Access to Literacy
Using Universal Design for Learning and Assistive Technology through the Lifespan

Picture this scene: *"Mary, a woman in her 60's is driving her car to her doctor's office. She pulls into the parking lot and parks her car. In the parking space she gets too close to the car in front of her and her car emits a beeping sound which gets progressively louder. She hears it and looks into the camera on the screen in front of her and sees the other car and stops. Then she gets out of the car and walks into the building, choosing to use the terra cotta colored curb cut with bumps (truncated domes to walk onto the sidewalk since the sidewalk is slippery from the recent rain. She then walks on the relatively flat, textured sidewalk into the building. As she gets close to the doors they automatically open. She walks to the elevator and pushes the button and as the doors open she enters the elevator. Inside the elevator she pushes the button for the 3rd floor noticing the Braille labeling on the button pad as the button lights up. In a few seconds she arrives at the 3rd floor, the elevator emits a ringing sound. Then she walks out of the elevator to the doctor's office on her left side. Mary walks into the office and moves over from a lower counter where the receptionist is sitting to the counter that is waist high. The receptionist greets her, "Good Morning Mary!" as Mary hands the receptionist her insurance card to be scanned and entered into the computer…"*

The modifications to the built environment that Mary encountered are things we all take for granted, but are changes that have occurred over time due to universal design. Universal design is the design of products, buildings, or environments so they are usable for all people regardless of their physical, cogni-tive, or communicative abilities. Without these adaptations there remain barriers to access to the built world by everyone.

UNIVERSAL DESIGN FOR LEARNING

An extension of universal design is *universal design for learning. Universal design for learning (UDL)* involves access to learning for all people no matter their diversity of abilities. UDL includes these three principles:

- <u>Multiple Means of Representation</u>: the "What" of learning which emphasizes providing information in multiple formats.
- <u>Multiple Means of Action and Expression</u>: the "How" of learning addresses the needs and abilities of the learner providing tools and options that support the learner.
- <u>Multiple Means of Engagement</u>: the "Why" of learning including what stimulates, interests, and motivates learning (CAST, 2018).

The "What" is how a person obtain information such as verbal, print, auditory/TTS etc. The "How" is the expression of information knowledge such as voice, switches or communica-tion apps or devices. The "Why" is more individual to the learner such as topics of interest ie; super heroes, trains, shopping that connect their interest with the learning to increase motivation.

UDL influences the accessibility of knowledge transfer through presentation, instructional design and teaching techniques that support understanding and the ability to use

---

TAMMY BRUEGGER is a is an Assistant Professor in Occupational Therapy at Rockhurst University in Kansas City, Missouri. For over 25 years she has worked as an Assistive Technology Practitioner and Occupational Therapist at The Children's Center for the Visually Impaired. She is a RESNA certified assistive technology practitioner, OT and special educator who has worked for over 40 years in a variety of settings with children and adults who have visual impairment and other neurological conditions. She has presented on and is conducting research with individuals with cortical/cerebral visual impairment, coping and resilience, sensory processing and participation of children with visual impairment. She has also researched and presented on literacy and learning/teaching practices using simulation, mindfulness and art. Tammy has authored a chapter in the book, "Best Practices for Occupational Therapy in Early Childhood" on children with visual impairments.

information (Rose, Hasselbring, Stahl & Zabala, 2005). This may occur within a classroom or settings within the community where an individual or group of people may have difficulty understanding and using information. For example, in a classroom the students may be reading a book during a literacy activity and then answering questions about the book. Some children are using a typical book and others may use a digital book on a tablet using text to speech to "read" the book using an adaptive switch to turn the pages of the digital book. Another example is an older adult may read a standard newspaper in the morning, but their spouse may view the newspaper on their Smartphone with a magnifier app. due to their low vision. As these two individuals demonstrate, the guiding principles of the UDL framework suggest how literacy resources may be modified to accommodate a variety of learning needs.

UDL, LEARNING AND LITERACY

UDL may involve a wide variety of methods used to access information and to express and apply knowledge. This knowledge and application of knowledge is the process and outcome of learning. Learning is accessed through literacy activities and may also result in increased literacy as an outcome of the activity in a interdependent interaction between the activity, context and the person. Literacy connects the person to a continuum of learning which enables people to achieve their goals, to develop their knowledge and potential, and to participate fully in their community and wider society (Unesco, 2023). The United Nations defines literacy as "the ability to identify, understand, interpret, create, communicate and compute, using printed and written materials associated with varying contexts" (UNESCO, 2008). However, other definitions expand literacy to include freedom of expression, to seek, receive and impart information and ideas in any form ie; oral, written, print or other media (Keefe, E. B., & Copeland, S. R., 2011). The definition of literacy utilized impacts how one views literacy and may have different perspectives based on the person's view of literacy. In addition, there are many kinds of literacy to consider including foundational literacy, functional literacy, and digital literacy to name a few. Foundational literacy involves the basic skills for reading, writing and communication needed to support all learning. Foundational literacy assists with and is connected to day to day functional activities resulting in functional literacy. Functional literacy is literacy needed to function in daily life activities such as communicating with others to express a person's wants and needs, and to make choices. It is further defined as the ability to interpret common written materials needed to effectively carry out basic daily life skills and participate in meaningful occupations and social roles (Grajo & Gutman, 2019). It involves ways of gaining information or knowledge in everyday life and conveying what the person knows such as reading instructions for a recipe to cook a meal,

making appointments to get a driver's license, and even filling out an application to get a job or managing a bank account or budget. Grajo and Gutman (2019) propose 3 parts of functional literacy (a) literacy as a form of occupational justice promotion; (b) literacy as an approach to health facilitation, well-being, and adaptive capacity; and (c) literacy as a means to strengthen social connectedness. Definitions of literacy vary by discipline and perspective and further varies how one may interpret literacy in broader contexts.

In schools or community education programs for adults typically the teacher is responsible for foundational literacy. As a person needs more assistance for the day to day functional literacy it may involve other professionals. One professional that may be involved is an occupational therapist. Although OT practitioners are not the primary professionals responsible for teaching individuals to read and write, it is within the OT scope of practice to assist clients to access literacy resources to improve occupational participation, especially for these functional literacy activities (Grajo and Gutman, 2019). This "access" may involve collaboration with the teacher and other team members in the school, hospital, or other community setting. As the need for adaptations become less mainstream it may require the use of assistive technology. Assistive technologies are defined as any device or service that is specifically designed to reduce barriers for people with disabilities (Rose, Harbour, Johnston, Daley, and Abarbanell, 2006). Universal design for learning (UDL) and assistive technology (AT) enable a person to expand their participation in occupations and daily life activities by providing access to literacy throughout the lifespan. For instance, a person who learns to use their Smartphone to set up a doctor's appointment or reservation at a restaurant or even make an appointment at the driver's license center is able to expand their participation in daily activities in the area of health, social connection, and transportation. UDL and AT have become widely integrated tools that work collaboratively to improve access to different types of literacy.

UDL, ASSISTIVE TECHNOLOGY AND LITERACY

When considering using assistive technology it is important to consider theories and frameworks to organize our thoughts and process. As an occupational therapist this includes OT theory and frameworks, such as found in the Occupational Practice Framework 4th Edition (OTPF-4) and for assistive technology practitioners it is AT theory such as the Human Activity Assistive Technology model (HAAT). The HAAT model emphasizes matching the person to the technology by evaluating the dynamic interaction between the user, the activity, and the AT within the specific environment (context) of use. The usability of AT is determined by the interaction between these components, the degree to which a user can use AT to reach their goals effectively (completeness), efficiently (time and effort used),

BACK TO CONTENTS

and satisfactorily when using AT in a specific context (Borgestig, M., Sandqvist, J., Ahlsten, G., Falkmer, T., & Hemmingsson, H., 2017). AT and UDL can be thought of as a continuum with definite distinctions on each end of the continuum but more reflective and integrated in the middle and often interdependent for effective solutions (Rose et al., 2005). Both enhance an individual and a populations' ability to participate within society by optimizing their function and independence (Smith, 2017).
SOCIAL JUSTICE AND ACCESS TO TECHNOLOGY AND ASSISTIVE TECHNOLOGY

The *OTPF–4* serves as a guide for evaluation and intervention of contexts, performance patterns, performance skills and client factors involved in literacy and occupational engagement. However evaluation must also include an assessment of whether technology is physically available to the individual. Access to literacy not only involves the use of AT, UDL and other strategies, but at a more basic level, the social justice and equity involved in access and availability of the technology and the Internet (Hitlin, P., 2018; Herold, B., 2020). According to the Pew Research Center (2019) 90% of adults of all ages use the Internet, but only 27% of adults over 65 years of age use the Internet. Surprisingly, 100% of adults in the 18-29 year old age group report using the Internet or other types of technology daily. Access to the Internet is an issue for 6 out of 10 rural Americans with 43% of adults not having broadband access due to socioeconomic reasons (Anderson, M., Perrin, A.,Jiang, J., & Kumar, M., 2019). Along with this disparity between young adults and older individuals related to the use of technology, many older adults report requiring assistance to set up and learn to use technology (Choi, N. G., & DiNitto, D. M., 2013). In children and younger adults' technology has become so ingrained in day to day life that it is difficult to participate in daily occupations without technology (Pew, 2018). However, inaccessibility may be due to marginalization in society, culturally or socioeconomically. Inaccessibility and poor literacy skills may limit an individual's occupational options fostering a cycle of socioeconomic and educational deprivation and occupational injustice (Durocher, Gibson, & Rappolt, 2013; Townsend, 2012)

In the educational setting, inaccessibility to technology may be due to the cost associated with specialized devices and training to use the devices. The Individual Education Act defines AT as "any device, piece of equipment, or product system, whether acquired commercially off the shelf, modified, or customized, that is used to increase, maintain, or improve the functional capabilities of a person with a disability"(Goodrich, B. & Garza, E., 2015.). More recently, IDEA defines assistive technology services including the evaluation, acquisition, and training to use AT as part of the included services (IDEA, 2023). The focus is more on the person rather than the technology or device. Newer technologies incorporate UDL or accessibility within the design. Many computers, digital tablets, Smartphones, software, or digital applications are developed with accessibility features making them flexible and usable for everyone (Mole, 2013, Dalton, 2017). These include accessible education material (AEM). Accessible educational materials (AEM) are materials and technology usable for learning across the widest range of individual variability, regardless of format or features (CAST, 2019). Whether a document or technology is designed from the start to be accessible for all learners or is made accessible for learners with disabilities, it is considered AEM (CAST, 2019). Universal Design and AEM follow the principles of equitable and flexible use, are simple and intuitive, have perceptible information, low tolerance for error or physical effort, and have appropriate size, space, and use (CAST, 2019).. UDL, AEM and AT viewed as a continuum of services benefits more people using each of these options at the appropriate time, task, and context.

OCCUPATIONAL THERAPY'S ROLE IN ACCESS TO LITERACY

In the schools and in other community settings, there is a team comprised of a variety of professionals along with the teacher who provide services and can consider UDL and assistive technology. Occupational therapy is often one of the related service providers for children with disabilities. OTs are not only members of a team in the schools but is involved frequently with children and adults in outpatient or inpatient rehabilitation facilities, mental health centers and community based settings.   Part of OT's role is to "coach" or train individuals in the use of assistive technology after determining access mode considering physical, cognitive, visual, and other abilities to increase participation and success in school and in daily occupations (Reed, P & Bowser, G., 2012). Occupational Therapists often assist with and make modifications to typical school curriculum and daily activities, provide solutions for students and clients to participate in the classroom or other settings to increase participation. These areas may include: seating and positioning, physical access, activities of daily living (ADL's), instrumental activities of daily living /(iADL's), reading/writing adaptations, executive functioning, functional cognition and communication, visual and hearing adaptations, functional mobility and social-emotional functioning (Goodrich, B. & Garza, E., 2015; Reed P. & Bowser, B., 2012; Stauter, D. W., Prehn, J., Peters, M., Jeffries, L. M., Sylvester, L., Wang, H., & Dionne,

C. 2019) UDL is often the first area of intervention in the continuum to be considered when looking at the occupational performance areas listed above. Occupational therapy and other team members are able to aid using UDL and AT options through direct service, coaching, consultation, and advocacy. Using the *Occupational Practice Framework 4th edition* and the HAAT framework as guiding structures it is possible to optimize interventions with individuals throughout all areas of occupation, no matter the need, context, diagnosis, or age.

EXAMPLES OF UDL AND AT

A first grade student with cerebral palsy has difficulty participating in classroom reading and writing tasks because of limited motor control in her arms. The occupational therapist works with the teacher, and they introduce many high- and low-tech options, including a computer and digital tablet with word prediction/abbreviations to increase her writing efficiency and legibility; an adaptive desk with supports for her arms so she can access a large print keyboard; testing using the computer or tablet and accessible testing. She reads using a digital tablet with access to online digital book applications, and she uses a dedicated speech generating device for communication (introduced by the speech pathologist). These supports allow her to access literacy in the classroom, participate in classroom discussions and communicate with classmates and teachers.

An 81-year-old man with vision loss resulting in low vision lives at home. An occupational therapist helps identify and implement a variety of supports to increase his function in the home for iADL's, including a Smartphone with a camera to photograph and enlarge labels and recipes; speech to text on the tablet to help him search for recipes online; high-contrast dials with tactile dots for the oven and stove; and large-print cookbooks and measuring tools. These interventions allowed him to remain independent and safe in his home without additional assistance (AOTA, 2015). These supports also allow him to access literacy activities such as searching for and reading recipes on his tablet, using his Smartphone to enlarge labels so that he can read the labels and reading the markings on measuring cups while cooking.

Today there are many options from built in accessibility features in devices, apps, chrome extensions and other more specialized assistive technology. Using a continuum of options from universal design for learning and low tech/high tech assistive technology it is possible for everyone to have access to literacy opportunities and participation.

The table below shows a few options and other information can be found through the Closing the Gap Resource Directory, Microsoft and Apple accessibility.

Table of Literacy Modes, Devices and Software/applications (not inclusive) Code: Switch Access: SA, Voice Access: VA, Gaze Access: GA, Auditory Output: AO, Text to speech: TTS, Speech to text: STT			
Area of Literacy Access/Access Type	Assistive Technology Devices	Function of AT	Universal Design for Learning
Reading	Braille books JAWS Screen Reader Other Screen Readers/Magnification Software CCTV's Magnifiers/Digital Magnifiers	To read to gain knowledge and for leisure activity. 2. augment or substitute	Immersive Reader Built in Accessibility Options on Commercially Available Devices Starfall app., or website ABCmouse app. Literacy app: Inclusive Tech. Choose it Maker 3 software and Choose it Maker app.: Inclusive Tech. Chrome: Read and Write, Read Aloud Other Reading Apps: Easy Reader Read and Write, Readability, Kindle, Tar Heel Game Play Tar Heel Reader Pictello Magnifier Apps
Writing	2. Adaptive keyboards: Big Keys, Large print Logic Keyboard: KeyCaps IntellikeysBig Keys Keyboard Refreshable Braille Displays Smartbrailler Mountbatten Learning System Clicker apps	To write independently with varied access.	Built in Accessibility options: text to speech, speech to text, high contrast, magnification, switch activation, iPad "Recipes" Use of external keyboard, onscreen keyboard, speech to text, word prediction, short cuts/abbreviations. Chrome: Read and Write for Chrome Cowriter
Notetaking			Speech to Text/ Recording software/ apps: Audionote, Notability Onenote Evernote Glean voice recorder (Built in to OS or Android), Google Keep

Math	Talking Calculator Large Print Calculator	To complete computation	Numeracy app: Inclusive Technology Digital calculator on Smartphone
Science	Picture in a Flash: used to make tactile diagrams/pictures for visually impaired Code Jumper" coding device for the visually impaired	To complete science	Science app: Inclusive Tech.
Functional ADL/IADL's/ Executive Function	Picture or Object Symbol Schedules, Picture or Object Symbol Step by Step Directions for ADL/iADLs Orbi Feeder Adaptive Dressing Aids ie; reachers, dressing stick, buttonhook, large handles utensils etc.		Apps with recipes, grocery lists or ordering groceries. Grocery shopping app Choicemaker App
AAC	Variety of dedicated speech generating devices and low tech voice output buttons (provide low tech and high tech options) Low Tech Picture or Object/Tactile Symbol Communication Boards	To communicate	Touchchat SnapChat Cough Drop SoundingBoard Go Talk Now
Health/Health Literacy		To maintain health and wellness.	Apps (endless options) Calm: mindfulness MyFitness Pal Headspace Sleep Cycle My Life Check: AHA Apple Health Waterlogged Nutritionix Fooducate
Eye gaze access	Eye gaze Camera (Tobii, Gazepoint, iMotion etc) Skyle case: with eye gaze. offers a choice of AAC apps, access to social media, email, and environmental control (using the Environ app to control Pretorian smart home devices AAC Devices with built in eye gaze.	To access	Hawk Eye eye gaze app Microsoft Eye Gaze using built in webcam

Keyboarding		To access writing	Websites:TypingClub EduTyping Typing.com TypingPal Taptyping Accessible Apps: Typio TapTyper Keyboard Fun TypeAWord SpellA Word ScanAWord Talking Typer
Switch access: Learning/ literacy	Variety of adaptive switches with sound, touch, press, proximity, EMG/twitch access Computer or BlueTooth Switch Interfaces	To access with your switches.	OS built in switch access Helpkidzlearn Pictello: book app. Tar Heel Gameplay Tar Heel Reader: add Recipe in switch access in Ipad to turn pages/read book
Voice access/ Speech to Text	Dragon Dictate	Voice access	OS voice to text/Suri Alexa
Face Tracking			Built in accessibility: iPad Pro, iPhone 11 Jabberwocky app for text to speech access using head movement
Touch			OS adaptive touch access/gestures
Auditory Processing/ Hearing	Assistive listening devices: FM Systems, Hearing Loop Systems, Infrared Systems		Open Captioning (Beta on OS). Allows captioning with conversations. Closed Captioning on digital/video media

Approaches to Robust Integration of Assistive Technology Content into
Professional Occupational Therapy Programs

Summary:

Though instruction on assistive technology (AT) has been required in professional occupational therapy education programs for decades, overwhelmingly practitioners report feeling underprepared for service provision in this area. This article explores benefits and challenges of various approaches to curriculum design to support practitioner success. It highlights the hybrid approach of the Entry-Level OTD Program at Methodist University that incorporates AT learning activities throughout a variety of courses, in addition to a stand-alone course in AT.

The provision of assistive technology (AT) services is a vital component of everyday practice for the occupational therapy practitioner (OTP) across practice settings. However, research over the past few decades has indicated that overwhelmingly, OTPs feel they are underprepared to provide services in this specialized area of evaluation and intervention, (Gitlow & Sanford, 2003; Kanny & Anson, 1998; Long & Wolverton, 2007; McDaniel & Gitlow, 2021). This is a growing, but not newly emerging challenge. Since the late 1900s, research has indicated that this knowledge and skills gap exists for OTPs providing AT services in all areas of practice, (Kanny & Anson, 1998). Barriers to competency and confidence in the area of AT service provision includes the rapid growth of technology, few content experts and specialists in the field, and the perception of a lack of clinician education required for practice in this area, (Gitlow & Sanford, 2003; McDaniel & Gitlow, 2021; Sarsak et al., 2023). Though continuing education content is available for OTPs in this area of practice, one approach to addressing these gaps in knowledge and skills is through intentional curriculum design at the professional program level to help prepare new graduates for the clinical service provision of this portion of the occupational therapy scope of practice.

Occupational therapy (OT) is one of many professions which addresses assistive technology within its scope of practice. OTPs work to enable participation of individuals or populations through the therapeutic use of everyday occupations, (AOTA, 2010; AOTA, 2015). Intervention approaches intentional modification and/or adaptation of activities to enhance participation, frequently through the use of assistive technology, (Cook, Polgar, & Encarnação, 2020; WFOT, 2019). The Occupational Therapy Practice Framework-4 provides guidance about the scope and execution of occupational therapy, (AOTA, 2020). This framework encourages practitioners to both consider AT as part of the client's environmental context, and to use assistive technology as an intervention, (AOTA, 2020). The profession's unique contribution to assistive technology service provision

ANNABETH KNIGHT OTD, OTR/L, ATP, is an occupational therapist, assistive technology professional, and assistant professor at Methodist University in Fayetteville, North Carolina. She has over 12 years of clinical experience in pediatric occupational therapy across a variety of settings, working primarily with medically complex children who benefit highly from assistive technology service provision. Annabeth earned her post-professional doctorate in Occupational Therapy from Mount Mary University, and her master's degree in Occupational Therapy from the University of Scranton. In her current role, Annabeth teaches assistive technology coursework in the Methodist University OTD Program. She also mentors student research in the area of assistive technology, and serves as the Doctoral Capstone Coordinator. Since 2014, Annabeth has presented at national and international conferences on various topics in assistive technology service provision.

involves the integration of a spectrum of assistive technologies into occupation-based evaluation and intervention to meet client-driven functional goals, (AOTA, 2025; WFOT, 2019). In the professional education of OTPs, the American Certification of Occupational Therapy Education (ACOTE) provides AT service provision standards, that offer specific guidelines for the scope of the content that must be covered in OT curriculum at the associates, bachelors, masters, and doctoral level. The standard regarding assistive technologies requires inclusion of learning activities designed to establish knowledge and skills about AT "used to enhance occupational performance and foster participation and well-being", (ACOTE, 2018, pp. 37; 60).

ACOTE does not, however, provide specific guidance on how to integrate this content knowledge into broad program curriculum. Programs are left to determine this on their own; choosing either to integrate AT concepts throughout a variety of courses, to develop a stand-alone course in AT, or a hybrid of the two. Since the practitioner knowledge gap is still present despite these standards in curriculum in the United States, there is a need to investigate the details of curriculum design when determining how to bridge the gap between the classroom and clinical practice. Additionally, at this time, there has not been a comparative analysis conducted to investigate any difference in outcomes between programs that have a stand-alone AT course, and those that choose to integrate AT concepts across multiple courses and education opportunities. Though there is intentionality and potential benefit to either approach to curriculum design, inclusion of a stand-alone course provides the opportunity to address several of the barriers to achieving practitioner competency in AT, while also consistently tracking student learning outcomes within this area of knowledge and clinical skills.

The Doctor of Occupational Therapy Program at Methodist University in Fayetteville, North Carolina is an entry-level program, which has designed its curriculum to address AT-related education standards through a combination of a stand-along course in AT, and integration of supplemental AT concepts throughout the program curriculum. This hybrid approach empowers students with the underlying theory informing AT service provision by OTPs across their foundational and clinical coursework, and introduces concepts and technologies relevant to particular practice areas and client populations as they progress through the didactic curriculum. Additionally, the stand-alone AT course provides a number of benefits to enhancing learning through targeted instruction by a variety of content-expert instructors, hands-on learning opportunities, on-campus and community collaboration, and opportunities to contribute to research and capstone projects in the area of AT.

The stand-alone course, *Supporting Occupational Performance with Technology and Environments*, in Methodist Uni-

The entry-level Doctor of Occupational Therapy Program at Methodist University aims to deliver the most contemporary, high-quality educational experience to train future practitioners that are compassionate and ethical leaders who will engage, enrich, and empower the lives and communities they serve.

versity's OTD Program curriculum utilizes a variety of unique strategies to optimize learning outcomes in the area of AT knowledge and service provision. This begins with focus on mapping broad OT theoretical models onto those that are AT specific, providing students with a foundational understanding of how to apply OT specific concepts and interventions to AT models of practice such at the Human Activity Assistive Technology (HAAT) Model, (Cook, Polgar, & Encarnação, 2020). The dissemination of the course material to students calls on the expertise of multiple parties. The primary course instructor is a licensed OTP, as well as a certified Assistive Technology Professional (ATP). This resume provides a unique knowledge and clinical skillset that other OT instructors who cover AT topics in their coursework may not have. The course is also supported by a lab assistant; an OTP and adjunct instructor whose primary clinical role involves high levels of specialized AT service provision. In addition to having experienced clinicians teach this course, there is intentional use of guest lecturers throughout this course to provide students with the expertise of additional stakeholders in the AT field. As user experience is such an instrumental component of on engagement in and reflection on outcomes of AT service provision, students learn directly from disabled AT users as they serve as guest lecturers across the course. Students not only gain knowledge about the experiences these individuals have with using AT, but also about systematic barriers they may have faced as a disabled AT user. Additionally, students begin reflection about general user experience (UX) design, which is an emerging, non-traditional area of practice for OTPs. Finally, local AT equipment vendors are utilized as guest lectures to offer their expertise on a particular group of technology such as wheelchairs and mobility aids, augmentative and alternative communication systems, and 3D printers. From these lab experiences, students not only gain exposure to a variety of AT, but also learn the importance

Second-year Doctor of Occupational Therapy students engage in hands-on learning in their assistive technology course through exposure to specialized communication and alternative access technologies.

continuing education, and referral for AT services for their future clients. Students learn about complex manual and power mobility equipment and durable medical equipment (DME) through collaborative lecture and lab activities led by their instructor and a local vendor. This seating specialist also provides pressure mapping equipment for students to trial as they learn about approaches to client positioning and conducting mechanical assessment tool (MAT) evaluations. Vendors of augmentative alternative communication (AAC) products also provide hands-on lab experiences for the students, bringing a variety of high-tech AAC systems on campus for students to trial while discussing the feature matching process, and the role of the OT on the AAC team.

Finally, inclusion of a stand-alone AT course in this program allows for the design and implementation of assignments and learning activities that provide students with opportunities to gain hands-on experience with AT, interact with interprofessional team members off campus, and positively impact the community. Throughout the semester, students engage in a switch adaptation lab, an adapted toy project, and a low-tech AT design competition that brings AT application to life in the classroom. Each of these projects have evolved over the past several years to involve more direct application of AT concepts

of collaboration with area vendors to best serve their future clients. The emphasis here is not on having robust knowledge about particular AT vendors and/or equipment companies, but instead on gaining an understanding that as OTPs they do not have to be an expert on all equipment and can rely on the expertise afforded by local vendors as part of the interdisciplinary team.

AT service provision is a complex process that begins with understanding of the feature matching process, as well as exposure to and hands on experience interfacing with the AT equipment itself, (AOTA, 2015; Cook, Polgar, & Encarnação, 2020; WFOT, 2019). Budgeting to have a robust library of AT equipment can be a barrier for many OT education programs. Though the program at Methodist University has a variety of AT equipment in-house, hands-on experience is supplemented through a variety of channels. Partnerships with local organizations and vendors are utilized to provide access to AT equipment in the classroom, and students learn the importance of collaboration with these players as OTPs along the way. Students in this program begin the semester with a lab experience led by an AT provider from one of the state's Assistive Technology Act Program (ATAP) locations. Here, they not only have the opportunity to explore a variety of AT equipment in person, but also learn about the legislation which supports funding of state ATAPs, and the utility of the program for equipment loans,

Students gain practical skills switch-adapting electronic toys to provide alternative access to play.

to real cases, increased collaboration with professional experts to provide students with feedback, and intentional design to impact the community. The switch-adaptation lab provides students with an opportunity to learn and apply engineering principles while building a basic switch and battery interrupter. Students then use their equipment to switch-adapt toys and electronics, while discussing relevant case study applications. The adapted toy project challenges students to adapt an existing toy or game to meet the needs of a disabled child in the community. Students collaborate with area OTPs to discuss real clients on their caseload who could benefit from an adapted toy, and design their adaptations based on the unique needs of that child. This activity allows students to not only implement components of the AT evaluation, development, and intervention process, but also provides them with the opportunity to engage in professional communication and collaboration with therapists in the field. The low-tech AT design project in this course has evolved significantly over time to expand its real-life application and impact on the community. Once an in-class project involving a quick presentation of design ideas to peers, the project now involves development of a prototype and presentation to a panel of experts for contest judging. The expert panel includes therapists, community members, students, and professors from related departments such as engineering and kinesiology to provide design and usability feedback from their unique perspectives. This project is designed to mirror a student design competition held annually at the state's occupational therapy association conference. Students are able to submit their work to this competition at the end of the semester, providing them additional opportunity for professional presentation, resume building, and AT community impact.

As OT education programs at any level engage in continuous quality improvement of their curriculum design, it is important for them to consider the feedback of clinicians about their perceived level of preparedness for AT service provision as new graduates. Future directions at Methodist University include continued expansion of community partnerships that promote opportunities for students to gain more hands-on experience with AT users across the lifespan, and to bring growth to community impact of the program through service learning, collaborative research, and capstone projects. Though we know there are benefits of any effort to enhance to AT content in OT curriculum, it has not yet been determined whether one specific approach of integrating more robust AT-content into programs yields the most optimal academic and clinical outcomes. Further outcomes-driven research is indicated in this area to expand our understanding of the dynamic causes of gaps in AT knowledge amongst OTPs, therefore improving the preparedness of our graduates and the overall quality of AT service provision.
AT content experts provide resources to students in addition to hands-on lab experiences, empowering them with community connections to utilize during fieldwork experiences and as future clinicians.

An Army of
Squeaky Wheels
"The squeaky wheel gets the oil."

Summary:

We all know the old adage, "the squeaky wheel gets the oil." This common phrase, generally used as an unfavorable characterization, has been used to describe parents of students with disabilities. The Center on Inclusive Technology and Education Systems (CITES) at CAST is looking to turn this phrase on its head and shift the narrative around squeaky wheels. Join the conversation at cites.cast.org.

We all know the old adage "the squeaky wheel gets the oil." The metaphor of a squeaky wheel essentially means that the loudest person or the most difficult person in the room gets the attention. This phrase is often used as an unfavorable characterization for people that are willing to ask questions, advocate, and explore opportunities beyond the established norm. How might the field flip this adage on its head?

Let's start by investigating the term "squeaky wheel" in the context of providing assistive technology (AT) supports and services. Often, students have an informed parent, teacher, para-professional, or even principal in their corner, who secures the accommodations and AT that the particular learner needs to be successful in the classroom. In such cases, these particular students "get the oil" because someone in their corner knew the right questions to ask and the appropriate levers to pull. Being a squeaky wheel means being a knowledgeable other

who advocates for a students' needs. Acting as the protagonist in this educational storyline, this knowledgeable other might be a paraprofessional, a direct service provider like an OT or SLP, or perhaps even a classroom teacher. Most often, however, the squeaky wheel is the parent of a student with a disability, who is working to advocate for the best outcomes for their child.

ENGAGING FAMILIES

The research is clear. Implementing strong, authentic family engagement practices has a positive impact on educators, families, and learners themselves. These demonstrated impacts and benefits of implementing family engagement practices inspired the U.S. Department of Education to make family engagement a requirement. The Every Student Succeeds Act (ESSA) requires that families are given input and influence in decision-making. And for more than two decades, the

MAGGIE PICKETT As a Senior Technical Assistance Specialist for the Center on Inclusive Technology & Education Systems (CITES), Maggie explores systemic integration of Assistive Technology, Information Technology, and Educational Technology systems, in partnership with districts.

Maggie is a certified speech-language pathologist. Her passion in education resides in creating engaging and accessible learning opportunities for all learners. For over a decade, Maggie has worked with teachers, students, administrators, para-professionals, families, and community partners to build a common understanding of how creating engaging and accessible learning for ALL is possible. Maggie previously served as Program Consultant for the Iowa Department of Education as the AIM/AEM Coordinator for the state of Iowa. As a district AEM Coordinator she collaborated across district initiatives to support inclusive teaching and learning structures. Most recently, Maggie served as a digital learning consultant helping districts bridge the gap between instructional and assistive technologies in their teaching and learning practices.

BACK TO CONTENTS

Individuals with Disabilities in Education Act (IDEA) has required that families of students with disabilities (SWD) are full and equal partners in the individualized education program (IEP) planning team. These laws require educators to engage parents and families in meaningful ways.

Emerging research on engaging families in technology planning and use for their children and youth with disabilities would suggest that there are continued barriers to explore. Morgan (2022) surveyed over 300 parents and families of students with disabilities being served under IDEA or Section 504 from across the United States. Results illustrated that only 20% of families had been provided information about AT by district leaders. The same study illustrated that about half of classroom educators are collecting and using information about learner-preference and -need to select appropriate inclusive technology strategies and features. These figures suggest, perhaps, both a lack of information flowing to and from parents about the use of AT to support the learning experience. This could lead to parents of SWDs being perceived as an antagonist versus a protagonist in their child's educational journey. So how does information, support, and feedback flow to and from parents and children and youth with disabilities?

IT'S ECOLOGY, DEAR WATSON

Psychologist Urie Bronfenbrenner's ecological systems theory conceptualizes human development as influenced by nested layers within their environment (Figure 1). The innermost layer is the child, followed by the microsystem (immediate face-to-face environment), mesosystem (relationship between the child and their microsystem), exosystem (indirect influences on the child within the microsystem), macrosystem (cultural norms, policies, beliefs, legal influences), and chronosystem (events and transitions in the child's life, including sociohistorical impacts).
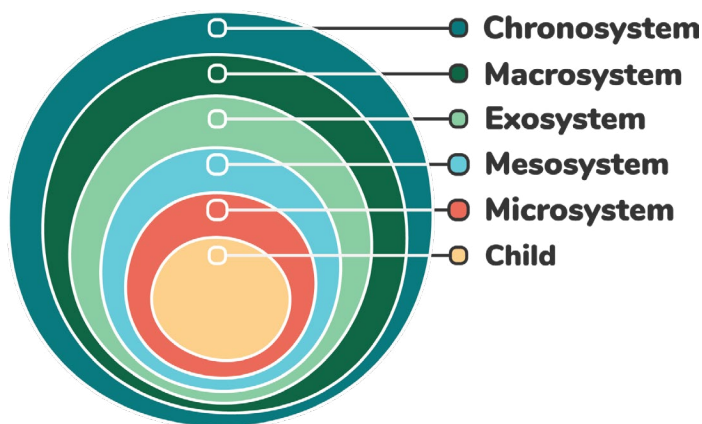

Diagram representing the contextual influences on a child's development. Child at the center, with concentric circles moving out, labeled Microsystem, Mesosystem, Exosystem, Macrosystem, and Chronosystem

Bronfenbrenner's theory illustrates the various contextual factors shaping a child's development, encompassing self-identity components such as race, gender, disabilities, and health. The microsystem involves family, educators, therapists, and peers. The mesosystem includes the IEP team and educational and AT specialists. Exosystem elements encompass school and district leaders, teacher preparation programs, and family work commitments. The macrosystem layer considers cultural norms, belief systems, educational laws, and policies affecting equitable access to learning technologies. The chronosystem examines temporal influences, including historical education practices, transitions between school levels, technological evolution, and the impact of events like the COVID-19 pandemic.

Parents and families of children and youth with disabilities are no longer interacting solely with the classroom educator in the microsystem. Families are receiving loads of information across the levels of Bronfenbrenner's ecological systems theory. Daily notifications via the learning management system; weekly classroom-wide, building-wide, and district-wide newsletters and emails; interfacing with technology help desk staff to troubleshoot a glitchy device; and social media announcements and trends all make up the communication flowing to parents. There is an inundation of information and influence. Yet, are parents and family members able to be the *squeaky wheel* and **use the information they are receiving to advocate** for their child's AT needs?

AN EQUITY ISSUE

Despite the amount of information flowing to parents, educators, and educational leaders, there is still a lingering discrepancy between what we know works and what actually occurs during the learning experience. This gap in research (i.e., what the evidence base tells us works) to practice (i.e., what is occurring on the ground in schools) rears its head in not only a technical, knowledge and skills gap, but also a gap in mindset and culture. A squeaky wheel requires both a level of **technical knowledge and an individual mindset** in order to influence the use of inclusive technologies for learners who require them. So, what happens when one of these critical components of a squeaky wheel is missing?

Imagine walking into a 6th grade ELA classroom. The educator is floating around the classroom checking in with the learning experience her students are engaged in. She comes to one particular student and quietly whispers, "Your mom wanted me to remind you that this would be a great opportunity to use your text to speech tool to help you read." The student reaches into their backpack and pulls out their earbuds to plug into a device.

Success! This student's parent, in partnership with his educator, had identified opportunities within the learning

experience that her child could take advantage of his AT. A squeaky wheel in action. But what if you were to discover that 3 other students in that classroom required the exact same accommodation, but weren't reminded. Would this situation still be considered a success? What happens when a student doesn't have a squeaky wheel?

When districts operate from a place where only students who have a "squeaky wheel" on their team obtain the supports and services they require, they are operating from a place of inequity. The Center on Inclusive Technology and Education Systems (CITES) at CAST is looking to turn this phrase on its head and shift the narrative around squeaky wheels. CITES is working to support districts in creating an army of squeaky wheels — in which district professionals, families, and community members understand the benefits of inclusive opportunities and experiences supported by technology and are motivated to mobilize in refined ways to operationalize these experiences to support all students, particularly those children and youth with disabilities who require AT.

A ROADMAP TO EMPOWER AN ARMY

The CITES Framework is a helpful guide that encourages positive change within a district. It's used alongside technology and instructional efforts already in place, bringing together experts and coaches at various levels to assist local teams in making and maintaining inclusive technology systems. It offers districts a step-by-step, systemic process for creating an army of squeaky wheels. The CITES Framework uses the five areas outlined in the National Education Technology Plan (NETP) as a foundation for systems change: leadership, infrastructure, teaching, learning, and assessment. The guidance in the NETP includes insights on universal design for learning (UDL), AT, and accessibility. In this work, the team at CITES clarifies and expands those concepts and provides guidance for creating a balanced, inclusive technology ecosystem.
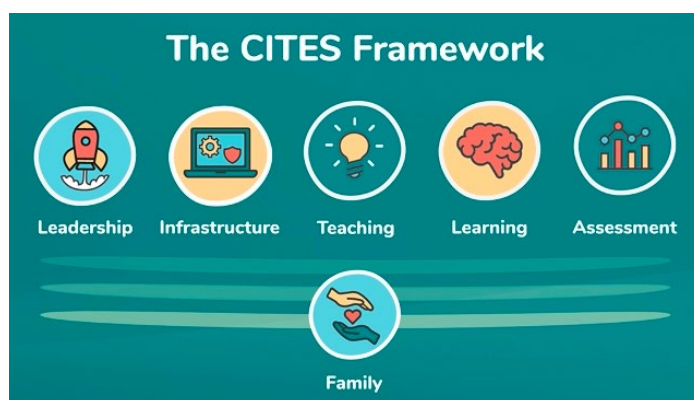

CITES framework area icons of leadership, infrastructure, teaching, learning and assessment. Family engagement icon extends tentacles across each area.

The process of creating an inclusive technology system employs a coordinated effort by district teams to move forward seamlessly with the framework and its practices. Implementing inclusive technology systems requires knowledgeable professionals with a variety of experiences all bringing their ideas to the discussion. This reliance on the collective intelligence of our colleagues is what serves as the foundation for an army of squeaky wheels. It means using the synergy created when bringing together informed family members, teachers, para-professionals, SLPs, OTs, physical therapists, information technology folks, and even administrators who are informed about accessibility, AT, and children and youth with disabilities. What might we see when these professionals work to support inclusive technology systems?

It will be educators taking a proactive approach to broadening personal technology skills to help identify and remove barriers to learning and design, empowering learning experiences. Classroom educators would help to:

- Develop technology competencies by discovering ways to create and integrate accessible digital learning materials and AT into teaching practices.
- Design learner-centered experiences by using technology, including AT, in instructional design and planning, and as a way to efficiently and effectively collaborate with partner educators.
- Enhance technology skills by committing to be a lifelong learner and by participating in coaching relationships as a coach or coachee.
- Engage families in the learning community by regularly communicating with families regarding the coordination and collaboration of the learner's specially designed instruction, including AT use in the classroom, as well as seeking the families' input on how to better support the learner.
- Support families' shifting role by ensuring all families have opportunity to participate in the educational career of their children in ways that are developmentally appropriate and future-focused.

We would observe EdTech professionals using a proactive approach to broaden personal technology skills to more effectively offer support to help educators and students identify and remove barriers to learning with technology. EdTech professionals help to:

- Develop technology competencies by training educators, staff, and families to integrate accessible digital and information literacy throughout learning experiences.
- Design learner-centered experiences by training educators to use teaching technology resources to support digital citizenship for all students. EdTech professionals also

BACK TO CONTENTS

evaluate and select technology resources to address individual learner needs.

- Enhance technology skills by providing options for coaching, networking, and collaborative learning experiences for staff to extend their knowledge and skills regarding educational technologies, including inclusive technology.
- Engage families in the learning community by finding tools (e.g., translation services, accessible communications) that support their needs.
- Support families' shifting role by supporting educators to identify developmentally appropriate digital citizenship skills and to provide families with critical information and ways to engage all learners in inclusive, balanced, and informed digital experiences.

We will certainly experience IT professionals contributing to an inclusive technology infrastructure by planning, designing, and managing all software, hardware, and networking installations and support services. IT professionals will help to:

Personalize learning devices by ensuring that standard district software is configurable and meets accessibility needs to support all students, including those with disabilities. Also, when needed, IT professionals partner with educators and families to procure and set up personalized devices to meet the accessibility needs of particular students.

- Unify inclusive technology decision-making by coordinating and soliciting input and feedback from individuals with disabilities, families, AT professionals, and IT professionals in procurement decisions to choose devices and ensure their interoperability.
- Provide accessible educational materials (AEM) by providing technical support for EdTech staff on networks and hardware used to support technology for teaching and learning, as well as providing technical support for AT staff on hardware and networks for accessibility tools to support individual needs and preferences (screen readers, dictation, or video tools).
- Ensure student privacy and secure inclusive practices by maintaining a technology infrastructure to support accurate and secure data exchange between educators, families, and students. IT professionals should also implement and train staff, students, and their families on district privacy policies and safe cybersecurity practices to minimize cyberattacks and data breaches.
- Grant families access by providing them with foundational information on various products and platforms and ensuring, when needed, that families and educators of students with complex learning support needs have appropriate login information.

- Provide technical support to families by establishing opportunities for families to engage with Help Desk staff to troubleshoot barriers.

An army would include district and building administrators who develop and put in place short- and long-term plans to help the district and individual buildings fulfill their vision and mission. These administrators will help to:

- Create a community-wide vision by gathering a team of leaders, administrators, educators, and families to develop a vision that supports an inclusive technology infrastructure and accessible learning opportunities.
- Develop a strategic technology plan by bringing knowledge of national, state, and local policy to ensure the technology plan empowers educators to design learner-centered experiences, while also navigating required compliance activities.
- Measure progress for continuous improvement by allocating resources to data collection planning and analysis, and cultivating a culture of inclusive decision-making that honors the concept of "shared data" or "our data" across departments.
- Develop a professional learning system by allocating resources that include a mentoring and coaching program that establishes safe and supportive relationships between instructional leaders and new and veteran staff to continue to build skills.
- Partner and communicate with families by modeling quality family partnerships and communications and setting the expectation that all communications provided meet accessibility standards.

As instructional leaders, building administrators will create programs to improve the design and delivery of instruction for all students. Building administrators help to:

- Train educators and staff to develop technology competencies that empower them to design accessible, inclusive learning experiences that integrate AEM and AT.
- Design learner-centered experiences by cultivating a culture of inclusion and promoting a vision of learner-focused instructional design that incorporates the district's instructional framework with inclusive technology strategies.
- Enhance technology skills by sponsoring activities for district leaders, educators, technology staff, and families to enhance and apply their EdTech and AT technology skills.
- Engage families in the learning community by empowering educators to create a safe space in their learning community for families and modeling quality family and community interactions.

- Support families' shifting role by providing educators with packaged tools and resources to provide to families to support the transition from sole advocate to parent support with regards to the availability and use of accessible materials and AT required.

An army of squeaky wheels will ensure AT professionals work to identify accessibility and AT interoperability requirements for assessments to support all learners. AT professionals help to:

- Procure accessible assessments by educating leaders about assessment accessibility standards and AT compatibility, and training educators, students, and their families about assessment technology accommodations and the alignment, or lack of alignment, to instructional accommodations.
- Design accessible formative assessments by helping district leaders develop guidance for educators to select formative assessment tools that are accessible, and training educators to create accessible content and incorporate AT when developing formative assessment instruments.
- Collaborate with state testing officials by partnering with the district assessment coordinator to ensure assessment accommodations policy and procedure are appropriately supported. Additionally, gather input from district learners, families, and educators to inform state testing accessibility coordinators about the accessibility of state assessments, including AT accommodations.
- Analyze data for decision-making by using data to inform improvements of:
  ◦ Instructional design through the collaborative analysis of various forms of individual learner data, that include data on AT assessment, evidence of availability, and evidence of use.
  ◦ Programmatic design through collaborative analysis of various forms of group data, including AT data, to determine appropriate shifts in program design and delivery.
  ◦ Systemic design through collaborative analysis of various forms of group data, including AT data, to determine appropriate shifts in service delivery and resource allocation.

Finally, building an army of squeaky wheels depends on having a knowledgeable population of family members to ask the right questions. Questions families will ask district leaders include:

- How can I provide input into the district's strategic technology plan?
- How can I provide input into the district's remote learning plan?

- How is the district using data provided by families to improve technology use?
- How can I participate in large-scale and alternate assessment decisions?
- How is large-scale assessment data used to improve teaching and learning with technology?
- How is family feedback on large-scale assessments used to improve assessment accessibility and interoperability with AT?
- Where can I find information and training on available accessibility options for district and state assessments?
- Where can I find a list of district-provided software and supported websites, along with access information for those tools?
- Where can I find the district's student privacy and security policies?
- As the parent or legal guardian of a student with low incidence and/or significant disabilities, how do I access my student's technology accounts?
- What training is available for families to learn more about commonly used digital software and AT?
- What support resources are available to families for accessible and assistive technologies?

Questions families will ask educators include:

- How can I help with planning for and providing classroom accommodations and support?
- How can I learn about what my learner is doing in the classroom?
- How can I take part in the learning at home?
- How can I help my learner become a self-advocate and a self-determined young adult?
- What accommodations and alternatives are available for classroom assessments?
- How can I support my learner in utilizing their accommodations and supports at home?

The transformation of the "squeaky wheel gets the oil" adage in the context of providing AT to students is a critical next step in providing truly inclusive and equitable learning experiences. The concept underscores the importance of family engagement, the equity issue in relying solely on advocates, and the role the CITES Framework can play in promoting a collective effort to shift practices. The roadmap emphasizes the need for a knowledgeable population of family members and professionals to design and deliver these learning experiences. Visit cites.cast.org to learn more about inclusive technology systems and to get started framing the future of learning. The future is inclusive.

42ND ANNUAL CONFERENCE
OCTOBER 23-25, 2024

Pre Conference Workshops: Monday and Tuesday, October 21-22, 2024
DOUBLETREE BY HILTON HOTEL BLOOMINGTON

See why Closing The Gap has earned a reputation for exceptional learning and plan now to join us for Closing The Gap 2024!

The Closing The Gap Conference is an annual assistive technology conference that presents an opportunity to deepen your assistive technology (AT) knowledge and strengthen your implementation strategies. The conference week is designed to dig deeper into critical areas that have the power, when implemented strategically, to transform your classroom, your school, your district, your practice. When you start thinking differently about how to reach ALL students, how to infuse technology into learning, how to leverage AT strategies in all areas — then we begin to transform these areas and ultimately increase achievement and independence.

PRE CONFERENCE WORKSHOPS
MONDAY AND TUESDAY, OCTOBER 21-22 2024

IN-DEPTH LEARNING Pre conference workshops focus on assistive technology implementation and best practices. Each workshop is conducted by a nationally recognized leader in the field, providing in-depth professional skills necessary to successfully implement assistive technology in the lives of persons with disabilities. Workshops range from introductory to advanced and cover many different topics.

3-DAY CONFERENCE
WED, THU AND FRI, OCTOBER 23-25, 2024

COME, NETWORK, LEARN – Discover rich resources and tools that support students in accessing instruction and enhance learning opportunities.

Attend sessions filled with practical and applicable strategies and best practices. Visit the exhibitors, meet with representatives, learn first-hand about the latest technologies making a difference today.

CALL FOR PROPOSALS

Share Your Knowledge and Expertise

Closing The Gap will consider proposals for one-hour or multiple-hour sessions that describe and/or demonstrate successful applications of assistive technology for persons with disabilities.

Groups or individuals who wish to participate should submit their proposals for one-hour and multiple-hour presentations as soon as possible.

Call for Proposals will open February 15, 2024.

Deadline to submit is Wednesday, May 1, 2024.

LEARN MORE

AAC Integrated into Academic Learning
NOT a Compliance Tool

Summary:

Readers will gain insight into the why, the how, and the outcomes of a multi-year building wide initiative to integrate AAC into academic learning. Within this discussion readers will learn about teaching strategies and other professional development that guide educators to place a focus on spontaneous novel utterance generation within academic learning. In conclusion, readers will recognize despite challenges we face our ultimate goal as professionals is once we know better that we do better.

OUR WHY:

Augmentative Alternative Communication (AAC) gives individuals with complex communication needs the opportunity and access to say what they want to say when they want to say it. However, as with any tangible tool, it can be easily misused, turned into a compliance tool and ultimately limit the communicator. While it is important to be aware of how our instructional practices and classroom procedures impact the learning of any communication tool, in our setting, which serves the most complex communicators, increasing awareness of these risks was critical. When analyzing the current AAC systems being used by our students, we realized that not all of our students had access to robust vocabulary systems, and many times the vocabulary they had access to was driven by academic demands. Rather than being a tool for spontaneous communication, AAC devices were used as a compliance tool for classroom participation; this resulted in students being heavily prompted to participate during classroom activities and repeat rote academic knowledge. Our students with complex communication needs became passive communicators, relying on staff to prompt them to speak. We saw a need to align our attitudes and beliefs with our instructional practices and positively impact our school culture.

LINDSAY MARKWORTH is a Speech-Language Pathologist/AAC Specialist at Walworth County CDEB-Lakeland School in Elkhorn, Wisconsin. She joined the Lakeland team in 2020 to start her career, and has supported emerging and complex communicators across a variety of age-levels. Lindsay has supported staff, students, and caregivers in the implementation and use of Augmentative Alternative Communication. She is also a LAMP (Language Acquisition through Motor Planning) Certified Professional through the Center for AAC and Autism. Through her work she has continued to build capacity within Lakeland School and the families it serves to improve the outcomes of students with complex communication needs.

SARAH SINGLETON is a Speech-Language Pathologist/AAC Specialist and the current Assistant Director of Special Education at Walworth County CDEB-Lakeland School in Elkhorn, Wisconsin. Over her 19 year career, Sarah has continually supported complex communicators across a variety of age-levels. Sarah has been an integral component in transforming Lakeland School's approach to Speech-Language programming. Through her work with students, families, and staff members she has improved curriculum, implementation, and the home-school connection.

BACK TO CONTENTS

OUR HOW:

Establish shared values:

We started by having conversations with our classroom teachers regarding four main beliefs/values. The first centered on presumed competence: the belief that all students were capable of learning. As an educator you may think, "Well isn't that obvious?" The reality is that sometimes we do get in the way of a student's learning because we are human and have our own perceived ideas based on our own experiences. We took it to a deeper level and started to flip our mindset from "I don't think they will understand" to "Let's try it and find out". In doing so, we stopped putting preconceived ideas in the way of our students learning and started providing opportunities for learning regardless of the outcome.

The second value discussed was seeing communication as an intrinsic right. Individuals with complex communication needs have a right to say what they want to say when they want to say it. As educators, we have a responsibility to give students access to language, not just words related to our academic subject. What was observed in our setting was that AAC devices were not readily accessible and were often put away. They were provided to students during classroom activities when responses or participation were expected; they were also often removed as a consequence when students were not compliant or had misbehaved. Seeing communication as an intrinsic right meant changing this practice to one that ensures that devices are accessible and within arm's reach at all times; it also meant that AAC devices would no longer be removed in disciplinary practices.

The third value was to view AAC as a mode of communication and not a participation tool. As verbal speakers, our lungs provide the air we need to produce voice, our oral articulators help us to make sounds, and our brain helps us develop the language to communicate our thoughts and ideas to others. For an AAC user, while they may "articulate" their thoughts differently (using their fingers, hands or body parts), the AAC device becomes their voice. We reminded staff that we can't manipulate a verbal speaker's mouth/lungs to say what we want them to say so we should not manipulate a student's AAC device just because it is more tangible.

Lastly, many of our students are emergent communicators and needed to be better supported in learning how to use their AAC system to meet their communication needs. Without robust systems, many of our students had to rely on unconventional or conventional behaviors to communicate their wants/needs, thoughts and ideas. A quote by Beukelman (1991) puts it simply, "... AAC alone doesn't make one a competent, proficient communicator." Having a communication device doesn't make you an effective communicator any more than having a piano makes you a musician." These ideas helped our teaching staff to reframe their thinking when lesson planning and

assessing and supporting individuals who use AAC as a communication mode.

Set priorities:

To apply our values into practice, we developed a set of priorities. Our first was to provide all our students access to robust vocabulary systems. A robust vocabulary system includes a large amount of core vocabulary with personally relevant fringe. Core words are those that are most frequently found in our verbal and written communication (i.e. verbs, articles, adjectives, etc.) and their meaning can apply to many topics and across environments. In contrast, fringe vocabulary consists mainly of nouns that are context specific. A robust vocabulary system also includes a dynamic display in order to provide access to thousands of words within a few activations. Ultimately, robust vocabulary systems allow for language growth and development by providing access to grammatical endings (i.e. plural -s, present progressive -ing, etc.), as well as the ability to combine individual words into phrases and sentences.

Our second priority was to build staff capacity in supporting our users in learning how to use their AAC systems through targeted professional development, coaching, and in-class modeling/demonstration of support techniques. We also developed visual supports and demonstrated how to embed them into lessons, the classroom environment, and how to use core boards and icons/icon sequences as modeling tools. By removing the expectation that students should automatically understand the icons, organization, etc. of their device, we created context for specific AAC support during classroom activities to build core vocabulary and functional communication skills.

Targeted professional development:

Provision of professional development for staff was multifaceted, taking place in both large and small group settings throughout the year, and involved teachers, paraprofessionals, therapists, and administrators. New staff were also provided training as they were hired throughout the school year. Through structured presentations, coaching, and interactive practice activities, staff were supported in building their foundational knowledge related to AAC systems and implementation. Professional development topics centered on building understanding of functional communication as well as Aided Language Input and how to create an aided language environment for students.

Oftentimes, functional communication is viewed too narrowly in schools, seeing it as pertaining to only meeting basic needs (i.e. toileting, food), making choices and requests, and answering academic related questions; however, while these functions are important, functional communication encompasses so much more! It includes the many reasons that we communicate, such as to comment, greet, tell a story, argue,

joke, flirt, complain, ask questions, protest, etc. The list could go on and on! Functional communication is an important skill as it leads to self-determination, self-advocacy, increased social experiences, and improved vocational and independent living outcomes. If we were to only focus on meeting basic needs and answering academic questions, the future opportunities for our complex communicators would be limited. To support our AAC users in developing their functional communication skills, the following approaches were emphasized through targeted professional development: modeling (i.e. video, real-time, aided language input, etc.), Descriptive Teaching, and tools, ideas and techniques to create an aided language environment.

Modeling is a passive teaching approach widely used by any and every educator. We model practice math problems in front of the class to teach math concepts before we expect our students to complete work sheets and take exams. We model sight words before we expect our students to identify and express them when reading and answering comprehension questions. The same concept applies when we are teaching an AAC device. Research has shown that modeling related vocabulary using a passive approach allows the AAC user the time and reduced cognitive load needed to learn (Biederman et al., 1998). For our teachers, we emphasized the provision of Aided Language In-

put, or modeling without expectation. We provided coaching and examples of how staff could model using student systems (high and low tech) without expecting or demanding that the student imitate the models. We also had to provide staff with information on the nature of vocabulary that should be modeled. Previously, too much weight was put on fringe academic words by focusing on those nouns that only applied to that one academic lesson. We needed to pivot our mindset from modeling the content specific vocabulary and programming those words into a device for one lesson, to focusing on core vocabulary that is applicable across many concepts, curricular themes and academic subjects. The following guidance was helpful to our staff in approaching this change: 1) model functional core (i.e. sleep, ride, grow, big, etc.) that could be used instead of fringe/noun vocabulary (bed, bike, flower, bear, etc.); 2) model 1-2 words longer than what our students use independently; 3) model on a low tech core board, separate device, or with permission of the student, the student's AAC device; 4) when modeling, use a complete verbal sentence but model core words on the AAC system; 5) avoid questions, as questions will place expectations on our learners; choose instead to use descriptive statements or comments. (See image 1)

BACK TO CONTENTS

Image 2: Lakeland School's univerwsal core board (i.e. LAMP Words for Life) at the elementary playground

(Image 2) Creating an aided language environment was also critical in moving from a compliance framework and truly supporting spontaneous language generation. Staff were

Image 3: Classroom bulletin board using LAMP Words for Life icon sequences

supported in embedding the symbols and core boards that mirror those used by our AAC users into their classroom environment and throughout the school. This was done by embedding the symbols into worksheets, SMART board lessons, books, and onto school bulletin boards. Placing low tech core boards throughout the building and on the playground also supported both staff and students in having access to a core board for modeling or communication purposes throughout the school. We also utilized software to mirror student devices on the smartboard, which provided a fully functioning replica of the students vocabulary systems. (See image 3, image 4, and image 5)

Our last building-wide professional development initiative was to build understanding of the Descriptive Teaching Model (Van Tatenhove, 2019) and the importance of using it when teaching students with complex communication needs, specifically those who use AAC. Instructionally, most approaches being taken were referential in nature, focusing on memorizing terms, definitions, labels in order to answer questions related to content, providing little opportunity for open ended responses or the use of generative language. Transitioning to a descriptive teaching approach provided our AAC users with open-ended response formats and the ability to use generative

Image 4: Classroom schedule using LAMP Words for Life icon sequences

Image 5: LAMP Words for Life core board highlighting "core word of the week"

language to demonstrate what they know; it also strongly supported both the modeling and use of core vocabulary throughout academic content areas. This supported generalization across environments, as well as improving outcomes related to functional communication.

OUR OUTCOME:

As we reflected on this multi-year project that helped our school, as a whole, redefine our core values and pivot our thinking and teaching strategies, we recognized that we continued to have a problem with prompting. Our staff was excited and wanted our students to learn their robust vocabulary systems, but struggled with the balance of prompting and modeling without expectation. They believed that their students could learn, but had difficulty balancing that with the expectations of participating in academic learning. Ultimately, we had the tools, the environment to support their AAC systems, and a pivot in our teaching strategies, but our students continued to be prompt dependent to use their devices and would often wait for the teaching staff to initiate an opportunity for communication. At times, we were losing sight of the fact that the tool (i.e. AAC device) does not make a proficient communicator. This led us to examine other factors we could change to better support our students and determined that building our skills as communication partners was that next step.

Research has shown that the following characteristics are common in communication partners of those with complex communication needs: take most of the turns, ask mostly yes/

BACK TO CONTENTS

no questions, frequently interrupt, focus on the technology, and provide limited opportunities (Kent-Walsh & McNaughton, 2005). These characteristics are not conducive to providing natural opportunities for spontaneous communication, and inhibit expressive communication for AAC users. We focused on building partner characteristics that were identified as having a positive impact on spontaneous communication, such as providing wait time, incorporating expectant looks, asking open ended questions, providing active feedback, focusing on the person and not the AAC device, and as previously emphasized, providing opportunities for practice and modeling without expectation. This helped us to remember that a communication device is a tool. The tool does not create opportunities, but instead people create the opportunities. No matter what tool our students have in front of them, we as educators have the power to create opportunities for practice and learning.

The other idea we reflected on was that communication is about more than just academic learning and building language skills. Communication is about relationships! We as educators need to focus on the person first, think about their likes/dislikes, and engage with them in a fun and exciting way. Communication is about connection, talking about things that interest us or things that don't, and providing limitless opportunities. It should be fun and intrinsically motivating, not task oriented or compliance driven. Along those lines, we supported teachers in incorporating motivating choice activities, materials, etc. that would spark communication and engage our students, as well as help them to develop their skills at expressing interests and preferences.

We also realized that teachers needed more support in targeting core vocabulary across their day, as well as more ideas for how to create opportunities to practice core words to meet their regulation and social needs. As a result, we created a core communication curriculum. The scope and sequence for this curriculum maintained a core word focus throughout the year, as well as structured teaching and activities related to social language and behavioral regulation. Having a strong core vocabulary benefits all students, not just AAC users; as a result, this "Core Communication" class was implemented building wide from 6th grade to 12th grade. This class provided opportunities for staff and students to build connections and engage in activities that promoted modeling without expectation, social interactions, and opportunities to practice a variety of functional communication skills that could generalize throughout their day at school.

IN CONCLUSION:

Moving from a compliance based approach to AAC, especially within the context of the classroom where so many academic demands exist, was not an easy process. To truly address the issue, we had to approach things from a systems standpoint, ensuring that both our students and staff had access to the tools, devices and support they needed to be successful, as well as providing targeted professional development to understand the reasoning behind the recommended changes. Our growth, as an organization, is apparent when you walk through our halls or sit in our classrooms; while we are still learning and growing professionally, it is clear that our staff are exemplifying presumed competence in the work they do with our early communicators every single day. We continue to remain dedicated to ongoing learning and doing what is best for our students. As they say, when you know better - do better! And that's what we strive to do everyday!

Unlocking the Magic of AI: Beginning Skills for Educators

By Anne Truger
Thursday February 8, 2024
3:30 pm – 5:00 pm (Central Standard Time)

Join us for an exciting webinar where we will explore the world of artificial intelligence and its applications in education. This webinar is designed for educators who are new to AI and are interested in dipping their toes into the AI world.

Artificial Intelligence (AI) has emerged as a transformative force in education, offering innovative tools and resources to support educators in their quest to enhance teaching and learning experiences. In this engaging webinar, participants will embark on a journey to explore the world of AI and its practical applications in educational settings.

From personalized learning resources to data analysis and instructional support, AI offers a treasure trove of possibilities for educators seeking to harness the power of AI in their classrooms.

By the end of the session, participants will emerge equipped with the knowledge and inspiration to begin their AI journey, empowered by the possibilities that AI has to offer. This webinar promises to be an interactive and enlightening experience, providing educators with the tools and insights needed to unlock the magic of AI in their educational endeavors. We will specifically focus on the capabilities of MagicSchool.ai and a variety of other tools.).

Anne Truger is a Digital Learning Specialist at TrueNorth Educational Cooperative 804. She has over 20 years of classroom experience in Special Ed, Instructional Tech and Administration. She is a Google for Education Certified Trainer, Google Certified Innovator, Promethean PEP Squad member, DEN STAR, Tech4Learning Innovative Educator, MagicSchool AI Pioneer, past President of ICE (Illinois) and former co-chair for the ICE Conference. She is a graduate of Johns Hopkins University in partnership with ISTE: Supervision and Leadership program. Anne enjoys sharing all of the amazing things you can do with AI. She loves all things technology and loves to share her love of learning.

Taming the Advice Monster: Strategies to Support Collaborative Efforts

By Sara Pericolosi and Carolyn O'Hearn
Wednesday, February 28, 2024
4:00 pm – 5:00 pm (Central Standard Time)

The students we serve often have complex needs, which necessitates a team-based approach – communication isn't and can't just be a "speech thing." While it may be easier for us to provide direct answers or advice to those working with complex communicators, coaching often yields better understanding and willingness to shift practices overall.

During this session, participants will be provided an opportunity to reflect on their current practices while they learn practical tools and strategies for engaging adult learners as partners to create more systemic, sustainable change.

Join us for this interactive session where participants will learn about Jim Knight's Partnership Principles, GROWTH coaching, and how to support adult learners (yes, it's different than working with students). The strategies learned within this session can be applied to individual teams as well as AAC capacity-building efforts.

Sara Pericolosi, M.A. CCC-SLP, Speech-Language Pathologist, Inclusive Education Enthusiast, Co-Founder of All Means ALL, LLC, an inclusive practices consulting firm. In addition, she is an AT/AAC Specialist with Alt+Shift, an IDEA grant funded initiative through the Michigan Department of Education, Office of Special of Education.

Carolyn O'Hearn, M.A. CCC-SLP, Speech-Language Pathologist, Inclusive Education Enthusiast and co-founder of All Means ALL, LLC, an inclusive practices consulting firm. In addition, she is the Director of Elementary Pathway Programs and Special Education Literacy Outcomes for Livingston

Bringing Literacy to Life: Using AAC & Sensory Elements to Build Connections

By Megan Stewart
Thursday. March 21 2024
3:30 pm – 4:30 pm (Central Daylight Time)

One of the hallmark features of a comprehensive literacy program is helping learners build connections to what they are reading. However, helping students with complex communication needs build these connections can prove to be a challenge, especially when tasked with integrating varying types of AAC and additional strategies for literacy instruction, while keeping in mind their individual sensory needs.

Throughout this session, participants will examine the benefits of incorporating AAC, literacy, and sensory components into lessons, and discuss how incorporating these elements into lessons increases learners' motivation, connection to, and engagement within the lesson. Additionally, examples of successful lessons and school-wide activities will be shared with opportunities for participants to brainstorm and construct lessons and activities for implementation in various settings.

Megan Stewart, M.S. CCC-SLP, Speech-Language Pathologist, 20 years as an SLP, focusing on learners with complex communication needs, Owner of

Designing Accessible Content to Include All Students

By Rose Raciot and Kristin Leslie
Wednesday. May 15 2024
3:30 pm – 5:0pm (Central Daylight Time)

Do you have students who are facing barriers to accessing core curriculum due to language, learning style or disability? Foundational to Multi-tiered Systems of Support (MTSS) is the belief that ALL students need access to core instruction. Assuring that students have "accessible versions of educational materials may mean the difference between learning barriers and learning opportunities." (National Center on Accessible Educational Material).

As educators, we are tasked with providing learning materials that are accessible to diverse student groups. What resources are available to guide educators through this process? The Special Education Technology Center (SETC) in Washington State has created a free online learning course in an Open Educational Resources (OER) format to help educators navigate the process of vetting and creating educational material that is fully accessible to students, staff, and parents. Join us to discuss how to break down access barriers by integrating this professional development content in your classroom and district practices.

Rose Raciot, MS, OTR/L, AT Specialist and Consultant for the Special Education Technology Center at Central Washington University.

Kristin Leslie, ATP, MAT, OTR/L, Director of the Special Education Technology Center, Central Washington University.

Empower Your Vision Today!

Introducing THE NEW e3+

We are thrilled to unveil our latest innovation, the NuEyes e3+.This cutting-edge low vision wearable device is designed to revolutionize the way low vision consumers experience the world. With enhanced features and unmatched performance, the e3+ sets a new standard for smart glasses in assistive technology,

Key Features:

- Enhanced Visual Clarity: The e3+ boasts a state-of-the-art high-resolution display, providing you with stunningly clear visuals that rival real life as well as a 10% increase in field of view for those later stage low vision consumers that need more viewing area.
- All-Day Comfort: We've redefined comfort with a lightweight (40% reduction in overall size from the e2+), ergonomic design that you can comfortably wear all day long.
- Extended Battery Life: Enjoy uninterrupted usage with our extended battery life (4+ hours), ensuring the NuEyes e3+ is ready to assist you whenever you need it.
- AI Voice Command Integration: Interact with your e3+ effortlessly through voice commands, making navigation and control a breeze.
- Stylish and Modular Design: We understand that style matters. The NuEyes e3+ can be worn with an external battery pack for "glasses" look and feel or attach the included battery for ultimate comfort and ergonomics. The e3+ also boasts a new pupillary adjustment for each eye to make clarity and ease of use our top priority with the e3+.

Caption the Conversation

If you or someone you care about has difficulty hearing on the phone – Hamilton® CapTel® is a simple solution. Designed exclusively for individuals with hearing loss, the Hamilton CapTel Phone works just like any other phone. When the phone rings, you answer it. When you want to make a call, you dial the number.

The clear difference: With Hamilton CapTel, you can listen and read captions of everything said to you over the phone.

Every Hamilton CapTel solution is designed exclusively for individuals with hearing loss, so no matter how you connect – the results provide clarity and confidence.

- Fast, accurate captions on every call
- Every call is 100% confidential
- Captions are available in English and Spanish
- Save your conversation for later review
- There is no charge for the captioned telephone service

12 volt NI-MH High Capacity Battery and Charger
Adaptive Switch Laboratories, Inc.
Price: $295
Device: switch interface
Disability: physical
The ASL 515 is a 12 volt power source with charger that is used with 12 volt DC sensors without a power wheelchair. This high capacity battery will last up to two days before charging.

12/24 Volt AC Power Source Wall Plug
Adaptive Switch Laboratories, Inc.
Price: $60
Device: switch interface
Disability: physical
The ASL 505 is for accessories or 12 or 24 volt sensors to plug into the wall for use with computers and ACC devices.

2 ECU Interface Cable with 2 Mono Plugs
Adaptive Switch Laboratories, Inc.
Price: $180 - $210
Device: environmental control
Disability: physical
ASL 802-2, 802-3 and 802-4 converts directional commands from the ECU port into separate mono plugs. It has two, three, or four output jacks from the left and right signal on the driver control that can be used for tilt, recline, computer/communication access or any device that requires a mono.

4 Choice Sequential Scanner for the Visually Impaired
Enabling Devices
Price: $429.95
Device: dedicated communicator, speech output
Disability: cognitive, physical, speech
Our communicator provides illumination of your icons. It is also extremely flexible, four scan modes, choice of the number of fields to use and two mounting systems.

4-Level Communication Builder
Enabling Devices
Price: $357.95
Device: dedicated communicator, speech output
Disability: cognitive, physical, speech
Communication Builder now with four levels. Comes with four easy to change frames (one, two, four, eight and 16 window options). Retains all your recordings on all four levels when switching between frames. Total record time is 300 seconds.

6dot Braille Label Maker
LoganTech
Price: $1075
Device: alternative keyboard, braille input, braille output
Disability: vision

The 6dot Braille Label Maker has everything you need to create high quality Braille labels in any language. Powerful but simple, the 6dot's ergonomic design makes it easy for children and adults of all ages to label practically anything at home, school, the office or on the go.

7-Level Communication Builder
Enabling Devices
Price: $369.95
Device: dedicated communicator, speech output, speech trainer
Disability: cognitive, learning, physical, speech
The 7-Level Communication Builder is a self-contained communication device. It allows the user to record and play back from one, two, four, eight or 16 different messages per level. There are seven levels for recordings. Total record time is 300 seconds.

7-Message Take and Talk Go! Board
Enabling Devices
Price: $249.95
Device: dedicated communicator, speech output, speech trainer
Disability: cognitive, learning, physical, speech
Record seven messages up to 35 seconds each. You then play the message back by removing or placing one of the 3 x 3-inch icons on one of the light sensitive compartments. Wall mounting hardware included.

8-Pin Extension Cable
Adaptive Switch Laboratories, Inc.
Price: $78
Device: environmental control
Disability: physical
The ASL 811 8-Pin Extension Cable has 8-pin round connectors on each end and is to be used as an extension for an ASL drive control package.

Ability Drive
Tolt Technologies LLC
Price: $6500
Device: switch interface
Disability: physical
Ability Drive™ is a drive control interface that enables you to control seating and drive a powered wheelchair with your eyes. Using virtual buttons and eye gaze technology, people who are not able to use a joystick can regain movement independence.

Accent® 1000
PRC-Saltillo
Device: keyguard, switch, dedicated communicator, environmental control, speech output, speech trainer
Disability: cognitive, learning, physical, speech
Reliable and responsive communication at home or on the go The new generation

Accent® 1000 boasts toughness with customized Gorilla Glass® and a splash- and dust-resistant design that exceeds industry standards. Faster CPU and increased memory bring you more power and responsiveness.This speech-generating device also accommodates switches, Keyguards and TouchGuides, Look® Eye Tracking , and NuPoint® Head Tracking for a variety of access options. Comes with industry-leading High Five Warranty for five years of coverage!

Accent® 1400
PRC-Saltillo
Device: keyboard emulator, switch, speech output, speech trainer
Disability: cognitive, learning, physical, speech
PRC-Saltillo's most advanced AAC solution The Accent® 1400 features a sleek design with a 14-inch high-definition, daylight-readable display and all-day battery life. This speech-generating device is built to last with a magnesium frame, chemically strengthened glass, and moisture-resistant seal.The Accent 1400 offers multiple access modes supporting switches, joysticks, and other tools, and accommodates PRC-Saltillo's Look® Eye Tracking and NuPoint® Head Tracking . Comes with industry-leading High Five Warranty for five years of coverage!

Accent® 800
PRC-Saltillo
Device: keyguard, switch, dedicated communicator, speech output, speech trainer
Disability: cognitive, learning, physical, speech
Tough. Powerful. Long-lasting. The Accent® 800 speech-generating device features a larger, longer-lasting battery, faster CPU, and increased memory to keep your conversations going with your favorite Minspeak vocabulary such as Unity® or LAMP Words for Life®. PRC-Saltillo's smallest Accent device accommodates switches, Keyguards and TouchGuides, and NuPoint® Head Tracking for a variety of access options. Comes with industry-leading High Five Warranty for five years of coverage!

Acrobat HD - mini ultra 13.3 w/Rolling Case
Enhanced Vision
Price: $2865
Device: large print
Disability: vision
This flexible 3-in-1 video magnifier with built-in 13.3 battery operated monitor is ideal for near, distance and self-viewing. Rotate the camera for reading, writing, grooming and magnifying images at distances. Acrobat is perfect for work, school or home. A small compact size and case make it easy to transport.

Acrobat HD - mini ultra 13.3"
Enhanced Vision
Price: $2790
Device: large print
Disability: vision
This flexible 3-in-1 video magnifier with a built-in 13.3 battery operated monitor is ideal for near, distance and self-viewing. Rotate the camera for reading, writing, grooming and magnifying images at distances. Acrobat is perfect for work, school or home and its small compact size make it easy to transport.

Acrobat HD ultra LCD 20"
Enhanced Vision
Price: $2530
Device: large print
Disability: vision
This flexible 3-in-1 video magnifier is ideal for near, distance and self-viewing. By rotating the camera, you can read, write, groom and magnify images at any distance. The Acrobat offers a complete system for those at work, school or home. Offering a 20 high resolution HD LCD.

Acrobat HD ultra LCD 20" w/ Rolling Case
Enhanced Vision
Price: $2625
Device: large print
Disability: vision
This flexible 3-in-1 video magnifier is ideal for near, distance and self-viewing. By rotating the camera, you can read, write, groom and magnify images at any distance. The Acrobat offers a complete system for those at work, school or home. Offering a 20" high resolution HD LCD and easy transport rolling case.

Acrobat HD ultra LCD 22"
Enhanced Vision
Price: $2865
Device: large print
Disability: vision
This flexible 3-in-1 video magnifier is ideal for near, distance and self-viewing. By rotating the camera, you can read, write, groom and magnify images at any distance. The Acrobat offers a complete system for those at work, school or home. Offering a 22" high resolution HD LCD.

Acrobat HD ultra LCD 22" w/ Rolling Case
Enhanced Vision
Price: $2980
Device: large print
Disability: vision
This flexible 3-in-1 video magnifier is ideal for near, distance and self-viewing. By rotating the camera, you can read, write, groom and magnify images at any distance. The Acrobat offers a complete system for those at work, school or home. Offering a 22" high resolution HD LCD and easy transport rolling case.

Acrobat HD ultra LCD 24" w/ Rolling Case
Enhanced Vision
Price: $3197
Device: large print
Disability: vision
This flexible 3-in-1 video magnifier is ideal for near, distance and self-viewing. By rotating the camera, you can read, write, groom and magnify images at any distance. The Acrobat offers a complete system for those at work, school or home. Offering a 24" high resolution HD LCD and easy to transport rolling case.

Adapt-It Pack
Adaptivation, Inc.
Price: $89
Device: switch, environmental control
Disability: cognitive, learning, physical
Our simple-to-use Adapt-It Pack has everything needed to make a battery-operated toy switch accessible. The Adapt-It Pack includes: Mini Pal Pad, Battery Interruper, battery-operated toy (two AA batteries included) and easy-to-follow photo instructions

Adjustable Proximity Switch
Adaptive Switch Laboratories, Inc.
Price: $660
Device: switch
Disability: physical
The ASL 208 is a single function switch has an adjustable activation range of touch to 1/2 inch. Activation occurs when it senses a hand or another part of the body in the activation area. It can be built with a mono port and be either 12 or 24 volt.

Allora 3
Jabbla
Price: $5950
Device: keyguard, switch, dedicated communicator, environmental control, speech output
Disability: physical, speech
Allora 3 stands for intuitive, straightforward, and easy communication. The user-friendly and high-performance functionalities of this device are incorporated in its sleek and modern design. Allora is an easy-to-use keyboard-based text-to-speech communicator. Any message written on the clear display is read out clearly and comprehensibly in a high quality natural sounding voice.

AllTalk
Lingraphica
Price: $7500
Device: alternative keyboard, mouse emulator, speech output
Disability: speech
Lingraphica's most versatile communication device, designed to help people with communication disorders easily and quickly communicate their feelings, wants, and needs.The AllTalk easily converts into four different positions. It s also available

Braillo 300 S2
American Thermoform Corporation
Price: $23000
Device: braille output, printer, speech output
Disability: vision

Braillo 300 Braille embosser is a reliable and dependable embosser for true Braille production. At 300 CPS using continuous Braille paper, it offers exceptional Braille quality and consistency. Its combination of speed, durability, reliability are the reasons why it is used by most of the largest Braille production facilities.

Braillo 450 S2
American Thermoform Corporation
Price: $35000
Device: braille output, printer
Disability: vision

The Braillo 450 S2 is an ideal embosser for those that need increased Braille output over the 300 S2, but not the speed and scalability of the 600 S2. It shares the same chassis as the 300 S2, but internal components are upgraded to ensure superior dot quality and consistency at these higher embossing speeds. Using continuous/fanfold Braille paper and embossing at 450 CPS (1,350 pages per hour), it will be a trusted, high speed asset to your business

Braillo 600 S2
American Thermoform Corporation
Price: $45000
Device: braille output, large print, printer, speech output
Disability: vision
The Braillo 600 S2 Braille embosser is the faster, more robust counterpart to theBraillo 450 S2.Embossing at 600 CPS (1,800 pages per hour), it is the fastest continuous/fanfold embosser available, and it offers remarkable dot quality and dependability. Its combination of speed, reliability and quietness are the reasons why its predecessor, the Braillo 600, is used across the world by most of the largest Braille production facilities. Unique to the 600 S2 is that it is built upon a chassis that can be upgraded to aBraillo 600 SRas your Braille production needs expand.

Braillo 600 SR
American Thermoform Corporation
Price: $79500
Device: braille output, large print, printer, speech output
Disability: vision
The Braillo 600 SR braille embossermeant for large volume Braille production. This Braille embosser is unique, as it uses paper rolls instead of continuous tractor feed paper. Using paper rolls helps to save money on paper expenses and also eliminates the need for a burster and its operator.

Braillo 650 SF
American Thermoform Corporation
Price: $128000
Device: braille output, printer, speech output
Disability: vision
The Braillo 650 SF is the worlds only fully automated Braille book production system. Send a file and pick up a finished, folded, covered and stapled book. The Braillo 650 SF makes on-demand Braille publishing possible.

Braillo 650 SW
American Thermoform Corporation
Price: $88000
Device: braille output, printer, speech output
Disability: vision
Braille 650 SW Braille Embosser is an advanced Braille embosser that employs a paper cutter for two or four page-per-sheet format, and a stacking unit engineered to handle large format production. This machine is ideal for creating both magazines and textbooks.

Companion is an ultra-portable power add-on for manual wheelchairs. It fits both rigid and folding frames for adult and pediatric users. Easily connect and disconnect Companion in seconds for up to 15mph* in high-torque power. Companion has a range of up to 18 miles* per charge and can easily be loaded in and out of a vehicle without assistance. The unit weighs about 20 lbs and can be customized in appearance and function to suit your unique identity and needs. The compact, travel-friendly design can be transported on a plane and follow you on any journey, whether by air, land or sea. *Varies based on the model, configuration, user weight, and environment.

Connect 12 - Smart portable magnifier
HumanWare
Price: $3995
Device: alternative keyboard, optical character recognition, large print, speech output
Disability: vision

Connect 12 is a high-performance 12-inch digital magnifier combined with the functionality, connectivity and versatility of an Android tablet. It offers up to 24X live HD magnification with intelligent LED illumination. Including a lightweight and sturdy stand, the Connect 12 is easily foldable and extremely portable. Staying engaged and connected in the classroom has never been this satisfying.

Control Bionics Trilogy System - NeuroNode Duo iOS
Control Bionics Inc.
Price: $13500
Device: switch, voice recognition, dedicated communicator, environmental control, speech output
Disability: cognitive, hearing, learning, physical, speech, vision

CONTROL BIONICS TRILOGY SYSTEM The NeuroNode Duo is a speech generating device with powerful access methods that make the user more effective in communicating. Combining the flexible NeuroNode sensor, and an Apple iPad, this device lets you operate your speech generating software using iOS. With EMG (electromyography) and Spatial control options, the NeuroNode Duo gives the user communication possibilities they've never had before. The wireless sensor moves with the user, allowing flexible placement for users of all abilities and range of motion - even the most minimal movement can trigger the sensor, giving the user control and independence.

CooperCar II
RJ Cooper and Associates
Price: $999 - $1399
Disability: cognitive, physical

The original CooperCar, 1991-1999, was placed 848 times around the world. Some are even still in use! The CooperCar II is a resurrection of this successful toy/tool/vehicle for severely physically (and possibly cognitively) challenged young children (up to 50 lbs). It can be controlled by 1-4 switches, or an optional joystick. It turns electrically on its large 2 wheels (no steering wheel). An optional Wireless Remote Override is available. The firmware on the controller is similar to switch parameters on a computer: Time (so that a short activation of a switch/joystick movement can result in longer movements of the vehicle), Acceleration (for those that startle easily), and Speed.The CooperCar II is a viable alternative for youngsters to a VERY expensive power wheelchair! Or, for those severely cognitively impaired, the world's greatest cause/effect device.

Cordless Switch Interface
RJ Cooper and Associates
Price: $99
Device: switch interface
Disability: physical

Provides two switch inputs for plugging switches into a computer. Once plugged in, the switch(es) become standard mouse clicks. With installation of the accompanying SwitchHopper software you can configure each button to be any mouse-button event or keystroke that you would like.

Cosmos Connect
Control Bionics Inc. - $550
Device: switch, environmental control
Disability: physical

Play video games, activate switch toys, dine independently, check text messages, and more, all using a single NeuroNode and the Cosmos Connect.The Cosmos Connect is a small portable control device that can be used with a Windows display device. When paired with the NeuroNode sensor, the Cosmos Connect leverages our exclusive application to intuitively interact with a variety of personal control devices giving the user more independence with a single movement.The Cosmos Connect is a small, portable device that turns a single NeuroNode sensor into multiple outputs. The device allows up to 8 wired outputs and one Bluetooth output.The Cosmos Connect app, installed on your Windows device, is designed to match not only the device but also the context of a specific activity. Intuitive menus present choices right for the current context, giving independence and control to the user. The app comes with cloud-based presets to simplify setup and create meaningful context right from the home screen.

Crick USB Switch Box
Crick Software, Inc.
Price: $159
Device: switch interface
Disability: physical

Plugs into your computer and connects your switches. It will work instantly with Clicker and DocsPlus, with no setup required. For other switch accessible software, we have included USB Keys software, a small application that converts switch presses from the USB switch box into key presses or mouse clicks.

Cushion Grip Switch
Enabling Devices
Price: $45.95 - $47.95
Device: switch
Disability: cognitive, hearing, learning, physical, speech, vision

A fantastic sensitive switch that fits most hands. Just slip it over your hand and you can use a palmer grasp or roll it on a tray or tabletop to activate any device or toy. Now comes in two sizes - Medium and Small.

DaVinci Pro HD/OCR
Enhanced Vision
Price: $4405
Device: optical character recognition, large print
Disability: vision

DaVinci Pro is a high-performance desktop video magnifier, featuring a 3-in-1 camera (see near, intermediate, and far), Full HD and selective text-to-speech OCR. Experience the joy of reading with high definition color and contrast, crystal clear images, and vibrant colors. DaVinci Pro will read any printed text aloud with the push of a button

Dipsy
Adaptivation, Inc.
Price: $39
Device: switch
Disability: cognitive, learning, physical

This tilt-sensitive switch can be attached to the head, arm, finger or any appropriate object and can be used for posture training. The Dipsy is activated by a 30-degree tilt which makes it less prone to false activation. Includes a headband and two finger mounts. Price Reduced.

Dot Box Switch
Adaptive Tech Solutions
Price: $33.94
Device: switch
Disability: physical

Our Dot Box Switch has a 1" raised circular activation surface that requires moderate pressure (average fingertip pressure). Has a generous 6' cord with standard 1/8" (3.5mm) jack and rubber feet on the bottom. A nice general switch that can also be used to encourage finger isolation.

Drink-Partner Insulated Tumbler
Mealtime Partners, Inc.
Price: $74.95
Disability: cognitive, physical

<p class="style45">The Drink-Partner Drinking System can accommodate an Insulated Tumbler in the cup holder, as an alternate drink container to the bottle that is provided with the Drink-Partner Drinking System. The Insulated Tumbler is an assistive drinking aid that provides hands free drinking for individuals with

disabilities. The Drink-Partner Insulated Tumbler will fit in any of the Mealtime Partners Front Mounted Drinking Systems Cup Holders as well as the Drink-Partner Cup Holder. The Insulated Tumbler holds 16-ounces of hot or cold liquid. It keeps liquids hot or cold for several hours. The tumbler has a screw-on stainless steel lid that has flex tubing integrated into it. The flex tube contains the drinking tube from which the user drinks. Once positioned, the flex tube will hold the drinking tube in position, until it is adjusted.

Dual Button Mechanical Switch with Stereo Plug
Adaptive Switch Laboratories, Inc.
Price: $360
Device: switch interface
Disability: physical
The ASL 524 with Stereo Plug will allow you to use both mechanical switches with one switch port. For instance right and left mouse click or recline and tilt.

Dual Switch Input Adaptor
Adaptive Switch Laboratories, Inc.
Price: $20
Device: switch interface
Disability: physical
The ASL 817 allows two mono port switches to have the same mono output or can allow for two output switch functions from one single switch port.

Perkins Brailler
Perkins School for the Blind
Price: $775
Device: braille input, braille output
Disability: vision
The Perkins Brailler is a durable braille writing machine used for reading, writing and math from early learning through adulthood. WHY THE PERKINS BRAILLER? Best in Class: The most widely used mechanical braille writer in the world since its invention in 1951. Durability that Lasts for Decades: Metal casing, closed body architecture (limiting dust accumulation), and over 66 years of craftsmanship, resulting in a resilient product. Wide-ranging Usefulness: Wide paper length to accommodate complex math, note taking or other literacy activities. Accommodates Additional Disabilities: Unimanual, light touch, and large print Brailler models, ensuring that more people have access to reading and writing braille. Reliable Support: One year warranty, repair service trainings and repair service centers throughout the world, ensuring that any problem with your product is resolved quickly.

Perkins SMART Brailler
Perkins School for the Blind
Price: $2195
Device: braille input, braille output, large print, speech output
Disability: vision
The SMART Brailler® is an early learning tool designed to promote an interactive educational experience between students, teachers and parents by displaying, vocalizing, and brailling what a student types. WHY THE SMART BRAILLER? Accelerates Learning: Encourages multi-sensory learning through visual, tactile and auditory feedback, increasing the student's ability to process new information and making learning fun. Lightens the Load: Weighs 20 percent less than the classic Perkins Brailler, making it easy to transport between home and classroom. Integrates with Mainstream Technology: Edits, saves and transfers brailled documents to digital text files via USB, letting sighted teachers or parents read the document on a computer. Involves Non-Braille Users: Enables better collaboration between students and sighted teachers or parents using Roman letters on the display screen to mirror what is being brailled.

Personal Pager
Adaptivation, Inc.
Price: $39 - $79
Device: environmental control
Disability: physical
The Personal Pager provides wireless call button capability at home, school or outdoors. Both transmitter and chime

receiver are battery operated. Works with any adaptive switch.

Simple Music Player
Adaptivation, Inc.
Price: $199
Disability: cognitive, physical, speech, vision
The Simple Music Player was originally designed to play music to people with dementia. Playing music from their formative years vastly improves their cognizance and lucidity. The effects are dramatic, and are widely recognized by Alzheimer professionals. Because of the ease of use, patients with various conditions of diminishment can operate the Simple Music Player themselves. Any mp3 will play, including books on tape, pod casts, or record a book in your own voice for your loved one to enjoy. Now! the Simple Music Player is appropriate for students with cognitive and/or physical disabilities. The switch jacks on the back allow the teacher, parent or therapist to connect a suitable switch, giving the student complete access. Upload your student's favorite music (mp3, etc.) from your computer to the Simple Music Player using a USB cable. The Simple Music Player appears to the computer as a thumb drive.

Sip/Puff Breeze
Origin Instruments Corp.
Price: $176
Device: switch, switch interface
Disability: physical
Connects directly to USB ports on computers, tablets and phones, speech generating devices and provides hardware emulation of mouse, keyboard, and joystick buttons; works with iPad using Apple adapter. The integrated pneumatic port connects directly to a range of available user interface options.

Sip/Puff Breeze with Gooseneck
Origin Instruments Corp.
Price: $324.5
Device: switch, switch interface
Disability: physical
Connects directly to standard USB port on computers, tablets, phones, speech generating devices and provides hardware emulation of: mouse, keyboard, joystick buttons; works with iPad using Apple adapter. Breeze has a range of available user interface options, including Gooseneck. Flexible steel gooseneck and the ball-and-socket mount enable easy and secure mouthpiece positioning.

Sip/Puff Breeze with Headset
Origin Instruments Corp.
Price: $324.5
Device: switch, switch interface
Disability: physical
Connects directly to standard USB port on computers, tablets, phones, speech generating devices and provides hardware emulation of: mouse, keyboard, joystick buttons; works with iPad using Apple adapter. Breeze connects directly to a range of available user interface options, including the Sip/Puff Headset.

Sip/Puff Gooseneck
Origin Instruments Corp.
Price: $165
Device: switch
Disability: physical
The Sip/Puff Gooseneck features a universal clamp that attaches to table tops, beds and wheelchairs. The flexible steel gooseneck and the ball-and-socket mount enable easy and secure mouthpiece positioning. The filtered mouthpiece is replaceable and a thin, pliable connecting tube interfaces to Sip/Puff Switch or Breeze.

Sip/Puff Headset
Origin Instruments Corp.
Price: $165
Device: switch
Disability: physical
This head referenced design maximizes compatibility with other assistive technologies, like HeadMouse that employ head movement. A replaceable mouth tube is held in position with an integral stainless steel forming wire. A thin, pliable connecting tube interfaces to Sip/Puff Switch or Breeze.

Sip/Puff Switch
Origin Instruments Corp.
Price: $176
Device: switch
Disability: physical
The Sip/Puff Switch translates sips and puffs into independent switch closures. Batteries or external power are not required. Test buttons are integrated to assist in application testing. A twist-on pneumatic interface provides for direct connection to a range of available user interface options, including Headset and Gooseneck.

Sip/Puff Switch with Gooseneck
Origin Instruments Corp.
Price: $324.5
Device: switch
Disability: physical
The Sip/Puff Switch translates sips and puffs into independent switch closures. Batteries or external power are not required. Test buttons are integrated to assist in application testing. A twist-on pneumatic interface provides for direct

connection to a range of available user interface options, including the Gooseneck.

Sip/Puff Switch with Headset
Origin Instruments Corp.
Price: $324.5
Device: switch
Disability: physical
The Sip/Puff Switch is a pneumatic switch. It can be used in any switch application. The headset mounts comfortably over the top of both ears and behind the head, making it less visible than typical headsets. It includes replacement mouth tubes, a switch box and 1/8-inch (3.5mm) connection cables.

Small Joystick
RJ Cooper and Associates
Price: $99 - $239
Device: mouse emulator
Disability: physical
A joystick very similar to that of a power wheelchair that can 'be' the mouse on a computer or tablet. Available either in an 8x4x3 box with 0-4 large buttons on it, or a standalone version, 3x3, with 0-4 switch inputs.This is a switch type joystick so there is no proportionality but you can use the host's Acceleration parameter to emulate that.

Smart Reader HD
Enhanced Vision
Price: $2090
Device: optical character recognition, large print, speech output
Disability: vision
A Full-Page OCR system that is deal for reading magazines, books, newspapers, recipes and any other printed material. Simply position your document and press a button, in a few seconds Smart Reader begins to read aloud. Attach headphones for privacy.

Wireless Adapted Mouse Computer Left Click Interface
Adaptive Tech Solutions
Price: $54.88
Device: mouse emulator
Disability: physical
Here's a quick and easy left click mouse interface that allows the user to simulate left click selection using theirswitch (sold separately) with standard 1/8" (3.5mm) jack. Works with single switch scanning software that utilizes a left mouse click for activation or for traditional software where the adult or peer can manipulate the mouse on the screen and the user can activate their switch to select an item. Also useful for individuals who are able to move the mouse on the screen, but can't click the mouse button themselves. They can move the mouse over the target on the screen, then activate their switch to left click. Need right click instead? Contact us-and we'll gladly help you with that special request.This high quality switch adapted Microsoft mouse can also be used as a regular mouse by those who don't need switch access. Style may vary slightly from that pictured, but will be a Microsoft mice that are compatible with both Windows and Mac.Works with Windows 10 through Windows 7, Linux, or Mac OS 10.4 or later. Contains the adapted mouse and wireless USB dongle.

Wireless IR Mouse Emulator
Adaptive Switch Laboratories, Inc.
Price: $1560 - $1680
Device: mouse emulator
Disability: physical
ASL 550 and/or 551 a desktop wireless, infrared transmitter/receiver mouse emulator with three switch configuration. Full mouse emulation is achieved with only three switches. The five switch version allows the wheelchair joystick to become a joystick operated mouse. Computer access from the wheelchair is achieved through a wireless infrared connection.

Wireless Receiver
AbleNet, Inc.
Price: $105
Device: switch
Disability: cognitive, physical
Our Original Receiver functions just like a traditional switch - plug in the receiver, and go! Choose the Original Receiver if you plan to control a computer switch interface or single device.

Wireless Switch Transmitter and Receiver
Adaptive Switch Laboratories, Inc.
Price: $800
Device: switch, switch interface
Disability: physical
The ASL 503 allows you to transmit up to five switches to a remote location. This is achieved with a 12 volt transmitter/receiver that has five mono ports as inputs on the transmitter and five mono outputs on the receiver. Switches not included.

Wobble Switch
Adaptive Switch Laboratories, Inc.
Price: $180
Device: switch
Disability: physical
The ASL 304A is a single function switch that has a light action spring and can be activated by contact from any direction.

Wobble Switch
Adaptive Tech Solutions

101 Animations
RJ Cooper and Associates
Special Skill: cognitive redevelopment, early childhood, adapted keyboard/switch access
Disability: cognitive, physical
Skill Level: infant/toddler, preschool, elementary
Operating System: Windows, Mac
Each activation of the switch causes one of 101 large, loud animations to be played. All Windows and Mac OS's supported.

2 + 2
RJ Cooper and Associates
Price: $59
Special Skill: early childhood,
Disability: learning, physical, vision
Skill Level: elementary, secondary
Operating System: Windows, Mac
This is a talking math facts program. You can edit the facts list and use addition, subtraction, multiplication and division with numbers up to 999, even decimals. An easy-to-follow scan system is built in for single switch operation, if desired. 2+2 has drill mode, test mode and help function.

AAC Evaluation Genie
Tip Top Apps
Price: $12.99
Special Skill: communication, scanning, single switch, multi switch, diagnostic
Disability: cognitive, physical, speech
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Operating System: iOS (Apple)
AAC Evaluation Genie is an informal diagnostic tool that is intended to assist speech-language pathologists and others with identifying skill areas that relate specifically to the language representation methods commonly found on augmentative communication systems. There are 13 subtests that can be administered with screening options available for each subtest. English and Spanish language options are available. Direct touch, single and two switch scanning access methods options are available.

ABC Maestro
E-Glas d.o.o.
Price: $69.95 - $129.95
Special Skill: language development,
Skill Level: preschool, elementary
Operating System: Windows
ABC Maestro is unique educational rehabilitation software for learning how to write, type, and read. It is primarily intended for students with special educational needs. ABC Maestro offers children faster learning through play. It has 14 fun activites divided into 3 categories - letters, words and numbers.

AbleLink JobQuest
AbleLink Smart Living Technologies
Price: $2500
Special Skill: basic living skills, cognitive redevelopment, vocational, , diagnostic, instructional management
Disability: cognitive
Skill Level: secondary, adult
Operating System: Other
AbleLink JobQuest is a web-based service that gives people with cognitive disabilities a voice in their own career path. Employing AbleLink's ATLAS survey engine and Data Reports system, JobQuest presents multiple job categories and gathers data in real time regarding the preferences of the individual. Students and adults with intellectual and developmental disabilities often have difficulty understanding the nature of various types of work. Pictures and words are limited in conveying tasks, the work environment, tools that might be used, or other elements that could affect job preference.

AbleLink Smart Living Service
AbleLink Smart Living Technologies
Price: $150
Special Skill: basic living skills, cognitive redevelopment, vocational, , authoring system, instructional management
Disability: cognitive, learning
Skill Level: elementary, secondary, adult
Operating System: Windows, iOS (Apple), Android
The Smart Living Service provides access to the Endeavor and Visual Impact apps, as well as the Smart Living desktop. Monthly subscribers receive ongoing training and support from AbleLink staff. Through initial assessment, consultation, setup, customization, and long-term implementation support, AbleLink will be there to help people achieve their goals.

AbleLink Smart Travel Service
AbleLink Smart Living Technologies
Price: $150
Special Skill: basic living skills, cognitive redevelopment, vocational, , authoring system, instructional management
Disability: cognitive, learning
Skill Level: secondary, adult
Operating System: iOS (Apple), Android
The Smart Travel Service provides access to the AbleLink WayFinder app for cognitively accessible travel in the community. Monthly subscribers also receive ongoing training and support from AbleLink staff. Through initial assessment, consultation, setup, customization, and long-term implementation support, AbleLink will be there to help people achieve their travel goals.

AbleLink VantagePoint
AbleLink Smart Living Technologies
Price: $2500
Special Skill: basic living skills, diagnostic, IEP/IPP
Disability: cognitive, learning
Skill Level: secondary, adult
Operating System: Windows, iOS (Apple), Android
VantagePoint software includes four satisfaction surveys addressing key service areas: My Views About...My Home, My Work, Accessing My Community, and My Day Program. The VantagePoint service includes web-based surveys, data reporting, and unlimited usage.

Access Algebra
Attainment Company, Inc.
Price: $129 - $399
Skill Level: secondary
Access Algebra is a research-based math curriculum for high school students who have moderate-to-severe developmental disabilities, including those with an intellectual disability or autism. The curriculum gives students access to content their high school peers are learning, but with the adaptations and support they may need to succeed. The curriculum accommodates students who have unique needs, including those who are nonverbal and those whose math skills are at an emergent numeracy level.

Access Language Arts iPad app
Attainment Company, Inc.
Price: $39.99
Special Skill: cognitive redevelopment, communication, language development, adapted keyboard/switch access, large print, scanning, single switch, multi switch, speech output
Disability: cognitive, learning, physical
Skill Level: elementary, secondary, adult
Adapted stories:Neighbors, Sadako and a Thousand Paper Cranes, The Diary of Anne Frank, and We Beat the Streets. Five-step sequence: Preview, vocabulary instruction, read the adapted story, comprehension questions, sequencing activity. Research has shown to be highly effective in teaching language arts skills aligned to standards.

Access Language Arts software
Attainment Company, Inc.
Price: $99
Special Skill: cognitive redevelopment, communication, language development, adapted keyboard/switch access, large print, scanning, single switch, multi switch, speech output
Disability: cognitive, learning, physical
Skill Level: elementary, secondary, adult
Operating System: Windows, Mac
Adapted stories:Neighbors, Sadako and a Thousand Paper Cranes, The Diary of Anne Frank, and We Beat the Streets. Five-step sequence: Preview, vocabulary instruction, read the adapted story, comprehension questions, sequencing activity. Research has shown to be highly effective in teaching language arts skills aligned to standards.

Access Language Arts: WRITE Software
Attainment Company, Inc.
Price: $99 - $990
Special Skill: language development,
Disability: learning, physical
Skill Level: secondary
A researched and standards-based approach for secondary students practicing reading and writing skills. Prompts students to write grade-aligned opinion paragraphs for nonfiction and fiction and improves reading comprehension and vocabulary development. Can be used as a complement to Teaching to Standards: English Language Arts or a stand-alone curriculum.

Accessible Literacy Learning (ALL) Reading Program Software
Tobii Dynavox
Price: $79.98
Special Skill: communication, early childhood, language development, scanning, single switch, multi switch
Disability: cognitive, learning, physical, speech
Skill Level: elementary, secondary
Operating System: Windows
The ALL Reading Program Software is designed specifically to teach basic reading skills to students who are non-verbal and is accessible through touch/eyegaze/scanning. It enables students to bypass oral responses at all stages of instruction, allowing even the most challenged students to learn to read.

Accessibyte Arcade
Accessibyte
Price: $150
Special Skill: basic living skills, cognitive redevelopment, early childhood, language development, vocational, adapted keyboard/switch access, large print, speech output
Disability: cognitive, hearing, learning, physical, vision
Skill Level: preschool, elementary, secondary, adult
Operating System: Windows, Mac, iOS (Apple), Android, Chrome, Other
Accessibyte Arcade is a collection of visual and audible games for students with disabilities. Students can have fun from home or school just by logging in All accessibility included in the browser on any device. Part of Accessibyte Online All Access (includes Typio, Quick Cards, Accessibyte Arcade, ProPack and Braillio).

Activity Trainer - US Version
Accelerations Educational Software
Price: $99 - $499
Special Skill: basic living skills, communication, early childhood, eye-hand coordination, language development, vocational,
Disability: cognitive, learning
Skill Level: preschool, elementary

Operating System: Windows

The Activity Trainer (AT) is the first software designed to make video modeling (VM) practical. VM increases acquisition rates of skills. The AT has a library of over 300 activities and you can create your own. The AT adds to VM task analysis, sequences, organization by student, data collection, and video to image and image to text transitions. These features make the Activity Trainer a powerful addition to your toolbox to improve outcomes of your students.

Advanced Comprehension Therapy

Tactus Therapy Solutions
Price: $24.99
Special Skill: cognitive redevelopment, communication,
Disability: cognitive, learning, speech
Skill Level: elementary, secondary, adult
Operating System: iOS (Apple), Android
Challenge your understanding with listening and reading exercises for sentences - perfect for mild or moderate aphasia.

Advanced Language Therapy 4-in-1

Tactus Therapy Solutions
Price: $74.98
Special Skill: cognitive redevelopment, communication, language development,
Disability: cognitive, learning, speech
Skill Level: elementary, secondary, adult

The Anxiety Management Program teaches how to manage anxiety through learning self-control, managing stress and improving physical wellness.

App MyEar
App MyEar
Price: $9.99
Special Skill: , speech output, voice recognition
Disability: hearing
Skill Level: elementary, secondary, adult
Operating System: iOS (Apple)
Are you deaf and tired of lipreading? Even the best lipreaders follow ~22% of their conversations - imagine what you're missing out on. MyEar App was developed by Gerald Isobe, deaf hall-of-fame golfer and his son, Brandon. Gerald grew up lipreading but became frustrated with understanding only 30% of what was being said and tired of asking people around him "what are you talking about? This app was created from those frustrations and it's an app he and others are using to communicate with their hearing colleagues, friends, and family.

App MyGroup
App MyEar

Price: $1 - $
Disability: hearing
Skill Level: elementary, secondary, adult
Operating System: iOS (Apple)
As a deaf person, have you ever found yourself as the only deaf person at a family dinner with no way to understand what's going on? As a family member, friend, or co-worker of a deaf person and wanting to connect but have no idea where hire an ASL interpreter no idea if an ASL interpreter is good or bad App MyGroup is here to help. This app helps hearing people communicate clearly with deaf friends/family members. This app is not for medical/legal use and we use only Registry of Interpreters for the Deaf (RID) certified interpreters in our network -- aka the best. If you're tired of seeing your deaf family member/friend left out of group conversations, then try out this app!

AT-node for Access

Koester Performance Research

AT-node for Access is a public, searchable collection of research on the use of computer access interfaces by people with disabilities. AT-node serves as an evidence-based tool for AT service providers and end users to facilitate informed selection of text entry interfaces. The data can be explored from multiple standpoints to create benchmarks for text entry based on the type of interface, individual diagnosis, and body site being considered for interface activation. The information can inform interface selection, goal setting, and optimizing training for selected interfaces. Researchers and students can use AT-node to identify relevant publications and data on computer access, saving significant time and effort. It provides an efficient way of learning what has already been done and what gaps remain in the field. Available for free at kpronline.com/atnode

ATLAS Travel Readiness Assessments

AbleLink Smart Living Technologies
Price: $2500 - $
Special Skill: basic living skills, cognitive redevelopment, vocational, , diagnostic, instructional management

Emotions Color Wheel and Social Programs
Virtual Reality Aids, Inc
Special Skill: basic living skills, cognitive redevelopment, communication,

language development, , instructional management
Disability: cognitive, learning, speech
Skill Level: preschool, elementary, secondary, adult
Operating System: Windows, Mac, iOS (Apple), Android, Chrome

Emotions Color Wheel is an example of our online social programs. Emotions Color Wheel visually groups hundreds of emotions with feelings, showing faces on the wheel for each emotion. It discusses concepts for feelings such as how people often have a home emotion that colors how they understand situations. Printable activities and versions of the wheel are used in classrooms for discussions and generalizing for each child. Other material to support social learning include a Social Skills Toolbox for improving communication skills, Social Emotional Skills classroom activities and worksheets, and free printable Picture Cards for non-verbal communication. Programs are free at do2learn.com, which never displays ads or tracks users. Developed under NIH funding, site programs have been tested and used in schools for over 25 years.

Consists of language, attention and memory games designed specifically for children with autism. The language games teach vocabulary, syllable segmentation, sound blending, reading and spelling. The attention games teach matching, same-to-same and figure-ground discrimination. Adults with stroke/ traumatic brain injury can use the CD to recover language and memory skills.

Tunefork app
Tunefork
Special Skill: communication, language development, scanning, telecommunications, diagnostic
Disability: hearing
Skill Level: preschool, elementary, secondary, adult
Operating System: iOS (Apple), Android
Tunefork is audio personalization software that delivers the optimal hearing experience, improving quality of life for people with hearing loss and elders.
Hearing is an individual experience. Each of us has unique hearing "Earprint". This is why no one sound system is perfect for everyone. When you listen to unbalanced audio, you will always miss something. In some cases, you may even cause damage to your hearing. The Tunefork app allows you to take a hearing test when and where is most convenient to you. You could take the test in your living room, without going anywhere, and discover your unique "Earprint". The test is simple yet accurate, following the same protocols as a clinical hearing test that would usually only be done in special booths in hearing centers.After taking the test, the result - your "Earprint" - is converted by a sophisticated algorithm into an audio filter adjusted to meet your hearing needs.

Turn-Talking
RJ Cooper and Associates
Price: $1.99 - $59
Special Skill: communication, language development,
Disability: cognitive, physical, speech
Skill Level: preschool, elementary, secondary

Operating System: Windows, Mac, iOS (Apple)

This software takes the user on a guided tour of taking turns in a conversation. A supervisor writes a script and has a person, close in age to the user, record the user's phrases. Turn-Talking then conducts that conversation.

10 Foot TriFold Portable Wheelchair Ramp
Express Ramps
Price: $754.99
Product Type: seating/positioning/mobility, elementary, secondary, adult
Disability: physical
The Advantage Tri-Fold Folding Wheelchair Ramp from EZ-Access offers the length required for wheelchairs and scooters to access mini and full-size vans, go up a number of steps, or raised landings. Advantage Tri-Fold Ramps split into 2 pieces, have anti-slip coatings, and feature bottom transition plates that make loading a breeze.

2-Point Padded Hip Belt
Bodypoint Inc.
Price: $60 - $129
Product Type: seating/positioning/mobility, preschool, elementary, secondary, adult
Disability: physical
Highest quality materials and advanced design details make Bodypoint belts the top choice of therapists and wheelchair users around the world. Our padded hip belt with two points of attachment is built for maximum functionality, durability, and all-day user comfort. Three pull styles and five buckle styles accommodate individual needs. Machine wash and dry.

4 Switch Proximity Tray Array
Adaptive Switch Laboratories, Inc.
Price: $4480 - $5316
Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: physical
The ASL 106 offers four proximity sensors that allow the driver to operate a power wheelchair. These sensors can be positioned inside a tray or at any available switch site. It was designed for those who have problems maintaining a switch that requires pressure or contact.

4-Point Padded Hip Belt
Bodypoint Inc.
Price: $82 - $167
Product Type: seating/positioning/mobility, preschool, elementary, secondary, adult
Disability: physical
Four points of attachment on this belt ensure the pelvis stays in an aligned, stable position, secure against the wheelchair seat and back supports. Primary straps position the belt while secondary straps anchor it into position. Bodypoint's high quality materials and design details ensure maximum functionality, durability, and all-day comfort. Three pull styles and five buckle styles accommodate individual needs. Machine wash and dry.

5 Foot TriFold Portable Wheelchair Ramp
Express Ramps
Price: $324.99
Product Type: seating/positioning/mobility, elementary, secondary, adult
Disability: physical
The Advantage Tri-Fold Folding Wheelchair Ramp from EZ-Access offers the length required for wheelchairs and scooters to access mini and full-size vans, go up a number of steps, or raised landings. Advantage Tri-Fold Ramps split into 2 pieces, have anti-slip coatings, and feature bottom transition plates that make loading a breeze.

5 Little Men in a Flying Saucer with BSL Signs Kindle
Co-Sign Communications (inc DeafBooks.co.uk)
Price: $3.24
Product Type: adapted play/manipulative, instructional material, learning aid, sensory stimulation, infant/toddler, preschool, elementary
Disability: cognitive, hearing, learning, speech
Available from amazon.com Thirty-five pages in fixed page landscape format to keep the relevant text with the signs. Part of a series to promote essential early learning skills. Well-loved counting Nursery Rhyme with signs to enjoy with your child. Double-tap the sign graphics for pop-up text describing the movements.

6 Foot TriFold Portable Wheelchair Ramp
Express Ramps
Price: $249.95
Product Type: seating/positioning/mobility, elementary, secondary, adult
Disability: physical
The Advantage Tri-Fold Ramp from EZ-Access offers the length required for wheelchairs and scooters to access mini and full-size vans, go up a number of steps, or raised landings. Advantage Tri-Fold Ramps split into 2 pieces, have anti-slip coatings, and feature bottom transition plates that make loading a breeze.

6610 CHEST SUPPORT
Danmar Products, Inc.
Price: $150
Product Type: seating/positioning/mobility, sensory stimulation, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, physical
A core of moldable material surrounded in soft foam provides a comfortable chest support that can form to follow body contours. There are strap attachments on the Yokes for wheelchairs, travel chairs and strollers, and the lap belt has pivot mounts for optimal adjustability.

6611 CLEAR CHEST SUPPORT
Danmar Products, Inc.
Price: $130
Product Type: seating/positioning/mobility, sensory stimulation, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, physical
Flexible yet durable, this easy-to-use design has no bulky hardware and is hardly noticeable! It offers positioning for individuals who benefit from having their upper body stabilized and hips held at a proper angle. It can be used with most standard, high back or custom wheelchairs and strollers.

6615 SPLIT CLEAR CHEST SUPPORT
Danmar Products, Inc.
Price: $130
Product Type: seating/positioning/mobility, sensory stimulation, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, physical
This flexible yet durable anterior support provides a firm fit, and is designed to be easy on and off. It can be adjusted for seasonal clothing changes and growth. Made of heavy duty 1/8" thick clear PVC vinyl, it will last much longer than harnesses made of fabric.

6620 MODULAR CHEST SUPPORT
Danmar Products, Inc.
Price: $195
Product Type: seating/positioning/mobility, sensory stimulation, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, physical
We have surrounded a core of moldable material with soft foam to create a chest support that is comfortable and can be formed to follow body contours. The yoke arms and lap belt pivot, allowing for tailored adjustments for ultimate comfort.

6626 TRUNK SUPPORT SYSTEM
Danmar Products, Inc.
Price: $150
Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, physical
Designed for use in a wheelchair or custom seating system, this system provides firm support by using an inner core of molded nylon, with a vinyl-coated soft form cover for comfort and ease of cleaning, and can be permanently mounted to the back of a chair.

6760 UTENSIL HANDLES
Danmar Products, Inc.
Price: $23
Product Type: adapted play/manipulative, learning aid, sensory stimulation, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical
Versatile and comfortable, these handles will hold eating utensils, personal hygiene items, activity brushes and crayons. Specially contoured sections fit into the hand and have a slide-buckle strap that can be easily adjusted for fit. Available in Blue, Orange or Red and sizes Small or Large.

6762 THERAPY HANDLES
Danmar Products, Inc.
Price: $26
Product Type: adapted play/manipulative, learning aid, sensory stimulation, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical
Versatile and comfortable, these handles will hold eating utensils, personal hygiene items, activity brushes and crayons. They come with a 1" foam extension to position the thumb and help with grip. Utensils can be placed in the end of the handle or in the thumb extension.

This all-in-one tool combines the Therapy Handle(#6762) and the Knob Holder (#6764) and Anchor Strap.

6770 MIBOWL HOLDER
Danmar Products, Inc.
Price: $45
Product Type: instructional material, learning aid, sensory stimulation, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical
This new design makes self-feeding easier than ever! Suction cups hold our foam bowl holder in place, preventing movement around the table. Use with our Handy Helpers (6763) for even more eating independence. The bowl is included and our vinyl-coated foam is easily cleaned with warm soapy water.

6771 MIPLATE HOLDER
Danmar Products, Inc.
Price: $45
Product Type: adapted play/manipulative, learning aid, sensory stimulation, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical
This new design uses suction cups to hold the plate in place, preventing movement around the table, making self-feeding easier than ever! Use with our Handy Helpers (6763) for even more eating independence. Our vinyl-coated foam is easily cleaned with warm soapy water.

6775 MITABLE TOPPER
Danmar Products, Inc.
Price: $55
Product Type: adapted play/manipulative, seating/positioning/mobility, sensory stimulation, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical
This soft foam table topper makes hard surfaces safer than ever, protecting heads and hands from making contact while also protecting table surfaces during art activities. The foam is vinyl-coated and easy to clean with warm soapy water.

6780 MITABLE TOPPER KIT
Danmar Products, Inc.
Price: $99
Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical
Comes complete with Table Topper Pad, Bowl or Plate Holder, and Handy Helper with spoon. The suction cups on the Bowl or Plate Holder sticks right to the Table Topper Pad and will not move. All components are vinyl-coated and easy to clean with warm soapy water.

6785 MIMITTS
Danmar Products, Inc.
Price: $105
Product Type: adapted play/manipulative, seating/positioning/mobility, sensory stimulation, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, physical
Our all-foam mitts are specially designed to help absorb and deflect the impact when an individual strikes out. They can be applied and secured quickly with Velcro straps, protecting both the wearer from injuring themselves as well as possibly injuring person(s) nearby; clean with warm soapy water.

6809 HENSINGER WITH HIGH BACK
Danmar Products, Inc.
Price: $130
Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical, speech, vision
Revolutionary in the world of cervical collars, this soft but supportive foam collar braces the head by supporting the occiput and jawline, and is 1" taller in the back. Helping to maintain mid-line head positioning results in improved breathing, swallowing and simplified feeding and aids with social interaction and awareness.

6810 HENSINGER HEAD SUPPORT
Danmar Products, Inc.
Price: $125
Product Type: seating/positioning/mobility, sensory stimulation, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical, speech, vision
Revolutionary in the world of cervical collars, the soft yet supportive foam is designed to brace the head by the jawline. It can be used with a chest support or mounted to a permanent seating system.

6815 HENSINGER HEAD SUPPORT WITH MOUNT BAR
Danmar Products, Inc.
Price: $152
Product Type: seating/positioning/mobility, sensory stimulation, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical, speech, vision
Social interactions and learning skills may be achieved more easily if the head is comfortably positioned while using feeder seats. The preformed bar has a Hensinger Head Support (6810 or 6809) attached. Specify size of feeder seat and Hensinger when ordering.

6826 ANTERIOR HEAD SUPPORT
Danmar Products, Inc.
Price: $126
Product Type: learning aid, seating/positioning/mobility, sensory stimulation, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical, speech, vision
Help to combat chin drop with this head support which provides firm yet gentle lifting of the chin, and lateral support of the head. There is a padded roll around the rear strap for a comfortable finish.

6828 SIDE-OPENING HEAD SUPPORT
Danmar Products, Inc.
Price: $145
Product Type: seating/positioning/mobility, sensory stimulation, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, physical, speech, vision
Secure, soft and very supportive, this head support opens on the side for easy on/off. It provides firm yet gently lifting of the chin, as well as lateral and occipital support of the head. The vinyl coating is easily cleaned with warm soapy water.

6833 SWIRL COLLAR
Danmar Products, Inc.
Price: $69
Product Type: learning aid, seating/positioning/mobility, sensory stimulation, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical, speech, vision
This swirl of soft foam wraps around the neck and has an adjustable Velcro closure in the rear, which makes fitting a breeze and encourages easy movement from side-to-side. Used for minor to moderate support, the Swirl can be used with any seating system and by individuals who are ambulatory.

6855 SOFT DEFLECTOR
Danmar Products, Inc.
Price: $100
Product Type: seating/positioning/mobility, elementary, secondary, adult
Disability: learning, physical, vision
This small, lightweight and discreet toileting aid can attach to any toilet seat; snap on the front or clamp to the rim. The vinyl-coated foam is easy to clean with warm soapy water, and fits onto our Toilet Seat Cover with Reducer Ring (#6850).

6856 PERSONAL DEFLECTOR
Danmar Products, Inc.
Price: $108
Product Type: seating/positioning/mobility, elementary, secondary, adult
Disability: physical
For standard deflectors that are too bulky and make toileting difficult, our personal deflector with a flexible preformed waistband, holds our soft deflector in place. Can be adjusted up and down, as well as side-to-side, and is easily cleaned with warm soapy water.

6858 PRIVACY APRON
Danmar Products, Inc.
Price: $120
Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical
Made to fit both open front and round styles of standard toilet seats (and our #6850 Toilet Seat Cover with Reducer Ring), this toileting aid can be mounted using a bracket or clamped onto the rim. Our germ resistant, vinyl-coated foam is easy to clean with warm soapy water.

6860 CHANGING STATION KIT
Danmar Products, Inc.
Price: $164.95
Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical
Our germ resistant, vinyl-covered foam is soft and easy to clean using warm soapy water. Soft and cushiony, the pad and forehead/chin rest add comfort while the J-Clips hold everything in place. Contains Changing Pad, Chin/Forehead Rest and J-Clips.

7 Foot TriFold Portable Wheelchair Ramp
Express Ramps
Price: $433.99
Product Type: seating/positioning/

mobility, elementary, secondary, adult
Disability: physical

The Advantage Tri-Fold Portable Wheelchair Ramp from EZ-Access offers the length required for wheelchairs and scooters to access mini and full-size vans, go up a number of steps, or raised landings. Advantage Tri-Fold Ramps split into 2 pieces, have anti-slip coatings, and feature bottom transition plates that make loading a breeze.

8 Foot TriFold Portable Wheelchair Ramp
Express Ramps
Price: $549.99
Product Type: seating/positioning/mobility, elementary, secondary, adult
Disability: physical

The Advantage Tri-Fold Folding Wheelchair Ramps from EZ-Access offers the length required for wheelchairs and scooters to access mini and full-size vans, go up a number of steps, or raised landings. Advantage Tri-Fold Ramps split into 2 pieces, have anti-slip coatings, and feature bottom transition plates that make loading a breeze.

8720 DELTA SWIM SYSTEM
Danmar Products, Inc.
Price: $120
Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical

This component system is designed to aid in progressive swimming development, perfect for ambulatory individuals with postural balance and arm control. As swimming skills improve, pads can be removed to help achieve independence.

8721 PAD PLUS
Danmar Products, Inc.
Price: $45
Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical

Offered to modify the Delta Swim System (#8720) and the Tri-Swim (#8728), the Pad Plus may be attached to the front section to add buoyancy and raise the body position in the water.

8723 SECTIONAL RAFT
Danmar Products, Inc.
Price: $240
Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical

For individuals who are insecure in the water or non-ambulatory, the Sectional Raft supports and cradles the body, while allowing water to flow around the body, enabling interaction with the environment and helping to reduce anxiety.

8724 SWIM RINGS
Danmar Products, Inc.
Price: $87
Product Type: adapted play/manipulative, instructional material, learning aid, seating/positioning/mobility, sensory stimulation, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical

Create your own personal flotation device with these versatile rings! Sets may be snapped together for neck, chest, torso, or body support, and the individual rings can be added or removed to adjust for comfort, and to increase or decrease flotation.

8725 HEAD FLOAT
Danmar Products, Inc.
Price: $105
Product Type: adapted play/manipulative, instructional material, learning aid, seating/positioning/mobility, sensory stimulation, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical

Independence for everyone- there is no need to support the head manually, and hands are free! Superb cushioning allows the head to rest without pressure on the spinal column, which encourages neutral positioning.

8727 DOLPHIN FLOAT SYSTEM
Danmar Products, Inc.
Price: $172
Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical

Designed for physically involved individuals who have head/neck control, but may need to compensate for uneven weight. Using the side pads helps minimize a user's tendency toward lateral rotation, and the front chest pad provides additional lift and is removeable.

8729 STABILIZER BAR
Danmar Products, Inc.
Price: $120
Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical

Helps maintain balance and equilibrium during walking/gaiting pool exercises. It is also great for resting on or extending out in front for kicking drills, as well as workouts for individuals with mild arthritis.

The amount of flotation can be adjusted by adding or removing rings.

8730 COMFORT MAT
Danmar Products, Inc.
Price: $160
Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical

Designed for use in the many situations where foam padding would be welcome. Place at the pool's edge to ease entry/exit. In the locker room, they insulate against the cold tile floors, and provide changing comfort. They make a great flotation raft too.

8735 HEAD FLOAT and STABILIZER BAR
Danmar Products, Inc.
Price: $200
Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical

This combination helps keep the face out of the water, and works well not only for swimmers with Athoid CP but also for those who roll sideways and backwards. Now they can stretch and turn their heads when interacting with others without tipping or rolling.

9708 SOFT COMFY CAP
Danmar Products, Inc.
Price: $96
Product Type: adapted play/manipulative, instructional material, learning aid, seating/positioning/mobility, sensory stimulation, telecommunications, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, speech, vision

Our lightest, coolest helmet yet! This stylish, head-hugging design made of compression-molded foam offers a uniquely comfortable fit, weighing only 3 ounces. It provides maximum ventilation and retains limited body heat, and is easy to clean with warm, soapy water.

9709 Hard Top Comfy Cap
Danmar Products, Inc.
Price: $13
Product Type: adapted play/manipulative, instructional material, learning aid, seating/positioning/mobility, sensory stimulation, telecommunications, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, speech, vision

Our lightest, coolest Hard Shell Helmet yet! This 11.5 ounce helmet is made of a compression-molded inner foam liner attached to a hard plastic exterior. The stylish

design is extremely well-ventilated and retains limited body heat. It's easy to clean, using warm soapy water.

9817 HALO HELMET
Danmar Products, Inc.
Price: $174
Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, speech, vision

Ideal for individuals who do not need full head coverage. A band of 5-8" soft, vinyl-coated foam surrounds the head at the forehead level, and extends down to cover the temporal and occipital areas. It's easy to clean with warm soapy water. Average weight is 10 ounces.

9820 SOFT SHELL HELMET
Danmar Products, Inc.
Price: $123
Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, speech, vision

This lightweight helmet is constructed out of 1/2" thick shock-absorbing foam and is fully ventilated without compromising head coverage. It's vinyl-coated with our Fabricoat which does not allow for bacteria growth, and is easy to clean with warm soapy water. Average weight is 8 ounces.

9821 HARD SHELL HELMET
Danmar Products, Inc.
Price: $160
Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, speech, vision

This headgear is both comfortable and effective in reducing the risk of injury. A strong polyethylene shell covers a shock-absorbing foam liner which is vinyl-coated and easy to clean with warm soapy water. It allows for ventilation without compromising head coverage. Average weight is 17 ounces.

9822 HARD SHELL HELMET WITH FACE GUARD
Danmar Products, Inc.
Price: $260
Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, speech, vision

This protective helmet features a shock-absorbent foam liner which is riveted to a strong polyethylene outer shell. A clear polycarbonate face guard is attached to the outer hard shell. There is an eye opening for an unobstructed view and a mouth opening for maximum ventilation. Weight averages 25 ounces.

BACK TO CONTENTS

9823 CHIN GUARD
Danmar Products, Inc.
Price: $50
Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, speech, vision
This 1/2" thick foam guard fits comfortably over the chin area and can be worn with every helmet except for the 9822 Hard Shell Helmet with Face Guard. It is soft yet shock-absorbent and easily cleaned with warm soapy water. Weight averages 1.5 ounces.

9824 HARD SHELL HELMET WITH FACE BAR
Danmar Products, Inc.
Price: $208
Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, speech, vision
A clear 2" wide polycarbonate bar is securely attached to our 9821 Hard Shell Helmet so that it can't move, to reduce the risk of injury to the facial area. The shock absorbent foam liner is vinyl-coated and the entire helmet is easy to clean with warm soapy water. Weight averages 21 ounces.

9825 DELUXE HARD SHELL HELMET
Danmar Products, Inc.
Price: $171
Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, speech, vision
This sporty version of our 9821 Hard Shell Helmet adds a decorative visor and rubber chin cup, adding style and flair. Our shock-absorbent foam is riveted to a strong, polyethylene outer hard shell, allowing ventilation without compromising head coverage. Easily cleaned with warm soapy water. Weight averages 18 ounces.

9829 FULL COVERAGE HELMET
Danmar Products, Inc.
Price: $152
Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, speech, vision
This lightweight helmet is constructed out of 5-8" vinyl-coated foam and covers more of the temporal and cheek areas, as well as the area around the ears and nape of the neck. It's easy to clean with warm soapy water. Average weight is 10 ounces.

9830 CLEAR HELMET
Danmar Products, Inc.
Price: $220
Product Type: adapted play/manipulative, instructional material, learning aid, seating/positioning/mobility, sensory stimulation, telecommunications, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, speech, vision
This clear polycarbonate helmet is well-ventilated and edged with soft foam. We include 8 moveable pads that can be used to adjust the sizing and elevate specific areas of the helmet away from wound sites. It is easily cleaned with warm soapy water.

9836 NEWBORN CAP
Danmar Products, Inc.
Price: $83
Product Type: seating/positioning/mobility, infant/toddler
Disability: cognitive, hearing, learning, physical, speech, vision
This ultra-lightweight helmet is made from soft, 3/8" shock-absorbent foam and is fully ventilated. It's coated in vinyl so it's easy to clean with warm soapy water. A soft chinstrap holds the cap in place, and the ribbon on the front allows for moderate growth.

9910 SOFT COMFY CAP WITH DESIGN
Danmar Products, Inc.
Price: $142
Product Type: adapted play/manipulative, instructional material, learning aid, seating/positioning/mobility, sensory stimulation, telecommunications, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, speech, vision
Our lightest, coolest helmet yet! This stylish head-hugging design of compression-molded foam offers a uniquely comfortable fit, and weighs just 3 ounces. It provides maximum ventilation and retains limited body heat, and is easy to clean with warm soapy water. Choose from Butterfly or Camouflage design.

Aeromesh® Calf Panel
Bodypoint Inc.
Price: $96 - $108
Product Type: seating/positioning/ mobility, elementary, secondary, adult
Disability: physical

Bodypoint® Calf Panels keep feet safely and comfortably on wheelchair foot plates. Wide strap distributes pressure across a broad calf region, especially useful for those in tilt or reclined position. Smooth, porous Aeromesh® fabric provides air circulation and comfort while a stiffener layer maintains panel shape, eliminating folding and buckling.

Aeromesh® Calf Strap
Bodypoint Inc.
Price: $73 - $85
Product Type: seating/positioning/ mobility, elementary, secondary, adult
Disability: physical
Bodypoint® Calf Straps keep feet safely and comfortably on wheelchair foot plates. A two-layer design blends comfort and function, and keeps feet from falling without bruising skin. Smooth, porous Aeromesh® fabric against the legs provides air circulation and comfort while a stiffener layer maintains its shape, eliminating folding and buckling.

Aeromesh® Rapid-Dry Bath Belts
Bodypoint Inc.
Price: $89 - $107
Product Type: seating/positioning/ mobility, elementary, secondary, adult
Disability: physical
Bodypoint Bath Belts can be worn across the chest, abdomen, hips or legs to stabilize position while bathing or in the pool. Unique Aeromesh® fabric allows water, soap, dirt and air to pass through freely while protecting skin and promoting hygiene. Three length-adjustable styles are compatible with most major shower chair brands.

Aeromesh® Shower Chair Calf Support
Bodypoint Inc.
Price: $70
Product Type: seating/positioning/ mobility, elementary, secondary, adult
Disability: physical
A calf strap designed specifically for shower chairs! Silky, porous Aeromesh® material is soft on skin while allowing soapy water, dirt and air to pass through. Attaches to all major models using sewn-in clips; no hardware required. The 4 " height supports legs but does not interfere with chair operation.

Aira
Aira
Price: $89 - $199

Alphabet Spelling Letter Board | AAC
Say it with Symbols AAC
Price: $9.94
Product Type: learning aid, sensory stimulation, secondary, adult
Disability: cognitive, hearing, learning, physical, speech
An Amazon best seller! This alphabet letter board provides a much needed, easy to use communication option for patients who cannot speak due to stroke, intubation, neurological disorders or language barriers. Ideal for use by patients, nurses, therapists, health care staff and caregivers

who care for people who are not able to express themselves verbally temporarily or longer term. Our alphabetical letter board offers large letters and numbers so patients can easily point to letters to spell out their needs and answer yes/no questions. Sheet size is 8.5" x 11", printed on heavy card stock and laminated for increased durability and re-use by the same patient. Back side is blank and can be used for writing messages with the dry-erase marker included. Sold in sets of 2 laminated boards on SayitwithSymbols.com.

Baby Shark Let's Go Hunt! Game
Adaptive Tech Solutions
Price: $35.66
Product Type: adapted play/manipulative, preschool, elementary, secondary, adult
Disability: physical
Let's go hunting with Baby Shark and the whole family! Baby Shark will even tell you who to hunt for. Baby shark will sing the famous Baby Shark song to tell you which card you need to find. Try to find the adorable members of the Baby Shark family- Mommy Shark, Daddy Shark, Grandma Shark, Grandpa Shark, and, of course, Baby Shark. To win, be the first player to collect three sets of four matching cards. No reading required.Recommended for two to four players, ages three and up.

Ball Chairs
Therapy Shoppe® Incorporated
Price: $30.99
Product Type: learning aid, seating/positioning/mobility, sensory stimulation, elementary, secondary, adult
Disability: cognitive, learning, physical
Balls Chairs are balls with tiny feet that make a great classroom seat; they help kids (and adults) get their wiggles out by encouraging subtle bouncing/rocking movements without getting up from their seats! These seats naturally help facilitate paying attention, sitting up straighter, and strengthening back muscles. Nice for classrooms and the office as the little feet are designed to keep ball chairs from rolling away when they aren't in use. *Please note the manufacturer and colors have changed for some sizes of our Chair Balls (as Fitball Ball Chairs are no longer being made).

Balltop Stylus
ShapeDad
Price: $28 - $48
Product Type: adapted play/manipulative, preschool, elementary, secondary, adult
Disability: physical
Wooden ball topped tablet and smartphone stylus for assistive grip aids. Comes in two sizes: regular and mini.

Bestic
Camanio Care Inc
Price: $3995
Product Type: seating/positioning/mobility, preschool, elementary, secondary, adult
Disability: physical
Bestic is an assistive eating device developed for individuals with decreased or no arm and/or hand function. Now you can enjoy your meal in your own pace and on your own terms. Sten Hemmingsson, founder of Bestic, was in need of an assistive eating device when he was not able to eat on his own anymore. Today, Bestic is and assistive eating device that is used by, for instance; individuals with ALS, MS, Rheumatism, Cerebral Palsy and Spinal Cord Injuries. Bestic is easy to use with it's teach-function. It is also appreciated with a total weight of 4.4 lbs and fitted in a small backpack, which means it's easy to bring with you to eat independent anywhere, at any time.

Big Beamer Transmitter
AbleNet, Inc.

Capable Denim Pant
Capable Clothing
Price: $89
Product Type: seating/positioning/ mobility
 adult
Disability: physical
The Capable premium denim pant makes emptying the bladder while seated in the wheelchair easier. The false front gives easy access to straight catheterization, indwelling catheters, and adult incontinence underwear. The pant is lower in the front, and higher in the back for increased comfort while seated. The reinforced lift loops assist in lifting, turning, and repositioning, thus reducing caregiver back strain. The back pockets have been removed to prevent skin breakdown. Easy glide zipper and velcro closure gives a person lacking

fine motor skills the ability to zip and unzip the pant unassisted. Extra length has been added to the bottom to ensure a custom fit. The most comfortable and fashionable adaptive jean that you will ever wear!

Caregiver Cue Cards | AT
Say it with Symbols AAC
Price: $35
Product Type: instructional material, learning aid
 adult
Disability: cognitive, hearing, learning, physical, speech
Caregiver Cue Cards provide essential visual cues that improve communication, promote independence and reduce anxiety for adults with dementia, memory and cognitive challenges who live at home or in care settings. This handy, compact set of double sided cards includes simple black and white illustrations that prompt individuals with dementia and cognitive challenges to understand and participate more independently in self-care and social activities. This deck of 76 picture cards is ring-bound so it opens easily to the desired color-coded section. Cards are laminated so they can be wiped clean. Blank cards are provided so you can add other specific center or activity cues. Available from SayitwithSymbols.com.

CB100 - Compound Bow Mount
Be Adaptive Equipment, Inc.
Price: $609
Product Type: adapted play/ manipulative, elementary, secondary, adult
Disability: physical
Model CB100 is designed for individuals with limited hand and arm movement and strength. This piece of equipment works on most all models of compound bows and can be used with right hand or left hand bows. It allows the limited mobility user to pivot the bow left and right and up and down while the mount holds the entire weight of the bow. The CB100 mount requires the use of a Draw-Loc or similar product (which is not included) to hold the bow at full draw for the user.

Chest Belt
Bodypoint Inc.
Price: $71 - $101
Product Type: seating/positioning/ mobility, elementary, secondary, adult
Disability: physical
A comfortable, low-profile trunk support option for users with limited hand function or those who prefer chest support without a buckle. Flexible molded end-tab is easy to grab, and high-grade hook-and-loop material holds securely but is smooth to the touch. Optional slip-on pads sold separately.

Chewelry by Munchables
Munchables Sensory Solutions Ltd.
Price: $6.99 - $20
Product Type: sensory stimulation, preschool, elementary, secondary, adult
Disability: physical, speech
Munchables Sensory Solutions Ltd specializes in stylish chewelry for kids and adults. We offer chewy necklaces, bracelets, zipper pulls and pencil toppers. Every piece of chewable jewelry comes with a 90 Day Chew Guarantee. Free shipping within United States and Canada.

Chin Control Harness
mo-Vis
Price: $1210
Product Type: seating/positioning/ mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: physical
With the Chin Control Harness you can mount a joystick on the chest of the user. This is one of the mo-vis options for chin control of your electrical wheelchair.

CJT/LOCLINE SWITCH MOUNT
CJT Mounting
Price: $225 - $525
Product Type: adapted play/ manipulative, seating/positioning/ mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, speech, vision
The CJT and Locline universal mount combines the flexibility of Locline with the strength and stability of the CJT Griptight Base Connector. The CJT Griptight base is fast and easy to attach and remove from your wheelchair, bed frame, walker, activity chair, or ET Roller.

Clamp On Drink Holder
Adaptive Tech Solutions
Price: $10.09
Product Type: adapted play/ manipulative, elementary, secondary, adult
Disability: physical
This clamp on drink holder easily attaches to a bed rail, wheelchair, walker or bike to allow for easy access of a drink. Clamp mounts onto a surface with a diameter as small as 3/4" and as large as 1 3/4", and the arms can accommodate containers up to about 2 3/4" in diameter. This is a helpful way to improve fluid intake and promote independence.

ClearMask
ClearMask
Price: $67
Product Type: , infant/toddler, preschool, elementary, secondary, adult
Disability: hearing, learning, speech
The ClearMask™ is the first fully transparent, FDA-cleared mask optimized for maximum clarity and comfort: making connections more human and providing clearer communication for all. Single use only.

Latex-free. Anti-Fog. Protection complies with applicable ASTM level 3 standards for fluid resistance and flammability. Available in two different strap styles: EZ-Adjuster or classic tie-on.

Cling
AbleNet, Inc.
Price: $125
Product Type: adapted play/ manipulative, learning aid, seating/ positioning/mobility, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical, speech, vision
Cling provides a quick, easy way to mount almost any AbleNet switch or small dedicated speech generating device (SGD) to a smooth surface like a table or desktop. Two easy lock and release suction cups secure it while the pivoting arm allows positioning of the switch device.

Compact Activity Center
Enabling Devices
Price: $149.95

DeCoste Writing Protocol
Texthelp Inc.
Price: $25 - $529
Product Type: instructional material, elementary, secondary, adult
Disability: cognitive, learning

In this age of accountability and assessment, your district needs a process to evaluate writing issues for students with disabilities. Unfortunately, many districts don't have a systematic way to do this. The DeCoste Writing Protocol is a formative assessment tool that helps educators identify factors affecting an individual student's ability to produce writing.

The Writing Protocol compares a child's individual performance across handwriting and keyboarding tasks. It examines spelling performance and writing skills so educators make more informed decisions about instructional strategies and the appropriate use of technology to meet classroom demands. The DeCoste Writing Protocol evolved from Dr DeCoste's original book, Assistive Technology Assessment: Developing a Written Productivity Profile, first published in 2004. Much has changed over the last decade- fueled by advances in technology and insights from new research.

Described and Captioned Media Program
Described and Captioned Media Program
Product Type: instructional material, infant/toddler, preschool, elementary, secondary, adult
Disability: hearing, learning, vision
DCMP's is a federally funded project administered through the National Association of the Deaf. Dynamic Footrests
Seating Dynamics
Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: physical
Dynamic Footrests provide up to three types of movement: a telescoping downward movement, knee extension, and

144

plantar/dorsi flexion. Forces are absorbed, protecting both the client and equipment from harm, and reducing overall tone and posturing. This movement can increase sitting tolerance, decrease agitation, increase alertness, and increase lower extremity strength.

Dynamic Headrest
Seating Dynamics
Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: physical
The Dynamic Head Support Hardware allows neck extension, diffusing and absorbing force to protect the client, protect the hardware, and reduce overall extensor tone. The Dynamic Head Support can be used on its own or in combination with the Dynamic Rocker Back and Dynamic Footrests.

Dynamic Rocker Back
Seating Dynamics
Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: physical
The Dynamic Rocker Back provides movement to absorb forces and assist the client back to upright. This movement can protect the client from injury and equipment from breakage, reduce extension, reduce agitation, increase alertness, provide sensory input, facilitate functional activities, and increase trunk and head control.

e3+
NuEyes Technologies
Price: $2995
Product Type: learning aid, seating/positioning/mobility, telecommunications, elementary, secondary, adult
Disability: vision
NuEyes e3+, a cutting-edge wearable magnifier integrated with NuEyes visual AI software, designed to assist individuals with low vision. Here's a breakdown of its key features: Versatile Assistance: The e3+ is engineered to aid in various daily activities, from watching TV, reading books, cooking in the kitchen, and attending live sports events. Ergonomic Design: Its design focuses on comfort for extended periods, ensuring all-day wearability without causing discomfort. Modular and Adjustable: The device features a new modular design, allowing users to adjust the (IPD) pupil distance to suit their individual eye needs. Additionally, the portable battery attachment provides flexibility for a more personalized and portable experience. Distance Viewing: Equipped with a forward-facing Ultra HD Camera, the e3+ enables users to see distant objects clearly, facilitating the recognition of faces and enhancing overall visual clarity. TV Viewing: The HD camera provides excellent

clarity for watching television, enhancing the viewing experience from the comfort of one's favorite spot. Reading Assistance: Unlike stationary magnifiers, e3+ offers the convenience of a wearable magnifier, allowing users to read comfortably.

Attainment Company, Inc.
Price: $229
Product Type: adapted play/manipulative, instructional material, sensory stimulation, elementary, secondary
Disability: learning, physical
Hands-On Math manipulatives helps students grasp abstract concepts. Kids learn when their hands are purposefully engaged, while math manipulatives help students grasp abstract concepts. Incorporates both big ideas to teach a wide range of standards-based math lessons to students with intellectual disability and/or autism, regardless of age.

Hands-On Math 2
Attainment Company, Inc.
Price: $299
Product Type: instructional material, preschool, elementary, secondary
Disability: learning, physical
A great continuation from Hands-On Math that includes 12 interchangeable number lines and sets of color-coded number pieces. There is an instructor's guide that has 120 lessons with consistent 22-page format for Big Idea concepts, vocabulary, practice pages, story problems, quizzes, and challenge exercises along with an image library and PDFs for printing additional materials are included on a USB flash drive.

Hands-On Math for Early Numeracy Skills
Attainment Company, Inc.
Price: $299
Product Type: adapted play/manipulative, instructional material, learning aid, preschool, elementary
Disability: cognitive, learning, physical, speech
Hands-On Math (HOM) for Early Numeracy Skills is primarily for preschool students with an intellectual disability or autism. It is based on two premises: (a) students with a disability learn well when their hands are purposefully engaged, and (b) math manipulatives help students understand abstract concepts. The HOM for Early Numeracy Skills Curriculum is an introduction to concepts included within school math standards. It is a skills-based program focused on early numeracy concepts.

Harkla Compression Sensory Swing
Harkla
Price: $99.98 - $119.99
Product Type: sensory stimulation, preschool, elementary, secondary, adult
Disability: physical
Hug-like calming effect Sensory input through compression and swinging $25worth of hardware included free for an easy setup Holds up to 200 lbs - safe for your child. A RELAXING PLACE FOR YOUR CHILD TO HANG. Looking for the perfect place for your child with sensory needs to feel relaxed and have fun? Harkla'sindoor therapyswing is a great addition to the bedroom or sensory room.

Harkla Compression Sheet
Harkla
Price: $29.99 - $39.99
Product Type: sensory stimulation, preschool, elementary, secondary, adult
Disability: cognitive, learning, physical
Soft, comfortable, and made with sensory needs in mind Machine washable Improve bedtime with compression Easy to set up and designed to last THE PERFECT ADDITION TO YOUR CHILD'S BEDROOM Bedtime IMPROVED! Have you struggled to help your child relax and get restful sleep? Start your journey to better sleep (and mood!) with a compression sheet. The compression sheet offers deep touch pressure (like a hug!) which helps regulate the nervous system. This releases melatonin helping relax your child. The melatonin turns into serotonin leading to deeper, more restful sleep. You'll love how your child curls up under the compression sheet as they relax and drift to sleep. EASY TO SET UP AND REMOVAL - MADE MACHINE WASHABLE Children get messy (and sweaty!). That's why our sheet is an easy on/off the bed and designed to be machine washable. Simply slide the sensory sheet over the mattress like a sleeve. The sheet fits snugly around two-thirds of the bed leaving plenty of room for both the head and feet to stick out accommodating those who prefer their feet not be compressed.

Harkla Hug
Harkla
Price: $69.98
Product Type: preschool, elementary
Disability: cognitive, learning, physical
The Harkla Hug combines a sensory input tool with the fun of a toy! Inflate the pea pod chair and watch your child explore. Now made with flock vinyl, this durable peapod sensory chair is a perfect addition to a sensory room. The inflatable peapod for autism applies much-needed pressure to sensitive areas of the body helping your child feel grounded and in control. This cozy canoe is perfect for autism. It stirs a sense of adventure while the compression provides a calming comfort where your child can feel secure. Use this sensory

processing disorder tool to add comfort and joy in your child's life. The Harkla Hug provides Deep Touch Pressure (DTP) in the form of firm tactile sensory input or proprioceptive input to the whole body. When administered to the whole body, Deep Touch Pressure therapy (DTP) has a calming, organizing effect on children and adults alike.

Harkla Pod Sensory Swing
Harkla
Price: $59.99
Product Type: sensory stimulation, preschool, elementary
Disability: physical
If you are looking for sensory or therapy swings to help your child relax and get their bearings in, then you've come to the right spot. Our autistic swings are made of high-quality but comfortable canvas that your child will want to spend hours in. Our Pod Sensory Swings are used by occupational therapists for autism spectrum disorder and sensory processing disorder. The Pod Sensory Swing provides a hug-like effect for little ones by providing Deep Touch Pressure (DTP). The Pod Sensory Swing also provides vestibular input. From infancy through adulthood, vestibular information contributes to the development of muscle tone, balance, eye movements, and more. Using slow, linear movements with Pod Sensory Swing (back and forth, side to side) gives much needed vestibular input and creates a feeling of calm in your child. However, many families purchase them simply because they are a fun place for your child to hang out in! Since our indoor therapy swing safely hangs from your ceiling, your child can receive the calming sense of wellbeing that swinging brings right in your home.

Harkla Sensory Body Sock
Harkla
Price: $29.99
Product Type: sensory stimulation, preschool, elementary, secondary, adult
Disability: cognitive, learning, speech
Do you wish your child had an easier time relaxing? The Harkla body sock is designed with autism and sensory issues in mind. Your child will love to play, stretch, or relax in our sensory sock! HELP YOUR CHILD DEVELOP SPATIAL AWARENESS Not only do sensory socks for kids help to soothe and calm, but a body sock can also encourage your child to explore their movements by pressing and stretching the material. Start developing right away with the activity guide created by occupational therapists provided in each therapy socks package. STAND UP TO THE TOUGHEST OF PLAYTIMES Designed with double-stitched seams and strong snaps instead of velcro.

Harkla Weighted Blanket for Kids and Adults
Harkla
Price: $79.98 - $129.99
Product Type: sensory stimulation, preschool, elementary, secondary, adult
Disability: physical
The perfect weighted blanket for a good night's sleep. Are you or your child struggling to relax or fall asleep? If so, then maybe it's time to invest in a weighted blanket. Our sensory weighted blankets are designed with your family in mind. Whether you are buying one for trouble sleeping or sensory processing disorder, you'll be happy you finally made the investment in a weighted blanket. And with a weighted blanket, you have a healthy way to relax and reduce anxiety by simply laying down with your blanket instead of taking pharmaceuticals and supplements. It's a completely natural sleep aid. Our goal at Harkla is to help you and your child live a happier, healthier life. We both know getting a good night's sleep is one of the highest priorities for reaching that goal. Join the thousands of people who have benefited from a Harkla weighted blanket, today!

Harkla Weighted Compression Vest
Harkla
Price: $59.99
Product Type: learning aid, sensory stimulation, preschool, elementary, secondary
Disability: learning, physical
Are you looking for a tool to help your child feel secure, calm, and focused? Harkla's weighted compression vest for kids with sensory issues, autism, and ADHD combines the sensory input tool with a wearable by applying pressure tosensitive areasof the body. Simply place the vest over your child's clothing, and watch your little one return to feeling grounded and in control. A perfect addition to the classroom, pack the weighted compression vest with your child's school supplies for on-the-go sensory integration therapy. It works well on travel, too! Improve both their and your car rides with a vest providing deep pressure sensory input. The weighted compression vest for kids is made out of soft neoprene and is built to last. Unlike other brands, Harkla has built-in ventilation using mesh to make sure your child stays cool while receiving the sensory integration therapy benefits. <a href="https://harkla.co/collections/front-page/products/weighted-compression-vest">Click here to learn more!

Harkla Weighted Lap Animal
Harkla
Price: $44.99
Product Type: learning aid, sensory stimulation, preschool, elementary

150

Disability: cognitive, learning, physical

Your child's new sensory buddy The perfect toy for helping your child stay calm in class Make car rides and trips out more peaceful Weighs 5 lbs - for autism,sensoryprocessing disorder, and ADHD, SUPPORTING YOUR CHILD'S NEEDS WITH A FUN STUFFED ANIMAL. Does your child have a hard time staying calm at school or in the car? Are you always looking for toys that will effectively support your child's needs? The 5 lb weighted lap animal is the perfect companion for your sensory seeker! The science supporting weighted objects like our sensory weighted stuffed animal is called deep touch pressure (the same benefit as a weighted blanket.). Deep touch pressure helps to decrease nervous system activity which encourages a feeling of calm and relaxation. The weight takes advantage of the calming effects of deep pressure therapy. Theextremely soft fabric of the-poundpuppystuffed animalgives a great soft sensory surface for them to explore while relaxing. If your child could use extra help in sitting calmly, then they will benefit from a weighted stuffed animal. Add the weighted dog to your sensory toolbox and give your child the sense of calm they deserve (and the sense of calm you deserve as well!).

Harkla Weighted Lap Pad
Harkla
Price: $44.99
Product Type: sensory stimulation, preschool, elementary, secondary, adult
Disability: physical
Much like a weighted blanket, the weighted lap pad is a sensory tool that offers Deep Touch Pressure (DTP) to a person's legs as it rests on the lap when in a seated position. The weighted lap pad is often used in classrooms to provide some sensory input and help students stay seated. The weighted lap pad can also be used anywhere when adults or children need to stay sitting for an extended period. It's wonderful for activities like: Car rides Plane rides Mealtimes While doing home-work Sitting in the grocery cart Our minky dot design makes this a perfect sensory blanket, as the soft minky fabric, combined with the dots and added weight makes a sensory input trifecta! This sensory combo gives your child an easy way to fulfill their fidget needs while calming them with the weight. Our goal at Harkla is to help your child live a happier, healthier life, and we both know getting them to relax and focus in class is one of the highest priorities.

Head Pointer and Stylus cap edition
ShapeDad
Price: $129 - $139

The stylus pointer is available in four options that differ in length and bend-ability.

Headpod Dynamic Head Support
PACIFIC REHAB
Price: $495
Product Type: adapted play/manipulative, seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, physical
A dynamic head support device which can be applied to almost anything with a headrest while the child is upright,.. wheelchair, walker, stroller, stander,bike or activity chair. The child is able to move in full rotation, as well as chin tuck and extension, but not head drop. As the child acquires strength, the upper band is relaxed and they are able to move within their plane of strength. It is a completely different philosophy from head restraints and collars, which tends to atrophy musculature further due to lack of movement. The Headpod can only be used when the child is upright, to begin within their point of balance. A functional aide during power wheelchair use, Aug Comm and feeding. Any time that fatigue prevents function. It is not to be used for van or bus transport.

Healthcare Jot Reusable Writing Tablet
Say it with Symbols AAC
Price: $25.95
Product Type: instructional material, elementary, secondary, adult
Disability: cognitive, hearing, physical, speech
This original Jot(TM) Healthcare Reusable Writing Tablet from Boogie Board offers patients and students with speech challenges a sustainable way to write mes-

sages, ask questions and share feelings. The 8.5" screen is large enough to jot down messages, daily reminders, greetings or questions using the stylus provided or a finger. Push a button on the tablet to erase the message. Saves having scraps of paper around your home! A useful device - or gift - for individuals with aphasia, stroke, autism spectrum disorders, selective mutism, Parkinson's, ALS, throat cancer, brain injury and intubation. Can be used by caregivers, nurses and therapists at home, hospital bedside, at occupational and speech therapy sessions to improve patient communication. Learn more at https://www.sayitwithsymbols.com/healthcare-jot-writing-tablet/.

In The Know: Health, Sexuality, and Relationships
Attainment Company, Inc.
Price: $19
Product Type: instructional material, secondary, adult
Disability: cognitive, learning

In the Know: Health, Sexuality, and Relationships is a health and wellness curriculum designed to address sensitive topics like human growth and development, sexuality, pregnancy, mental health, and personal safety in an approachable way that will encourage students to participate in their learning.

InnerVoice AI
iTherapy, LLC
Price: $99.98
Product Type: learning aid, preschool, elementary, secondary
Disability: cognitive, learning, speech

InnerVoice can work like a typical communication device: letting your thoughts and feelings be heard and understood by others. Unlike traditional speech-generating apps, though, InnerVoice combines artificial intelligence technology with facial expressions, emotions, tone-of-voice, written words, and videos -- providing a complete multi-sensory learning experience. Visual Language is an exciting new feature that uses Microsoft's Azure artificial intelligence technology to teach language and literacy skills in a unique way. The camera displays what you're looking at. Take a picture and watch InnerVoice's AI system label your picture with text and describe it with speech -- allowing users to see the relationships shared among the environment, speech, language, and text. Visual language makes creating and editing buttons easier than ever: just take a picture and InnerVoice's AI system labels the button and adds a description.

iPad Bluetooth Speaker
RJ Cooper and Associates
Price: $79
Product Type: adapted play/manipulative, infant/toddler, preschool, elementary, secondary, adult
Disability: speech

Job Skills Stories
Attainment Company, Inc.
Price: $69 - $399
Product Type: adapted play/ manipulative, instructional material, learning aid, secondary, adult
Disability: cognitive, learning, physical, speech
Job Skills Stories emphasizes the five categories in Pre-ETS: Job and Career Exploration, Work-Based Learning, Post-Secondary Training, Workplace Readiness, and Self-Advocacy. One-hundred stories are presented in five Job Skills Stories Student Books. Each book is aligned to a Pre-ETS category. The stories cover key transition skills like identifying one's strengths, decision-making, and self-determination. The Job Skills Reader condenses and simplifies content by using captioned photos to convey each story's big idea. Both the Student Books and Reader cover lesson objectives, so you can teach with the version that best suits each student.

KM-201 KUPOCARE Wheelchair Tablet Holder (S size Super Knuckle Arm)
KUPOCARE
Product Type: seating/positioning/ mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: physical
The tablet holder is ideal for 7 to 11 inch tablets and connects to the Wheelchair Tube Clamp base via ball head through the S size (3") Super Knuckle Arm. The ball head on either end of the arm allows users to freely adjust the tablet's angle and can be locked into position by tightening the central knob. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts a tablet within a flexible 3" (7.6 cm) radius of a wheelchair tube.

KM-202 KUPOCARE Wheelchair Phone Holder (S size Super Knuckle Arm)
KUPOCARE
Product Type: seating/positioning/ mobility, infant/toddler, preschool, elementary, secondary, adult

Disability: physical
The phone holder is compatible with 2.3-3.3" (58 - 85 mm) wide phones and connects to the Wheelchair Tube Clamp base via ball head through the S size (3") Super Knuckle Arm. The ball head on either end of the arm allows users to freely adjust the phone's angle and can be locked into position by tightening the central knob. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts a phone within a flexible 3" (7.6 cm) radius of a wheelchair tube.

KM-203 KUPOCARE Wheelchair Camera Mount (S size Super Knuckle Arm)
KUPOCARE
Product Type: seating/positioning/ mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: physical
In this set, the S size (3") Super Knuckle Arm has a ball head with 1/4"-20 male thread on one end that is compatible with most cameras and camcorders. The two 1" aluminum ball head joints of the Super Knuckle Arm allows users to freely adjust the angle of cameras and lock the position by simply tightening the central knob. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts a camera or camcorder within a flexible 3" (7.6 cm) radius of a wheelchair tube.

KM-204 KUPOCARE Wheelchair AAC Switch Mount (S size Super Knuckle Arm)
KUPOCARE

Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: physical

This S size (3") Super Knuckle Arm has a ball head with 1/4"-20 female thread on one end that matches the universal mounting system of AbleNet switches. The two 1" aluminum ball head joints of the Super Knuckle Arm allows users to freely adjust the angle of mounted AAC switches and lock the position by simply tightening the central knob. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts an AbleNet switch or any equipment with 1/4"-20 male thread within a flexible 3" (7.6 cm) radius of a wheelchair tube.

KM-205 KUPOCARE Wheelchair Tablet Mount (M size Super Knuckle Arm)
KUPOCARE
Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: physical

The tablet holder is ideal for 7 to 11 inch tablets and connects to the Wheelchair Tube Clamp base via ball head through the S size (3") Super Knuckle Arm. The ball head on either end of the arm allows users to freely adjust the tablet's angle and can be locked into position by tightening the central knob. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts a tablet within a flexible 3" (7.6 cm) radius of a wheelchair tube.

KM-206 KUPOCARE Wheelchair Phone Holder (M Size Super Knuckle Arm)
KUPOCARE
Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: physical

The phone holder is compatible with 2.3-3.3" (58 - 85 mm) wide phones and connects to the Wheelchair Tube Clamp base via ball head through the M size (6") Super Knuckle Arm. The ball head on either end of the arm allows users to freely adjust the phone's angle and can be locked into position by tightening the central knob. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts a phone within a flexible 6" (15.2 cm) radius of a wheelchair tube.

KM-207 KUPOCARE Wheelchair Camera Mount (M Size Super Knuckle Arm)
KUPOCARE
Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: physical

In this set, the M size (6") Super Knuckle Arm has a ball head with 1/4"-20 male thread on one end that is compatible with most cameras and camcorders. The two 1" aluminum ball head joints of the Super Knuckle Arm allows users to freely adjust the angle of mounted cameras and lock the position by simply tightening the central knob. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts

a camera or camcorder within a flexible 6" (15.2 cm) radius of a wheelchair tube.

KM-208 Wheelchair AAC Switch Mount (M Size Super Knuckle Arm)
KUPOCARE
Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: physical

This L size (9") Super Knuckle Arm has a ball head with 1/4"-20 female thread on one end that matches the universal mounting system of AbleNet switches. This arm is constructed by linking two S size arms with a 3" extension. The four ball heads of the arm allow users to adjust the mounted AAC switches to precise positions that suit their special needs. The extension arm has three 1/4"-20 and two 3/8"-16 female thread holes that allow for mounting devices using an additional Super Knuckle Arm. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts an AbleNet switch or any equipment with 1/4"-20 male thread within a flexible 9" (22.8 cm) radius of a wheelchair tube.

KM-209 KUPOCARE Wheelchair Tablet Holder (L size Super Knuckle Arm)
KUPOCARE
Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: physical

The tablet holder is ideal for 7 to 11 inch tablets and connects to the Wheelchair Tube Clamp base via ball head through the L Size (9") Dual Knuckle Arm. This arm is constructed by linking two S size arms with a 3" extension. The four ball heads of the arm allow users to adjust the mounted tablets to precise positions that suit their special needs. The extension arm has three 1/4"-20 and two 3/8"-16 female thread holes that allow for mounting devices using an additional Super Knuckle Arm. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame

tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts a tablet within a flexible 9" (22.8 cm) radius of a wheelchair tube.

KM-210 Wheelchair Phone Holder (L Size Dual Knuckle Arm)
KUPOCARE
Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: physical

The phone holder is compatible with phones 2.3" to 3.34" (58 - 85 mm) wide and connects to the Wheelchair Tube Clamp base via ball head through the L Size (9") Dual Knuckle Arm. This arm is constructed by linking two S size arms with a 3" extension. The four ball heads of the arm allow users to adjust the mounted phones to precise positions that suit their special needs. The extension arm has three 1/4"-20 and two 3/8"-16 female thread holes that allow for mounting devices using an additional Super Knuckle Arm. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts a phone within a flexible 9" (22.8 cm) radius of a wheelchair tube.

KM-211 Wheelchair Camera Mount (L Size Dual Knuckle Arm)
KUPOCARE
Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: physical

In this set, the L Size (9") Dual Knuckle Arm has a ball head with 1/4"-20 male thread on one end that is compatible with most cameras and camcorders. This arm is constructed by linking two S size arms

154

with a 3" extension. The four ball heads of the arm allow users to adjust the mounted cameras to precise positions that suit their special needs. The extension arm has three 1/4"-20 and two 3/8"-16 female thread holes that allow for mounting devices using an additional Super Knuckle Arm. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts a camera or camcorder within a flexible 9" (22.8 cm) radius of a wheelchair tube.

KM-212 Wheelchair AAC Switch Mount (L Size Dual Knuckle Arm)
KUPOCARE

Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: physical

This L size (9") Super Knuckle Arm has a ball head with 1/4"-20 female thread on one end that matches the universal mounting system of AbleNet switches. This arm is constructed by linking two S size arms with a 3" extension. The four ball heads of the arm allow users to adjust the mounted AAC switches to precise positions that suit their special needs. The extension arm has three 1/4"-20 and two 3/8"-16 female thread holes that allow for mounting devices using an additional Super Knuckle Arm. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts an AbleNet switch or any equipment with 1/4"-20 male thread within a flexible 9" (22.8 cm) radius of a wheelchair tube.

KM-213 Wheelchair Umbrella Holder (S size Super Knuckle Arm)
KUPOCARE

Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: physical

The umbrella holder can hold any 13-35 mm diameter tubes and connects to the Wheelchair Tube Clamp base through the S size (3") Super Knuckle Arm. The umbrella holder can hold an umbrella, a flag, a walking stick, a rod shape action camera, a flashlight or any other long cylindrical objects. The ball head on either end of the arm allows users to freely adjust the angle of mounted items and can be locked into position by tightening the central knob. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts an umbrella, a flag, a walking stick, a rod shape action camera, a flashlight or any other long cylindrical objects anywhere within a flexible 3" (7.6 cm) radius of a wheelchair tube.

KM-214 Wheelchair Umbrella Holder (M Size Super Knuckle Arm)
KUPOCARE

Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: physical

The umbrella holder can hold any 13-35 mm diameter tubes and connects to the Wheelchair Tube Clamp base through the S size (6") Super Knuckle Arm. The umbrella holder can hold an umbrella, a flag, a walking stick, a rod shape action camera, a flashlight or any other long cylindrical objects. The ball head on either end of the arm allows users to freely adjust the angle of mounted items and can be locked into position by tightening the central knob. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing

the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts an umbrella, a flag, a walking stick, a rod shape action camera, a flashlight or any other long cylindrical objects anywhere within a flexible 6" (15.2 cm) radius of a wheelchair tube.

KM-215 KUPOCARE Wheelchair GoPro Holder (S size Super Knuckle Arm)
KUPOCARE

Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: physical

The GoPro holder can directly attach to the underside of the action camera to replace the factory mounting bracket and connects to the Wheelchair Tube Clamp base through the S size (3") Super Knuckle Arm. The ball head on either end of the arm allows users to freely adjust the GoPro's angle and can be locked into position by tightening the central knob. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts a GoPro action camera anywhere within a flexible 3" (7.6 cm) radius of a wheelchair tube.

KM-216 Wheelchair GoPro Mount (M Size Super Knuckle Arm)
KUPOCARE

Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: physical

The GoPro holder can directly attach to the underside of the action camera to replace the factory mounting bracket and connects to the Super Convi Clamp base through the M size (6") Super Knuckle Arm. The ball head on either end of the arm allows users to freely adjust the GoPro's angle and can be locked into position by tightening the central knob. The Wheel-

chair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts a GoPro action camera anywhere within a flexible 6" (15.2 cm) radius of a wheelchair tube.

KM-217 KUPOCARE Wheelchair GoPro Mount (L size Dual Knuckle Arm)
KUPOCARE

Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: physical

The GoPro holder can directly attach to the underside of the action camera to replace the factory mounting bracket and connects to the Super Convi Clamp base through the L Size (9") Dual Knuckle Arm. This arm is constructed by linking two S size arms with a 3" extension. The four ball heads of the arm allow users to adjust the mounted phones to precise positions that suit their special needs. The extension arm has three 1/4"-20 and two 3/8"-16 female thread holes that allow for mounting devices using an additional Super Knuckle Arm. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts a GoPro action camera anywhere within a flexible 9" (22.8 cm) radius of a wheelchair tube.

KM-701 KUPOCARE Table Tablet Mount (S size Super Knuckle Arm)
KUPOCARE

Product Type: seating/positioning/mobility, infant/toddler, preschool,

elementary, secondary, adult
Disability: physical

The tablet holder is compatible with 7 to 11 inch tablets and connects to the Super Convi Clamp base through the S size (3") Super Knuckle Arm. The ball head on either end of the arm allows users to freely adjust the tablet's angle and can be locked into position by tightening the central knob. The Super Knuckle Arm is equipped with a hex stud that can be inserted into the built-in female socket of the Super Convi Clamp. The Clamp can be securely mounted onto most rails or tubes with external diameters from 0.2 to 2 inches (5-51 mm). The included plastic saddle can be attached to the Super Convi Clamp to securely hold onto tables between 0.2-1.2" (5-30 mm) thick. The user-friendly Clamp is easily secured and removed efficiently. This set mounts a tablet anywhere within a flexible 3" (7.6 cm) radius.

KM-702 KUPOCARE Table Phone Mount (S size Super Knuckle Arm)
KUPOCARE
Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: physical

The tablet holder is compatible with 7 to 11 inch tablets and connects to the Super Convi Clamp base through the L Size (9") Dual Knuckle Arm. This arm is constructed by linking two S size arms with a 3" extension. The four ball heads of the arm allow users to adjust the mounted tablets to precise positions that suit their special needs. The extension arm has three 1/4"-20 and two 3/8"-16 female thread holes that allow for mounting devices using an additional Super Knuckle Arm. The other end of the arm has a ball head with a hex stud that connects to the Super Convi Clamp. The Clamp can be securely mounted onto most rails or tubes with external diameters from 0.2 to 2 inches (5-51 mm). The included plastic saddle can be attached to the Super Convi Clamp to securely hold onto tables between 0.2-1.2" (5-30 mm) thick. The user-friendly clamp is easily secured and removed efficiently. This set mounts a tablet within a flexible 9" (22.8 cm) radius.

KM-703 KUPOCARE Table Camera Mount (S size Super Knuckle Arm)
KUPOCARE
Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: physical

In this set, the S size (3") Super Knuckle Arm has a ball head with 1/4"-20 male thread on one end that is compatible with most cameras and camcorders. The two

1" aluminum ball head joints of the Super Knuckle Arm allows users to freely adjust the angle of mounted items and lock the position by simply tightening the central knob. The Super Knuckle Arm is equipped with a hex stud that can be inserted into the built-in female socket of the Super Convi Clamp. The Clamp can be securely mounted onto most rails or tubes with external diameters from 0.2 to 2 inches (5-51 mm). The included plastic saddle can be attached to the Super Convi Clamp to securely hold onto tables between 0.2-1.2" (5-30 mm) thick. The user-friendly Clamp is easily secured and removed efficiently. This set mounts a camera or camcorder anywhere within a flexible 3" (7.6 cm) radius.

KM-704 KUPOCARE Table AAC Switch Mount (S size Super Knuckle Arm)
KUPOCARE
Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: physical

This S size (3") Super Knuckle Arm has a ball head with 1/4"-20 female thread on one end that matches the universal mounting system of AbleNet switches. The other end of the arm has a ball head with a hex stud that connects to the Super Convi Clamp. The ball heads on either end of the arm allows users to freely adjust the angle of mounted AAC switches and can be locked into position by tightening the central knob. The clamp can be securely mounted onto most rails or tubes with external diameters from 0.2 to 2 inches (5-51 mm). The included plastic saddle can be attached to the Super Convi Clamp to securely hold onto tables between 0.2-1.2" (5-30 mm) thick. The user-friendly Clamp is easily secured and removed efficiently. This set mounts an AbleNet switch or any equipment with 1/4"-20 male thread within a flexible 3" (7.6 cm) radius.

KM-705 KUPOCARE Table Tablet Mount (M size Super Knuckle Arm)
KUPOCARE
Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: physical, speech

The tablet holder is compatible with 7 to 11 inch tablets and connects to the Super Convi Clamp base through the M size (6") Super Knuckle Arm. The ball head on either end of the arm allows users to freely adjust the tablet's angle and can be locked into position by tightening the central knob. The Super Knuckle Arm is equipped with a hex stud that can be inserted into the built-in female socket of the Super Convi Clamp. The Clamp can be securely

mounted onto most rails or tubes with external diameters from 0.2 to 2 inches (5-51 mm). The included plastic saddle can be attached to the Super Convi Clamp to securely hold onto tables between 0.2-1.2" (5-30 mm) thick. The user-friendly Clamp is easily secured and removed efficiently. This set mounts a tablet anywhere within a flexible 6" (15.2 cm) radius.

KM-706 KUPOCARE Table Phone Mount (M size Super Knuckle Arm)
KUPOCARE
Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: physical

The phone holder is compatible with 2.3-3.3" (58 - 85 mm) wide phones and connects to the Super Convi Clamp base through the M size (6") Super Knuckle Arm. The ball head on either end of the arm allows users to freely adjust the phone's angle and can be locked into position by tightening the central knob. The Super Knuckle Arm is equipped with a hex stud that can be inserted into the built-in female socket of the Super Convi Clamp. The Clamp can be securely mounted onto most rails or tubes with external diameters from 0.2 to 2 inches (5-51 mm). The included plastic saddle can be attached to the Super Convi Clamp to securely hold onto tables between 0.2-1.2" (5-30 mm) thick. The user-friendly Clamp is easily secured and removed efficiently. This set mounts a phone anywhere within a flexible 6" (15.2 cm) radius.

KM-707 KUPOCARE Table Camera Mount (M size Super Knuckle Arm)
KUPOCARE
Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: physical

In this set, the M size (6") Super Knuckle Arm has a ball head with 1/4"-20 male thread on one end that is compatible with most cameras and camcorders. The two 1" aluminum ball head joints of the Super Knuckle Arm allows users to freely adjust the angle of mounted items and lock the position by simply tightening the central knob. The Super Knuckle Arm is equipped with a hex stud that can be inserted into the built-in female socket of the Super Convi Clamp. The Clamp can be securely mounted onto most rails or tubes with external diameters from 0.2 to 2 inches (5-51 mm). The included plastic saddle can be attached to the Super Convi Clamp to securely hold onto tables between 0.2-1.2" (5-30 mm) thick. The user-friendly Clamp is easily secured and removed efficiently. This set mounts a camera or camcorder

anywhere within a flexible 6" (15.2 cm) radius.

KM-707 KUPOCARE Table Phone Mount (L size Dual Knuckle Arm)
KUPOCARE
Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: physical

The phone holder is compatible with phones 2.3" to 3.34" (58 - 85 mm) wide and connects to the Super Convi Clamp base through the L Size (9") Dual Knuckle Arm. This arm is constructed by linking two S size arms with a 3" extension. The four ball heads of the arm allow users to adjust the mounted phones to precise positions that suit their special needs. The extension arm has three 1/4"-20 and two 3/8"-16 female thread holes that allow for mounting devices using an additional Super Knuckle Arm. The other end of the arm has a ball head with a hex stud that connects to the Super Convi Clamp. The Clamp can be securely mounted onto most rails or tubes with external diameters from 0.2 to 2 inches (5-51 mm). The included plastic saddle can be attached to the Super Convi Clamp to securely hold onto tables between 0.2-1.2" (5-30 mm) thick. The user-friendly clamp is easily secured and removed efficiently. This set mounts a phone within a flexible 9" (22.8 cm) radius.

KM-708 KUPOCARE Table AAC Switch Mount (M size Super Knuckle Arm)
KUPOCARE
Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: physical

This M size (6") Super Knuckle Arm has a ball head with 1/4"-20 female thread on one end that matches the universal mounting system of AbleNet switches. The other end of the arm has a ball head with a hex stud that connects to the Super Convi Clamp. The ball heads on either end of the arm allows users to freely adjust the angle of mounted AAC switches and can be locked into position by tightening the central knob. The Clamp can be securely mounted onto most rails or tubes with external diameters from 0.2 to 2 inches (5-51 mm). The included plastic saddle can be attached to the Super Convi Clamp to securely hold onto tables between 0.2-1.2" (5-30 mm) thick. The user-friendly Clamp is easily secured and removed efficiently. This set mounts an AbleNet switch or any equipment with

1/4"-20 male thread within a flexible 6" (15.2 cm) radius.

KM-709 KUPOCARE Table Tablet Mount (L size Dual Knuckle Arm)
KUPOCARE
Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: physical, speech
The tablet holder is compatible with 7 to 11 inch tablets and connects to the Super Convi Clamp base through the L Size (9") Dual Knuckle Arm. This arm is constructed by linking two S size arms with a 3" extension. The four ball heads of the arm allow users to adjust the mounted tablets to precise positions that suit their special needs. The extension arm has three 1/4"-20 and two 3/8"-16 female thread holes that allow for mounting devices using an additional Super Knuckle Arm. The other end of the arm has a ball head with a hex stud that connects to the Super Convi Clamp. The Clamp can be securely mounted onto most rails or tubes with external diameters from 0.2 to 2 inches (5-51 mm). The included plastic saddle can be attached to the Super Convi Clamp to securely hold onto tables between 0.2-1.2" (5-30 mm) thick. The user-friendly clamp is easily secured and removed efficiently. This set mounts a tablet within a flexible 9" (22.8 cm) radius.

KM-711 KUPOCARE Table Camera Mount (L size Dual Knuckle Arm)
KUPOCARE
Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: physical
In this set, the L Size (9") Dual Knuckle Arm has a ball head with 1/4"-20 male thread on one end that is compatible with most cameras and camcorders. This arm is constructed by linking two S size arms with a 3" extension. The four ball heads of the arm allow users to adjust the mounted cameras to precise positions that suit their special needs. The extension arm has three 1/4"-20 and two 3/8"-16 female thread holes that allow for mounting devices using an additional Super Knuckle Arm. The other end of the arm has a ball head with a hex stud that connects to the Super Convi Clamp. The Clamp can be securely mounted onto most rails or tubes with external diameters from 0.2 to 2 inches (5-51 mm). The included plastic saddle can be attached to the Super Convi Clamp to securely hold onto tables between 0.2-1.2" (5-30 mm) thick. The user-friendly clamp is easily secured and removed efficiently. This set mounts a camera or camcorder within a flexible 9" (22.8 cm) radius.

KM-712 KUPOCARE Table AAC Switch Mount (L size Dual Knuckle Arm)
KUPOCARE
Product Type: seating/positioning/mobility, infant/toddler, preschool, elementary, secondary, adult
Disability: physical
This L size (9") Super Knuckle Arm has a ball head with 1/4"-20 female thread on one end that matches the universal mounting system of AbleNet switches. This arm is constructed by linking two S size arms with a 3" extension. The four ball heads of the arm allow users to adjust the mounted AAC switches to precise positions that suit their special needs. The extension arm has three 1/4"-20 and two 3/8"-16 female thread holes that allow for mounting devices using an additional Super Knuckle Arm. The other end of the arm has a ball head with a hex stud that connects to the Super Convi Clamp. The Clamp can be securely mounted onto most rails or tubes with external diameters from 0.2 to 2 inches (5-51 mm). The included plastic saddle can be attached to the Super Convi Clamp to securely hold onto tables between 0.2-1.2" (5-30 mm) thick. The user-friendly clamp is easily secured and removed efficiently. This set mounts an AbleNet switch or any equipment with 1/4"-20 male thread within a flexible 9" (22.8 cm) radius.

Laminated Health Care Communication Boards | AAC
Say it with Symbols AAC
Price: $9.94
Product Type: learning aid, secondary, adult
Disability: cognitive, hearing, learning, physical, speech
These no tech, laminated patient communication boards feature 68 pictures that help patients communicate their health and hospital care-related needs when they are not able to speak. Studies show that being able to communicate with care providers significantly improves the patient's experience and recovery in the ICU. Each double-sided sheet offers clear color pictures to indicate pain, wants, needs, ailments, comforts, questions, staff, emotions and more. Pain scale, alphabet and number tables are included. Non-verbal patients simply point to pictures to communicate their needs to care staff and family. Ideal for patients, nurses, therapists, emergency care and health care workers, caregivers and parents who care for adults and children who are not able to express their needs verbally. Symbols are 1" square. Sheet size: 8.5" x 11", printed on heavy card stock to be used by individual patients. Laminated for increased durability, wipe to reuse. Set includes 1 dry erase marker. Sold in sets of two on SayitwithSymbols.com. Contact us for quantity pricing.

Language and Learning: A Framework for Inclusive Design

It can be used on any touchscreen device to gain more control and precision with every click! The Limitless Stylus is extremely light weight

and durable which makes it easy to use on a daily basis without even thinking about it. After using the Limitless Stylus you will be unable to live without it. Stylus, two straps and extra tips included.

LingoPen
Scanning Pens
Price: $285
Product Type: learning aid, elementary, secondary, adult
Disability: learning
Lingo Pen is used primarily for EL/ ESL as it reads in English (as well as other languages) you can translate a word you don't know in the other language while hearing it pronounced in English. It's perfect for anyone working or studying in a language that is not their own to improve language acquisition . Multiple languages and dictionaries . The voice recorder is great for recording instructions or fluency progress checks. The scan to cursor feature allows users to scan from worksheets/textbooks directly to Google/Word Docs for simplified note taking or study guides. Saves money and time by reducing students' reliance on a human reader. Exam lock for exam integrity . Having it listed as, "text to speech " in the students IEP or 504 plan is helpful. Does NOT require WiFi. Stand alone does not require another device.

LM100 - Limited Mobility
Be Adaptive Equipment, Inc.
Price: $609
Product Type: adapted play/manipulative, elementary, secondary, adult
Disability: physical
Be Adaptive Equipment Model LM100 is a limited mobility unit designed for use by people with limited use or paraplegics that cannot hold a gun up. Designed for individuals with limited hand and arm movement and strength. The unique design of the equipment makes the weapon seem almost weightless to the person using it and allows them to have a full range of motion, up, down, and side to side. The simplicity of the LM100 allows it to hold all pistols, crossbows, rifles, and shotguns. The LM100 does not include a power trigger mechanism. If you lack hand movement and need assistance with this, you can purchase our TM100 (power trigger mechanism) and use it with this piece of equipment.

ReaderPen
Scanning Pens
Price: $285
Product Type: learning aid, elementary, secondary, adult
Disability: cognitive, learning, speech, vision
ReaderPen is a portable literacy tool helping students develop their independent reading skills while promoting inclusion in their classroom or distance learning. Simply scan words or sentences and hear them read discreetly via earbuds. The goal is to nurture the reading skills of a student until they no longer feel like they need the support. Built in dictionaries expand vocabulary. The voice recorder is great for recording instructions or fluency progress checks. The scan to cursor feature allows users to scan from worksheets/textbooks directly to Google/Word Docs for simplified note taking or study guides. Saves money and time by reducing students' reliance on a human reader. Reader Pen is mainly used as a 1:1 reading accommodation for a student, you can also Exam Lock it out for day to day tests which removes all features except reading. Having it listed as "text to speech" in the students IEP is helpful for exam approval. Does NOT require WiFi. Stand alone does not require another device.

ReaderPen Secure
Scanning Pens
Price: $285
Product Type: learning aid, elementary, secondary, adult
Disability: cognitive, learning, speech, vision
ReaderPen Secure is a portable text to speech device to support people with reading difficulties (like Dyslexia) in the workplace empowering them to be more productive with less stigma. Simply scan print base words or sentences and hear them read discreetly via earbuds. This multi-sensory reading aid will enable you

to be a more inclusive employer, without the worry of any data breach. There is NO storage capabilities on this device. Built in dictionaries will show definitions to scanned words instantly. The scan to cursor feature allows users to scan from paperwork directly to computer to digitize materials quickly and easily. Does NOT require WiFi. Stand alone does not require another device.

The stories and extended activities encourage collaboration, divergent thinking, and responsible decision-making while encouraging artistic expression.

SmartKnitKIDS Seamless Sensory Garments

Knit-Rite, Inc.
Price: $7.95 - $19.99
Product Type: sensory stimulation, infant/toddler, preschool, elementary, secondary, adult
Disability: physical

Bumps, seams, ouchies, burglers, or nuggies. By whatever name they're called, seams and lumps and bumps can be a nuisance. SmartKnitKIDS Seamless Products have taken the woes out of clothes and help to keep the morning routine in check. In 2003, SmartKnitKIDS, a brand of Knit-Rite, Inc., started receiving requests from parents for a completely seamless sock. It seemed that all the seamless socks available had a flat or handlinked seam across the toes. To a sensitive child, this was still a bother; there was still a toe seam. With over 90 years of medical textile expertise,

Knit-Rite used parent feedback to create a patented 100% seamless sock with added comfort features for sensitive feet. Children are not the only ones with sensitive feet and toes. Often sensitive kiddos turn into sensitive adults. SmartKnitKIDS expanded their line to include seamless socks for adults, appropriately named SmartKnit Big KIDS Socks. In 2010, SmartKnitKIDS launched patent pending Seamless Undies. The first of its kind, their seamless undies are seam free, elastic free, and gently hug little bottoms! The evolution continued with the launch of the Seamless Compresso-T and Bralette in 2011. The Compresso-T is a form-fitting undershirt that protects skin from annoying clothing seams and provides a soothing hug.

Social Skills at School: Elementary

Attainment Company, Inc.
Price: $199
Product Type: adapted play/manipulative, instructional material, learning aid, elementary
Disability: cognitive, learning, physical, speech

The updatedSocial Skills at School: Elementary is a perfect social skills program for elementary students with autism, intellectual, or behavioral disabilities. Time Timer PLUS® 120 Minute
Time Timer LLC
Price: $40.95
Product Type: adapted play/manipulative, learning aid, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, vision
The Time Timer PLUS 120 Minute offers a greater visual impact for longer duration needs. Time management is not a one-size-fits-all undertaking. Sometimes one hour is just not enough time. The Time Timer PLUS 120 Minute is ideal for independent learning stations at home, time blocking for large projects, nap times, and long-duration activities. Volume control dial for those times you need a louder tone and those when you prefer silence. Easy-to-read numbers Lightweight anti-static disk No loud ticking

Time Timer PLUS® 20 Minute
Time Timer LLC
Price: $40.95
Product Type: adapted play/manipulative, learning aid, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, vision
The Time Timer PLUS 20 Minute makes it easy to visualize how quickly 20 minutes will pass, especially beneficial for shorter task durations. Use the Time Timer PLUS 20 Minute to help ease transitions between activities and reduce anxiety. Also great for Pomodoro techniques for ADHD. The Time Timer PLUS family offers visual timers in 5-minute, 20-minute, 60-minute and 120-minute durations. Volume control dial for those who need a louder tone and those that prefer silence. Easy-to-read numbers Lightweight anti-static disk No loud ticking

Time Timer PLUS® 5 Minute
Time Timer LLC

Price: $40.95
Product Type: adapted play/manipulative, learning aid, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, vision
The Time Timer PLUS 5 Minute offers greater visual impact for shorter duration activities such as brushing teeth, breathing exercises, transitioning to new activities, and managing daily schedules. For those with severe cognitive or physical disabilities, being able to see how much longer can create better success for task completion and focus. The Time Timer PLUS family offers visual timers in 5-minute, 20-minute, 60-minute and 120-minute durations. Volume control dial for those who need a louder tone and those that prefer silence. Easy-to-read numbers Lightweight anti-static disk No loud ticking

Time Timer PLUS® 60 Minute
Time Timer LLC
Price: $40.95
Product Type: adapted play/manipulative, learning aid, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, vision
The Time Timer PLUS 60 Minute features a rugged case and durable clear lens to protect its patented red disk. The on-the-go handle helps encourage independent living and working in all ages and abilities. The Time Timer PLUS 60 Minute shows visually how much times has elapsed and eases anxiety between transitions. The Time Timer PLUS family offers visual timers in 5-minute, 20-minute, 60-minute and 120-minute durations. Volume control dial for those who need a louder tone and those that prefer silence. Easy-to-read numbers Lightweight anti-static disk No loud ticking

The 90-minute TWIST is an easy-to-use time management tool. To use, simply turn the outer ring until you get to your desired time, then push the play button. A digital display shows at a glance how much time remains. A magnetic back makes the TWIST a snap to display. Twist the colorful, outer ring to quickly set the time required Play / Pause button for quick starts and easy pause functionality Digital tick marks appear when timer is actively running Duration of timer appears in the center Quiet operation, no loud ticking Digital alert sounds at the end of the timer (Alert is not optional on this model) Available in

Original Red, Lake Day Blue, Dreamsicle Orange, and Pale Shale

Time Timer WASH + Soap Dispenser

Time Timer LLC
Price: $72.95
Product Type: learning aid, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, physical, vision

he Time Timer WASH + Soap Dispenser is a touchless, automatic soap dispenser integrated with a visual timer to ensure hands are being washed long enough to fulfill the CDC recommendation. The visual aspect of this timer helps all ages and abilities understand the duration and process of washing hands.The timer can be initiated without touching by simply holding hand under spout. Soap (not included) automatically dispenses and the timer will begin the countdown. As the disk disappears, time elapses, encouraging scrubbing through the duration. The timing of the countdown allows for users to first wet their hands, then wash for the approved 20-seconds, then rinse. Music and sounds can be used to reinforce the steps or it can be used silently for sound sensitive environments. USB Rechargeable.

Time Timer® MAX

Time Timer LLC
Price: $119.95
Product Type: adapted play/manipulative, learning aid, infant/toddler, preschool, elementary, secondary, adult
Disability: cognitive, hearing, learning, vision

The Time Timer MAX is 17 inches by 17 inches so it can be seen in larger spaces such as gymnasiums, cafeterias and auditoriums. The big red disk makes it easy to see for anyone with low vision. It's also eight timers in one - with customizable durations and changeable timer faces, the MAX can countdown as low as 5 minutes, or as high as 24 hours. Ease transitions between activities no matter how long the activity is. Included with the MAX are 3 two-sided timer faces - 5/15 minutes, 30/60 minutes, 120 minutes/Dry Erase Board timer face allowing for maximum flexibility and customization Divide the time with colored set time dividers that are conveniently stored on the back of the timer Free-standing or wall-mounted options, whiteboard or map rail. 1 bracket mount is included.

TM100 - Trigger Mechanism

Be Adaptive Equipment, Inc.
Price: $334
Product Type: adapted play/manipulative, preschool, elementary, secondary, adult
Disability:

Be Adaptive Equipment Model TM100 is a vacuum actuated trigger system that attaches to your trigger guard. Is simple to install on any weapon with a standard trigger guard. The unique design of the mechanism allows it to fire most weapons if placed anywhere inside of the trigger guard. The simplicity of the set up allows the trigger mechanism to be moved from one weapon to another easily and quickly. The TM100 fires the weapon by a very slight suction on the blue tube in the picture which is attached to the control box. The control box is attached to the stock of the weapon with a Velcro cinch strap. The mechanism operates on 12 volt DC power and comes with a pigtail that can be attached to one of the batteries in your power chair or attached to an auxiliary battery.

Toe Straps

Bodypoint Inc.
Price: $26
Product Type: seating/positioning/mobility, preschool, elementary, secondary, adult
Disability: physical

Add our durable, hook-and-loop toe straps to slotted wheelchair footplates to limit aggressive foot rotation and dorsiflexion. Length is fully adjustable and can be

trimmed shorter as needed. For enhanced foot positioning needs, consider our Ankle Huggers Support Straps instead. Use them alone or in conjunction with toe straps.

Tower Volcano Lamp
Adaptive Tech Solutions
Price: $48.24
Product Type: adapted play/manipulative, sensory stimulation, preschool, elementary, secondary, adult
Disability: physical
Our switch adapted Volcano Lamp has been adapted to accept a standard switch (sold separately) or it can be used without a switch. When you press your switch, the colored 'lava' balls flow from the volcano up into the water and back down again. Measures approximately 8" x 3" x 3" and requires 3 AA batteries (not included).

Traceable Name Stamps for Students | AT
Say it with Symbols AAC
Price: $20.95 - $26.95
Product Type: adapted play/manipulative, instructional material, learning aid, preschool, elementary

Vidatak EZ Picture Medical Communication Board | AAC
Say it with Symbols AAC
Price: $19.95
Product Type: instructional material, secondary, adult
Disability: cognitive, hearing, learning, speech

This research-based picture communication board helps non-verbal children and adults communicate their healthcare needs and improves their care. Ideal for patients with aphasia, intellectually disabilities, intubated or do not speak English. The Vidatak EZ Medical Picture Communication board is lightweight and durable. The patient simply points to the appropriate symbol (with words in English) or uses the non-toxic marker included to mark it. Each board is printed on large 17" x 11" dry erase board with pictures on both sides. Comes individually shrink-wrapped with a dry-erase marker. Symbols are large, 1.5" square. Available in pictures, symbols, English words and spiritual symbols. Available from SayitwithSymbols.com. Other languages also available by special order.

Wiggle Seat Discs
Therapy Shoppe® Incorporated
Price: $24.99 - $26.99
Product Type: adapted play/manipulative, learning aid, seating/positioning/mobility, sensory stimulation, preschool, elementary, secondary, adult
Disability: learning
Air cushion wiggle seats for kids, teens, and students! You'll love our new 10-3/4" early elementary size sensory seat disc, or a 13" size that's especially nice for older elementary age and/or middle school students. These high quality focus seats are excellent for providing vestibular movement input in the classroom or in community settings. Each disc features 100's of delightfully tactile, "spikes " on one side, and shorter raised sensory bumpies

on the other side; they're like having 2 different cushions in one great combo seat! Kids love the subtle wiggly movement these allow - perfect for enhancing focus and attention for kids who need movement input without having to get out of their seats! Each comes with its own hand air pump.

Wiggle Wobble Chair Bouncers
Therapy Shoppe® Incorporated
Price: $21.99
Product Type: seating/positioning/mobility, sensory stimulation, preschool, elementary, secondary, adult
Disability: learning, physical
Wiggle Wobble Chair Bouncers are a set of 4 rubbery, "feet " that transform standard school chairs into bouncy, "rocking " chairs! Students can subtley rock, roll, and bounce in all directions with these innovative focus tools. Perfect for kids who tip back on the legs of their chair, movement seekers, wigglers, and others who need vestibular input to concentrate better and be able to stay in their seat. These foot fidget helpers provide just the right touch of sensory input to help kids-adults of all ages reach their optimal level of arousal. Durable and effective. Designed for use on tile, wood, or carpeted floors. No tools are required. Kids love rocking and bouncing back, forth, up, down, and all around as the continuous movement helps regulate their brains and relax their bodies!

Wireless Attendant Call Button Vibrating Alert AC
Adaptive Tech Solutions
Price: $56.41 - $76.41
Product Type: adapted play/manipulative, telecommunications, elementary, secondary, adult
Disability: hearing, physical, speech
Our wireless attendant call button system can be used as-is or with a 1/8" (3.5mm) switch plugged into the transmitter.
