High Quad Shooting Mount

Be Adaptive Equipment, Inc.

Price: \$2048 - \$2048

Product Type: adapted play/manipulative

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

Model HQ100 is a high quad unit designed for use by people with no arm or hand use, to operate guns and crossbows. This model can be operated completely with your mouth and chin, standard or choose an option. Go to products at www.beadaptive.com for more information.

Modular Hose

ModularHose.com

Price: \$5.00 - \$450.00

Product Type: adapted play/manipulative, seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

A mounting system that is fortified with AWESOMENESS! Adjustable and flexible - great for holding switches, small devices, tablets, and more.

Molecule Joystick

Adaptive Switch Laboratories, Inc.

Price: \$1000.00 - \$5000.00

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

The ASL 128 Molecule Joystick is the lightest touch joystick offered by ASL. It takes only 8 grams of force to displace from neutral and requires only 3 millimeters of movement to reach full throw. Designed for someone with weakness, this joystick can keep a patient driving proportionately instead of having to move to a digital system.

Monoflex™

Bodypoint Inc.

Price: \$97.00 - \$121.00

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Dynamic positioning for wheelchair users who need strong but unobtrusive abdominal/chest support and free arm movement. High-strength elastic padding provides just the right amount of stretch for comfort while maintaining trunk control. Double-tapered shape and swirl buckles distribute pressure evenly. One-piece with underarm release or two-piece with center release. Can be mounted on almost any wheelchair, including those with low or flexible back systems where a four-point harness is difficult to mount. Machine wash and dry.

Mount'n Mover Mounting System

BlueSky Designs

Price: \$525.00 - \$1900.00

Product Type: learning aid, seating/positioning/mobility, telecommunications

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical, speech, vision

The Mount'n Mover movable mounting systems offer unique features specifically designed to promote independence and access. Mount phones, trays, speech devices, laptops, and cameras on wheelchairs, tables and more. From simple mounting solutions to our motorized Powlr mount

for complex needs - do more with a mount that moves!

Mouthstick Stylus

ShapeDad

Price: \$68.00 - \$78.00

Product Type: adapted play/manipulative

Skill Level: elementary, secondary, adult

Disability: physical

Mouth stick stylus for tablet and smartphone with an ergonomic snap fit mouth-piece. It's available in two versions: a fixed 12-inch version and one that telescopes from 9-17 inches in length. As of 2018, all mouthstick styli will be bendable as well.

Multi Joystick

mo-Vis

Price: \$2913 - \$2913

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, secondary, adult

Disability: physical

The Multi Joystick is a joystick module which can be connected directly to the wheelchair electronics to control the wheelchair functions. It is a small proportional joystick, which requires significant less power and movement compared to a normal joystick. It can easily be controlled by any body part, including finger, chin, lip... thanks to its flexibility. It is recommended for people with tetraplegia, neuromuscular diseases (ALS, MS...) and limited muscular force. Fully proportional, with reduced throw (8 mm) and force (ca. 50 gr) Built in a compact and discrete housing, with 2 3.5 mm jacks for switch input Two switches can be linked to the separate interface: (red) on/off power wheelchair - (yellow) mode of the power wheelchair Fully adjustable to individual possibilities and needs with well-thought-out electronics (mini USB connection) Compatible with multiple types of wheelchair electronics Has a LED light on the interface which will start to flash green in case of error or orange in case of active tilt

Multi Swing 2G

mo-Vis

Price: \$2756 - \$2756

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

A versatile, motorized mounting arm to mount on an electrical wheelchair. With this arm, devices such as a chin joystick can be positioned to drive, and the arm can be moved upwards or sideways by pressing a button whenever needed.

Multi Switch

mo-Vis

Price: \$893 - \$893

Product Type: seating/positioning/

mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

With just 1 single input, the Multi Switch offers the possibility to operate up to 4 outputs.

Multifunctional Smart Keyboard Key-X

Key2enable Assistive Technology Inc.

Price: \$999.00 - \$2100.00

Product Type: learning aid

Skill Level: preschool, elementary, secondary, adult

Disability: learning, physical

The device that redefines the inclusion of people with disabilities. Key-X allows people with any motor impairment to use any computer, smartphone or tablet with just eleven touch-sensitive keys, which can be activated even by the blink of an eye. By itself, Key-X is an innovative resource, which gives autonomy to people with any motor limitation to control any computer. However, offering every function of keyboard and mouse with total accessibility is just a detail. With just eleven touch-sensitive keys, which can be triggered even by the blink of an eye, Key-X does much further. In conjunction with the SimpliX software and its accessories, Key-X makes up an amazing platform of school inclusion and rehabilitation, capable of developing the motor and cognitive skills of students and patients with physical and intellectual disabilities.

Mushroom Joystick

Adaptive Switch Laboratories, Inc.

Price: \$2975.00 - \$0.00

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

The ASL 135 was designed to fit the contour of a hand, so no gripping or pincer grasp is needed. Deflection of the joystick uses minimal force and the flat plate made from a slick material surrounds the cap and provides a place for the hand and wrist to rest.

Disability: cognitive, hearing, learning, physical, speech, vision
The Pre-Employment Transition Solution provides lessons specific to each of the five WIOA required activities: Job & Career Exploration, Work-Based Learning, Post-Secondary Training, Workplace Readiness, and Self-Advocacy. Each lesson plan includes an instructor's script, lesson objectives, lesson plans, independent practice, and collaborative resources to fulfill the requirements of WIOA. These lessons will engage students in meaningful learning to support independent adult living and work. Lessons are leveled to meet the needs of all learners. Each lesson plan is connected to additional materials with identified pages from 13 existing Attainment Company curricula, resource books, pictorial instruction, software, apps and videos—all included in the package.

Professional Automatic Nail Clipper by ClipDifferent

ClipDifferent

Price: \$149 - \$149

Product Type: adapted play/manipulative, seating/positioning/mobility, sensory stimulation

Skill Level: secondary, adult

Disability: cognitive, learning, physical, speech, vision
The ClipDifferent Pro is a patent-pending, carefully engineered fingernail clipper that transforms this repetitive "task" into an easy experience. The safe fingernail slot prevents skin from coming into contact with the trimming mechanism (even those with full vision loss can use it safely). In addition, it catches the nail clippings in a drawer, eliminating the mess of this routine task. It's also compact (3" x 5") and contains a rechargeable battery that can last months between charges.

Pulse Mechanical Switch

Adaptive Switch Laboratories, Inc.

Price: \$0 - \$156

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

The ASL 320 Pulse Mechanical Switch is a mechanical switch which was designed to activate from any location on the top of the switch with minimal force. It includes a rubber seal which prevents foreign substances from entering the switch and interfering with operation.

Quad Belt

Bodypoint Inc.

Price: \$98.00 - \$115.00

Product Type: seating/positioning/mobility

Skill Level: secondary, adult

Disability: physical

A non-padded belt designed for wheelchair users with minimal hand function, with a stiffened thumb socket that makes it easier to grasp and manipulate. It features the Bodypoint® Rehab Latch™, our lowest force buckle, which is often the only buckle such users can operate themselves. It features a two-stage release with wide 70° opening angle to minimize accidental detachment. This belt is a center-pull, size large only.

Read and Tell

Attainment Company, Inc.

Price: \$259.00

Product Type: instructional material

Skill Level: elementary, secondary

Disability: learning, physical

An adapted literature collection featuring 32 popular novels like Little House on the Prairie and Because of Winn-Dixie. Ideal for elementary and secondary students. Highlights vocabulary, literacy comprehension, and listening skills and can be used as a stand-alone program or a great companion to an ELA program. Literature has been adapted to include modified storylines, symbol supports, and repeated text.

Read Naturally GATE

Read Naturally

Price: \$159.00 - \$159

Product Type: instructional material

Skill Level: elementary, secondary

Disability: learning

compatible with Duxbury software and Braille2000 software and pdf and text files to paste the text to create large-print versions for visually impaired students.

ReaderPen

Scanning Pens

Price: \$285.00 - \$285.00

Product Type: learning aid

Skill Level: elementary, secondary, adult

Disability: cognitive, learning, speech, vision

ReaderPen is a portable literacy tool helping students develop their independent reading skills while promoting inclusion in their classroom or distance learning. Simply scan words or sentences and hear them read discreetly via earbuds. The goal is to nurture the reading skills of a student until they no longer feel like they need the support. Built in dictionaries expand vocabulary. The voice recorder is great for recording instructions or fluency progress checks. The scan to cursor feature allows users to scan from worksheets/textbooks directly to Google/Word Docs for simplified note taking or study guides. Saves money and time by reducing students' reliance on a human reader. Reader Pen is mainly used as a 1:1 reading accommodation for a student, you can also Exam Lock it out for day to day tests which removes all features except reading. Having it listed as "text to speech" in the students IEP is helpful for exam approval. Does NOT require WiFi. Stand alone does not require another device.

ReaderPen Secure

Scanning Pens

Price: \$285.00 - \$285.00

Product Type: learning aid

Skill Level: elementary, secondary, adult

Disability: cognitive, learning, speech, vision

ReaderPen Secure is a portable text to speech device to support people with reading difficulties (like Dyslexia) in the workplace empowering them to be more productive with less stigma. Simply scan print base words or sentences and hear them read discreetly via earbuds. This multi-sensory reading aid will enable you to be a more inclusive employer, without the worry of any data breach. There is NO storage capabilities on this device. Built in dictionaries will show definitions to scanned words instantly. The scan to cursor feature allows users to scan from paperwork directly to computer to digitize materials quickly and easily. Does NOT require WiFi. Stand alone does not require another device.

Residential Wheelchair Ramps

Express Ramps

Price: \$350 - \$7000

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult

Disability: physical

Pathway 3g residential wheelchair ramps can provide access to most homes. They are easily configurable and quick to install.;

RightStart Mathematics

RightStart Mathematics

Price: \$15.00 - \$500.00

Product Type: instructional material

Skill Level: preschool, elementary

Disability: learning

RightStart Mathematics uses the AL Abacus to provide a visual, auditory, and kinesthetic approach to elementary math. Fractions are approached with a linear perspective. Card games are used to learn concepts and strategies and to practice facts. The lessons guide the teacher day-by-day, helping children understand, apply, and enjoy mathematics.

Ring Around Bells

Enabling Devices

Price: \$259.95 - \$0.00

Product Type: adapted play/manipulative, learning aid, sensory stimulation

Skill Level: preschool, elementary, secondary

Disability: cognitive, hearing, learning, physical, vision

Ring Around Bells is excellent for music therapy and classroom music time. The bells are precision-tuned and provide exceptional sounds. Use this musical toy four different ways: by attached yellow switch, your own capability switch, twirl by hand, or detach a bell and play it by hand.

Rubber Dome Joystick Handle

Bodypoint Inc.

Price: \$79.00 - \$79.00

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Bodypoint's Rubber Dome Joystick Handle is designed specifically for users with weak hands. Its low, wide form matches the shape of the palm, keeping the wrist neutral for comfort and control. Ribbed texture reduces sweat buildup and increases friction to keep hands from slipping off with involuntary movement.

Call our funding office today and we can help you explore options for

Veterans Administration, insurance, long-term care, vocational rehab, and Medicaid waivers to cover the cost of purchase and installation.

Sip and Puff Head Array

Adaptive Switch Laboratories, Inc.

Price: \$4730.00 - \$5802.00

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

The ASL 109 combines simple sip and puff controls with head movements. This system is designed for those with lateral head movement and weak breath control volume. The driver control is typically used with individuals with high level spinal cord injury.

Skoog 2.0

Skoogmusic

Price: \$199.95

Product Type: adapted play/manipulative

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, learning, physical, vision

Skoogmusic makes musical instruments we can all play. And we really do mean everyone! Play, jam and create music right out the box. We call it 'musicplay.'

Skwitch

Skoogmusic

Price: \$49.95

Product Type: adapted play/manipulative, learning aid, sensory stimulation

Skill Level: preschool, secondary, adult

Disability:

Skwitch is the brand new musical instrument from Skoogmusic. But we think it's so much more. Think of it as Skoog's compact, nimble little brother. Or sister. And it clips straight on to your iPhone, so within minutes you have a piece of accessible tech that you can use to create music, learn coding and more. It's a bit like magic, but better.

Slip-on Pads

Bodypoint Inc.

Price: \$43.00 - \$51.00

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Slip-On Pads slide over webbing to add padded comfort to basic non-padded chest or hip belts, providing greater pressure distribution. Non-wrinkling, flexible fabric resists dirt and grime, and rounded edge binding avoids skin irritation. Three sizes to fit 1", 1.5" and 2" webbing.

Smart Choices for a Digital Age

Attainment Company, Inc.

Price: \$39.00 - \$289.00

Smart Choices for a Digital Age is a secondary social skills curriculum emphasizing the appropriate use of various technologies, as well as pertinent topics, such as cell phones, the Internet, emails, text messages, social media sites, online research, cyberbullying, and more! This program provides the instruction and supports for students' use of technology at home and in school.

SmartKnitKIDS Seamless Sensory Garments

Knit-Rite, Inc.

Price: \$7.95 - \$19.99

Product Type: sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

Bumps, seams, ouchies, burglars, or nuggies. By whatever name they're called, seams and lumps and bumps can be a nuisance. SmartKnitKIDS Seamless Products have taken the woes out of clothes and help to keep the morning routine in check. In 2003, SmartKnitKIDS, a brand of Knit-Rite, Inc., started receiving requests from parents for a completely seamless sock. It seemed that all the seamless socks available had a flat or handlinked seam across the toes. To a sensitive child, this was still a bother; there was still a toe seam. With over 90 years of medical textile expertise, Knit-Rite used parent feedback to create a patented 100% seamless sock with added comfort features for sensitive feet.

Social Skills at School: Elementary

Attainment Company, Inc.

Price: \$199.00

Product Type: adapted play/manipulative, instructional material, learning aid

Skill Level: elementary

Disability: cognitive, learning, physical, speech

The updated Social Skills at School: Elementary is a perfect social skills program for elementary students with autism, intellectual, or behavioral disabilities. A skills-based curriculum for elementary students to develop an understanding of behavioral cues and expectations of a typical school day.

Socks

Beedlebug, LLC

This unique product is the only sensory therapy tool that can adapt to the needs of each individual, from motor sensory, to tactile, to life skills. The Fidget Folder is designed to be used in conjunction with our Fidget Bundles-activity bundles designed to support motor skill and sensory development. The All-in-One Fidget Folder includes the Communications, Dressing, Motor Sensory- and Tactile Bundles which are color coded

and come in individual pouches for easy organization.

The Fidget Mat

Abram's Nation

Price: \$299.29 - \$299.29

Product Type: adapted play/manipulative, instructional material, sensory stimulation

Skill Level: infant/toddler, preschool, elementary

Disability: cognitive, learning, physical

The Fidget Mat gives you 9 different multisensory experiences in one mat. Lots to feel, hear and touch to help regulate your senses and develop new skills. Easily folds with convenient handle to take anywhere. Made of high-quality fabrics and compliant vinyl for easy care. Wipe with damp cloth and spot clean.

The GMA System

Gray Matters Alliance

Price: \$2000 - \$4000

Product Type: instructional material, learning aid, sensory stimulation

Skill Level: elementary, secondary, adult

Disability: cognitive, learning, speech, vision

The GMA System is a customizable Assistive Technology device that provides remote supports and remote monitoring to individuals that need assistance in their day to day lives. The device allows people to live a more independent life while simultaneously keeps them safe in their environment. Some examples of the device's features are telehealth, virtual vitals, medication management, educational tutorials, home safety with smart home compatibility, scheduler for ADLs, care plan and notes, and many things to keep someone socially engaged, avoiding isolation and loneliness.

The Light tech Communication Book Files

Creative Communicating

Price: \$125.00 - \$150.00

Product Type: instructional material, learning aid

Skill Level: infant/toddler, preschool, elementary, secondary

Disability: cognitive, learning, physical, speech

This is an electronic download in pdf format of the light tech communication books to print. There is a selection of a six location CLAP book and a 12 location student book.

The Original AFO Assist

Home Heart Beats, LLC

Price: \$85.00 - \$90.00

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

The Original AFO Assist® is an international award winning adaptive aid that facilitates independent donning of an ankle foot

orthosis and shoe. Our product is made in the USA by a Woman-Owned-Small Business. Our product can help you regain dressing independence and reduce the need of caregiver assistance.

The Safety Sleeper

Abram's Nation

Price: \$3955.72 - \$5539.72

Product Type: adapted play/manipulative, seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, physical

The Safety Sleeper® is a medical enclosed safety bed designed with love and care for children and adults with special needs who can benefit from a secure sleeping space. The enclosed design prevents users from wandering at night and keeps them safe. Built with high quality, durable materials and made to be easily portable in a suitcase, The Safety Sleeper® is completely customizable to fit the needs of each individual. Options include soft frame pads to protect users from the metal frame, pockets for item storage inside, various entry options, and access points for items such as monitor wires and feeding tubes. The entire enclosure is machine washable to keep you clean and cool.

The SimplyHome Firefly (sensor based technology)

SimplyHome

Price: \$699.95 - \$999.90

Product Type:

Skill Level: adult

Disability: cognitive, hearing, physical

Full of features that help you live independently and stay connected, the Simply Home System: Firefly utilizes custom components to address concerns about cooking safety, falls, medication compliance, sleep patterns, wandering and elopement, aging in place, and more. By communicating with multiple sensors to observe activities of daily living, the Simply Home System: Firefly prompts the completion of daily routines and proactively alerts caregivers if assistance is needed.

The Voice Keeper

ALMAGU USA

Price: \$0 - \$300

Product Type: telecommunications

Skill Level: preschool, elementary, secondary, adult

Disability: speech

With The Voice Keeper, you can create a digital copy of your voice before you lose it to ALS. The Voice Keeper is the easiest to use voice banking service, allowing you to bank your voice straight from your iPhone, starting with as little as 50 sentences.

Therapy Shoppe Desktop Writing Slant Boards

Therapy Shoppe® Incorporated

Price: \$52.99 - \$52.99

Product Type: instructional material, learning aid

Skill Level: elementary, secondary, adult

Disability: cognitive, learning, physical, vision

Premium lightweight slantboards provide a smooth 15" x 13-1/2" writing surface and functional 20-degree writing angle for optimal wrist positioning. These durable slantboards naturally facilitate functional finger grasps, help with directionality challenges, and reduce eye/head-movement demands. Feature polished edges, non-slip feet, stainless clip, and a free writing tool holder. Six color choices.

Time Timer MOD®

Time Timer LLC

Price: \$36.95 - \$36.95

Product Type: adapted play/manipulative, learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, vision

The Time Timer MOD® is a 60-minute visual timer that has style and durability in a size that's portable and easy to use anywhere in the home, classroom, or therapist office to ease transitions between activities. The MOD features a removable, silicone case that offers an extra layer of protection from the bumps and falls that are part of everyday life. An on/off switch for the audible alert, for any time you need to hear the beep or prefer silence. No loud ticking. Removable covers allow you to change the color of your MOD

Time Timer MOD® - Home Edition

Time Timer LLC

Price: \$24.95 - \$24.95

Product Type: adapted play/manipulative, learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, vision

The Time Timer MOD - Home Edition is a collection of visual timers that can bring comfort, confidence, and focus to productivity. Colors can impact mood, therefore creating a calming environment for those with color sensitivities. Those with ADHD may also benefit from color coding tasks with specific visual timers. Available Colors: Lake Day Blue, Dreamsicle Orange, Peony Pink, Fern Green, Cotton Ball White, Pale Shale. Three Case Value Packs available for additional purchase.

Time Timer Original 3"

Time Timer LLC

Price: \$29.95 - \$29.95

Product Type: adapted play/manipulative, learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning,

vision

The Time Timer Original 3" is an ideal 60-minute countdown timer for individuals. Included is a Dry Erase Activity Card you can use to create visual schedules by drawing, writing, or applying a picto card. With time-to-task management you can ease transitions no matter age or ability. Encourages confidence, independence and natural talents like visual thinking. Time Timer Original timers are available in 3-inch, 8-inch, and 12-inch models

Time Timer PLUS® 120 Minute

Time Timer LLC

Price: \$40.95 - \$40.95

Product Type: adapted play/manipulative, learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, vision

The Time Timer PLUS 120 Minute offers a greater visual impact for longer duration needs. Time management is not a one-size-fits-all undertaking. Sometimes one hour is just not enough time. The Time Timer PLUS 120 Minute is ideal for independent learning stations at home, time blocking for large projects, nap times, and long-duration activities. Volume control dial for those times you need a louder tone and those when you prefer silence. Easy-to-read numbers Lightweight anti-static disk No loud ticking

Time Timer PLUS® 20 Minute

Time Timer LLC

Price: \$40.95 - \$40.95

Product Type: adapted play/manipulative, learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, vision

The Time Timer PLUS 20 Minute makes it easy to visualize how quickly 20 minutes will pass, especially beneficial for shorter task durations. Use the Time Timer PLUS 20 Minute to help ease transitions between activities and reduce anxiety. Also great for Pomodoro techniques for ADHD. The Time Timer PLUS family offers visual timers in 5-minute, 20-minute, 60-minute and 120-minute durations. Volume control dial for those who need a louder tone and those that prefer silence. Easy-to-read numbers Lightweight anti-static disk No loud ticking

Time Timer PLUS® 5 Minute

Time Timer LLC

Price: \$40.95 - \$40.95

Product Type: adapted play/manipulative, learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, vision

The Time Timer PLUS 5 Minute offers greater visual impact for shorter duration activities such as brushing teeth, breathing exercises, transitioning to new activities, and managing daily schedules. For those with severe cognitive or physical disabilities, being able to see how much longer can create better success for task completion and focus. The Time Timer PLUS family offers visual timers in 5-minute, 20-minute, 60-minute and 120-minute durations. Volume control dial for those who need a louder tone and those that prefer silence. Easy-to-read numbers Lightweight anti-static disk No loud ticking

Time Timer PLUS® 60 Minute

Time Timer LLC

Price: \$40.95 - \$40.95

Product Type: adapted play/manipulative, learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, vision

The Time Timer PLUS 60 Minute features a rugged case and durable clear lens to protect its patented red disk. The on-the-go handle helps encourage independent living and working in all ages and abilities.

The Time Timer PLUS 60 Minute shows visually how much time has elapsed and eases anxiety between transitions. The Time Timer PLUS family offers visual timers in 5-minute, 20-minute, 60-minute and 120-minute durations. Volume control dial for those who need a louder tone and those that prefer silence. Easy-to-read numbers Lightweight anti-static disk No loud ticking

Time Timer TWIST®

Time Timer LLC

Price: \$21.95 - \$21.95

Product Type: adapted play/manipulative, learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, vision

The 90-minute TWIST is an easy-to-use time management tool. To use, simply turn the outer ring until you get to your desired time, then push the play button. A digital display shows at a glance how much time remains. A magnetic back makes the TWIST a snap to display. Twist the colorful, outer ring to quickly set the time required Play / Pause button for quick starts and easy pause functionality Digital tick marks appear when timer is actively running Duration of timer appears in the center Quiet operation, no loud ticking Digital alert sounds at the end of the timer (Alert is not optional on this model) Available in Original Red, Lake Day Blue, Dreamsicle Orange, and Pale Shale

Time Timer WASH + Soap Dispenser

Time Timer LLC

Price: \$72.95 - \$72.95

Product Type: learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, vision

The Time Timer WASH + Soap Dispenser is a touchless, automatic soap dispenser integrated with a visual timer to ensure hands are being washed long enough to fulfill the CDC recommendation. The visual aspect of this timer helps all ages and abilities understand the duration and process of washing hands. The timer can be initiated without touching by simply holding hand under spout. Soap (not included) automatically dispenses and the timer will begin the countdown. As the disk disappears, time elapses, encouraging scrubbing through the duration. The timing of the countdown allows for users to first wet their hands, then wash for the approved 20-seconds, then rinse. Music and sounds can be used to reinforce the steps or it can be used silently for sound sensitive environments. USB Rechargeable.

Time Timer® MAX

Time Timer LLC

Price: \$119.95 - \$119.95

Product Type: adapted play/manipulative, learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, vision

The Time Timer MAX is 17 inches by 17 inches so it can be seen in larger spaces such as gymnasiums, cafeterias and auditoriums. The big red disk makes it easy to see for anyone with low vision. It's also eight timers in one - with customizable durations and changeable timer faces, the MAX can countdown as low as 5 minutes, or as high as 24 hours. Ease transitions between activities no matter how long the activity is. Included with the MAX are 3 two-sided timer faces- 5/15 minutes, 30/60 minutes, 120 minutes/Dry Erase Board timer face allowing for maximum flexibility and customization Divide the time with colored set time dividers that are conveniently stored on the back of the timer Free-standing or wall-mounted options, whiteboard or map rail. 1 bracket mount is included.

Time Timer® Desktop App

Time Timer LLC

Price: \$19.95 - \$19.95

Product Type: adapted play/manipulative, learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, vision

Time Timer® Desktop App (available for Mac or Windows) is perfect for classroom use, virtual learning, and is interactive whiteboard compatible. Create saved timers for routine lesson plans and activities to ease transitions. The 'Always-on-Top' feature keeps Time Timer visible while doing other activities or presentations. System Compatibility Requirements: 1GB RAM disk space available for all operating systems Windows OS: Windows 7 or later Mac OS: 10.9200 or later

Time Timer® MOD + Dry Erase Board

Time Timer LLC

Price: \$51.95 - \$51.95

Product Type: adapted play/manipulative, learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, vision

The Time Timer MOD + Dry Erase Board includes both a Time Timer MOD and the Time Timer Dry Erase Board. The Time Timer MOD is a 60-minute visual timer that's portable and easy to use anywhere and the Time Timer Dry Erase Board is perfect for visual schedules. It is perfect to ease transitions, set expectations, and keep schedules on time for those with ADHD, Autism, and other cognitive differences that require assistance with focus and anticipation. Includes Time Timer MOD and Dry Erase Board Convenient caddy to hold markers and supplies Time Timer MOD includes removable charcoal cover Now magnetic and available in new color combinations!

Time Timer® Original 12"

Time Timer LLC

Price: \$41.95 - \$41.95

Product Type: adapted play/manipulative, learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, vision

The largest of the Original family, the Time Timer® Original 12" is the heart of any classroom or home. Students learn more when they are able to spend more time focusing, rather than asking how much time is left. This can help students understand that an undesired task will not last forever. The Time Timer Original 12" eases stressful transitions by showing "how much longer" and can be seen from a distance. Time Timer Original timers are available in 3-inch, 8-inch, and 12-inch models Large patented red disk that disappears as time elapses No loud ticking, no distractions Optional audible signal when time is up Free-standing and wall-mounted options

Time Timer® Original 8"

Time Timer LLC

Price: \$36.95 - \$36.95

Product Type: adapted play/manipulative, learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, vision

The Time Timer Original 8" is an ideal 60-minute visual timer for small to medium groups. It can stand alone or hang on the wall and is perfect for the home, classrooms, and student testing. The perfect size to encourage focus and time management for an entire room or in a small 1-to-1 session - for all ages and cognitive abilities. Time Timer Original timers are available in 3-inch, 8-inch, and 12-inch models. Large patented red disk that disappears as time elapses. No loud ticking, no distractions. Optional audible signal when time is up;

Time Timer® Original 8" - Learning Center Classroom Set (Set of 3)

Time Timer LLC

Price: \$104.95 - \$104.95

Product Type: learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, vision

With the new Learning Center Classroom Set, the Time Timer Original 8", a teacher favorite, is now available in a multi-pack set of three. Each set comes with three timers of different colors to aid in color curriculum during the early years and for time management in color-coded classrooms. Available in a Primary Color Collection: Red, Yellow, and Blue, or a Secondary Color Collection: Orange, Green and Purple. Designed to be used in learning centers or stations, each set also includes 3 Dry Erase Activity Cards to label the learning centers as well as a bi-fold guide filled with Classroom Time Management and Learning Center ideas.

Time Timer® WASH

Time Timer LLC

Price: \$28.95 - \$28.95

Product Type: adapted play/manipulative, learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, vision

The Time Timer WASH keeps everyone safe with a touchless, water-resistant visual timer for handwashing. Its familiar disappearing disk, paired with the CDC recommended duration for clean hands, gives people of all ages and abilities an easy-to-understand resource for ensuring germ-free hands. It eases this essential task for anyone with OCD, Autism, or ADHD. The Time Timer WASH times for a total of 30 seconds and breaks hand washing

into three simple steps- Soap (5 seconds) Scrub (20 seconds) Rinse (5 seconds)

Time Timer® Watch

Time Timer LLC

Price: \$84.95 - \$84.95

Product Type: learning aid

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning

Enjoy the empowering effect of your favorite Time Timer® product that you know and love while on the go. The Time Timer® Watch provides an easy way to keep every daily routine on track, increase focus throughout the day, and improve independence and self-regulation that is discreet and portable. With improved durability and new interchangeable bands, the Time Timer Watch now allows you to make it your own. Mix and Match with your favorite watch band colors to reflect your style. Or carry the watch face in the new FOB accessory for further portability. Whether you depend on Time Timer® products to support yourself or others with ADHD, Autism, or other cognitive variances, or you just want the look of a fun sporty watch that increases productivity, the Time Timer Watch is your solution. The sporty design makes this wrist-watch a great accessory for students, adults, athletes, teachers, and professionals, of any age or ability.

TM100 - Trigger Mechanism

Be Adaptive Equipment, Inc.

Price: \$334 - \$334

Product Type: adapted play/manipulative

Skill Level: preschool, elementary, secondary, adult

Disability:

Be Adaptive Equipment Model TM100 is a vacuum actuated trigger system that attaches to your trigger guard. Is simple to install on any weapon with a standard trigger guard. The unique design of the mechanism allows it to fire most weapons if placed anywhere inside of the trigger guard. The simplicity of the set up allows the trigger mechanism to be moved from one weapon to another easily and quickly. The TM100 fires the weapon by a very slight suction on the blue tube in the picture which is attached to the control box. The control box is attached to the stock of the weapon with a Velcro cinch strap. The mechanism operates on 12 volt DC power and comes with a pigtail that can be attached to one of the batteries in your power chair or attached to an auxiliary battery.

Toe Straps

Bodypoint Inc.

Price: \$26.00 - \$26.00

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Add our durable, hook-and-loop toe straps to slotted wheelchair footplates to limit aggressive foot rotation and dorsiflexion. Length is fully adjustable and can be trimmed shorter as needed. For enhanced foot positioning needs, consider our Ankle Huggers Support Straps instead. Use them alone or in conjunction with toe straps.

Tower Volcano Lamp

Adaptive Tech Solutions

Price: \$48.24 - \$0.00

Product Type: adapted play/manipulative, sensory stimulation

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Our switch adapted Volcano Lamp has been adapted to accept a standard switch (sold separately) or it can be used without a switch. When you press your switch, the colored 'lava' balls flow from the volcano up into the water and back down again. Measures approximately 8" x 3" x 3" and requires 3 AA batteries (not included).

Traceable Name Stamps for Students | AT

Say it with Symbols AAC

Price: \$20.95 - \$26.95

Product Type: adapted play/manipulative, instructional material, learning aid

Skill Level: preschool, elementary

Disability: cognitive, learning, physical

SignitwithStamps.com is your source for personalized, traceable name stamps for special education students. Our exclusive Learn To Write personalized traceable name stamps help kids learn to print or improve their handwriting! Children with special needs as well as preschoolers will have fun using our easy-grip name stamps to trace the letters and "write" their own name. Simply trace the dotted letters in their name stamp and voila, they can "sign" their school work, artwork, books and cards! Available in both print or cursive traceable fonts. Order student names stamps at www.SignitwithStamps.com.

Trexo Home Robotic gait-trainer

Trexo Robotics Inc.

Price: \$34900 - \$39900

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary

Disability: physical

The Trexo Home robotic gait-trainer allows a child with a physical disability to take repetitive and consistent steps and walk, in many cases for the first time in their lives.

Trimline Shoulder Harness

Bodypoint Inc.

Price: \$107.00 - \$119.00

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult

Disability: physical

Focused shoulder retraction for wheelchair users with two separate, adjustable padded straps that comfortably accommodate asymmetry. Each shoulder can be independently controlled while keeping the chest clear for maximum freedom of movement. New MD (multi-directional) Pull Straps allow it to be set up on the spot as a front-pull or a rear-pull harness. Machine wash and dry.

Twirling Bead Chain

Enabling Devices

Price: \$239.95 - \$0.00

Product Type: adapted play/manipulative, learning aid, sensory stimulation

Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

Feel the cool beads! Activate the built-in red gumball switch and the carousel begins to turn causing the colorful cool beads to gently touch your hand as they spin by. In addition, upbeat music plays and red and blue lights sparkle. Great sensory experience that also teaches cause and effect.

Twister

mo-Vis

Price: \$138 - \$138

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

Small and elegant switches with very light sensitivity for electric wheelchairs. Available in 5 colors and in different models.

Twister Pro

mo-Vis

Price: \$170 - \$170

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

A qualitative and durable switch for electric wheelchairs, which requires medium force. Can also function as a safety button for R-net or LiNX operated systems.

U-shaped Joystick Handle

Bodypoint Inc.

Price: \$79.00 - \$79.00

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Our U-Shaped Joystick Handle provides maximum wheelchair driving control for those with limited hand function. The curved "goalpost" design with waterfall edge is form-fitting and ergonomic, comfortably cradling hands while keeping them from sliding off. Available in two

widths to fit different hand sizes, and can be custom-molded with hot water.

Uncle Goose Braille Blocks

Uncle Goose

Price: \$45.00 - \$45.00

Product Type: adapted play/manipulative, instructional material, learning aid

Skill Level: infant/toddler, preschool, elementary

Disability: vision

An educational toy for those who use Braille to communicate. Touch each embossed Braille letter on two sides of every block in this 28 piece set. Use your fingertips to trace the clean, European-style font that accompanies every Braille letter. Feel the attention to detail in every hand crafted cube.

Uncle Goose Braille Math Blocks

Uncle Goose

Price: \$26.00 - \$26.00

Product Type: adapted play/manipulative, instructional material, learning aid

Skill Level: infant/toddler, preschool, elementary

Disability: vision

We debossed each colorful block in this 16 piece set with either a number or a math symbol. Then, we used the Nemeth Braille Code for Mathematics to emboss the Braille translation next to each number or symbol.

Uncle Goose Classic ABC Blocks

Uncle Goose

Price: \$40.00 - \$40.00

Product Type: adapted play/manipulative, instructional material

Skill Level: infant/toddler, preschool, elementary

Disability: cognitive, learning

Love these blocks. Teach children to spell, sequence, and stack; sort, build, and match. Four full alphabets, colorful numbers, math symbols, plus a menagerie of hand-crafted animals. Detailed embossing on two sides of each block.

Uncle Goose Classic Lowercase ABC Blocks

Uncle Goose

Price: \$40.00 - \$40.00

Product Type: adapted play/manipulative, instructional material

Skill Level: infant/toddler, preschool, elementary

Disability: cognitive, learning

The ideal complement to our Classic ABC blocks. Four full lowercase alphabets, with two embossed letters on opposing sides. Add numbers, math symbols, and a small petting zoo of hand-crafted baby animals.

Uncle Goose Nursery Rhyme Favorite Blocks

Uncle Goose

Price: \$17.00 - \$17.00

Product Type: adapted play/manipulative

Skill Level: infant/toddler, preschool, elementary

Disability: cognitive, learning

Teach children classic storytelling skills with this 9 block set. We embossed each block with two iconic images from classic Mother Goose stories. Read the playful text for each rhyme on the four other sides in our original, artful font.

Uncle Goose Sign Language Blocks

Uncle Goose

Price: \$45.00 - \$45.00

Product Type: adapted play/manipulative

Skill Level: infant/toddler, preschool, elementary

Disability: hearing

An educational toy for those who use American Sign Language to communicate. Touch the two embossed sides on every block of this 28 block set. Use your fingertips to trace the clean, European-style font that accompanies every letter. Feel the attention to detail in every hand crafted cube.

Uncle Goose To Tonet ABC Blocks

Uncle Goose

Price: \$23.00 - \$23.00

Product Type: adapted play/manipulative, instructional material

Skill Level: infant/toddler, preschool, elementary

Disability: cognitive, learning

Behold 14 bold black and white blocks. Sans serif letters on black and white backgrounds. See and feel two embossed sides per block. Enjoy the geometric and floral patterns.

Uncle Goose To Tonet Number Blocks

Uncle Goose

Price: \$23.00 - \$23.00

Product Type: adapted play/manipulative, instructional material

Skill Level: infant/toddler, preschool, elementary

Disability: cognitive, learning

Behold 14 bold black and white blocks. Sans serif numbers on black and white backgrounds. See and feel two embossed sides per block. Enjoy shapes and symbols. Use the plus, minus, and equals signs to create equations.

Universal Elastic Strap

Bodypoint Inc.

Price: \$86.00 - \$100.00

Product Type: seating/positioning/mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

A stable solution for temporary, anytime positioning. Wraps around your chest, abdomen, lap or legs - at home, in clinic, for sports, or whenever short-term postural support is needed. Soft to the touch with

strong, durable hook-and-loop closure and easy-grasp thumb hole. Three sizes available. Cut to length without fraying.

UNO Single Switch Scanner

Adaptive Switch Laboratories, Inc.

Price: \$1000.00 - \$5000.00

Product Type: seating/positioning/mobility

Skill Level: elementary, secondary, adult

Disability: physical

The UNO Single Switch Scanner with Bluetooth is designed so that a person that has only one consistent switch site available can control multiple things with one switch; this includes power wheelchair movement, seat functions, phones, tablets and communication devices.

UPGRADE

Attainment Company, Inc.

Price: \$69.00 - \$299.00

Product Type: adapted play/manipulative, instructional material, learning aid

Skill Level: secondary, adult

Disability: cognitive, learning, physical, speech

UPGRADE is a research-based curriculum focusing on student employment goals in high school, a post-secondary program, or on the job. UPGRADE provides students with strategies for self-evaluation, like self-monitoring and goal setting. There are six units of instruction emphasizing soft skills necessary for school, work, and community success. These units are Attitude and Cooperation, Reliability, Productivity and On Task, Teamwork and Communication, and Quality of Work. After instruction, 10 UPGRADE lessons teach both the professional and the student to evaluate performance in each soft skill category.

USB Charger

mo-Vis

Price: \$479 - \$479

Product Type: seating/positioning/mobility

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: physical

Can be used to charge any USB-powered device with a power consumption of up to 3 A.

Using Assitive Technology to Meet Math Standards

Attainment Company, Inc.

Price: \$29.00 - \$0.00

Product Type: instructional material

Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, speech, vision

This guide for IEP teams provides an extensive list of goals based on math standards with potential AT solutions. Standards range from number sense to calculus (K-12). Also describes software, hardware, and manipulative tools with sample IEP goals.

Authors Sherry Purcell Ph.D and Debbie Grant M.A. 290 pages.

Vibes Hi-Fidelity Earplugs

Westminster Technologies

Price: \$23.99 - \$26.99

Product Type:

Skill Level: elementary, secondary, adult

Disability: hearing, learning

Vibes Hi-Fidelity Earplugs are reusable earplugs designed for sound quality that are used by individuals with sensitivity to sound, such as those with Autism Spectrum Disorder, Sensory Processing Disorder, Traumatic Brain Injuries, ADHD, etc. Unlike traditional earmuffs and foam earplugs that muffle sounds and isolate users from their environment, Vibes use acoustic filtering to lower the volume of the user's environment to a more comfortable level, while still allowing them to hear everything around them clearly and interact socially. Vibes' clear design makes them virtually invisible, allowing users to avoid the attention and stigma that is associated with bulky, bright colored hearing protection.

Vibrating Light with Music

Enabling Devices

Price: \$123.95 - \$0.00

Product Type: adapted play/manipulative, learning aid, sensory stimulation

Skill Level: infant/toddler, preschool, elementary, secondary, adult

Disability: cognitive, hearing, learning, physical, vision

The Vibrating Light with Music encourages even the most challenged child to reach out. The textured plate lights up and vibrates when pressed. It can be placed on a lap board or mounted on a wall. Hardware for wall mounting included.

Vibrating Pillow- 2 Speed-Switch Adapted

Adaptive Tech Solutions

Price: \$43.81 - \$45.81

Product Type: adapted play/manipulative, sensory stimulation

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Our switch adapted vibrating pillows have 2 speeds, low and high vibration, and are covered with either a smooth or a corduroy material that people love to touch. These pillows can be activated by applying pressure to the pillow or by pressing a switch (sold separately) that has been plugged into the pillow. Powered by 2 "D" batteries (not included). Measures 12" x 12"

Vidatak EZ Picture Medical Communication Board | AAC

Say it with Symbols AAC

Price: \$19.95

Product Type: instructional material

Skill Level: secondary, adult

Disability: cognitive, hearing, learning,

speech

This research-based picture communication board helps non-verbal children and adults communicate their healthcare needs and improves their care. Ideal for patients with aphasia, intellectually disabilities, intubated or do not speak English. The Vidatak EZ Medical Picture Communication board is lightweight and durable. The patient simply points to the appropriate symbol (with words in English) or uses the non-toxic marker included to mark it. Each board is printed on large 17" x 11" dry erase board with pictures on both sides. Comes individually shrink-wrapped with a dry-erase marker. Symbols are large, 1.5" square. Available in pictures, symbols, English words and spiritual symbols. Available from SayitwithSymbols.com. Other languages also available by special order.

MATERIALS: Outer shell: mid-weight nylon

Taslan Inner shell: Polartec(r) Fleece Layer (in black)

Wiggle Seat Discs

Therapy Shoppe® Incorporated

Price: \$24.99 - \$26.99

Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation

Skill Level: preschool, elementary, secondary, adult

Disability: learning

Air cushion wiggle seats for kids, teens, and students! You'll love our new 10-3/4" early elementary size sensory seat disc, or a 13" size that's especially nice for older elementary age and/or middle school students. These high quality focus seats are excellent for providing vestibular movement input in the classroom or in community settings. Each disc features 100's of delightfully tactile "spikes" on one side, and shorter raised sensory bumps on the other side; they're like having 2 different cushions in one great combo seat! Kids love the subtle wiggly movement these allow - perfect for enhancing focus and attention for kids who need movement input without having to get out of their seats! Each comes with its own hand air pump.

Wiggle Waggles Switch Adapted Tech

Adaptive Tech Solutions

Price: \$42.98 - \$0.00

Product Type: adapted play/manipulative, sensory stimulation

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Wiggle Waggles is a wiggly pup that walks and barks, and his rubber-string "fur" jiggles when he moves! He has been adapted to accept a standard 3.5 mm switch (not included). Press and release your switch to get this guy jiggling and moving. Works by pressing the switch made into his head or by plugging in an external switch.

Wiggle Wobble Chair Bouncers

Therapy Shoppe® Incorporated

Price: \$21.99 - \$21.99

Product Type: seating/positioning/ mobility, sensory stimulation

Skill Level: preschool, elementary, secondary, adult

Disability: learning, physical

Wiggle Wobble Chair Bouncers are a set of 4 rubbery "feet" that transform standard school chairs into bouncy "rocking" chairs! Students can subtly rock, roll, and bounce in all directions with these innovative focus tools. Perfect for kids who tip back on the legs of their chair, movement seekers, wigglers, and others who need vestibular input to concentrate better and be able to stay in their seat. These foot fidget helpers provide just the right touch of sensory input to help kids-adults of all ages reach

their optimal level of arousal. Durable and effective. Designed for use on tile, wood, or carpeted floors. No tools are required. Kids love rocking and bouncing back, forth, up, down, and all around as the continuous movement helps regulate their brains and relax their bodies!

Wireless Attendant Call Button Vibrating Alert AC

Adaptive Tech Solutions

Price: \$56.41 - \$76.41

Product Type: adapted play/manipulative, telecommunications

Skill Level: elementary, secondary, adult

Disability: hearing, physical, speech

Our wireless attendant call button system can be used as-is or with a 1/8" (3.5mm) switch plugged into the transmitter. Includes an A/C plug in receiver chime for indoor use, a battery operated portable receiver chime, and a switch adapted transmitter. This alert signal travels up to 500 feet, and the receiver has 52 ringtones, vibration, a silent mode, and 4 volume levels (from a soft 25 dB up to 110 dB). Requires 2 "AAA" batteries (not included) and 1 12-volt battery (included).

Wireless Suction Speaker

Adaptive Tech Solutions

Price: \$46.33 - \$0.00

Product Type: adapted play/manipulative

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Our wireless Bluetooth speaker has been adapted to accept up to two standard 3.5mm switches. The switch interfaces wirelessly when paired with a Bluetooth 3.0 enabled device and allows a person with limited hand function the ability to pause/play music or video and skip forward/increase volume.

Wobble Switch Mounting Plate

AbleNet, Inc.

Price: \$40.00

Product Type: seating/positioning/ mobility

Skill Level: preschool, elementary, secondary, adult

Disability: physical

Wobble Switch Mounting Plate- Connect your Wobble Switch to any of our mounting arms.

Wrist Wrap Communicator | AAC

Say it with Symbols AAC

Price: \$20.00

Product Type: instructional material, learning aid

Skill Level: elementary, secondary, adult

Disability: cognitive, learning, speech

This comfortable, low tech communication aid can be worn on the wrist of students, adults, instructors and caregivers who use visual reminders and picture symbols at

home, school or recreational settings. The stretchy, terry cloth wristband is approx. 6" long and has three clear plastic pockets that hold up to three different communication boards at a time. One size fits most adults. Slide pre-made picture boards provided inside for communicating on the go. Each sleeve holds one pre-made board with eight 1" symbols. Includes 6 communication boards for socializing, commenting, places, friends, feelings and more.

Zot Artz

Zot Artz

Price: \$100.00 - \$750.00

Product Type: adapted play/manipulative, sensory stimulation

Skill Level: preschool, elementary, secondary, adult

Disability: cognitive, learning, physical

Zot Artz creates art experiences and art tools for everyone. We create entirely new activities for people with disabilities and invite everyone to join in. Zot Artz experiences empower all individuals to reach their fullest potential through meaningful social experiences and interactions. Inclusive art making offers everyone the opportunity to express themselves and make their mark. Parents, friends, and family members share the experience and the joy that creating art can bring.
